**Rigetti Computing CEO Chad Rigetti Discusses
Quantum Computing, Becoming a Public Company on *Know Who Drives Return* Podcast**

BERKELEY, Calif. — Nov. 30, 2021 — Chad Rigetti, founder and CEO of Rigetti Computing (“Rigetti Computing”), a pioneer in full-stack quantum computing, was a guest today on the podcast *Know Who Drives Return*. The podcast is produced by Boardroom Alpha.

Rigetti Computing is on a mission to build the world’s most powerful computers to help solve humanity’s most important and pressing problems. The company has developed the first-of-its-kind scalable approach to building quantum processors. Its patented multi-chip architecture is the building block for new generations of quantum processors that are expected to achieve a clear advantage over classical computers.

Rigetti Computing announced in October it has entered into a definitive merger agreement with Supernova Partners Acquisition Company II, Ltd. (“Supernova II”) (NYSE:SNII), a publicly traded special purpose acquisition company. When the transaction closes, the publicly traded company will be named Rigetti Computing, Inc. and its common stock is expected to be listed on the NYSE under the ticker “**RGTI**.”

During the podcast, Chad Rigetti and host David Drapkin discussed the enormous market potential of quantum computing and the critical inflection points that will unlock broad commercial value over the next five years. Chad Rigetti also explained the technical advantages of its superconducting processors over other quantum computing technologies, and how he believes the proceeds from the transaction could accelerate the development of multiple new generations of the company’s quantum computers.
