

Rigetti Computing Reports Second Quarter 2024 Financial Results

August 8, 2024

BERKELEY, Calif., Aug. 08, 2024 (GLOBE NEWSWIRE) -- Rigetti Computing, Inc. (Nasdaq: RGTI) ("Rigetti" or the "Company"), a pioneer in full-stack quantum-classical computing, today announced its financial results for the second quarter ended June 30, 2024.

Second Quarter 2024 Financial Highlights

- Total revenues for the three months ended June 30, 2024 were \$3.1 million
- Total operating expenses for the three months ended June 30, 2024 were \$18.1 million
- Operating loss for the three months ended June 30, 2024 was \$16.1 million
- Net loss for the three months ended June 30, 2024 was \$12.4 million
- For the period from April 1 July 12, 2024 raised \$27.8 million from the sale of 24.1 million common shares under our current ATM program, including \$15.8 million raised in the three months ended June 30, 2024
- As of June 30, 2024 cash, cash equivalents and available-for-sale securities totaled \$100.5 million

Technology Updates

Roadmap and QPU Performance

Rigetti remains on track to develop and deploy its anticipated 84-qubit Ankaa™-3 system with the goal of achieving a 99+% median 2-qubit gate fidelity by the end of 2024.

"We are seeing very promising results both with fidelity and speed on our current systems which leverage the underpinning technology of our upcoming Ankaa-3 system. Our 24-qubit system is performing in the 99% range for 2-qubit fidelity. Our gate speeds are 60-80ns, making our systems twice as fast as other superconducting quantum computing players, and 3-4 orders of magnitude faster than trapped ion and pure atom quantum computing systems. We are confident that we can translate this level of performance to our 84-qubit chip," says Dr. Subodh Kulkarni, Rigetti CEO.

Continued Leadership in OPU Scaling Technology

Published Research on Modular Chip Architecture: Rigetti continues to demonstrate leadership in developing high performing, scalable quantum processors. In May 2024, Rigetti's research introducing multichip tunable couplers, floating tunable couplers that can be used to entangle qubits on separate chips, was published in the peer-reviewed scientific journal, *Physical Review Applied*. Rigetti introduced the world's first modular chip architecture in 2021, unlocking the ability to connect multiple identical chips into a large-scale quantum processor. This modular approach exponentially reduces manufacturing complexity and allows for accelerated, predictable scaling.

This architecture will allow for future Ankaa systems to be tiled together to create larger qubit count processors without sacrificing gate performance.

DARPA Benchmarking Phase 2 Research: Furthering the Company's work to improve the industry's understanding of the requirements needed for fault-tolerant quantum computers, in June 2024 Rigetti released preliminary research on the resource estimation framework the company developed in Phase 1 of the DARPA Benchmarking Program. Rigetti's manuscript presents the resource estimation framework and a software tool that estimates the physical resources required to execute specific quantum algorithms, compiled into their graph-state form, and laid out onto a modular superconducting hardware architecture. Rigetti will continue to work to optimize quantum algorithms for a variety of applications and improve the utility estimates to understand the value proposition of future quantum computers.

Quantum Optimization Algorithm Development

The limited number of qubits available on current quantum computers is a challenge that must be overcome to deliver utility in quantum combinatorial optimization. In July 2024, Rigetti introduced a method to solve large combinatorial problems using a small number of qubits. This method introduces a qubit-efficient combinatorial solver, which stores classical variables in an entangled wave function of fewer qubits. Rigetti's manuscript demonstrates this method on Rigetti's Ankaa-9Q-3 system.

Conference Call and Webcast

Rigetti will host a conference call later today, August 8, 2024, at 4:30 p.m. ET, or 1:30 p.m. PT, to discuss its second quarter 2024 financial results.

You can listen to a live audio webcast of the conference call at https://edge.media-server.com/mmc/p/p9p5pvoq or the "Events & Presentations" section of the Company's Investor Relations website at https://investors.rigetti.com/. A replay of the conference call will be available at the same locations following the conclusion of the call for one year.

To participate in the live call, please dial in toll free at 1-888-596-4144. When your line is picked up, please type in Conference ID 6114948 and press #.

About Rigetti

Rigetti is a pioneer in full-stack quantum computing. The Company has operated quantum computers over the cloud since 2017 and serves global enterprise, government, and research clients through its Rigetti Quantum Cloud Services platform. The Company's proprietary quantum-classical infrastructure provides high performance integration with public and private clouds for practical quantum computing. Rigetti has developed the industry's first multi-chip quantum processor for scalable quantum computing systems. The Company designs and manufactures its chips in-house at Fab-1, the industry's first dedicated and integrated quantum device manufacturing facility. Learn more at www.rigetti.com.

Cautionary Language Concerning Forward-Looking Statements

Certain statements in this communication may be considered "forward-looking statements" within the meaning of the federal securities laws, including statements with respect to the Company's expectations with respect to the success and performance, including anticipated future performance improvements of the Ankaa-2 system, including the 9-qubit Ankaa system, its ability to improve 2-qubit gate fidelity performance on future systems, expectations related to the Company's ability to achieve milestones including developing the Ankaa-3 84-qubit system and the 336-qubit Lyra system on the anticipated timing or at all; future sales or leases of the Novera QPU, customer adoption of the Ankaa-2 and Ankaa-3 systems and Novera QPU, the success of, benefits of and future sales related to the Novera QPU Partner Program; expecations with respect to scaling to create larger qubit systems without sacrificing gate performance using the Company's modular chip architecture; expectations regarding optimization of quantum algorithms based on the DARPA benchmarking program; expectations with respect to combinatorial optimization for algorithm development; expectations with respect to a vibrant on-premises quantum computing market and the needs and benefits thereof; expectations with respect to a quantum-ready society; expectations with respect to the Company's partners and customers and the quantum computing plans and activities thereof; the Company's expectations with respect to its unique position to tackle the challenges of building a quantum computer capable of addressing real-world problems and practical quantum computing; the Company's expectations with respect to the timing of next generation systems; the Company's expectations with respect to the anticipated stages of quantum technology maturation, including its ability to develop a quantum computer that is able to solve a practical, operationally relevant problem significantly better, faster, or cheaper than a current classical solution and achieve quantum advantage on the anticipated timing or at all. These forward-looking statements are based upon estimates and assumptions that, while considered reasonable by the Company and its management, are inherently uncertain. Factors that may cause actual results to differ materially from current expectations include, but are not limited to: the Company's ability to achieve milestones, technological advancements, including with respect to its technology roadmap, help unlock quantum computing, and develop practical applications; the ability of the Company to obtain government contracts successfully and in a timely manner and the availability of government funding; the potential of quantum computing; the ability of the Company to expand its QPU sales and the Novera QPU Partnership Program; the success of the Company's partnerships and collaborations; the Company's ability to accelerate its development of multiple generations of quantum processors; the outcome of any legal proceedings that may be instituted against the Company or others; the ability to maintain relationships with customers and suppliers and attract and retain management and key employees; costs related to operating as a public company; changes in applicable laws or regulations; the possibility that the Company may be adversely affected by other economic, business, or competitive factors; the Company's estimates of expenses and profitability; the evolution of the markets in which the Company competes; the ability of the Company to implement its strategic initiatives, expansion plans and continue to innovate its existing services; the expected use of proceeds from the Company's past and future financings or other capital; the sufficiency of the Company's cash resources; unfavorable conditions in the Company's industry, the global economy or global supply chain, including financial and credit market fluctuations and uncertainty, rising inflation and interest rates, disruptions in banking systems, increased costs, international trade relations, political turmoil, natural catastrophes, warfare (such as the ongoing military conflict between Russia and Ukraine and related sanctions and the state of war between Israel and Hamas and related threat of a larger conflict), and terrorist attacks; and other risks and uncertainties set forth in the section entitled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in the Company's Annual Report on Form 10-K for the year ended December 31, 2023 and Quarterly Report on Form 10-Q for the guarter ended June 30, 2024, and other documents filed by the Company from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and the Company assumes no obligation and does not intend to update or revise these forward-looking statements other than as required by applicable law. The Company does not give any assurance that it will achieve its expectations.
