

Rigetti Computing to Report First Quarter 2026 Financial Results and Host Conference Call on May 11, 2026

April 27, 2026

BERKELEY, Calif., April 27, 2026 (GLOBE NEWSWIRE) -- Rigetti Computing, Inc. ("Rigetti" or the "Company") (Nasdaq: RGTI), a pioneer in hybrid quantum-classical computing, announced today that it will release first quarter 2026 results on Monday, May 11, 2026, after market close. The Company will host a conference call to discuss its financial results and provide an update on its business operations at 5:00 pm ET the same day.

Key details regarding the call are as follows:

Call Date: Monday, May 11, 2026

Call Time: 5:00 pm ET / 2:00 pm PT

Webcast Link: <https://edge.media-server.com/mmc/p/9vx4c96d>

Live Call Participant Link: <https://register-conf.media-server.com/register/Bldbc06bbc0efb4b84b0681bceed95f22a>

Webcast Instructions

You can listen to a live audio webcast of the conference call by visiting the "Webcast Link" above or the "Events & Presentations" section of the Company's Investor Relations website at <https://investors.rigetti.com/>. A replay of the conference call will be available at the same locations following the conclusion of the call for one year.

Live Call Participant Instructions

To participate in the live call, you must register using the "Live Call Participant Link" above. Once registered, you will receive dial-in numbers and a unique PIN number. When you dial in, you will input your PIN and be routed into the call. If you register and forget your PIN, or lose the registration confirmation email, simply re-register to receive a new PIN.

About Rigetti

Rigetti is a pioneer in full-stack quantum computing. Rigetti quantum computers are based on superconducting qubits, which are widely believed to be the leading qubit modality given their maturity, clear path to scaling, and fast gate speeds. Current Rigetti quantum computing systems achieve gate speeds of 50-70 nanoseconds, which is about 1,000 times faster than alternative modalities such as trapped-ion and neutral-atom systems.

Rigetti sells on-premises 9-qubit to 108-qubit quantum computing systems, supporting national laboratories and quantum computing centers. Rigetti's Cepheus 36-qubit to 108-qubit systems are based on the Company's proprietary chiplet-based technology and include the Company's control electronics. Rigetti's 9-qubit Novera QPU supports a broader R&D community with a high-performance, on-premises QPU designed to plug into a customer's existing cryogenic and control systems.

The Company operates quantum computers over the cloud through its Rigetti Quantum Cloud Services (QCS) platform, enabling global enterprise, government, and research clients to pursue R&D. The Company's proprietary quantum-classical infrastructure provides high-performance integration with public and private clouds for practical quantum computing.

Rigetti developed the industry's first multi-chip quantum processor for scalable quantum computing systems. Leveraging this proprietary technology, Rigetti deployed the industry's largest multi-chip quantum computer in 2026 with Cepheus-1-108Q, based on twelve 9-qubit chiplets tiled together. The Company designs and manufactures its chips in-house at Fab-1, the industry's first dedicated and integrated quantum device manufacturing facility. Learn more at <https://www.rigetti.com/>
