From time to time after this registration statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input checked="" type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this preliminary prospectus is not complete and may be changed. These securities may not be sold until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities nor does it seek an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion, Dated April 5, 2023

PRELIMINARY PROSPECTUS

23,648,889 SHARES OF COMMON STOCK

This prospectus relates to the offer and resale of up to 23,648,889 shares of our common stock, \$0.0001 per share (the “common stock”), by B. Riley Principal Capital II, LLC (“B. Riley” or the “selling stockholder”). The shares included in this prospectus consist of shares of common stock that we have issued or that we may, in our discretion, elect to issue and sell to B. Riley, from time to time after the date of this prospectus, pursuant to a Common Stock Purchase Agreement we entered into with B. Riley on August 11, 2022 (the “Purchase Agreement”), in which B. Riley has committed to purchase from us, at our direction, up to \$75,000,000 of our common stock, subject to terms and conditions specified in the Purchase Agreement. Concurrently with our execution of the Purchase Agreement on August 11, 2022, we issued 171,008 shares of common stock to B. Riley as consideration for its irrevocable commitment to purchase shares of our common stock at our election in our sole discretion, from time to time after the date of this prospectus, upon the terms and subject to the satisfaction of the conditions set forth in the Purchase Agreement. See the section titled “Committed Equity Financing” for a description of the Purchase Agreement and the section titled “Selling Stockholder” for additional information regarding the selling stockholder.

We are not selling any shares of common stock being offered by this prospectus and will not receive any of the proceeds from the sale of such shares by B. Riley. However, we may receive up to \$75,000,000 in aggregate gross proceeds from sales of our common stock to B. Riley that we may, in our discretion, elect to make, from time to time after the date of this prospectus, pursuant to the Purchase Agreement.

B. Riley may sell or otherwise dispose of the shares of common stock included in this prospectus in a number of different ways and at varying prices. See the section titled “Plan of Distribution (Conflict of Interest)” for more information about how B. Riley may sell or otherwise dispose of the common stock being offered in this prospectus. B. Riley is an “underwriter” within the meaning of Section 2(a)(11) of the Securities Act of 1933, as amended.

The common stock is listed on The Nasdaq Capital Market (“Nasdaq”) under the symbol “RGTI.” On April 4, 2023, the last reported sales price of the common stock as reported on Nasdaq was \$0.6679 per share.

We are an “emerging growth company” as defined under U.S. federal securities laws and, as such, have elected to comply with reduced public company reporting requirements. This prospectus complies with the requirements that apply to an issuer that is an emerging growth company.

Investing in our securities involves a high degree of risks. You should review carefully the risks and uncertainties described in the section titled “[Risk Factors](#)” beginning on page 21 of this prospectus, and under similar headings in any amendments or supplements to this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is _____, 2023.

You should rely only on the information contained in this prospectus. No one has been authorized to provide you with information that is different from that contained in this prospectus. This prospectus is dated as of the date set forth on the cover hereof. You should not assume that the information contained in this prospectus is accurate as of any date other than that date.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement on Form S-1 that we filed with the Securities and Exchange Commission (the “SEC”) using the “shelf” registration process. Under this shelf registration process, B. Riley may, from time to time, sell the securities described in this prospectus. We will not receive any proceeds from the sale by B. Riley of the securities described in this prospectus.

Neither we nor B. Riley have authorized anyone to provide you with any information or to make any representations other than those contained in this prospectus or any applicable prospectus supplement or any free writing prospectuses prepared by or on behalf of us or to which we have referred you. Neither we nor B. Riley take responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. Neither we nor B. Riley will make an offer to sell these securities in any jurisdiction where the offer or sale is not permitted.

We may also provide a prospectus supplement or post-effective amendment to the registration statement to add information to, or update or change information contained in, this prospectus. You should read both this prospectus and any applicable prospectus supplement or post-effective amendment to the registration statement together with the additional information to which we refer you in the section titled “Where You Can Find More Information.”

On March 2, 2022 (the “Closing Date”), we consummated the transactions contemplated by that certain Agreement and Plan of Merger dated as of October 6, 2021, as amended on December 23, 2021 and January 10, 2022 (as amended, the “Merger Agreement”), by and among Supernova Partners Acquisition Company II, Ltd., a Cayman Islands exempted company (“Supernova”), Supernova Merger Sub, Inc., a Delaware corporation and a direct wholly owned subsidiary of Supernova (“First Merger Sub”), Supernova Romeo Merger Sub, LLC, a Delaware limited liability company and a direct wholly owned subsidiary of Supernova (“Second Merger Sub”), and Rigetti Holdings, Inc., a Delaware corporation (“Legacy Rigetti”). As contemplated by the Merger Agreement, on March 1, 2022, Supernova was domesticated as a Delaware corporation and changed its name to “Rigetti Computing, Inc.” (the “Domestication”). On the Closing Date, (i) First Merger Sub merged with and into Legacy Rigetti, the separate corporate existence of First Merger Sub ceased and Legacy Rigetti survived as a wholly owned subsidiary of Rigetti Computing, Inc. (the “Surviving Corporation” and, such merger, the “First Merger”) and (ii) immediately following the First Merger, the Surviving Corporation merged with and into the Second Merger Sub, the separate corporate existence of the Surviving Corporation ceased and Second Merger Sub survived as a wholly owned subsidiary of Rigetti Computing, Inc. and changed its name to “Rigetti Intermediate LLC” (such merger transaction, the “Second Merger” and, together with the First Merger, the “Merger,” and, collectively with the Domestication, the PIPE Financing (as defined below) and the other transactions contemplated by the Merger Agreement, the “Business Combination”). The closing of the Business Combination is herein referred to as “the Closing.”

Unless the context indicates otherwise, references in this prospectus to the “Company,” “Rigetti,” “Rigetti Computing,” “we,” “us,” “our” and similar terms refer to Rigetti Computing, Inc. (f/k/a Supernova Partners Acquisition Company II, Ltd.) and its consolidated subsidiaries. References to “Supernova” refer to our predecessor company prior to the consummation of the Business Combination (the “Closing,” and the date of the consummation of the Business Combination, the “Closing Date”). References to “Legacy Rigetti” refer to Rigetti Holdings, Inc. prior to the Closing.

This prospectus contains summaries of certain provisions contained in some of the documents described herein, but reference is made to the actual documents for complete information. All of the summaries are qualified in their entirety by the actual documents. Copies of some of the documents referred to herein have been filed, will be filed or will be incorporated by reference as exhibits to the registration statement of which this prospectus is a part, and you may obtain copies of those documents as described below under “Where You Can Find More Information.”

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of Section 27A of the Securities Act, and Section 21E of the Exchange Act. This includes, without limitation, statements regarding the financial position, business strategy and the plans and objectives of management for future operations. These statements constitute projections, forecasts and forward-looking statements, and are not guarantees of performance. We have based these forward-looking statements on our current expectations and projections about future events. Any statements that refer to projections, forecasts or other characterizations of future events or circumstances are forward-looking statements. In some cases, you can identify forward-looking statements by terminology such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intends,” “may,” “might,” “plan,” “possible,” “potential,” “predict,” “project,” “should,” “could,” “will,” “would” or the negative of such terms or other similar expressions.

These forward-looking statements are subject to known and unknown risks, uncertainties and assumptions about us that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Except as otherwise required by applicable law, we disclaim any duty to update any forward-looking statements, all of which are expressly qualified by the statements in this section, to reflect events or circumstances after the date of this prospectus. We caution you that these forward-looking statements are subject to numerous risks and uncertainties, most of which are difficult to predict and many of which are beyond our control.

Forward-looking statements in this prospectus may include, for example, statements about:

- the sufficiency of our cash resources, our expectation that we will need to raise additional capital by late 2024 or early 2025 and our ability to raise additional capital when needed;
- our ability to achieve milestones, technological advancements, including with respect to executing on our technology roadmap and developing practical applications;
- the potential of quantum computing and estimated market size and market growth including with respect to our long-term business strategy for quantum computing as a service (“Quantum Computing as a Service,” or “QCaaS”);
- the success of our partnerships and collaborations;
- our ability to accelerate our development of multiple generations of quantum processors;
- customer concentration and the risk that a significant portion of our revenue currently depends on contracts with the public sector;
- the outcome of any legal proceedings that may be instituted against us or others with respect to the Business Combination or other matters;
- our ability to execute on our business strategy, including monetization of our products;
- our financial performance, growth rate and market opportunity;
- our ability to cure the current deficiency with respect to, and to regain compliance with and maintain, the listing of our common stock and public warrants on, the Nasdaq Capital Market, and the potential liquidity and trading of such securities;
- the ability to recognize the anticipated benefits of the Business Combination, which may be affected by, among other things, competition, our ability to grow and manage growth profitably, maintain relationships with customers and suppliers and retain our management and key employees;
- costs related to operating as a public company;

Table of Contents

- our ability to remediate the material weaknesses in, and establish and maintain, effective internal controls over financial reporting;
- changes in applicable laws or regulations;
- the possibility that we may be adversely affected by other economic, business, or competitive factors;
- the evolution of the markets in which we compete;
- our ability to implement our strategic initiatives, expansion plans and continue to innovate our existing services;
- unfavorable conditions in our industry, the global economy or global supply chain (including any supply chain impacts from the ongoing military conflict involving Russia and Ukraine and sanctions related thereto), including inflation and financial and credit market fluctuations;
- changes in applicable laws or regulations;
- our success in retaining or recruiting, or changes required in, our officers, key employees or directors;
- our estimates regarding expenses, profitability, future revenue, capital requirements and needs for additional financing;
- our ability or decisions to expand or maintain our existing customer base; and
- the continuing effects of the COVID-19 pandemic and macroeconomic conditions, including worsening global economic conditions, disruptions to and volatility and uncertainty in the credit and financial markets, increases in inflation and interest rates, and recent and potential future disruptions in access to bank deposits or lending commitments due to bank failures, on the foregoing.

Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. Additional cautionary statements or discussions of risks and uncertainties that could affect our results or the achievement of the expectations described in forward-looking statements may also be contained in any accompanying prospectus supplement.

Should one or more of the risks or uncertainties described in this prospectus, or should underlying assumptions prove incorrect, actual results and plans could differ materially from those expressed in any forward-looking statements. Additional information concerning these and other factors that may impact the operations and projections discussed herein can be found in the section entitled “Risk Factors” and in our periodic filings with the SEC. Our SEC filings are available publicly on the SEC’s website at www.sec.gov.

You should read this prospectus and any accompanying prospectus supplement completely and with the understanding that our actual future results, levels of activity and performance as well as other events and circumstances may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

CERTAIN DEFINED TERMS

Unless the context otherwise requires, references in this prospectus to:

“**Ampere**” are to Ampere Computing LLC.

“**Ampere Warrant**” are to that certain warrant issued to Ampere pursuant to the Warrant Subscription Agreement.

“**BRS**” are to B. Riley Securities, Inc.

“**Beneficial Ownership Cap**” are to the limitation set out in the Purchase Agreement whereby we shall not issue or sell, and B. Riley shall not purchase or acquire, any shares of common stock which, when aggregated with all other shares of common stock then beneficially owned by B. Riley and its affiliates (as calculated pursuant to Section 13(d) of the Exchange Act and Rule 13d-3 promulgated thereunder), would result in the beneficial ownership by B. Riley of more than 4.99% of the outstanding shares of common stock.

“**Board**” are to the board of directors of Rigetti Computing, Inc. following the consummation of the Business Combination.

“**Business Combination**” are to the Domestication, the Merger and other transactions contemplated by the Merger Agreement, collectively, including the PIPE Financing.

“**Closing**” are to the closing of the Business Combination.

“**Closing Date**” are to March 2, 2022.

“**Commencement**” are to the initial satisfaction of the conditions to B. Riley’s purchase obligations set forth in the Purchase Agreement.

“**Commencement Date**” are to the date on which this registration statement has been declared effective by the SEC and all other conditions to B. Riley’s obligation to purchase common stock set forth in the Purchase Agreement have been initially satisfied.

“**Commitment Shares**” are to 171,008 duly authorized, validly issued, fully paid and non-assessable shares of common stock which, concurrently with the execution and delivery of the Purchase Agreement, we have caused our transfer agent to issue and deliver to B. Riley.

“**common stock**” or “**Common Stock**” are to the shares of common stock, par value \$0.0001 per share, of Rigetti Computing, Inc..

“**Domestication**” are to the transfer by way of continuation and deregistration of Supernova from the Cayman Islands and the continuation and domestication of Supernova as a corporation incorporated in the State of Delaware which was effectuated on March 1, 2022.

“**Exchange Act**” are to the Securities Exchange Act of 1934, as amended.

“**Exchange Cap**” are to the maximum number of shares we shall issue pursuant to the Purchase Agreement; such limitation includes that we shall not issue or sell any shares of common stock pursuant to the Purchase Agreement, and B. Riley shall not purchase or acquire any shares of common stock pursuant to the Purchase Agreement, to the extent that after giving effect thereto, the aggregate number of shares of common stock that would be issued pursuant to the Purchase Agreement and the transactions contemplated thereby would exceed 23,648,889 (such number of shares equal to approximately 19.99% of the shares of common stock issued and outstanding immediately prior to the execution of the Purchase Agreement), which number of shares shall be

[Table of Contents](#)

reduced, on a share-for-share basis, by the number of shares of common stock issued or issuable pursuant to any transaction or series of transactions that may be aggregated with the transactions contemplated by the Purchase Agreement under applicable Nasdaq rules. The Exchange Cap is not applicable if the average price per share paid by B. Riley for all of the shares of common stock that we direct B. Riley to purchase from us pursuant to the Purchase Agreement, if any, equals or exceeds \$4.45 per share (which price is calculated based on the lower of the official closing price of our common stock on Nasdaq on the trading day immediately preceding the date of the Purchase Agreement and the average official closing price of our common stock on Nasdaq for the five consecutive trading days ending on the trading day immediately preceding the date of the Purchase Agreement, as adjusted pursuant to applicable Nasdaq rules).

“**Exchange Ratio**” are to 0.786989052873439, as calculated pursuant to the Merger Agreement.

“**Excluded Transactions**” are to any of the following transactions, to the extent they occur during a VWAP Purchase Valuation Period or an Intraday VWAP Purchase Valuation Period, as applicable: (i) the opening or first purchase of our common stock at or following the open of trading on Nasdaq on the Purchase Date; (ii) the last or closing sale of common stock on Nasdaq on the Purchase Date; and (iii) all sales of our common stock on Nasdaq during the applicable VWAP Purchase Valuation Period or Intraday Purchase Valuation Period at a sale price less than the Minimum Price Threshold or the Intraday Minimum Price Threshold, as applicable.

“**GAAP**” are to generally accepted accounting principles in the United States, as applied on a consistent basis.

“**initial public offering**” or “**IPO**” are to Supernova’s initial public offering that was consummated on March 4, 2021.

“**Intraday Purchases**” are to, subject to the initial satisfaction of all of the conditions set forth in the Purchase Agreement on the Commencement Date and from time to time thereafter, our right, but not the obligation, to direct B. Riley, by our timely delivery to B. Riley of an Intraday Purchase Notice on the applicable Purchase Date therefor, to purchase a specified Intraday Purchase Share Amount, which shall not exceed the applicable Intraday Purchase Maximum Amount, at the applicable purchase price therefor.

“**Intraday Purchase Maximum Amount**” are to an Intraday Purchase limitation pursuant to which the Company may exercise its right to direct an Intraday Purchase in an amount not to exceed the lesser of: (i) 1,000,000 shares of common stock and (ii) 20% of the total aggregate volume of shares of our common stock traded on Nasdaq during the applicable “Intraday Purchase Valuation Period” for such Intraday Purchase, subject to certain adjustments, by the delivery to B. Riley of an Intraday Purchase Notice, so long as (i) the closing sale price of the common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price and (ii) all shares of common stock subject to all prior Purchases and all prior Intraday Purchases by B. Riley under the Purchase Agreement have been received by B. Riley prior to the time of delivery of such Intraday Purchase Notice. For purposes of calculating the Intraday Purchase Maximum Amount, Excluded Transactions during the applicable Intraday Purchase Valuation Period are excluded.

“**Intraday Minimum Price Threshold**” are to the applicable minimum price threshold specified by us in an Intraday Purchase Notice for an Intraday Purchase, or if we do not specify a minimum price threshold in such Intraday Purchase Notice, a price equal to 90% of the closing sale price of the common stock on the trading day immediately prior to the applicable Purchase Date for such Intraday Purchase.

“**Intraday Purchase Notice**” are to, with respect to an Intraday Purchase made pursuant to the Purchase Agreement, an irrevocable written purchase notice from us directing B. Riley to purchase a specified Intraday Purchase Share Amount and delivered and received (A) after the latest of (X) 10:00 a.m., New York City time, on such trading day, (Y) the ending time of the Purchases pursuant to a Purchase Notice or Intraday Purchases pursuant to an Intraday Purchase Notice, if any, occurring on the same trading day and (B) prior to the earlier of (X) 3:30 p.m., New York City time, on such trading day for such Intraday Purchase and (Y) such time that is

[Table of Contents](#)

exactly one hour immediately prior to the official close of the primary (or “regular”) trading session on Nasdaq if Nasdaq has theretofore publicly announced that the official close of the regular trading session shall be earlier than 4:00 p.m., New York City time, on such trading day for such Intraday Purchase, on such Purchase Date, at the applicable purchase price therefor.

“**Intraday Purchase Share Amount**” are to the total number of shares to be purchased by B. Riley in the relevant Intraday Purchase as specified in the applicable Intraday Purchase Notice.

“**Intraday Purchase Share Volume Maximum**” are to, with respect to an Intraday Purchase made pursuant to the Purchase Agreement, a number of shares of common stock equal to the quotient obtained by dividing (i) the Intraday Purchase Share Amount to be purchased by B. Riley in such Intraday Purchase by (ii) 0.20 (subject to certain adjustments). For purposes of calculating the Intraday Purchase Share Volume Maximum, Excluded Transactions during the applicable Intraday Purchase Valuation Period are excluded.

“**Legacy Rigetti**” are to Rigetti Holdings, Inc., a Delaware corporation, and its consolidated subsidiaries since the consummation of the Rigetti Holding Company Reorganization on October 5, 2021 and prior to the consummation of the Business Combination, and to Rigetti & Co, Inc. and its consolidated subsidiaries prior to the consummation of the Rigetti Holding Company Reorganization on October 5, 2021.

“**Legacy Rigetti Board**” are to the board of directors of Legacy Rigetti.

“**Legacy Rigetti common stock**” are to the common stock of Legacy Rigetti.

“**Legacy Rigetti Preferred Stock**” are to, collectively, the shares of preferred stock, par value \$0.000001 per share, of Legacy Rigetti, of which shares have been designated as Series C Preferred Stock and Series C-1 Preferred Stock.

“**Merger Agreement**” are to that certain Merger Agreement, dated October 6, 2021, by and among Supernova, Supernova Merger Sub, Inc., Supernova Romeo Merger Sub, LLC and Rigetti Holdings, Inc., and as amended on December 23, 2021 and further amended on January 10, 2022.

“**Minimum Price Threshold**” are to the applicable minimum price threshold specified by us in a Purchase Notice for a Purchase, or if we do not specify a minimum price threshold in such Purchase Notice, a price equal to 90% of the closing sale price of the common stock on the trading day immediately prior to the applicable Purchase Date for such Purchase.

“**Nasdaq**” are to The Nasdaq Capital Market.

“**PIPE Financing**” are to the transactions consummated in connection with Closing pursuant to the Subscription Agreements, in which the PIPE Investors collectively subscribed for an aggregate of 14,641,244 shares of common stock for an aggregate purchase price of \$147,510,000.

“**private placement warrants**” or “**Private Warrants**” are to the 4,450,000 private placement warrants that were issued to Supernova Sponsor as part of the closing of Supernova’s IPO, which are substantially identical to the public warrants sold as part of the units in Supernova’s IPO, subject to certain limited exceptions.

“**public warrants**” or “**Public Warrants**” are to the redeemable warrants (including those that underlie the Supernova units) that were offered and sold by Supernova in its IPO or the redeemable warrants of Rigetti issued as a matter of law upon the conversion thereof at the time of the Domestication, as context requires.

“**Purchases**” are to, subject to the initial satisfaction of all of the conditions set forth in the Purchase Agreement on the Commencement Date and from time to time thereafter, our right, but not the obligation, to direct B. Riley, by our timely delivery to B. Riley of a Purchase Notice on the applicable Purchase Date therefor, to purchase a specified Purchase Share Amount, which shall not exceed the applicable Purchase Maximum Amount, at the applicable purchase price therefor.

[Table of Contents](#)

“**Purchase Agreement**” are to that certain Common Stock Purchase Agreement, dated as of August 11, 2022, by and between us and B. Riley.

“**Purchase Date**” are to (i) with respect to a Purchase, the trading day on which B. Riley timely receives, (A) after 6:00 a.m., New York City time, and (B) prior to 9:00 a.m., New York City time, on such trading day, a valid Purchase Notice for such Purchase in accordance with the Purchase Agreement, and (ii) with respect to an Intraday Purchase made pursuant the Purchase Agreement, the trading day on which B. Riley timely receives a valid Intraday Purchase Notice for such Intraday Purchase in accordance the Purchase Agreement, (A) after the latest of (X) 10:00 a.m., New York City time, on such trading day, (Y) the ending time of the Purchases pursuant to a Purchase Notice or Intraday Purchases pursuant to an Intraday Purchase Notice, if any, occurring on the same trading day and (B) prior to the earlier of (X) 3:30 p.m., New York City time, on such trading day for such Intraday Purchase and (Y) such time that is exactly one hour immediately prior to the official close of the primary (or “regular”) trading session on Nasdaq if Nasdaq has theretofore publicly announced that the official close of the regular trading session shall be earlier than 4:00 p.m., New York City time, on such trading day for such Intraday Purchase.

“**Purchase Maximum Amount**” are to a Purchase limitation pursuant to which we may exercise our right to direct a Purchase in an amount not to exceed the lesser of: (i) 1,000,000 shares of common stock and (ii) 20% of the total aggregate number (or volume) of shares of common stock traded on Nasdaq during the Purchase Valuation Period (as defined below). For purposes of calculating the Purchase Maximum Amount, Excluded Transactions during the applicable Purchase Valuation Period are excluded.

“**Purchase Notice**” are to, with respect to a Purchase (other than an Intraday Purchase) made pursuant the Purchase Agreement, an irrevocable written purchase notice from us directing B. Riley to purchase a specified Purchase Share Amount and delivered and received after 6:00 a.m., New York City time, and prior to 9:00 a.m., New York City time, on the Purchase Date for such Purchase, at the applicable purchase price therefor.

“**Purchase Share Amount**” are to the total number of shares to be purchased by B. Riley in the relevant Purchase as specified in the applicable Purchase Notice.

“**Purchase Share Volume Maximum**” are to, with respect to a Purchase made pursuant to the Purchase Agreement, a number of shares of common stock equal to the quotient obtained by dividing (i) the Purchase Share Amount to be purchased by B. Riley in such Purchase, by (ii) 0.20 (subject to certain adjustments). For purposes of calculating the Purchase Share Volume Maximum, Excluded Transactions during the applicable Purchase Valuation Period are excluded.

“**Registration Rights Agreement**” are to that certain Registration Rights Agreement, dated as of August 11, 2022, by and between us and B. Riley.

“**Rigetti assumed warrants**” are to the warrants to purchase Legacy Rigetti common stock which were assumed and converted into a warrant to purchase shares of common stock in connection with the Business Combination, with each Rigetti assumed warrant subject to the same terms and conditions as were applicable to the original Legacy Rigetti warrant and having an exercise price and number of shares of common stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement.

“**Rigetti assumed options**” are to the options to purchase Legacy Rigetti common stock which were assumed and converted into an option to purchase shares of common stock in connection with the Business Combination, with each Rigetti assumed option subject to the same terms and conditions as were applicable to the original Legacy Rigetti option and having an exercise price and number of shares of common stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement.

“**Rigetti assumed RSUs**” are to the restricted stock units to purchase Legacy Rigetti common stock which were assumed and converted into a restricted stock unit award to receive shares of common stock in connection with the Business Combination, with each Rigetti assumed RSU subject to the same terms and conditions as were

[Table of Contents](#)

applicable to the original Legacy Rigetti restricted stock unit award and the number of shares of common stock to which the Rigetti assumed RSU relates based on the Exchange Ratio and other terms contained in the Merger Agreement.

“Rigetti Holding Company Reorganization” are to the holding company reorganization pursuant to which (i) Rigetti & Co, Inc. established Rigetti Holdings, Inc. and Rigetti Intermediate Merger Sub Inc., each as wholly owned subsidiaries of Rigetti & Co, Inc., (ii) on October 5, 2021, pursuant to an Agreement and Plan of Merger (the “Holding Company Merger Agreement”) by and among Rigetti & Co, Inc., Rigetti Holdings, Inc. and Rigetti Intermediate Merger Sub, Inc., dated as of October 5, 2021, Rigetti Intermediate Merger Sub, Inc. merged with and into Rigetti & Co, Inc., with Rigetti & Co, Inc. surviving such merger as a wholly owned subsidiary of Rigetti Holdings, Inc., with all of the outstanding equity securities of Rigetti & Co, Inc. exchanged for identical equity securities of Rigetti Holdings, Inc. and (iii) on October 6, 2021, Rigetti & Co, Inc. was converted into a Delaware limited liability company and continues as “Rigetti & Co, LLC”.

“SEC” are to the Securities and Exchange Commission.

“Securities Act” are to the Securities Act of 1933, as amended.

“selling stockholder” or **“B. Riley”** are to B. Riley Principal Capital II, LLC.

“Supernova Class A ordinary shares” are to the Class A ordinary shares, par value \$0.0001 per share, of Supernova, which were automatically converted, on a one-for-one basis, into shares of Rigetti common stock in connection with the Domestication.

“Supernova Class B ordinary shares” are to the Class B ordinary shares, par value \$0.0001 per share, of Supernova which automatically converted in connection with the Domestication on a one-for-one basis, into shares of Rigetti common stock.

“Supernova Sponsor” are to Supernova Partners II LLC, a Cayman Islands exempted company.

“Sponsor Support Agreement” are to that certain Sponsor Agreement, dated as of October 6, 2021, by and among Supernova Sponsor, Supernova and Legacy Rigetti, as amended and modified from time to time.

“Subscription Agreements” are to the Initial Subscription Agreements and the Subsequent Subscription Agreements, entered into by Supernova and each of the PIPE Investors in connection with the PIPE Financing.

“Supernova” are to Supernova Partners Acquisition Company II, Ltd., a Cayman Islands exempted company, prior to the consummation of the Business Combination.

“Sponsor Vesting Shares” are to the 3,059,273 shares of common stock initially held by Supernova Sponsor and subject to vesting and forfeiture;

“Supernova Board” are to Supernova’s board of directors.

“Threshold Price” are to \$1.00.

“VWAP” are to the volume weighted average price of the common stock, calculated in accordance with the Purchase Agreement.

“warrant agreement” are to the Warrant Agreement, dated March 1, 2021, between Supernova and American Stock Transfer & Trust Company, as warrant agent.

“warrants” or **“Warrants”** are to the public warrants and the private placement warrants.

“Warrant Subscription Agreement” or **“Forward Warrant Agreement”** are to that certain agreement dated as of October 6, 2021, by and between Ampere Computing LLC (“Ampere”) and Legacy Rigetti.

PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in this prospectus and does not contain all of the information that you should consider in making your investment decision. Before investing in our securities, you should carefully read this entire prospectus, including our consolidated financial statements and the related notes thereto and the information set forth in the sections titled “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.” Unless the context otherwise requires, we use the terms “Rigetti,” “Company,” “we,” “us” and “our” in this prospectus to refer to Rigetti Computing, Inc. and our wholly owned subsidiaries.

Overview

We build quantum computers and the superconducting quantum processors that power them. We believe quantum computing represents one of the most transformative emerging capabilities in the world today. By leveraging quantum mechanics, we believe our quantum computers process information in fundamentally new, more powerful ways than classical computers.

We are a vertically integrated company. We own and operate Fab-1, a unique wafer fabrication facility dedicated to prototyping and producing our quantum processors. Through Fab-1, we own the means of production of our breakthrough multi-chip quantum processor technology. We leverage our chips through a full-stack product development approach, from quantum chip design and manufacturing through cloud delivery.

We have been deploying our quantum computers to end users over the cloud since 2017. We offer our full-stack quantum computing platform as a cloud service to a wide range of end-users, directly through our Rigetti QCS platform, and also through cloud service providers.

We have developed strong customer relationships and collaborative partnerships to accelerate the development of key technologies for high-value use cases that unlock strategic early markets. Our partners and customers include commercial enterprises such as Amazon Web Services, Ampere, Astex Pharmaceuticals, Deloitte, Microsoft, Nasdaq and Standard Chartered Bank, along with U.S. government organizations such as the Defense Advanced Research Project Agency (“DARPA”), the Department of Energy (“DOE”), and NASA.

We are enabled by a deep technical team that includes global experts in quantum chip design and manufacturing, quantum computing systems architecture, quantum software, and quantum algorithms and applications.

Powered by the production of our scalable multi-chip quantum processors in Fab-1 and our full-stack product development approach, our goal is to deliver quantum computing systems that demonstrate clear performance advantages over classical computing alternatives for multiple high-impact application areas.

Background

Supernova was a blank check company incorporated on December 22, 2020 in the Cayman Islands for the purpose of effecting a merger, amalgamation, share exchange, asset acquisition, share purchase, reorganization, or similar business combination with one or more businesses.

On the Closing Date, Rigetti consummated the Business Combination pursuant to the Merger Agreement. Supernova’s shareholders approved the Business Combination and Domestication at an extraordinary general meeting of shareholders held on February 28, 2022 (the “Extraordinary General Meeting”). In connection with the Extraordinary General Meeting and the Business Combination, holders of 22,915,538 of Supernova Class A ordinary shares, or 66.4% of the shares with redemption rights, exercised their right to redeem their shares for cash at a redemption price of approximately \$10.00 per share, for an aggregate redemption amount of \$229,155,380.

On March 1, 2022, the business day prior to the Closing Date, Supernova effectuated the Domestication by filing a notice of deregistration with the Cayman Islands Registrar of Companies, together with the necessary accompanying documents, and filing a certificate of incorporation (the “Certificate of Incorporation”) and a certificate of corporate domestication with the Secretary of State of the State of Delaware, under which Supernova was domesticated and continues as a Delaware corporation. The Board also adopted the Bylaws of the Company (the “Bylaws”) on March 1, 2022, which became effective on that date.

In connection with the Domestication, Supernova changed its name from Supernova Partners Acquisition Company II, Ltd. to Rigetti Computing, Inc. As a result of and upon the effective time of the Domestication, among other things, (1) each then issued and outstanding Supernova Class A ordinary share converted automatically, on a one-for-one basis, into a share of common stock; (2) each then issued and outstanding Supernova Class B ordinary share converted automatically, on a one-for-one basis, into a share of common stock; (3) each then issued and outstanding whole warrant of Supernova to purchase one Supernova Class A ordinary shares converted automatically into a warrant to acquire one share of common stock at an exercise price of \$11.50 per share pursuant to the warrant agreement, between Supernova and American Stock Transfer & Trust Company, as warrant agent; and (4) each then issued and outstanding unit of Supernova (the “Supernova Units”) was separated and converted automatically into one share of common stock and one-fourth of one warrant to purchase common stock.

On the Closing Date, Rigetti consummated the First Merger and immediately following the First Merger, consummated the Second Merger. Immediately prior to the effective time of the First Merger, each share of Legacy Rigetti Preferred Stock converted into shares of Legacy Rigetti common stock in accordance with the Amended and Restated Certificate of Incorporation of Legacy Rigetti (such conversion, the “Legacy Rigetti Preferred Conversion”).

As a result of the First Merger, among other things, (1) all outstanding shares of Legacy Rigetti common stock as of immediately prior to the Closing (including Legacy Rigetti common stock resulting from the Legacy Rigetti Preferred Stock Conversion), were exchanged at the Exchange Ratio for an aggregate of 78,959,579 shares of common stock, (2) each warrant to purchase Legacy Rigetti common stock was assumed and converted into a Rigetti assumed warrant, with each Rigetti assumed warrant subject to the same terms and conditions as were applicable to the original Legacy Rigetti warrant and having an exercise price and number of shares of common stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement, (3) each option to purchase Legacy Rigetti common stock was assumed and converted into an option to purchase shares of common stock with each Rigetti assumed option subject to the same terms and conditions as were applicable to the original Legacy Rigetti option and with an exercise price and number of shares of common stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement and (4) each Legacy Rigetti restricted stock unit award was assumed and converted into a restricted stock unit award to receive shares of common stock, with each Rigetti assumed RSU subject to the same terms and conditions as were applicable to the original Legacy Rigetti restricted stock unit award and the number of shares of common stock to which the Rigetti assumed RSU relates based on the Exchange Ratio and other terms contained in the Merger Agreement.

Concurrently with the execution of the Merger Agreement, Supernova entered into Subscription Agreements (the “Initial Subscription Agreements”) with certain investors (together, the “Initial PIPE Investors”), pursuant to which the Initial PIPE Investors agreed to subscribe for and purchase, and Supernova agreed to issue and sell to the Initial PIPE Investors, an aggregate of 10,251,000 shares of common stock at a price of \$10.00 per share, for aggregate gross proceeds of \$102,510,000 (the “Initial PIPE Financing”). On December 23, 2021, Supernova entered into Subscription Agreements (the “Subsequent Subscription Agreements”) with two “accredited investors” (as such term is defined in Rule 501 of Regulation D) (the “Subsequent PIPE Investors,” and together with the Initial PIPE Investors, the “PIPE Investors”) pursuant to which the Subsequent PIPE Investors agreed to

subscribe for and purchase, and Supernova agreed to issue and sell to the Subsequent PIPE Investors, an aggregate of 4,390,244 shares of common stock at a price of \$10.25 per share, for aggregate gross proceeds of \$45,000,000 (the “Subsequent PIPE Financing,” and together with the Initial PIPE Financing, the “PIPE Financing”). Pursuant to the Subscription Agreements, Rigetti agreed to provide the PIPE Investors with certain registration rights with respect to the shares purchased as part of the PIPE Financing. The PIPE Financing was consummated immediately prior to the Merger.

Committed Equity Financing

On August 11, 2022, we entered into the Purchase Agreement and Registration Rights Agreement with B. Riley. Pursuant to the Purchase Agreement, subject to the satisfaction of the conditions set forth therein, we will have the right to sell to B. Riley up to \$75.0 million of newly issued shares of our common stock after the date of this prospectus and from time to time during the term of the Purchase Agreement. Sales of common stock by us to B. Riley pursuant to the Purchase Agreement, and the timing of any such sales, are solely at our option, and we are under no obligation to sell any securities to B. Riley under the Purchase Agreement. In accordance with our obligations under the Registration Rights Agreement, we have filed the registration statement of which this prospectus forms a part with the SEC to register under the Securities Act the resale by B. Riley of up to 23,648,889 shares of common stock, consisting of 171,008 shares of common stock that we issued to B. Riley as consideration for its commitment to purchase shares of common stock at our election under the Purchase Agreement, and up to 23,477,881 shares of common stock that we may elect, in our sole discretion, to issue and sell to B. Riley under the Purchase Agreement, from time to time after the date of this prospectus.

Upon the initial satisfaction of the conditions to B. Riley’s purchase obligation set forth in the Purchase Agreement, including that a registration statement of which this prospectus forms a part is declared effective by the SEC and a final prospectus relating thereto is filed with the SEC, we will have the right, but not the obligation, from time to time at our sole discretion over the 24-month period beginning on the Commencement Date to direct B. Riley to purchase a specified amount of shares not to exceed the Purchase Maximum Amount for such Purchase (and subject to certain additional limitations set forth in the Purchase Agreement) by timely delivering a Purchase Notice to B. Riley prior to the commencement of trading of the common stock on Nasdaq on any trading day, so long as (i) the closing sale price of the common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price and (ii) all shares of common stock subject to all prior Purchases and all prior Intraday Purchases by B. Riley under the Purchase Agreement have been received by B. Riley prior to the time we deliver such Purchase Notice to B. Riley.

The per share purchase price that B. Riley is required to pay for shares of common stock in a Purchase effected by us pursuant to the Purchase Agreement, if any, will be determined by reference to the VWAP during the full primary (or “regular”) trading session on Nasdaq on the applicable Purchase Date, calculated in accordance with the Purchase Agreement, or, if the total aggregate volume of shares of common stock traded on Nasdaq reaches an amount equal to the Purchase Share Volume Maximum prior to the official close of the regular trading session on Nasdaq on such Purchase Date, then the VWAP will be calculated only for the period beginning at the official open (or “commencement”) of the regular trading session on the applicable Purchase Date for such Purchase and ending at such time that the total aggregate volume of shares of common stock traded on Nasdaq reaches the Purchase Share Volume Maximum for such Purchase (as applicable) (such period for each Purchase, the “Purchase Valuation Period”), less a fixed 3% discount to the VWAP for such Purchase Valuation Period. For purposes of calculating the VWAP, the Purchase Maximum Amount and the Purchase Share Volume Maximum under the Purchase Agreement, Excluded Transactions during the Purchase Valuation Period are excluded.

From and after Commencement, we will control the timing and amount of any sales of common stock to B. Riley. Actual sales of shares common stock to B. Riley under the Purchase Agreement will depend on a variety

of factors to be determined by us from time to time, including, among other things, market conditions, the trading price of the common stock and determinations by us as to the appropriate sources of funding for our business and operations.

In addition to the regular Purchases described above, if either (i) we do not effect a regular Purchase on a trading day that we otherwise could have selected as a Purchase Date for a regular Purchase pursuant to the Purchase Agreement (or we fail to timely deliver to B. Riley a Purchase Notice for a regular Purchase on such trading day) or (ii) we have timely delivered a Purchase Notice for a regular Purchase on a Purchase Date, and the Purchase Valuation Period for such Purchase has ended prior to 3:00 p.m., New York City time, on such Purchase Date, then, in either case, we shall also have the right, but not the obligation, subject to the continued satisfaction of conditions set forth in the Purchase Agreement, to direct B. Riley to purchase, on such trading day (which may be the same Purchase Date as a regular Purchase) an additional specified amount of common stock, not to exceed the applicable Intraday Purchase Maximum Amount for such Intraday Purchase (and subject to certain additional limitations set forth in the Purchase Agreement), by the delivery to B. Riley of an irrevocable written purchase notice, after 10:00 a.m., New York City time (and after the Purchase Valuation Period for any prior regular Purchase (if any) and the Intraday Purchase Valuation Period(s) (as defined below) for the most recent prior Intraday Purchase effected on the same Purchase Date (if any) have ended), and prior to 3:30 p.m., New York City time, on such Purchase Date, so long as (i) the closing sale price of the common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price and (ii) all shares of common stock subject to all prior Purchases and all prior Intraday Purchases by B. Riley under the Purchase Agreement have been received by B. Riley prior to the time we deliver such Intraday Purchase Notice to B. Riley.

The per share purchase price for the shares of common stock that we elect to sell to B. Riley in an Intraday Purchase pursuant to the Purchase Agreement, if any, will be calculated in the same manner as in the case of a regular Purchase, provided that the VWAP for such Intraday Purchase will be measured during the portion of the normal trading hours on Nasdaq on the applicable Purchase Date that will begin at the latest of (i) the time of confirmation of B. Riley's receipt of the applicable Intraday Purchase Notice, (ii) the time that the Purchase Valuation Period for any prior regular Purchase effected on the same Purchase Date (if any) has ended and (iii) the time that the Intraday Purchase Valuation Period (as defined below) for the most recent prior Intraday Purchase effected on the same Purchase Date (if any) has ended, and ending at the earlier of (x) 3:59 p.m., New York City time, on such Purchase Date and (y) such time that the total aggregate volume of shares of common stock traded on Nasdaq reaches an amount equal to the Intraday Purchase Share Volume Maximum (such period for each Intraday Purchase, the "Intraday Purchase Valuation Period"), less a fixed 3% discount to the VWAP for such Intraday Purchase Valuation Period. For purposes of calculating the VWAP, the Intraday Purchase Maximum Amount and the Intraday Purchase Share Volume Maximum under the Purchase Agreement for an Intraday Purchase, Excluded Transactions during the Intraday Purchase Valuation Period are excluded.

There is no upper limit on the price per share that B. Riley could be obligated to pay for the common stock we may elect to sell to it in any Purchase or any Intraday Purchase under the Purchase Agreement. The purchase price per share of common stock that we may elect to sell to B. Riley in a Purchase and an Intraday Purchase under the Purchase Agreement will be equitably adjusted for any stock dividend, stock split, stock combination, recapitalization or other similar transaction occurring during the applicable Purchase Valuation Period for such Purchase or during the applicable Intraday Purchase Valuation Period for such Intraday Purchase.

Under the applicable Nasdaq rules, in no event may we issue to B. Riley under the Purchase Agreement more than 23,648,889 shares of common stock, which number of shares is equal to approximately 19.99% of the shares of the common stock outstanding immediately prior to the execution of the Purchase Agreement, unless (i) we obtain stockholder approval to issue shares of common stock in excess of the Exchange Cap in accordance with applicable Nasdaq rules, or (ii) the average price per share paid by B. Riley for all of the shares of common stock that we direct B. Riley to purchase from us pursuant to the Purchase Agreement, if any, equals or exceeds

\$4.45 per share (which price is calculated based on the lower of the official closing price of our common stock on Nasdaq on the trading day immediately preceding the date of the Purchase Agreement and the average official closing price of our common stock on Nasdaq for the five consecutive trading days ending on the trading day immediately preceding the date of the Purchase Agreement, as adjusted pursuant to applicable Nasdaq rules). Moreover, we may not issue or sell any shares of common stock to B. Riley under the Purchase Agreement which, when aggregated with all other shares of common stock then beneficially owned by B. Riley and its affiliates (as calculated pursuant to Section 13(d) of the Exchange Act and Rule 13d-3 promulgated thereunder), would result in B. Riley beneficially owning shares of common stock in excess of the Beneficial Ownership Cap.

The net proceeds under the Purchase Agreement to us will depend on the frequency and prices at which we sell shares of our common stock to B. Riley. We expect that any proceeds received by us from such sales to B. Riley will be used for working capital and general corporate purposes.

There are no restrictions on future financings, rights of first refusal, participation rights, penalties or liquidated damages in the Purchase Agreement or Registration Rights Agreement, other than a prohibition (with certain limited exceptions) on entering into specified “Variable Rate Transactions” (as such term is defined in the Purchase Agreement) during the term of the Purchase Agreement. Such transactions include, among others, the issuance of convertible securities with a conversion or exercise price that is based upon or varies with the trading price of our common stock after the date of issuance, or our effecting or entering into an agreement to effect an “equity line of credit” or other substantially similar continuous offering with a third party, in which we may offer, issue or sell common stock or any securities exercisable, exchangeable or convertible into common stock at a future determined price.

B. Riley has agreed that none of B. Riley, its officers, its sole member or any entity managed or controlled by B. Riley or its sole member will engage in or effect, directly or indirectly, for its own account or for the account of any other of such persons or entities, any short sales of the common stock or hedging transaction that establishes a net short position in the common stock during the term of the Purchase Agreement.

The Purchase Agreement will automatically terminate on the earliest to occur of (i) the first day of the month following the 24-month anniversary of the Commencement Date, (ii) the date on which B. Riley shall have purchased us under the Purchase Agreement shares of common stock for an aggregate gross purchase price of \$75.0 million, (iii) the date on which the common stock shall have failed to be listed or quoted on Nasdaq or another U.S. national securities exchange identified as an “eligible market” in the Purchase Agreement for one trading day, (iv) the 30th trading day after the date on which we commence a voluntary bankruptcy proceeding or any third party commences a bankruptcy proceeding against us that is not discharged or dismissed prior to such trading day, and (v) the date on which a bankruptcy custodian is appointed for all or substantially all of our property or we make a general assignment for the benefit of creditors. We have the right to terminate the Purchase Agreement at any time after Commencement upon ten trading days’ prior written notice to B. Riley. B. Riley has the right to terminate the Purchase Agreement upon ten trading days’ prior written notice to us upon the occurrence of certain events set forth in the Purchase Agreement. We and B. Riley may also agree to terminate the Purchase Agreement by mutual written consent. No termination of the Purchase Agreement will be effective until the fifth trading day immediately following the settlement date related to any pending Purchase that has not been fully settled in accordance with the Purchase Agreement. Neither we nor B. Riley may assign or transfer our respective rights and obligations under the Purchase Agreement or the Registration Rights Agreement.

As consideration for B. Riley’s commitment to purchase shares of common stock at our direction upon the terms and subject to the conditions set forth in the Purchase Agreement, upon execution of the Purchase Agreement, we issued the Commitment Shares to B. Riley. In addition, we agreed to reimburse \$100,000 of reasonable legal fees and disbursements of B. Riley’s legal counsel in connection with the transactions

contemplated by the Purchase Agreement and the Registration Rights Agreement, plus an additional \$5,000 of such legal fees and disbursements each quarter during the term of the Purchase Agreement.

The Purchase Agreement and the Registration Rights Agreement contain customary representations, warranties, conditions and indemnification obligations of the parties. The representations, warranties and covenants contained in such agreements were made only for the purposes of such agreements, were solely for the benefit of the parties to such agreements and may be subject to limitations agreed upon by the contracting parties. Copies of the agreements have been filed as exhibits to the registration statement of which this prospectus forms a part and are available electronically on the SEC's website at www.sec.gov.

We do not know what the purchase price for our common stock will be and therefore cannot be certain as to the number of shares we might issue to B. Riley under the Purchase Agreement after the Commencement Date. As of March 1, 2023, there were 126,964,206 shares of our common stock outstanding, of which 103,749,097 shares were held by non-affiliates. Although the Purchase Agreement provides that we may sell up to \$75.0 million of shares of our common stock to B. Riley, only 23,648,889 shares of our common stock are being registered for resale by B. Riley under this prospectus, which represents (i) the 171,008 Commitment Shares that we issued to B. Riley on August 11, 2022 under the Purchase Agreement and (ii) up to 23,477,881 shares of common stock that may be issued to B. Riley from and after the Commencement Date, if and when we elect to sell shares to B. Riley under the Purchase Agreement. Depending on the market prices of our common stock at the time we elect to issue and sell shares to B. Riley under the Purchase Agreement, we may need to register for resale under the Securities Act additional shares of our common stock in order to receive aggregate gross proceeds equal to the \$75.0 million available to us under the Purchase Agreement. If all of the 23,648,889 shares offered by B. Riley for resale under this prospectus were issued and outstanding on March 1, 2023, such shares would represent approximately 15.7% of the total number of outstanding shares of common stock and approximately 18.6% of the total number of outstanding shares of common stock held by non-affiliates of our company. If we elect to issue and sell more than the 23,648,889 shares offered under this prospectus to B. Riley, which we have the right, but not the obligation, to do, we must first register for resale under the Securities Act any such additional shares, which could cause additional substantial dilution to our stockholders. The number of shares ultimately offered for resale by B. Riley is dependent upon the number of shares we may elect to sell to B. Riley under the Purchase Agreement from and after the Commencement Date.

Issuances of our common stock in this offering will not affect the rights or privileges of our existing stockholders, except that the economic and voting interests of each of our existing stockholders will be diluted as a result of any such issuance. Although the number of shares of common stock that our existing stockholders own will not decrease, the shares owned by our existing stockholders will represent a smaller percentage of our total outstanding shares after any such issuance to B. Riley.

Summary Risk Factors

The following is a summary of select risks and uncertainties that could materially adversely affect us and our business, financial condition and results of operations. Before you invest in our common stock, you should carefully consider all the information in this prospectus, including matters set forth under the heading "Risk Factors," immediately following this prospectus summary. These risks include the following, among others:

- It is not possible to predict the actual number of shares we will sell under the Purchase Agreement, or the actual gross proceeds resulting from those sales. Further, we may not have access to the full amount available under the Purchase Agreement.
- The sale and issuance of our common stock to B. Riley will cause dilution to our existing stockholders, and the sale of the shares of common stock acquired by B. Riley, or the perception that such sales may occur, could cause the price of our common stock to fall.

- Investors who buy shares at different times will likely pay different prices.
- Our management will have broad discretion over the use of the net proceeds from our sale of shares of common stock to B. Riley, if any, and you may not agree with how we use the proceeds and the proceeds may not be invested successfully.
- Based on our estimates and current business plan, we expect that we will need to raise additional capital by late 2024 or early 2025 in order to continue our research and development efforts and achieve our business objectives. We cannot be sure that additional financing will be available. If we are unable to raise additional funding when needed, we may be required to delay, limit or substantially reduce our quantum computing development efforts.
- We are in our early stages and have a limited operating history, which makes it difficult to forecast our future results of operations.
- We have a history of operating losses and expect to incur significant expenses and continuing losses for the foreseeable future.
- Even if the market in which we compete achieves its anticipated growth levels, our business could fail to grow at similar rates, if at all.
- Our ability to use net operating loss carryforwards and other tax attributes may be limited.
- We have not produced quantum computers with high qubit counts and we face significant barriers in our attempts to produce quantum computers, including the need to invent and develop new technology. If we cannot successfully overcome those barriers, our business will be negatively impacted and could fail.
- Any future generations of hardware, including any future generations developed to demonstrate narrow quantum advantage and broad quantum advantage and the anticipated release of an 84 qubit system, and 336 qubit system, each of which is an important anticipated milestone for our technology roadmap and commercialization, may not occur on our anticipated timeline or at all.
- If our computers fail to achieve quantum advantage, our business, financial condition and future prospects may be harmed. Moreover, the standards by which we measure our progress may be based on assumptions and expectations that are not accurate or that may change as quantum computing evolves.
- The quantum computing industry is competitive on a global scale and we may not be successful in competing in this industry or establishing and maintaining confidence in our long-term business prospects among current and future partners and customers.
- We depend on a limited number of customers for a significant percentage of our revenue and the loss or temporary loss of a major customer for any reason could harm our financial condition.
- A significant portion of our revenue depends on contracts with the public sector, and our failure to receive and maintain government contracts or changes in the contracting or fiscal policies of the public sector could have a material adverse effect on our business.
- Our business is currently dependent upon our relationship with our cloud providers. There are no assurances that we will be able to commercialize quantum computers from our relationships with cloud providers.
- We rely on access to high performance third party classical computing through public clouds, high performance computing centers and on-premises computing infrastructure to deliver performant quantum solutions to customers. We may not be able to maintain high quality business relationships and connectivity with these resources which could make it harder for us to reach customers or deliver solutions in a cost-effective manner.
- We depend on certain suppliers to source products. Failure to maintain our relationship with any of these suppliers, or a failure to replace any of these suppliers, could have a material adverse effect on our business, financial position, results of operations and cash flows.

- Our system depends on the use of certain development tools, supplies, equipment and production methods. If we are unable to procure the necessary tools, supplies and equipment to build our quantum systems, or are unable to do so on a timely and cost-effective basis, and in sufficient quantities, we may incur significant costs or delays which could negatively affect our operations and business.
- Even if we are successful in developing quantum computing systems and executing our strategy, competitors in the industry may achieve technological breakthroughs which render our quantum computing systems obsolete or inferior to other products.
- We may be unable to reduce the cost of developing our quantum computers, which may prevent us from pricing our quantum systems competitively.
- The quantum computing industry is in its early stages and volatile, and if it does not develop, if it develops slower than we expect, if it develops in a manner that does not require use of our quantum computing solutions, if it encounters negative publicity or if our solution does not drive commercial engagement, the growth of our business will be harmed.
- We could suffer disruptions, outages, defects and other performance and quality problems with our quantum computing systems, our production technology partners or with the public cloud, data centers and internet infrastructure on which we rely.
- If our information technology systems or data, or those of third parties upon which we rely, are or were compromised, we could experience adverse consequences resulting from such compromise, including but not limited to regulatory investigations or actions; litigation; fines and penalties; disruptions of our business operations; reputational harm; loss of revenue or profits; loss of customers or sales; and other adverse consequences, which may adversely affect our business.
- We have identified material weaknesses in our internal control over financial reporting related to the lack of effective review controls over the accounting for complex financial instruments and to the design and operation of our overall closing and financial reporting processes, and we may identify additional material weaknesses in the future. The material weakness over accounting for complex financial instruments has resulted in errors in financial statements for prior periods. If we fail to remediate such material weaknesses, if we identify additional material weaknesses or if we otherwise fail to establish and maintain effective control over financial reporting, it may adversely affect our ability to accurately and timely report our financial results in the future, and may adversely affect investor confidence, our reputation, our ability to raise additional capital and our business operations and financial condition.
- Our failure to obtain, maintain and protect our intellectual property rights could impair our ability to protect and commercialize our proprietary products and technology and cause us to lose our competitive advantage.
- There can be no assurance that we will be able to regain compliance with the continued listing standards of Nasdaq. If we fail to cure our current deficiency and regain compliance with the listing requirements of the Nasdaq Capital Market or fail to comply with such listing requirements in the future or fail to cure any future deficiencies, we may be delisted and the price of our common stock and our ability to access the capital markets could be negatively impacted.
- Sales of our securities, or perceptions of sales, by us or holders of our securities in the public markets or otherwise could cause the market price for our securities to decline and even in such case certain holders of our securities may still have an incentive to sell our securities.
- Delaware law and our Certificate of Incorporation and Bylaws contain certain provisions, including anti-takeover provisions, that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.

- Unstable market and economic conditions, including the recent bank failure of Silicon Valley Bank, have had and may continue to have serious adverse consequences on our business, financial condition and share price.
- Our warrants, including our public warrants, private placement warrants and other warrants we have issued, are accounted for as liabilities and the changes in value of our warrants could have a material effect on our financial results.
- Our warrants are exercisable for common stock, the exercise of which would increase the number of shares eligible for future resale in the public market and result in dilution to our stockholders.
- The warrants may never be in the money, and they may expire worthless.

Corporate Information

Our principal executive offices are located at 775 Heinz Avenue, Berkeley, CA 94710 and our telephone number is (510) 210-5550. Our corporate website address is www.rigetti.com. Solely for convenience, trademarks and trade names referred to in this prospectus may appear without the ® or ™ symbols.

Emerging Growth Company and Smaller Reporting Company Status

We are an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act of 2012 (“JOBS Act”). As an emerging growth company, we are exempt from certain requirements related to executive compensation, including the requirements to hold a nonbinding advisory vote on executive compensation and to provide information relating to the ratio of total compensation of our Chief Executive Officer to the median of the annual total compensation of all of our employees, each as required by the Investor Protection and Securities Reform Act of 2010, which is part of the Dodd-Frank Act.

Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can choose not to take advantage of the extended transition period and comply with the requirements that apply to non-emerging growth companies, and any such election to not take advantage of the extended transition period is irrevocable.

Supernova previously elected to avail itself of the extended transition period and we will take advantage of the benefits of the extended transition period emerging growth company status permits. During the extended transition period, it may be difficult or impossible to compare our financial results with the financial results of another public company that complies with public company effective dates for accounting standard updates because of the potential differences in accounting standards used.

We will remain an emerging growth company under the JOBS Act until the earliest of (a) December 31, 2026 (the last day of the fiscal year following the fifth anniversary of the consummation of the IPO), (b) the last date of our fiscal year in which we have a total annual gross revenue of at least \$1.07 billion, (c) the date on which we are deemed to be a “large accelerated filer” under the rules of the SEC with at least \$700.0 million of outstanding securities held by non-affiliates or (d) the date on which we have issued more than \$1.0 billion in non-convertible debt securities during the previous three years.

We are also a “smaller reporting company” as defined in the Exchange Act. We may continue to be a smaller reporting company even after we are no longer an emerging growth company. We may take advantage of certain of the scaled disclosures available to smaller reporting companies and will be able to take advantage of these scaled disclosures for so long as the market value of our voting and non-voting common stock held by non-affiliates is less than \$250.0 million measured on the last business day of our second fiscal quarter, or our annual revenue is less than \$100.0 million during the most recently completed fiscal year and the market value of our voting and non-voting common stock held by non-affiliates is less than \$700.0 million measured on the last business day of our second fiscal quarter.

THE OFFERING

Issuer	Rigetti Computing, Inc.
Shares of common stock offered by the selling stockholder	<p>Up to 23,648,889 shares of common stock, consisting of:</p> <ul style="list-style-type: none">• 171,008 Commitment Shares that we issued to B. Riley upon execution of the Purchase Agreement in consideration of its commitment to purchase shares of common stock at our election under the Purchase Agreement; and• Up to 23,477,881 shares of common stock that we may elect, in our sole discretion, to issue and sell to B. Riley under the Purchase Agreement from time to time after the Commencement Date.
Shares of common stock outstanding	126,964,206 shares of common stock (as of March 1, 2023).
Shares of common stock outstanding after giving effect to the issuance of the shares registered hereunder	150,442,087 shares of common stock.
Use of proceeds	<p>We will not receive any proceeds from the resale of shares of common stock included in this prospectus for resale by B. Riley. However, we may receive up to \$75.0 million in aggregate gross proceeds under the Purchase Agreement from sales of common stock that we may elect to make to B. Riley pursuant to the Purchase Agreement, if any, from time to time in our sole discretion, from and after the Commencement Date.</p> <p>We expect to use the net proceeds that we receive from sales of our common stock to B. Riley, if any, under the Purchase Agreement for working capital and general corporate purposes. See the section titled “Use of Proceeds.”</p>
Conflict of interest	<p>B. Riley is an affiliate of BRS, a registered broker-dealer and FINRA member, which will act as an executing broker that will effectuate resales of our common stock that have been and may be acquired by B. Riley from us pursuant to the Purchase Agreement to the public in this offering. Because B. Riley will receive all the net proceeds from such resales of our common stock made to the public through BRS, BRS is deemed to have a “conflict of interest” within the meaning of FINRA Rule 5121. Consequently this offering will be conducted in compliance with Rule 5121. Pursuant to that rule, the appointment of a “qualified independent underwriter” is not required in connection with this offering, as a “bona fide public market,” as defined in Rule 5121, exists for the securities offered. BRS is not permitted to sell shares of our common stock in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder. See “Plan of Distribution (Conflict of Interest).”</p>

[Table of Contents](#)

Nasdaq trading symbol

Our common stock is currently traded on Nasdaq under the symbol “RGTL.”

Risk factors

Before investing in our securities, you should carefully read and consider the information set forth in “Risk Factors” beginning on page 20.

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below together with all of the other information contained in this prospectus, including our financial statements and related notes appearing at the end of this prospectus and in the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” before deciding to invest in our common stock. If any of the events or developments described below were to occur, our business, prospects, operating results and financial condition could suffer materially, the trading price of our common stock could decline, and you could lose all or part of your investment. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business.

Risks Related to the Offering

It is not possible to predict the actual number of shares we will sell under the Purchase Agreement, or the actual gross proceeds resulting from those sales. Further, we may not have access to the full amount available under the Purchase Agreement.

On August 11, 2022, we entered into the Purchase Agreement with B. Riley, pursuant to which B. Riley has committed to purchase up to \$75.0 million of our common stock, subject to certain limitations and conditions set forth in the Purchase Agreement. The shares of our common stock that may be issued under the Purchase Agreement may be sold by us to B. Riley at our discretion from time to time over an approximately 24-month period commencing on the Commencement Date.

We generally have the right to control the timing and amount of any sales of our shares of common stock to B. Riley under the Purchase Agreement. Sales of our common stock, if any, to B. Riley under the Purchase Agreement will depend upon market conditions and other factors to be determined by us. We may ultimately decide to sell to B. Riley all, some or none of the shares of our common stock that may be available for us to sell to B. Riley pursuant to the Purchase Agreement.

Because the purchase price per share to be paid by B. Riley for the shares of common stock that we may elect to sell to B. Riley under the Purchase Agreement, if any, will fluctuate based on the market prices of our common stock during the applicable Purchase Valuation Period for each Purchase made pursuant to the Purchase Agreement, if any, it is not possible for us to predict, as of the date of this prospectus and prior to any such sales, the number of shares of common stock that we will sell to B. Riley under the Purchase Agreement, the purchase price per share that B. Riley will pay for shares purchased from us under the Purchase Agreement, or the aggregate gross proceeds that we will receive from those purchases by B. Riley under the Purchase Agreement, if any.

Moreover, although the Purchase Agreement provides that we may sell up to an aggregate of \$75.0 million of our common stock to B. Riley, only 23,648,889 shares of our common stock (171,008 of which represent the Commitment Shares we issued to B. Riley upon signing the Purchase Agreement as payment of a commitment fee for B. Riley’s obligation to purchase shares of our common stock under the Purchase Agreement) are being registered for resale under the registration statement of which this prospectus forms a part. If it becomes necessary to sell to B. Riley under the Purchase Agreement more than the 23,648,889 shares of common stock being registered for resale under the registration statement of which this prospectus forms a part in order to receive aggregate gross proceeds equal to \$75.0 million under the Purchase Agreement, we must first (i) obtain stockholder approval to issue shares of common stock in excess of the Exchange Cap under the Purchase Agreement in accordance with applicable Nasdaq rules and (ii) file with the SEC one or more additional registration statements to register under the Securities Act the resale by B. Riley of any such additional shares of our common stock we wish to sell from time to time under the Purchase Agreement, which the SEC must declare effective, in each case before we may elect to sell any additional shares of our common stock to B. Riley under

[Table of Contents](#)

the Purchase Agreement. The number of shares of our common stock ultimately offered for sale by B. Riley is dependent upon the number of shares of common stock, if any, we ultimately elect to sell to B. Riley under the Purchase Agreement.

In addition, we are not required or permitted to issue any shares of common stock under the Purchase Agreement if such issuance would breach our obligations under the rules or regulations of Nasdaq and B. Riley will not be required to purchase any shares of our common stock if such sale would result in B. Riley's beneficial ownership exceeding 4.99% of the then issued and outstanding common stock. Our inability to access a portion or the full amount available under the Purchase Agreement, in the absence of any other financing sources, could have a material adverse effect on our business.

The sale and issuance of our common stock to B. Riley will cause dilution to our existing stockholders, and the sale of the shares of common stock acquired by B. Riley, or the perception that such sales may occur, could cause the price of our common stock to fall.

The purchase price for the shares that we may sell to B. Riley under the Purchase Agreement will fluctuate based on the price of our common stock. Depending on market liquidity at the time, sales of such shares may cause the trading price of our common stock to fall. Further, any issuance and sale by us under the Purchase Agreement of a substantial amount of shares of common stock in addition to the 23,648,889 shares of common stock being registered for resale by B. Riley under the registration statement of which this prospectus forms a part could cause additional substantial dilution to our stockholders.

If and when we do sell shares to B. Riley, after B. Riley has acquired the shares, B. Riley may resell all, some, or none of those shares at any time or from time to time in its discretion. Therefore, sales to B. Riley by us could result in substantial dilution to the interests of other holders of our common stock. Additionally, the sale of a substantial number of shares of our common stock to B. Riley, or the anticipation of such sales, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales.

Investors who buy shares at different times will likely pay different prices.

Pursuant to the Purchase Agreement, we will have discretion, subject to market demand, to vary the timing, prices, and numbers of shares sold to B. Riley. If and when we do elect to sell shares of our common stock to B. Riley pursuant to the Purchase Agreement, after B. Riley has acquired such shares, B. Riley may resell all, some or none of such shares at any time or from time to time in its discretion and at different prices. As a result, investors who purchase shares from B. Riley at different times will likely pay different prices for those shares, and so may experience different levels of dilution and in some cases substantial dilution and different outcomes in their investment results. Investors may experience a decline in the value of the shares they purchase from B. Riley as a result of future sales made by us to B. Riley at prices lower than the prices such investors paid for their shares in this offering. In addition, if we sell a substantial number of shares to B. Riley under the Purchase Agreement, or if investors expect that we will do so, the actual sales of shares or the mere existence of our arrangement with B. Riley may make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect such sales.

Our management team will have broad discretion over the use of the net proceeds from our sale of shares of common stock to B. Riley, if any, and you may not agree with how we use the proceeds and the proceeds may not be invested successfully.

Our management team will have broad discretion as to the use of the net proceeds from our sale of shares of common stock to B. Riley, if any, and we could use such proceeds for purposes other than those contemplated at the time of commencement of this offering. Accordingly, you will be relying on the judgment of our management team with regard to the use of those net proceeds, and you will not have the opportunity, as part of

your investment decision, to assess whether the proceeds are being used appropriately. It is possible that, pending their use, we may invest those net proceeds in a way that does not yield a favorable, or any, return for us. The failure of our management team to use such funds effectively could have a material adverse effect on our business, financial condition, operating results and cash flows.

Risks Related to Our Financial Condition and Status as an Early-Stage Company

Based on our estimates and current business plan, we expect that we will need to raise additional capital by late 2024 or early 2025 in order to continue our research and development efforts and achieve our business objectives. We will require a significant amount of cash for expenditures as we invest in ongoing research and development and business operations and may need additional capital sooner than planned to pursue our business objectives and respond to business opportunities, challenges or unforeseen circumstances, and we cannot be sure that additional financing will be available. If we are unable to raise additional funding when needed, we may be required to delay, limit or substantially reduce our quantum computing development efforts.

Our business and future plans for expansion are capital-intensive, and the specific timing of cash inflows and outflows may fluctuate substantially from period to period. We will require a significant amount of cash for expenditures as we invest in ongoing research and development and business operations. For example, in addition to our continuing investment in our technology roadmap we may continue to invest in the expansion of and upgrades to our Fab-1 facility. In addition to increased electrical utility fees going forward, we may be required to pay additional amounts in taxes, penalties or otherwise related to the electrical utility fees that were unpaid and unrecognized in prior periods as discussed in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this prospectus. We have incurred and expect to incur costs related to, among other things, the reduction in workforce that we announced in February 2023 and our recent management transitions, in addition to expenses relating to the remediation of our material weaknesses in internal controls over financial reporting. The actual amounts we may be required to spend on these and other matters may be greater and more significant than our expectations. We believe that our existing cash, cash equivalents and marketable securities should be sufficient to meet our anticipated operating cash needs for at least the next 12 months based on our current business plan, and expectations and assumptions considering current macroeconomic conditions. Based on our estimates and current business plan, we expect that we will need to obtain additional capital by late 2024 or early 2025 in order to continue our research and development efforts and achieve our business objectives. Our operating plan may change because of factors currently unknown, and we may need to seek additional funds sooner than planned, through public or private equity or debt financings or other sources, such as strategic collaborations or other transactions. In addition, we may seek additional capital even if we believe that we have sufficient funds for current or future operating plans. Such financings may result in dilution to stockholders, issuance of securities with priority as to liquidation and dividend and other rights more favorable than common stock, imposition of debt covenants and repayment obligations or other restrictions that may adversely affect our business. Any funds we raise may not be sufficient to enable us to continue to implement our long-term business strategy. Further, our ability to raise additional capital may be adversely impacted by worsening global economic conditions and the recent disruptions to and volatility in the credit and financial markets in the United States and worldwide resulting from, the continuing impacts of the COVID-19 pandemic, recent and potential future disruptions in access to bank deposits or lending commitments due to bank failures and military conflict with Russia and Ukraine and the related sanctions imposed against Russia. There can be no assurance that further deterioration in credit and financial markets and confidence in economic conditions will not occur. A severe or prolonged economic downturn could result in a variety of risks to our business, including weakened demand for our products and services and our ability to raise additional capital when needed on acceptable terms, if at all. If the equity and credit markets continue to deteriorate, it may make any necessary debt or equity financing more difficult, more costly, and more dilutive. Failure to secure any necessary financing in a timely manner and on favorable terms could impair our ability to achieve our growth strategy, could harm our financial performance and stock price and could require us to delay or abandon our business plans. We cannot anticipate all of the ways in which the current economic climate and financial market conditions could adversely impact our business. There can be no assurance that financing will be available to us on favorable terms, or at all. The inability to

obtain financing when needed may make it more difficult for us to operate our business or implement our growth plans and we may be required to delay, limit or substantially reduce our quantum computing development efforts. In addition, our ability to raise additional capital through the sale of securities could be significantly impacted by the resale of our securities by holders of our securities which could result in a significant decline in the trading price of our securities and potentially hinder our ability to raise capital at terms that are acceptable to us or at all.

We are in our early stages and have a limited operating history, which makes it difficult to forecast our future results of operations.

Our business was founded in 2013 and has operated quantum computers over the cloud since 2017. As a result of our limited operating history, our ability to accurately forecast the future results of operations is limited and subject to a number of uncertainties, including our ability to plan for and model future growth. Our ability to generate revenues will largely be dependent on our ability to develop and produce quantum computers with increasing numbers of quantum bits (“qubits”) and with increasing levels of performance. As of April 5, 2023, the highest number of qubits we have externally deployed is a quantum computer with 80 qubits with 94.5% median fidelities. As a result, our scalable business model has not been formed and our technology roadmap may not be realized as quickly as hoped, or even at all. We have in the past failed to meet publicly announced milestones and may fail to meet projected technological milestones in the future. In addition, we have in the past changed our technology roadmap, including anticipated milestones and timing thereof. For example, in 2018, we announced that we planned to build and deploy a 128-qubit system over the subsequent twelve months, but have not to date built a 128-qubit system. In addition, in 2022 we updated our technology roadmap, including anticipated timing for the 84Q Ankaa system, the 336Q Lyra system, 1,000+ qubit system, 4,000+ qubit system and incremental milestones relating to applications, access and production, Quantum Cloud Services (“Quantum Cloud Services” or “QCS”), quantum processing units and chip fabrication. We revised our technology roadmap in February 2023 to reflect our updated business strategy, including our plan to first concentrate on the goal of delivering the Ankaa-1 84-qubit system, then prioritize increasing the performance of the anticipated Ankaa-1 84-qubit system by focusing efforts on improving performance with an anticipated Ankaa-2 84-qubit system, and thereafter scale to develop the anticipated Lyra 336-qubit system, and after our internal deployment of Ankaa-1 in March 2023, we further refined this plan to reflect that we plan to continue to work to improve Ankaa-1 performance before the potential external release of the system to select customers. We may further update the technology roadmap in the future, including anticipated milestones and anticipated timeline for milestones. Furthermore, we may be unable to achieve the milestones in our technology roadmap on their announced anticipated timeline or at all. The development of our scalable business model will likely require the incurrence of a substantially higher level of costs than incurred to date, while our revenues will not substantially increase unless and until more powerful, scalable, higher performing computers are produced, which requires a number of technological advancements which may not occur on the currently anticipated timetable or at all. As a result, our historical results should not be considered indicative of our future performance. Further, in future periods, our growth could slow or decline for a number of reasons, including but not limited to slowing demand for our Quantum Cloud Services (“Quantum Cloud Services” or “QCS”), increased competition, changes to technology, inability to scale up or improve performance of our technology, a decrease in the growth of the market, or our failure, for any reason, to continue to take advantage of growth opportunities.

We have also encountered, and will continue to encounter, risks and uncertainties frequently experienced by growing companies in rapidly changing industries. If our assumptions regarding these risks and uncertainties and our future growth are incorrect or change, or if we do not address these risks successfully, our operating and financial results could differ materially from our expectations, and our business could suffer. Our success as a business ultimately relies upon fundamental research and development breakthroughs in the coming years. There is no certainty these research and development milestones will be achieved as quickly as hoped, or even at all.

We have a history of operating losses and expect to incur significant expenses and continuing losses for the foreseeable future.

We incurred net losses of \$71.5 million and \$41.7 million for the year ended December 31, 2022 and the twelve months ended December 31, 2021, respectively, and \$38.2 million for the eleven months ended December 31, 2021. As of December 31, 2022, we had an accumulated deficit of \$278.7 million. We believe that we will continue to incur operating and net losses each quarter until at least the time we begin generating significant revenue from our narrow or broad quantum advantage quantum computers, which may never occur. Even with significant production, our services may never become profitable.

We expect the rate at which we will incur losses to be significantly higher in future periods as we, among other things, continue to incur significant expenses in connection with the design, development and manufacturing of our quantum computers; and as we expand our research and development activities; invest in manufacturing capabilities; build up inventories of components for our quantum computers; increase our sales and marketing activities; develop our infrastructure; and increase our general and administrative functions to support our growing operations and our being a public company. We may find that these efforts are more expensive than we currently anticipate or that these efforts may not result in revenues, which would further increase our losses. If we are unable to achieve and/or sustain profitability, or if we are unable to achieve the growth that we expect from these investments, it could have a material effect on our business, financial condition or results of operations. Our business model is unproven and may never allow us to cover our costs.

Our operating results may be adversely affected by unfavorable economic and market conditions. We have recorded a charge for goodwill impairment and may in the future be required to record significant charges for impairment of other assets or investments.

An adverse change in market conditions, including a sustained decline in our stock price, negative changes to the Company's position in the market, or lack of growth in demand for our products and services could be considered to be an impairment triggering event. Such changes in the future could impact valuation assumptions relating to the recoverability of assets and may result in impairment charges to our long-lived assets, other assets or investments, which would negatively impact our operating results and harm our business.

There are inherent uncertainties in management's estimates, judgments and assumptions used in assessing recoverability of goodwill, intangible, and other long-lived assets. Any material changes in key assumptions, including failure to meet business plans, a deterioration in the U.S. and global financial markets, an increase in interest rates or an increase in the cost of equity financing by market participants within the industry or other unanticipated events and circumstances, may decrease our projected cash flows or increase discount rates and could potentially result in an impairment charge. From time to time, we may be required to record a significant charge to earnings in our consolidated financial statements during the period in which any impairment of our goodwill or intangible and other long-lived assets is determined, which might have a materially adverse impact on our business operations and our financial position or results of operations.

For example, in assessing our goodwill in connection with the preparation of the financial statements for the fiscal year ended December 31, 2022, we concluded indicators of impairment were present due to the current macroeconomic conditions, including continued declines in our stock price. Based upon the results of the impairment test, we recorded a goodwill impairment charge of \$5.4 million within the consolidated statement of operations.

We may not be able to scale our business quickly enough to meet customer and market demand, which could result in lower profitability or cause us to fail to execute on our business strategies.

In order to grow our business, we will need to continually evolve and scale our business and operations to meet customer and market demand. Quantum computing technology has never been sold at large-scale

[Table of Contents](#)

commercial levels. Evolving and scaling our business and operations places increased demands on our management as well as our financial and operational resources to:

- attract new customers and grow our customer base;
- maintain and increase the rates at which existing customers use our platform, sell additional products and services to our existing customers, and reduce customer churn;
- invest in our platform and product offerings;
- effectively manage organizational change;
- accelerate and/or refocus research and development activities;
- expand manufacturing and supply chain capacity;
- increase sales and marketing efforts;
- broaden customer-support and services capabilities;
- maintain or increase operational efficiencies;
- implement appropriate operational and financial systems; and
- establish and maintain effective financial disclosure controls and procedures and remediate material weaknesses thereof.

Commercial traction of quantum computing technology may never occur. As noted above, there are significant technological challenges associated with developing, producing, marketing and selling services in the advanced technology industry, including our services, and we may not be able to resolve all of the difficulties that may arise in a timely or cost-effective manner, or at all. We may not be able to cost effectively manage production at a scale or quality consistent with customer demand in a timely or economical manner.

Our ability to scale is dependent also upon components we must source from multiple industries including: from the electronics industry with low-noise microwave components, CPUs, GPUs, FPGAs; cryogenic industry with dilution refrigerators and associated helium gas products; and from the semiconductor industry with silicon wafers and other specialty materials, tooling and measurement equipment. Shortages or supply interruptions in any of these components will adversely impact our ability to deliver revenues.

If large-scale development of our quantum computers commences, our computers may contain defects in design and manufacture that may cause them to not perform as expected or that may require repair and design changes. Our quantum computers are inherently complex and incorporate technology and components that have not been used for other applications and that may contain defects and errors, particularly when first introduced. We have a limited frame of reference from which to evaluate the long-term performance of our computers. There can be no assurance that we will be able to detect and fix any defects in our quantum computers in a timely manner that does not disrupt our services to our customers. If our technology fails to perform as expected, customers may seek out a competitor or turn away from quantum computing entirely, each of which could adversely affect our sales and brand and could adversely affect our business, prospects and results of operations. If defects in our technology lead to erroneous outputs, third parties relying on those outputs may draw from them erroneous conclusions, creating a risk that we will be liable to those third parties.

If we cannot evolve and scale our business and operations effectively, we may not be able to execute our business strategies in a cost-effective manner and our business, financial condition, profitability and results of operations could be adversely affected.

Even if the market in which we compete achieves its anticipated growth levels, our business could fail to grow at similar rates, if at all.

Our success will depend upon our ability to expand, scale our operations, and increase our sales and support capability. Even if the market in which we compete meets the size estimates and growth forecasted, our business could fail to grow at similar rates, if at all.

Our growth is dependent upon our ability to successfully expand our solutions and services, retain customers, bring in new customers and retain critical talent. Unforeseen issues associated with scaling up and constructing quantum computing technology at commercially viable levels could negatively impact our business, financial condition and results of operations.

Our growth is dependent upon our ability to successfully market and sell our quantum computing services and solutions. We do not have experience with the large-scale production and sale of quantum computing technology. Our growth and long-term success will depend upon the development of our sales and retention capabilities.

Moreover, because of our unique technology, our customers will require particular support and service functions, some of which are not currently available, and may never be available. If we experience delays in adding such support capacity or servicing our customers efficiently, or experiences unforeseen issues with the reliability of our technology, we could overburden our servicing and support capabilities. Similarly, increasing the number of our products and services would require us to rapidly increase the availability of these services. Failure to adequately support and service our customers may inhibit our growth and ability to expand.

There is no assurance that we will be able to ramp our business to meet our sales, manufacturing, installation, servicing and quantum computing targets globally, that expected growth levels will prove accurate or that the pace of growth or coverage of our customer infrastructure network will meet customer expectations. For example, our competitors may achieve certain narrow and/or broad quantum milestones faster than us, which may negatively impact our business and prospects. Failure to grow at rates similar to that of the quantum computing industry may adversely affect our operating results and ability to effectively compete within the industry.

We may not manage growth effectively, including with respect to our employee base, and managing our operations successfully.

Our failure to manage growth effectively could harm our business, results of operations and financial condition. We anticipate that a period of significant expansion will be required to address potential growth. This expansion will place a significant strain on our management, operational and financial resources. For example, the expansion of our Fab 1 facility is ongoing and we may not complete the expansion on terms originally anticipated, in a timely manner or at all, which could have a material impact on our business, financial condition or results of operations. Expansion will require significant cash investments and management resources and there is no guarantee that they will generate additional sales of our products or services, or that we will be able to avoid cost overruns or be able to hire additional personnel to support us. In addition, we will also need to ensure our compliance with regulatory requirements in various jurisdictions applicable to the sale, installation and servicing of our products. To manage the growth of our operations and personnel, we must establish appropriate and scalable operational and financial systems, procedures and controls and establish and maintain a qualified finance, administrative and operations staff. The reduction in workforce that we announced in February 2023 may impair our ability to manage growth and maintain operations effectively, due to factors such as loss of institutional knowledge and expertise, employee attrition beyond our intended reduction in force, a reduction in morale among our remaining employees, greater-than-anticipated costs incurred in connection with implementing the restructuring, and the risk that we may not achieve the benefits from the restructuring to the extent or as quickly as we anticipate, all of which may have a material adverse effect on our business, results of operations or financial condition. We may be unable to acquire the necessary capabilities and personnel required to manage growth or to identify, manage and exploit potential strategic relationships and market opportunities.

[Table of Contents](#)

Our recent updates to our business plan and workforce reduction may not have the anticipated benefits and we may incur additional costs or other difficulties.

In February 2023, we announced an updated business plan and implemented a workforce reduction. The objective of these initiatives is to focus our organization and its resources on nearer-term strategic priorities. We believe these changes were needed to streamline our organization and reallocate our resources to better align with our current strategic goals.

However, the changes to our business strategy and the reduction in workforce may yield unintended consequences and costs, such as the loss of institutional knowledge and expertise, attrition beyond our intended reduction-in-force, a reduction in morale among our remaining employees, and the risk that we may not achieve the anticipated benefits, all of which may have an adverse effect on our development activities, ability to progress our technology roadmap, and results of operations or financial condition. We may also incur other charges, costs, future cash expenditures or impairments not currently contemplated due to events that may occur as a result of, or in connection with, the revised business plan and reduction in workforce. In addition, we may be unsuccessful in distributing the duties and obligations of departed employees among our remaining employees. In addition, our management may need to divert a disproportionate amount of its attention away from our day-to-day strategic and operational activities and devote a substantial amount of time to managing these organizational changes.

We may also discover that the reductions in workforce and cost cutting measures will make it difficult for us to pursue new opportunities and initiatives and require us to hire qualified replacement personnel, which may require us to incur additional and unanticipated costs and expenses. Moreover, there is no assurance we will be successful in our pursuit of any of our new goals. Our failure to successfully accomplish any of the above activities and goals may have a material adverse impact on our business, financial condition, and results of operations.

We have a credit facility secured by substantially all of our assets under which we have borrowed and may in the future borrow additional amounts; any indebtedness thereunder could adversely affect our financial position and our ability to raise additional capital and prevent us from fulfilling our obligations.

On March 10, 2021, we entered into a Loan and Security Agreement (as amended from time to time, the “Loan Agreement”) with Trinity Capital Inc. (“Trinity”). The credit facility had an available borrowing capacity of \$32.0 million. As of December 31, 2022, we had total outstanding indebtedness of approximately \$30.7 million consisting of outstanding borrowings under the Loan Agreement. Any future additional borrowings under this agreement are at the sole discretion of the lender. This and future indebtedness incurred under the Loan Agreement may:

- limit our ability to borrow additional funds for working capital, capital expenditures, acquisitions, or other general business purposes;
- require us to use a portion of our cash flow from operations to make debt service payments instead of other purposes, thereby reducing the amount of cash flow available for future working capital, capital expenditures, acquisitions, or other general business purposes;
- expose us to the risk of increased interest rates as following the consummation of our initial public offering borrowings under the Loan Agreement are subject to interest at the greater of (i) a floating per annum rate equal to 7.5% above the prime rate, or (ii) a fixed per annum rate equal to 11.0%, also paid on a monthly basis;
- limit our flexibility to plan for, or react to, changes in our business and industry;
- increase our vulnerability to the impact of adverse economic, competitive and industry conditions; and
- increase our cost of borrowing.

[Table of Contents](#)

The credit facility is secured by substantially all of our assets. In addition, the Loan Agreement contains, and the agreements governing our future indebtedness may contain, restrictive covenants that may limit our ability to engage in activities that may be in our long-term best interest. These restrictive covenants include, among others, financial reporting requirements and limitations on indebtedness, liens, mergers, consolidations, liquidations and dissolutions, sales of assets, dividends and other restricted payments, investments (including acquisitions) and transactions with affiliates. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of substantially all of our debt and potentially the foreclosure on our assets in the event we are unable to repay all amounts owed.

Our ability to use net operating loss carryforwards and other tax attributes may be limited.

We have incurred losses during our history, do not expect to become profitable in the near future and may never achieve profitability. To the extent that we continue to generate taxable losses, unused losses will carry forward to offset future taxable income, if any, until such unused losses expire, if at all. As of December 31, 2022 we had U.S. federal net operating loss carryforwards of approximately \$234.7 million.

Under current law, U.S. federal net operating loss carryforwards generated in taxable periods beginning after December 31, 2017, may be carried forward indefinitely, but the deductibility of such net operating loss carryforwards is limited to 80% of taxable income. It is uncertain if and to what extent various states will conform to current federal law.

In addition, under Sections 382 and 383 of the Internal Revenue Code of 1986, as amended (the “Code”), our federal net operating loss carryforwards and other tax attributes may become subject to an annual limitation in the event of certain cumulative changes in our ownership. An “ownership change” pursuant to Section 382 of the Code generally occurs if one or more stockholders or groups of stockholders who own at least 5% of a company’s stock increase their ownership by more than 50 percentage points over their lowest ownership percentage within a rolling three-year period. Our ability to utilize our net operating loss carryforwards and other tax attributes to offset future taxable income or tax liabilities may be limited as a result of ownership changes, including changes in connection with the Business Combination or other transactions. Similar rules may apply under state tax laws. We have not yet determined the amount of the cumulative change in our ownership resulting from the Business Combination or other transactions, or any resulting limitations on our ability to utilize our net operating loss carryforwards and other tax attributes.

If we earn taxable income, such limitations could result in increased future income tax liability and our future cash flows could be adversely affected. We have recorded a valuation allowance related to our net operating loss carryforwards and other deferred tax assets due to the uncertainty of the ultimate realization of the future benefits of those assets.

Risks Related to Our Business and Industry

We have not produced quantum computers with high qubit counts or at volume and we face significant barriers in our attempts to produce quantum computers, including the need to invent and develop new technology. If we cannot successfully overcome those barriers, our business will be negatively impacted and could fail.

Producing quantum computers is a difficult undertaking. There are significant engineering challenges that we must overcome to build our quantum computers. We are still in the development stage and face significant challenges in completing development of our quantum computers and in producing quantum computers in sufficient volumes. Some of the development challenges that could prevent the introduction of our quantum computers include, but are not limited to, failure to find scalable ways to manipulate qubits, failure to reduce error rates, failure to transition quantum systems to leverage low-cost components, and failure to realize multi-chip quantum computer technology.

[Table of Contents](#)

Even if we complete development and achieve volume production of our quantum computers, if the cost, accuracy, performance characteristics or other specifications of the quantum computer fall short of our expectations, our business, financial condition and results of operations would be adversely affected.

Any future generations of hardware and software developed to demonstrate narrow quantum advantage and broad quantum advantage, and the anticipated release of an 84 qubit system and a subsequent 84 qubit system with reduced error rates, and the potential later release of a 336 qubit system, each of which is an important anticipated milestone for our technology roadmap and commercialization, may not occur on our anticipated timeline or at all.

Our successful execution of our technology roadmap is based on the development of multiple generations of quantum computing systems, including hardware that demonstrates narrow quantum advantage and broad quantum advantage, and the anticipated release of an 84 qubit system and a subsequent 84 qubit system with error rates reduced to 1% or lower, in addition to the potential release of a 336 qubit system. The future success of our technology roadmap will depend upon our ability to continue to increase the number of qubits and decrease error rates in each subsequent generation of our quantum computer. If we are unable to achieve the increase in the number of qubits or decrease in error rates on the timeframe that we anticipate, the availability of future generations of quantum computer systems may be materially delayed, or may never occur. In the past we have failed to meet publicly announced milestones and may fail to meet projected milestones in the future. If our technology roadmap is delayed or never achieved, this would have a material impact on our business, financial condition or results of operations. See “*We are in our early stages and have a limited operating history, which makes it difficult to forecast our future results of operations.*”

If our computers fail to achieve quantum advantage, our business, financial condition and future prospects may be harmed. Moreover, the standards by which we measure our progress may be based on assumptions and expectations that are not accurate or that may change as quantum computing evolves.

Quantum advantage refers to the moment when a quantum computer can compute faster than traditional computers, while quantum supremacy is achieved once quantum computers are powerful enough to complete calculations that traditional supercomputers cannot perform at all. Narrow quantum advantage is when a quantum computer is able to solve practical problems in production workloads with improved accuracy, speed or cost. Broad quantum advantage is when quantum advantage is seen in many applications and developers prefer quantum computers to a traditional computer. No current quantum computers, including our quantum hardware, have reached broad quantum advantage, and may never reach such advantage. Achieving narrow quantum advantage and broad quantum advantage will be critical to the success of any quantum computing company, including ours. However, achieving quantum advantage would not necessarily lead to commercial viability of the technology that accomplished such advantage, nor would it mean that such system could outperform classical computers in tasks other than the one used to determine a quantum advantage. In addition, the definitions and expectations with respect to what constitutes quantum advantage, including the anticipated stages of quantum technology maturation, may continue to evolve and may also diverge from others in the industry. Quantum computing technology, including narrow quantum advantage and broad quantum advantage, may take years or decades to be realized, if ever. In addition, the standards by which we measure our progress may be based on assumptions and expectations that are not accurate or that may change as quantum computing evolves. For example, CLOPS as a speed test was originally developed by IBM in October 2021. To our knowledge, CLOPS as a speed test has not been investigated or verified by any independent third party. In addition, while we have applied CLOPS in testing the speed of our Aspen-M-2 and Aspen-11 systems, there is no guarantee that we applied the test in the same way as IBM and, as a result, any variability in the application of the test as between Rigetti, IBM or others in the industry that may apply CLOPS in the future could render CLOPS scores incomparable and actual relative performance may materially differ from reported results. Other than IBM, others in the industry have not announced CLOPS as a speed test. As a result, the speed of other competitors as measured by CLOPS is not currently known. In addition, the solution accuracy provided by quantum computers is another key factor, and a quantum computer that may be slower may be preferable to users if it provides a

[Table of Contents](#)

more accurate answer for certain applications. Moreover, the relative leads reflected by speed tests such as CLOPS can change as new generations of quantum computers are introduced by industry participants and, consequently, any advantages cannot be considered permanent and can be expected to change from time to time. Current CLOPS tests may not be indicative of the results of future tests.

If we cannot develop quantum computers that have quantum advantage, customers may not continue to purchase our products and services. If other companies' quantum computers reach narrow quantum advantage or broad quantum advantage prior to the time we reach such capabilities, it could lead to a loss of customers. If any of these events occur, it could have a material adverse effect on our business, financial condition or results of operations.

We may expend our resources to pursue particular products, designs, sectors or investments and we may fail to capitalize on such products, designs, sectors or investments and/or forego other products, designs, sectors or investments that may have been more profitable or for which there may have been a greater likelihood of success.

Because we have limited financial and operational resources, we must prioritize our research and development for use of quantum computing within certain products, designs, sectors or investments. Correctly prioritizing our research and development activities is particularly important for us due to the breadth of companies building or seeking to build universal, gate-model quantum computing systems that can meet the requirements for solving commercial problems. As a result, we may forego or delay pursuit of opportunities in other products, designs, sectors or investments that later prove to have greater commercial potential and ability to achieve quantum advantage. For example, although we currently believe that quantum machine learning for finance is poised to be an early domain of quantum advantage through rapid value capture from quick integration, the risks associated with developing a product that can compute algorithms that scale efficiently to real-world size applications and will be applicable to multiple use cases and competition in creating such a product, among others, could outweigh the benefits. In addition, in February 2023, we announced an updated business strategy and revisions to our technology roadmap reflecting a nearer term reprioritization and focus on lower qubit systems than our prior business strategy and technology roadmap. We may fail to capitalize on the products, designs, sectors, or investments we choose to pursue, and our resource allocation decisions may cause us to or forego viable or more profitable products, designs, sectors or investments, which would have an adverse effect on our business, prospects and financial results.

The quantum computing industry is competitive on a global scale and we may not be successful in competing in this industry or establishing and maintaining confidence in our long-term business prospects among current and future partners and customers.

The markets in which we operate are rapidly evolving and highly competitive. As the marketplace continues to mature and new technologies and competitors enter, we expect competition to intensify. Our current competitors include:

- large, well-established tech companies that generally compete across our products, including Quantinuum, Google, Microsoft, Amazon, Intel and IBM;
- large research organizations funded by sovereign nations such as China, Russia, Canada, Australia and the United Kingdom, and those in the European Union as of the date of this prospectus and we believe additional countries in the future;
- less-established public and private companies with competing technology, including companies located outside the United States; and
- new or emerging entrants seeking to develop competing technologies.

We compete based on various factors, including technology, performance, multi-cloud availability, brand recognition and reputation, customer support and differentiated capabilities, including ease of administration and

[Table of Contents](#)

use, scalability and reliability, data governance and security. Many of our competitors have substantially greater brand recognition, customer relationships, and financial, technical and other resources, including an experienced sales force and sophisticated supply chain management. They may be able to respond more effectively than us to new or changing opportunities, technologies, standards, customer requirements and buying practices. In addition, many countries are focused on developing quantum computing solutions either in the private or public sector and may subsidize quantum computers which may make it difficult for us to compete. Many of these competitors do not face the same challenges we do in growing our business. In addition, other competitors might be able to compete with us by bundling their other products in a way that does not allow us to offer a competitive solution.

Additionally, we must be able to achieve our objectives in a timely manner lest quantum computing lose ground to competitors, including competing technologies. For example, our competitors may achieve certain narrow and/or broad quantum milestones faster than us, which may negatively impact our business and prospects. Because there are a large number of market participants, including certain sovereign nations, focused on developing quantum computing technology, we must dedicate significant resources to achieving any technical objectives on the timelines established by our management team. Any failure to achieve objectives in a timely manner could adversely affect our business, operating results and financial condition.

For all of these reasons, competition may negatively impact our ability to maintain and grow consumption of our platform or put downward pressure on our prices and gross margins, any of which could materially harm our reputation, business, results of operations, and financial condition.

We depend on a limited number of customers for a significant percentage of our revenue and the loss or temporary loss of a major customer for any reason could harm our financial condition.

We have historically generated most of our revenue from a limited number of customers. Our three largest customers, which differed by period, collectively accounted for 66% of our revenue for the fiscal year ended December 31, 2022, and 66% of our revenue for the eleven months ended December 31, 2021. As a consequence of the concentrated nature of our customer base, our quarterly revenue and results of operations may fluctuate from quarter to quarter and are difficult to estimate, and any delay, reduction or cancellation of orders or services rendered or any acceleration or delay in anticipated purchases or grants and awards by our larger customers could materially affect our revenue and results of operations in any quarterly period. For further information regarding our customer concentration, refer to Note 2 to the notes to our audited consolidated financial statements for the year ended December 31, 2022, included elsewhere in this prospectus.

We may be unable to sustain or increase our revenue from our larger customers, grow revenues with new or other existing customers, or offset the discontinuation of concentrated purchases by our larger customers with purchases by new or existing customers. These larger customers could also reduce or discontinue their purchases of our products and services in the event they transition to internally developed products and services or determine to divide their purchases of our products and services between us and a second source. We expect that such concentrated purchases will continue to contribute materially to our revenue for the foreseeable future and that our results of operations may fluctuate materially as a result of such larger customers' buying patterns or funding cycles. The loss or temporary loss of such customers, or a significant delay or reduction in their purchases, could materially harm our business, financial condition, results of operations and prospects.

A significant portion of our revenue currently depends on contracts with the public sector, and our failure to receive and maintain government contracts or changes in the contracting or fiscal policies of the public sector could have a material adverse effect on our business.

We derive a significant portion of our revenue from contracts with U.S. federal and foreign governments and government agencies, and we believe that the success and growth of our business will continue to depend on our successful procurement of government contracts. We have historically derived, and expect to continue to derive, a significant portion of our revenue from contracts with agencies of the U.S. federal and foreign

[Table of Contents](#)

governments, either directly by us or through other government contractors. In the year ended December 31, 2022 and the eleven months ended December 31, 2021, sales to government entities comprised 81.3% and 80.0% of our total revenue, respectively.

Contracts with government agencies are subject to a number of challenges and risks. The bidding process for government contracts can be highly competitive, expensive, and time-consuming, often requiring significant upfront time and expense without any assurance that these efforts will generate revenue. We also must comply with laws and regulations relating to the formation, administration, and performance of contracts, which provide public sector customers rights, many of which are not typically found in commercial contracts. In addition, our perceived relationship with the U.S. government could adversely affect our business prospects in certain non-U.S. geographies or with certain non-U.S. governments.

Accordingly, our business, financial condition, results of operations, and growth prospects may be adversely affected by certain events or activities, including, but not limited to:

- Changes in government fiscal or procurement policies, or decreases in government funding available for procurement of goods and services generally, or for our federal government contracts specifically;
- Changes in government programs or applicable requirements;
- Restrictions in the grant of personnel security clearances to our employees;
- Ability to maintain facility clearances required to perform on classified contracts for U.S. federal government and foreign government agencies;
- Changes in the political environment, including before or after a change to the leadership within the government administration, and any resulting uncertainty or changes in policy or priorities and resultant funding;
- Changes in the government's attitude towards the capabilities that we offer;
- Changes in the government's attitude towards us as a company or our platforms;
- Appeals, disputes, or litigation relating to government procurement, including but not limited to bid protests by unsuccessful bidders on potential or actual awards of contracts to us or our partners by the government;
- The adoption of new laws or regulations or changes to existing laws or regulations;
- Budgetary constraints, including automatic reductions as a result of "sequestration" or similar measures and constraints imposed by any lapses in appropriations for the federal government or certain of its departments and agencies;
- Influence by, or competition from, third parties with respect to pending, new, or existing contracts with government customers;
- Changes in political or social attitudes with respect to security or data privacy issues;
- Potential delays or changes in the government appropriations or procurement processes, including as a result of events such as war, incidents of terrorism, natural disasters, and public health concerns or epidemics, such as the coronavirus pandemic; and
- Increased or unexpected costs or unanticipated delays caused by other factors outside of our control.

For example, following the second quarter 2022, we announced that we anticipate lower-than-expected new government contract opportunities and what we believe to be slower than anticipated timing of government funding and appropriations with respect to relevant projects in 2022.

[Table of Contents](#)

Any such of the foregoing events or activities, among others, could cause governments and governmental agencies to delay or refrain from entering into contracts with us and/or purchasing our computers in the future, reduce the size or timing of payments with respect to our services to, or purchases from, existing or new government customers, or otherwise have an adverse effect on our business, results of operations, financial condition, and growth prospects.

Our business is currently dependent upon our relationship with our cloud providers. There are no assurances that we will be able to commercialize quantum computers from our relationships with cloud providers.

We currently offer access to quantum computing as a service (“Quantum Computing as a Service” or “QCaaS”), both directly to our end users with our own Quantum Cloud Services and indirectly to end users through public cloud providers such as Amazon Braket and Microsoft Azure Quantum who integrate our QCS into their own quantum computing platforms. These public cloud partners operate a service in direct competition with our providing direct access to QCS. Currently, a majority of our QCaaS business is run through the AWS service, and we intend to partner with additional partners to provide access to our QCaaS. Cloud computing partnerships could be terminated, or not scale as anticipated, or even at all.

There is risk that one or more of the public cloud providers, such as AWS and Azure, could use their respective control of their public clouds to control market pricing of the services, restrict access, embed innovations or privileged interoperating capabilities in competing products, bundle competing products and leverage their public cloud customer relationships to exclude us from opportunities. Further, they have the resources to acquire or partner with existing and emerging providers of competing technology and thereby accelerate adoption of those competing technologies. All of the foregoing could make it difficult or impossible for us to provide products and services that compete favorably with those of the public cloud providers.

Further, if our contractual and other business relationships with our partners are terminated, either by the counterparty or by us, suspended or suffer a material change to which we are unable to adapt, such as the elimination of services or features on which we depend, we would be unable to provide our QCaaS business at the same scale and would experience significant delays and incur additional expense in transitioning customers to a different public cloud provider.

Currently, our customer agreement with AWS remains in effect until (i) terminated for convenience, which we may do for any reason by providing AWS notice and closing our account and which AWS may do for any reason by providing us at least 30 days’ notice or (ii) terminated for cause, which either party may do if the other party has an uncured material breach and which AWS may do immediately upon notice. Although alternative data center providers could host our business on a substantially similar basis to AWS, transitioning the cloud infrastructure currently hosted by AWS to alternative providers could potentially be disruptive, and we could incur significant one-time costs. If we are unable to renew our agreement with AWS on commercially acceptable terms, our agreement with AWS is prematurely terminated, or it adds additional infrastructure providers, we may experience costs or downtime in connection with the transfer to, or the addition of, new data center providers. If AWS or other infrastructure providers increase the costs of their services, our business, financial condition, or results of operations could be materially and adversely affected.

Any material change in our contractual and other business relationships with our partners, could result in reduced use of our systems, increased expenses, including service credit obligations, and harm to our brand and reputation, any of which could have a material adverse effect on our business, financial condition and results of operations.

[Table of Contents](#)

We rely on access to high performance third party classical computing through public clouds, high performance computing centers and on-premises computing infrastructure to deliver performant quantum solutions to customers. We may not be able to maintain high quality relationships and connectivity with these resources which could make it harder for us to reach customers or deliver solutions in a cost-effective manner.

Our QCS incorporates high performance classical computing through public clouds to provide services to end users and our partners. These services are predominantly on AWS.

Any material change in our contractual and other business relationships with AWS or other cloud provider, could result in reduced use of our systems, increased expenses, including service credit obligations, and harm our brand and reputation, any of which could have a material adverse effect on our business, financial condition and results of operations.

Further, if our contractual and other business relationships with our partners are terminated, either by the counterparty or by us, suspended or suffer a material change to which we are unable to adapt, such as the elimination of services or features on which we depend, we would be unable to provide our QCaaS business at the same scale and would experience significant delays and incur additional expense in transitioning customers to a different public cloud provider.

We depend on certain suppliers to source products. Failure to maintain our relationship with any of these suppliers, or a failure to replace any of these suppliers, could have a material adverse effect on our business, financial position, results of operations and cash flows.

We buy our products and supplies from suppliers that manufacture and source products from the United States and abroad. We enter into agreements with many of our suppliers that provide us with exclusive or restrictive distribution rights, limiting our competitors' ability to source materials from such suppliers. Our ability to identify and develop relationships with qualified suppliers and enter into exclusive or restrictive distribution rights agreements with suppliers who can satisfy our standards for quality and our need to access products and supplies in a timely and efficient manner is a significant challenge. Any failure to maintain our relationship with any of our top ten largest suppliers, or a failure to replace any such supplier that is lost, could have a material adverse effect on our business, financial position, results of operations and cash flows.

We may be required to replace a supplier if their products do not meet our quality or safety standards. In addition, our suppliers could discontinue selling products at any time for reasons that may or may not be in our control or the suppliers' control, including shortages of raw materials, environmental and social supply chain issues, pandemic, labor disputes or weather conditions. Disruptions in transportation lines or the ongoing military conflict involving Russia and Ukraine may also cause global supply chain issues that affect us or our suppliers. We generally have multiple sources of supply, however, in some cases, materials are provided by a single supplier. For example, our small and mid-size cryogenic refrigerators have been provided by a single supplier and we have begun to source from a second supplier. In addition, we expect that larger cryogenic refrigerators required in connection with the potential development of systems greater than 100 qubits will be provided by a single supplier, at least for an initial period of time. We cannot assure that any of our suppliers or potential suppliers will have the capacity to supply larger cryogenic refrigerators on the terms, timing or scale that we expect. The loss of, or substantial decrease in the availability of, products from our suppliers, or the loss of a key supplier, temporarily or permanently, could result in a material shortage of products, which could lead to price escalations that we may be unable to offset by our prices to our customers. When supply chain issues are later resolved and prices return to normal levels, we may be required to reduce the prices at which we sell our products to our customers in order to remain competitive. In addition, even where these risks do not materialize, we may incur costs as we prepare contingency plans to address such risks. Our operating results and inventory levels could suffer if we are unable to promptly replace a supplier who is unwilling or unable to satisfy our requirements with a supplier providing similar products. In addition, our suppliers' ability to deliver products may also be affected by raw material and commodity cost volatility or financing constraints caused by credit market conditions, which could materially and negatively impact our net sales and operating costs, at least until

[Table of Contents](#)

alternate sources of supply are arranged. Any delay or unavailability of key products required for our development activities could delay or prevent us from further developing our systems and applications on our expected timelines or at all.

Additionally, our business, financial position, results of operations and cash flows could be materially and adversely affected by our inability to continue sourcing products from our suppliers. A weak or declining economy could strain our suppliers, possibly resulting in supply disruption. In addition, there is a risk that our current or future suppliers, service providers, manufacturers or other partners may not survive such difficult economic times, which could directly affect our ability to attain our operating goals on schedule and on budget. Although we seek to have alternate sources and recover increases in input costs through price increases in our products, shortages, supply chain interruptions or regulatory changes or other governmental actions could result in the need to change suppliers or incur cost increases that cannot, in the short term, or in some cases even in the long-term, be offset by our prices.

We may face unknown supply chain issues that could delay the development or introduction of our products and negatively impact our business and operating results.

We are reliant on third-party suppliers for components necessary to develop and manufacture our quantum computing solutions. Any of the following factors (and others) could have an adverse impact on the availability of these components:

- our inability to enter into agreements with suppliers on commercially reasonable terms, or at all;
- difficulties of suppliers ramping up their supply of materials to meet our requirements;
- a significant increase in the price of one or more components, including due to industry consolidation occurring within one or more component supplier markets or as a result of decreased production capacity at manufacturers;
- any reductions or interruption in supply, including disruptions on our global supply chain as a result of the COVID-19 pandemic, which we have experienced, and may in the future experience or as a result of the ongoing military conflict between Russia and Ukraine and the related sanctions imposed against Russia (including as a result of disruptions in global shipping, the transport of products, energy supply, cybersecurity incidents and banking systems as well as our ability to control input costs) or otherwise;
- financial problems of either manufacturers or component suppliers;
- significantly increased freight charges, raw material costs, rising electrical power costs and other expenses associated with our business;
- other factors beyond our control or which we do not presently anticipate, could also affect our suppliers' ability to deliver components to us on a timely basis;
- a failure to develop our supply chain management capabilities and recruit and retain qualified professionals;
- a failure to adequately authorize procurement of inventory by our contract manufacturers; or
- a failure to appropriately cancel, reschedule or adjust our requirements based on our business needs.

If any of the aforementioned factors were to materialize, it could cause us to halt production of our quantum computing solutions and/or entail higher manufacturing costs, any of which could materially adversely affect our business, operating results, and financial condition and could materially damage customer relationships.

[Table of Contents](#)

Our systems depend on the use of certain development tools, supplies, equipment and production methods. If we are unable to procure the necessary tools, supplies and equipment to build our quantum systems, or are unable to do so on a timely and cost-effective basis, and in sufficient quantities, we may incur significant costs or delays which could negatively affect our operations and business.

There are limited suppliers to sources of materials which may be necessary for the production of our technology. We are currently reliant on a single or small number of suppliers for certain resources. While we are currently looking to engage additional suppliers, there is no guarantee we will be able to establish or maintain relationships with such additional suppliers on terms satisfactory to us. Reliance on any single supplier increases the risks associated with being unable to obtain the necessary components because the supplier may have manufacturing constraints, can be subject to unanticipated shutdowns and/or may be affected by natural disasters and other catastrophic events. Some of these factors may be completely out of our and our suppliers' control. Failure to acquire sufficient quantities of the necessary components in a timely or cost-effective manner could materially harm our business.

Even if we are successful in developing quantum computing systems and executing our strategy, competitors in the industry may achieve technological breakthroughs which render our quantum computing systems obsolete or inferior to other products.

Our continued growth and success depends on our ability to innovate and develop quantum computing technology in a timely manner and effectively market these products. Without timely innovation and development, our quantum computing solutions could be rendered obsolete or less competitive by changing customer preferences or because of the introduction of a competitor's newer technologies. We believe that many competing technologies will require a technological breakthrough in one or more problems related to science, fundamental physics or manufacturing. While it is uncertain whether such technological breakthroughs will occur in the next several years that does not preclude the possibility that such technological breakthroughs could eventually occur. Any technological breakthroughs which render our technology obsolete or inferior to other products, could have a material effect on our business, financial condition or results of operations.

We may be unable to reduce the cost of developing our quantum computers, which may prevent us from pricing our quantum systems competitively.

The success of our business is dependent upon the cost per qubit decreasing over the next several years as our quantum computers advance, which is based on achieving anticipated economies of scale related to demand for our computer systems, technological innovation and negotiations with third-party parts suppliers. If we do not achieve economies of scale or if the anticipated cost savings do not materialize, we may be unable to achieve a lower cost per qubit, which would make our quantum computing solution less competitive than those produced by our competitors and could have a material adverse effect on our business, financial condition or results of operations. Due to macroeconomic headwinds, we have experienced and may continue to experience increased costs, including with respect to labor and products.

The quantum computing industry is in its early stages and volatile, and if it does not develop, if it develops slower than we expect, if it develops in a manner that does not require use of our quantum computing solutions, if it encounters negative publicity or if our solution does not drive commercial engagement, the growth of our business will be harmed.

The nascent market for quantum computers is still rapidly evolving, characterized by rapidly changing technologies, competitive pricing and competitive factors, evolving government regulation and industry standards, and changing customer demands and behaviors. If demand for quantum computers in general does not develop as expected, or develops more slowly than expected, our business, prospects, financial condition and operating results could be harmed.

In addition, our growth and future demand for our products is highly dependent upon the adoption by developers and customers of quantum computers, as well as on our ability to demonstrate the value of quantum computing to our customers. Delays in future generations of our quantum computers or technical failures at other quantum computing companies could limit acceptance of our solution. Negative publicity concerning our solution or the quantum computing industry as a whole could limit acceptance of our solution. We believe quantum computing will solve many large-scale problems. However, such problems may never be solvable by quantum computing technology. If our clients and partners do not perceive the benefits of our solution, or if our solution does not drive member engagement, then demand for our products may not develop at all, or it may develop slower than we expect. If any of these events occur, it could have a material adverse effect on our business, financial condition or results of operations. If progress towards quantum advantage ever slows relative to expectations, it could adversely impact revenues and customer confidence to continue to pay for testing, access and “quantum readiness.” This would harm or even eliminate revenues in the period before quantum advantage.

We could suffer disruptions, outages, defects and other performance and quality problems with our quantum computing systems, our production technology partners or with the public cloud, data centers and internet infrastructure on which we rely.

Our business depends on our quantum computing systems being available. We have experienced, and may in the future further experience, disruptions, outages, defects and other performance and quality problems with our systems. We have also experienced, and may in the future further experience, disruptions, outages, defects and other performance and quality problems with the public cloud and internet infrastructure on which our systems rely. These problems can be caused by a variety of factors, including failed introductions of new functionality, vulnerabilities and defects in proprietary and open-source software, hardware components, human error or misconduct, capacity constraints, design limitations or denial of service attacks or other security-related incidents. We do not have a contractual right with our public cloud providers that compensates us for any losses due to availability interruptions in the public cloud.

Any disruptions, outages, defects and other performance and quality problems with our quantum computing systems or with the public cloud and internet infrastructure on which we rely, could result in reduced use of our systems, increased expenses, including service credit obligations, and harm to our brand and reputation, any of which could have a material adverse effect on our business, financial condition and results of operations.

If we cannot successfully execute on our strategy, including in response to changing customer needs and new technologies and other market requirements, or achieve our objectives in a timely manner, our business, financial condition and results of operations could be harmed.

The quantum computing market is characterized by rapid technological change, changing user requirements, uncertain product lifecycles and evolving industry standards. We believe that the pace of innovation will continue to accelerate as technology changes and different approaches to quantum computing mature on a broad range of factors, including system architecture, error correction, performance and scale, ease of programming, user experience, markets addressed, types of data processed, and data governance and regulatory compliance. Our future success depends on our ability to continue to innovate and increase customer adoption of our quantum solutions. If we are unable to enhance our quantum computing system to keep pace with these rapidly evolving customer requirements, or if new technologies emerge that are able to deliver competitive products at lower prices, more efficiently, with better functionality, more conveniently, or more securely than our platform, our business, financial condition and results of operations could be adversely affected.

We are highly dependent on our ability to attract and retain senior executive leadership and other key employees, such as quantum physicists, software engineers and other key technical employees, which is critical to our success. If we fail to retain talented, highly qualified senior management, engineers and other key employees or attract them when needed, such failure could negatively impact our business.

Our future success is highly dependent on our ability to attract and retain our executive officers, key employees and other qualified personnel. As we build our brand and become more well known, there is increased risk that competitors or other companies may seek to hire our personnel. The loss of the services provided by these individuals will adversely impact the achievement of our business strategy. These individuals could leave our employment at any time, as they are “at will” employees. A loss of a member of senior management, or an engineer or other key employee particularly to a competitor, could also place us at a competitive disadvantage. Effective succession planning is also important to our long-term success. Failure to ensure effective transfer of knowledge and smooth transitions involving key employees could hinder our strategic planning and execution. For example, our former President and Chief Executive Officer, Dr. Chad Rigetti, resigned in the fourth quarter of 2022 and has been replaced by our current President and Chief Executive Officer, Dr. Subodh Kulkarni, following a transition period with an interim President and Chief Executive Officer. In addition, we recently announced the departure of our former Chief Financial Officer, Brian Sereda, and the appointment of Jeffrey Bertelsen as our new Chief Financial Officer, in addition to the departure of our former Chief Technology Officer, Michael Harburn, and promotion of David Rivas to such position. An inadequate transition in our management may cause disruption to our business due to, among other things, diverting management’s attention away from the operations of the business or causing a deterioration in morale.

Furthermore, the reduction in workforce that we announced in February 2023 may yield unintended consequences and costs, such as the loss of institutional knowledge and expertise, employee attrition beyond our intended reduction in force, a reduction in morale among our remaining employees, greater-than-anticipated costs incurred in connection with implementing the restructuring, and the risk that we may not achieve the benefits from the restructuring to the extent or as quickly as we anticipate, all of which may have a material adverse effect on our business, results of operations or financial condition. These restructuring initiatives could place substantial demands on our management and employees, which could lead to the diversion of our management’s and employees’ attention from other business priorities. In addition, we may discover that the workforce reduction and other restructuring efforts will make it difficult for us to pursue new opportunities and initiatives and require us to hire qualified replacement personnel, which may require us to incur additional and unanticipated costs and expenses.

Our future success also depends on our continuing ability to attract, develop, motivate, and retain highly qualified and skilled employees. The market for highly skilled workers and leaders in the quantum computing industry is extremely competitive. In particular, hiring qualified personnel specializing in supply chain management, engineering and sales, as well as other technical staff and research and development personnel is critical to our business and the development of our quantum computing systems. Some of these professionals are hard to find and we may encounter significant competition in our efforts to hire them. Many of the other companies with which we compete for qualified personnel have greater financial and other resources than we do. The effective operation of our supply chain, including the acquisition of critical components and materials, the development of our quantum computing technologies, the commercialization of our quantum computing technologies and the effective operation of our managerial and operating systems all depend upon our ability to attract, train and retain qualified personnel in the aforementioned specialties. Additionally, changes in immigration and work permit laws and regulations or the administration or interpretation of such laws or regulations could impair our ability to attract and retain highly qualified employees. If we cannot attract, train and retain qualified personnel in this competitive environment, we may experience delays in the development of our quantum computing technologies and be otherwise unable to develop and grow our business as projected, or even at all.

Our future growth and success depends on our ability to sell effectively to government entities and large enterprises.

Our potential customers tend to be government agencies and large enterprises. Therefore, our future success will depend on our ability to effectively sell our products to such customers. Sales to these end-customers involve risks that may not be present (or that are present to a lesser extent) with sales to non-governmental agencies or smaller customers. These risks include, but are not limited to, (i) increased purchasing power and leverage held by such customers in negotiating contractual arrangements with us and (ii) longer sales cycles and the associated risk that substantial time and resources may be spent on a potential end-customer that elects not to purchase our solutions. Sales to government agencies are typically under fixed fee development contracts, which involve additional risks. See “*If our cost and time estimates for fixed fee arrangements do not accurately anticipate the cost of servicing those arrangements, we could experience losses on these arrangements or our profitability could be reduced.*” In addition, government contracts generally include the ability of government agencies to terminate early which, if exercised, would result in a lower contract value and lower than anticipated revenues generated by such arrangement. See “*-Contracts with U.S. government entities subject us to risks including early termination, audits, investigations, sanctions and penalties.*”

Government agencies and large organizations often undertake a significant evaluation process that results in a lengthy sales cycle. Our contracts with government agencies are typically structured in phases, with each phase subject to satisfaction of certain conditions. As a result, the actual scope of work performed pursuant to any such contracts, in addition to related contract revenue, could be less than total contract value. In addition, product purchases by such organizations are frequently subject to budget constraints, multiple approvals and unanticipated administrative, processing and other delays. Finally, these organizations typically have longer implementation cycles, require greater product functionality and scalability, require a broader range of services, demand that vendors take on a larger share of risks, require acceptance provisions that can lead to a delay in revenue recognition and expect greater payment flexibility. All of these factors can add further risk to business conducted with these potential customers and could lead to lower revenue results than originally anticipated.

We may not be able to accurately estimate the future supply and demand for our quantum computers, which could result in a variety of inefficiencies in our business and hinder our ability to generate revenue. If we fail to accurately predict our manufacturing requirements, we could incur additional costs or experience delays.

It is difficult to predict our future revenues and appropriately budget for our expenses, and we may have limited insight into trends that may emerge and affect our business. We anticipate being required to provide forecasts of our demand to our current and future suppliers prior to the scheduled delivery of products to potential customers. Currently, there is no historical basis for making judgments on the demand for our quantum computers or our ability to develop, manufacture, and deliver quantum computers, or our profitability, if any, in the future. If we overestimate our requirements, our suppliers may have excess inventory, which indirectly would increase our costs. If we underestimate our requirements, our suppliers may have inadequate inventory, which could interrupt manufacturing of our products and result in delays in shipments and revenues. In addition, lead times for materials and components that our suppliers order may vary significantly and depend on factors such as the specific supplier, contract terms and demand for each component at a given time. If we fail to order sufficient quantities of product components in a timely manner, the delivery of quantum computers and related compute time to our potential customers could be delayed, which would harm our business, financial condition and operating results.

Because our success depends, in part, on our ability to expand sales internationally, our business will be susceptible to risks associated with international operations.

We currently maintain offices and have sales personnel in the United States, the United Kingdom, Australia and Canada. In the year ended December 31, 2022 and the eleven months ended December 31, 2021, our non-U.S. revenue was approximately 15.0% and 28.9% of our total revenue, respectively. Depending on customer opportunities and our ability to access quantum engineering talent, we may continue to expand our

[Table of Contents](#)

international operations, which may include opening offices in new jurisdictions. Any additional international expansion efforts that we are undertaking and may undertake may not be successful. In addition, conducting international operations subjects us to new risks, some of which we have not generally faced in the United States or other countries where we currently operate. These risks include, among other things:

- unexpected costs and errors in the localization of our platform and solutions, including translation into foreign languages and adaptation for local culture, practices and regulatory requirements;
- lack of familiarity and burdens of complying with foreign laws, legal standards, privacy and cybersecurity standards, regulatory requirements, tariffs and other barriers, and the risk of penalties to our customers and individual members of management or employees if our practices are deemed to not be in compliance;
- practical difficulties of enforcing intellectual property rights in countries with varying laws and standards and reduced or varied protection for intellectual property rights in some countries;
- an evolving legal framework and additional legal or regulatory requirements for data privacy and cybersecurity, which may necessitate the establishment of systems to maintain data in local markets, requiring us to invest in additional data centers and network infrastructure, and the implementation of additional employee data privacy documentation (including locally-compliant data privacy notice and policies), all of which may involve substantial expense and may cause us to need to divert resources from other aspects of our business, all of which may adversely affect our business;
- unexpected changes in regulatory requirements, taxes, trade laws, tariffs, export quotas, custom duties or other trade restrictions;
- difficulties in managing systems integrators and technology partners;
- differing technology standards;
- different pricing environments, longer sales cycles, longer accounts receivable payment cycles and difficulties in collecting accounts receivable;
- increased financial accounting and reporting burdens and complexities;
- difficulties in managing and staffing international operations including the proper classification of independent contractors and other contingent workers, differing employer/employee relationships and local employment laws;
- increased costs involved with recruiting and retaining an expanded employee population outside the United States through cash and equity-based incentive programs and unexpected legal costs and regulatory restrictions in issuing our shares to employees outside the United States;
- global political and regulatory changes that may lead to restrictions on immigration and travel for our employees;
- fluctuations in exchange rates that may decrease the value of foreign-based revenue;
- potentially adverse tax consequences, including the complexities of foreign value added tax (or other tax) systems, restrictions on the repatriation of earnings, and transfer pricing requirements; and
- permanent establishment risks and complexities in connection with international payroll, tax and social security requirements for international employees.

Additionally, operating in international markets also requires significant management attention and financial resources. We cannot be certain that the investment and additional resources required in establishing operations in other countries will produce desired levels of revenue or profitability.

Compliance with laws and regulations applicable to our global operations also substantially increases our cost of doing business in foreign jurisdictions. We have limited experience in marketing, selling and supporting

our platform outside of the United States. Our limited experience in operating our business internationally increases the risk that any potential future expansion efforts that we may undertake will not be successful. If we invest substantial time and resources to expand our international operations and are unable to do so successfully and in a timely manner, our business, financial condition, revenues, results of operations or cash flows will suffer. We may be unable to keep current with changes in government requirements as they change from time to time. Failure to comply with these regulations could harm our business. In many countries, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or other regulations applicable to us. Although we have implemented policies and procedures designed to ensure compliance with these laws and policies, there can be no assurance that all of our employees, contractors, partners and agents will comply with these laws and policies. Violations of laws or key control policies by our employees, contractors, partners or agents could result in delays in revenue recognition, financial reporting misstatements, enforcement actions, reputational harm, disgorgement of profits, fines, civil and criminal penalties, damages, injunctions, other collateral consequences or the prohibition of the importation or exportation of our solutions and could harm our business, financial condition, revenues, results of operations or cash flows.

Our international sales and operations subject us to additional risks and costs, including the ability to engage with customers in new geographies, exposure to foreign currency exchange rate fluctuations, that can adversely affect our business, financial condition, revenues, results of operations or cash flows.

We derive a significant portion of revenue from our customers in the United States. We may expand our international operations if we are able to achieve narrow or broad quantum advantage. However, there are a variety of risks and costs associated with our international sales and operations, which may include making additional investments prior to the proven adoption of our solutions, the cost of conducting our business internationally and hiring and training international employees and the costs associated with complying with local law. Furthermore, we cannot predict the rate at which our platform and solutions will be accepted in international markets by potential customers. We currently have sales, customer support and engineering personnel outside the United States in the United Kingdom, Australia and Canada, and have established an entity in Germany; however, our sales, support and engineering organization outside the United States is smaller than our U.S. sales organization. We believe our ability to attract new customers to subscribe to our platform or to attract existing customers to renew or expand their use of our platform is directly correlated to the level of engagement we obtain with the customer. To the extent we are unable to effectively engage with non-U.S. customers due to our limited sales force capacity, we may be unable to effectively grow in international markets.

Given our international presence, we are exposed to the effects of fluctuations in currency exchange rates. While we have primarily transacted with customers in U.S. dollars, we expect to continue to generate some revenues, denominated in foreign currencies. Additionally, fluctuations in the value of the U.S. dollar and foreign currencies may make our subscriptions more expensive for international customers, which could harm our business. Additionally, we incur expenses for employee compensation and other operating expenses at our non-U.S. locations in the local currency for such locations. Fluctuations in the exchange rates between the U.S. dollar and other currencies could result in an increase to the U.S. dollar equivalent of such expenses. These fluctuations could cause our results of operations to differ from our expectations or the expectations of our investors. Additionally, such foreign currency exchange rate fluctuations could make it more difficult to detect underlying trends in our business and results of operations.

Our international operations may subject us to greater than anticipated tax liabilities.

The amount of taxes we pay in different jurisdictions depends on the application of the tax laws of various jurisdictions, including the United States, to our international business activities, changes in tax rates, new or revised tax laws or interpretations of existing tax laws and policies, and our ability to operate our business in a manner consistent with our corporate structure and intercompany arrangements. The taxing authorities of the jurisdictions in which we operate may challenge our methodologies for pricing intercompany transactions pursuant to our intercompany arrangements or disagree with our determinations as to the income and expenses

[Table of Contents](#)

attributable to specific jurisdictions. If such a challenge or disagreement were to occur, and our position was not sustained, we could be required to pay additional taxes, interest, and penalties, which could result in one-time tax charges, higher effective tax rates, reduced cash flows, and lower overall profitability of our operations. Our financial statements could fail to reflect adequate reserves to cover such a contingency. Similarly, a taxing authority could assert that we are subject to tax in a jurisdiction where we believe we have not established a taxable connection, often referred to as a “permanent establishment” under international tax treaties, and such an assertion, if successful, could increase our expected tax liability in one or more jurisdictions.

Our quantum computing systems may not be compatible with some or all industry-standard software and hardware in the future, which could harm our business.

We have focused our efforts on creating quantum computing hardware, the operating system for such hardware, a suite of low-level software programs that optimize execution of quantum algorithms on our hardware, application programming interfaces (“APIs”) to access our systems, software development kits (“SDKs”) for system and application developers, and quantum programming languages for low- and high-level application developers. The industry is rapidly evolving, and customers have many choices for programming languages, application libraries, APIs, and SDKs, some of which may not be compatible with our own languages, APIs or SDKs. Our quantum computing solutions are designed today to be compatible with most major quantum software development kits, including Qiskit, Cirq, and Open QASM, all of which are open source. If a proprietary (not open source) software toolset became the standard for quantum application development in the future by a competitor, usage of our hardware might be limited as a result which would have a negative impact on the Company. Similarly, if a piece of hardware became a necessary component for quantum computing (for instance, quantum networking) and we cannot integrate with, the result might have a negative impact on the Company.

If our customers are unable to achieve compatibility between other software and hardware and our hardware, it could impact our relationships with such customers or with customers, generally, if the incompatibility is more widespread. In addition, the mere announcement of an incompatibility problem relating to our products with higher level software tools could cause us to suffer reputational harm and/or lead to a loss of customers. Any adverse impacts from the incompatibility of our quantum computing solutions could adversely affect our business, operating results and financial condition.

We may rely heavily on future collaborative partners and third parties to develop key, relevant algorithms and programming to make our quantum systems commercially viable.

We have entered into, and may enter into, strategic partnerships to develop and commercialize our current and future research and development programs with other companies to accomplish one or more of the following:

- obtain expertise;
- obtain sales and marketing services or support;
- obtain equipment and facilities;
- develop relationships with potential future customers; and
- generate revenue.

We may not be successful in establishing or maintaining suitable partnerships, and we may not be able to negotiate collaboration agreements having terms satisfactory to the Company, or at all. Failure to make or maintain these arrangements or a delay or failure in a collaborative partner’s performance under any such arrangements could harm our business and financial condition.

If our information technology systems or data, or those of third parties upon which we rely, are or were compromised, we could experience adverse consequences resulting from such compromise, including but not limited to regulatory investigations or actions; litigation; fines and penalties; disruptions of our business operations; reputational harm; loss of revenue or profits; loss of customers or sales; and other adverse consequences, which may adversely affect our business.

In the ordinary course of our business, we and the third parties upon which we rely, process proprietary, confidential, and sensitive data, including personal data, intellectual property, and trade secrets (collectively, sensitive information). Cyber-attacks, malicious internet-based activity, online and offline fraud, denial-of-service attacks, ransomware attacks, business email compromises, computer malware, viruses, and social engineering (including phishing) and other similar activities threaten the confidentiality, integrity, and availability of our sensitive information and information technology systems, and those of the third parties upon which we rely. Such threats are prevalent in the technology industry and our customers' industries and continue to rise, are increasingly difficult to detect, and come from a variety of sources, including traditional computer "hackers," threat actors, "hacktivists," organized criminal threat actors, personnel (such as through theft or misuse), sophisticated nation states, and nation-state-supported actors. The techniques may be used to sabotage or to obtain unauthorized access to our platform, systems, networks, or physical facilities where our quantum computers are stored, and we may be unable to implement adequate preventative measures or stop security breaches while they are occurring. U.S. law enforcement agencies have indicated to us that quantum computing technology is of particular interest to certain malicious cyber threat actors. In addition, our cybersecurity risk could be increased as a result of the ongoing military conflict between Russia and Ukraine and the related sanctions imposed against Russia.

Some actors now engage and are expected to continue to engage in cyber-attacks, including without limitation nation-state actors for geopolitical reasons and in conjunction with military conflicts and defense activities. During times of war and other major conflicts, we, the third parties upon which we rely, may be vulnerable to a heightened risk of these attacks, including retaliatory cyber-attacks, that could materially disrupt our systems and operations, supply chain, and ability to produce, sell and distribute our goods and services. We and the third parties upon which we rely are subject to a variety of evolving threats, including but not limited to social-engineering attacks (including through phishing attacks), malicious code (such as viruses and worms), malware (including as a result of advanced persistent threat intrusions), denial-of-service attacks (such as credential stuffing), credential harvesting, personnel misconduct or error, ransomware attacks, supply-chain attacks, software bugs, server malfunctions, software or hardware failures, loss of data or other information technology assets, adware, telecommunications failures, earthquakes, fires, floods, and other similar threats. In particular, severe ransomware attacks are becoming increasingly prevalent and can lead to significant interruptions in our operations, loss of sensitive data and income, reputational harm, and diversion of funds. Extortion payments may alleviate the negative impact of a ransomware attack, but we may be unwilling or unable to make such payments due to, for example, applicable laws or regulations prohibiting such payments.

We rely on third-party service providers and technologies to operate critical business systems to process sensitive information in a variety of contexts. Our platform is built to be accessed through third-party public cloud providers such as AWS. These providers may also experience breaches and attacks to their products which may impact our systems. Data security breaches may also result from non-technical means, such as actions by an employee with access to our systems. Our ability to monitor these third parties' information security practices is limited, and these third parties may not have adequate information security measures in place. If our third-party service providers experience a security incident or other interruption, we could experience adverse consequences. While we may be entitled to damages if our third-party service providers fail to satisfy their privacy or security-related obligations to us, any award may be insufficient to cover our damages, or we may be unable to recover such award.

Any of the previously identified or similar threats could cause a security incident or other interruption that could result in unauthorized, unlawful, or accidental acquisition, modification, destruction, loss, alteration, encryption, disclosure of, or access to our sensitive information or our information technology systems, or those

[Table of Contents](#)

of the third parties upon whom we rely. A security incident or other interruption could disrupt our ability (and that of third parties upon whom we rely) to provide our platform/products/services.

We may expend significant resources or modify our business activities to try to protect against security incidents. Certain data privacy and security obligations may require us to implement and maintain specific security measures or industry-standard or reasonable security measures to protect our information technology systems and sensitive information. While we and our third-party cloud providers have implemented security measures designed to protect against security breaches, these measures could fail or may be insufficient, resulting in the unauthorized disclosure, modification, misuse, destruction, or loss of sensitive or confidential information. We take steps to detect and remediate vulnerabilities, but we may not be able to detect and remediate all vulnerabilities because the threats and techniques used to exploit the vulnerability change frequently and are often sophisticated in nature. Therefore, such vulnerabilities could be exploited but may not be detected until after a security incident has occurred. These vulnerabilities pose material risks to our business. Further, we may experience delays in developing and deploying remedial measures designed to address any such identified vulnerabilities.

Applicable data privacy and security obligations may require us to notify relevant stakeholders of security incidents. Such disclosures are costly, and the disclosure or the failure to comply with such requirements could lead to adverse consequences. Actual or perceived breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of proprietary information or sensitive or confidential data about the Company, our partners, our customers or third parties could expose us and the parties affected to a risk of loss or misuse of this information, resulting in litigation and potential liability, paying damages, regulatory inquiries or actions, damage to our brand and reputation or other harm to our business. Our efforts to prevent and overcome these challenges could increase our expenses and may not be successful. If we fail to detect or remediate a security breach in a timely manner, or a breach otherwise affects our customers, or if we suffer a cyber-attack that impacts our ability to operate our platform, we may experience adverse consequences, such as government enforcement actions (for example, investigations, fines, penalties, audits, and inspections); additional reporting requirements and/or oversight; restrictions on processing sensitive information (including personal data); litigation (including class claims); indemnification obligations; negative publicity; material damage to our reputation; monetary fund diversions; interruptions in our operations (including availability of data); financial loss; and other similar harms. Security incidents and attendant consequences may cause customers to stop using our services, deter new customers from using our services, and negatively impact our ability to grow and operate our business.

Our contracts may not contain limitations of liability, and even where they do, there can be no assurance that limitations of liability in our contracts are sufficient to protect us from liabilities, damages, or claims related to our data privacy and security obligations. We cannot be sure that our insurance coverage will be adequate or sufficient to protect us from or to mitigate liabilities arising out of our privacy and security practices, that such coverage will continue to be available on commercially reasonable terms or at all, or that such coverage will pay future claims.

In addition to experiencing a security incident, third parties may gather, collect, or infer sensitive information about us from public sources, data brokers, or other means that reveals competitively sensitive details about our organization and could be used to undermine our competitive advantage or market position.

Unfavorable conditions in our industry or the global economy, could limit our ability to grow our business and negatively affect our results of operations.

Our results of operations have varied and may continue to vary based on the impact of changes in our industry or the global economy on us or our customers and potential customers. Negative conditions in the general economy both in the United States and abroad, including conditions resulting from changes in gross domestic product growth, financial and credit market fluctuations, international trade relations, pandemics (such

as the COVID-19 pandemic), political turmoil, natural catastrophes, warfare, and terrorist attacks on the United States or elsewhere, could cause a decrease in business investments, including the progress on development of quantum technologies, and negatively affect the growth of our business. In addition, in challenging economic times, our current or potential future customers may experience cash flow problems and as a result may modify, delay or cancel plans to purchase our products and services. Additionally, if our customers are not successful in generating sufficient revenue or are unable to secure financing, they may not be able to pay, or may delay payment of, accounts receivable due to it. Moreover, our key suppliers may reduce their output or become insolvent, thereby adversely impacting our ability to manufacture our products.

Furthermore, uncertain economic conditions may make it more difficult for us to raise funds through borrowings or private or public sales of debt or equity securities. We cannot predict the timing, strength or duration of any economic slowdown, instability or recovery, generally or within any particular industry.

Government actions and regulations, such as tariffs and trade protection measures, may limit our ability to obtain products from our suppliers or sell our products and services to customers. Political challenges between the United States and countries in which our suppliers are located, and changes to trade policies, including tariff rates and customs duties, trade relations between the United States and those countries and other macroeconomic issues could adversely impact our business. The United States administration has announced tariffs on certain products imported into the United States, and some countries have imposed tariffs in response to the actions of the United States. There is also a possibility of future tariffs, trade protection measures or other restrictions imposed on our products or on our customers by the United States or other countries that could have a material adverse effect on our business. Our technology may be deemed a matter of national security and as such our customer base may be tightly restricted. We may accept government grants that place restrictions on the business' ability to operate.

Unstable market and economic conditions have had and may continue to have serious adverse consequences on our business, financial condition and share price.

The global economy, including credit and financial markets, has experienced extreme volatility and disruptions, including severely diminished liquidity and credit availability, declines in consumer confidence, declines in economic growth, increases in unemployment rates, increases in inflation rates, higher interest rates, bank failures and uncertainty about economic stability. For example, recent bank failures have resulted in volatility in the capital markets. Similarly, the ongoing military conflict between Russia and Ukraine has created extreme volatility in the global capital markets and is expected to have further global economic consequences, including disruptions of the global supply chain and energy markets. Any volatility and disruptions may have adverse consequences on us or the third parties on whom we rely. If general economic conditions were to deteriorate or remain uncertain for an extended period of time, our liquidity and ability to repay our outstanding debt may be harmed and the trading price of our common stock could decline. Significant decline of stock price has caused, and may cause in the future, a triggering event for impairment testing of fair-valued assets, including goodwill and other long-lived assets. For example, in assessing our goodwill in connection with the preparation of the financial statements for the fourth quarter and fiscal year ended December 31, 2022, we concluded indicators of impairment were present due to the current macroeconomic conditions, including continued declines in our stock price. Based upon the results of the impairment test, we recorded a goodwill impairment charge of \$5.4 million within the consolidated statement of operations for the twelve months ended December 31, 2022. If the equity and credit markets deteriorate, including as a result of political unrest or war, it may make any necessary debt or equity financing more difficult to obtain in a timely manner or on favorable terms, more costly or more dilutive, and we could be forced to delay, reduce or eliminate our research and development programs and other efforts. Increased inflation rates have and are expected to adversely affect us by increasing our costs, including labor and employee benefit costs, and costs for equipment and system components associated with system development. In addition, higher inflation could also increase our customers' operating costs, which could result in reduced budgets for our customers and potentially less demand for our systems. Any significant increases in inflation and related increase in interest rates could have a material adverse effect on our business, results of operations and financial condition.

[Table of Contents](#)

On March 10, 2023, the California Department of Financial Protection and Innovation closed Silicon Valley Bank (“SVB”) and appointed Federal Deposit Insurance Corporation (the “FDIC”) receiver. On March 12, 2023, the Department of the Treasury, the Federal Reserve, and the FDIC jointly released a statement that depositors at SVB and Signature Bank would have access to their funds, even those in excess of the standard FDIC insurance limits, under a systemic risk exception. As of March 14, 2023, we had approximately \$1.0 million of cash with SVB, our sole depositor. We are making arrangements to open accounts with a new financial institution and could experience disruption with customer receivables and vendor payments during the transition process. The majority of our other cash, cash equivalents and investments, consisting of a variety of short-term and high-credit treasury and corporate bonds and other liquid investments, is held in custodial accounts with U.S. Bank for which SVB Asset Management is the advisor. Despite our proactive measures and the measures taken by the United States federal government, there is great uncertainty in the markets regarding the stability of regional banks and the safety of deposits in excess of the FDIC insured deposit limits. The ultimate outcome of these events, and whether further regulatory actions will be taken, cannot be predicted. These events may have a material adverse effect on our liquidity and financial condition if our ability to access funds at SVB and our ability to transfer our other cash, cash equivalents and investments to other financial institutions are impaired. In addition, if in the future a financial institution in which we hold funds fails or is subject to significant adverse conditions in the financial or credit markets, we could be subject to a risk of loss of all or a portion of such uninsured funds or be subject to a delay in accessing all or a portion of such uninsured funds. Any such loss or lack of access to these funds could adversely impact our short-term liquidity and ability to meet our operating expense obligations. Further, these events may make equity or debt financing more difficult to obtain, and additional equity or debt financing might not be available on reasonable terms, if at all; difficulties obtaining equity or debt financing could have a material adverse effect on our financial condition, as well as our ability to continue to grow our operations.

If our cost and time estimates for fixed fee arrangements do not accurately anticipate the cost of servicing those arrangements, we could experience losses on these arrangements and our profitability could be reduced.

Our development contracts are typically fixed fee arrangements invoiced on a milestone basis. If we underestimate the amount of effort required to deliver on a contract and/or the period of time required to achieve the milestone, our profitability could be reduced. If the actual costs of completing the contract exceed the agreed upon fixed price, we would incur a loss on the arrangement.

We have identified material weaknesses in our internal control over financial reporting related to the lack of effective review controls over the accounting for complex financial instruments and to the design and operation of our overall closing and financial reporting processes, and we may identify additional material weaknesses in the future. The material weakness over accounting for complex financial instruments has resulted in errors in financial statements for prior periods. If we fail to remediate such material weaknesses, if we identify additional material weaknesses or if we otherwise fail to establish and maintain effective control over financial reporting, it may adversely affect our ability to accurately and timely report our financial results in the future, and may adversely affect investor confidence, our reputation, our ability to raise additional capital and our business operations and financial condition.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of a company’s annual or interim financial statements will not be prevented or detected on a timely basis.

As previously disclosed, in connection with our unaudited condensed consolidated financial statements for the nine months ended October 31, 2021, we identified a material weakness in our internal control over financial reporting related to the lack of effective review controls over the accounting for complex financial instruments. Specifically, the controls failed to identify an error in the accounting for complex warrant instruments. The error related to the Company not properly accounting for the liability associated with the warrants to purchase common stock issued to Trinity Capital Inc. that was subsequently cancelled and reissued for a new warrant in connection with an amendment to the Loan Agreement.

[Table of Contents](#)

In addition, in connection with the preparation of the financial statements for the second quarter of 2022, we also identified and corrected an immaterial error related to the revaluation of the liability associated with the same warrants issued to Trinity Capital. The error was made in the previously issued unaudited condensed consolidated financial statements as of and for the period ended March 31, 2022. We corrected the immaterial error in our condensed consolidated financial statements as of and for the period ended June 30, 2022 and restated our financial statements for the quarters ended March 31, 2022 and June 30, 2022 as described below, and reversed such prior correction and instead reflected such correction in the restated financial statements for the quarter ended March 31, 2022.

In connection with the preparation of the financial statements for the third quarter of 2022, we discovered that the previously identified material weakness led to additional material errors related to the valuation of the Earn-out liability and the Private Warrant liability that affected the previously issued unaudited condensed consolidated financial statements as of and for the periods ended March 31, 2022 and June 30, 2022. These errors were corrected in the unaudited condensed consolidated financial statements as of and for the periods ended March 31, 2022 and June 30, 2022 through a restatement of previously filed financial statements for such periods.

Our management previously concluded that this material weakness in our internal control over financial reporting was due to the fact that at the time we initially identified the material weakness, we did not have sufficient accounting resources and did not have the necessary business processes and related internal controls formally designed and implemented to address the accounting and financial reporting requirements related to these complex instruments. This material weakness continued to exist as of December 31, 2022 due to the reasons described above and due to the shorter period of time that has elapsed since the identification of the additional errors in prior periods related to the material weakness discussed above.

Additionally, in connection with the preparation of the financial statements for the year ended December 31, 2022 appearing elsewhere in this prospectus, we identified a material weakness in our internal control over financial reporting related to the design and operation of our overall closing and financial reporting processes, including the timely preparation of account reconciliations, effective segregation of duties, and a lack of timely review over the financial statement close process. We have concluded that this material weakness is due to the fact that, between the date the company went public pursuant to the Business Combination and December 31, 2022, the company had limited resources and did not have the necessary business processes and related internal controls formally designed and implemented coupled with the appropriate resources with the appropriate level of experience and technical expertise to oversee our closing and financial reporting processes.

As a result of the foregoing, management concluded that our disclosure controls and procedures were not effective at the reasonable assurance level as of the end of the quarterly periods ended March 31, 2022, June 30, 2022, September 30, 2022 and December 31, 2022. Our management is in the process of undertaking a remediation plan and is taking steps to remediate the material weaknesses. The material weaknesses will not be considered remediated until such time as management designs and implements effective controls that operate for a sufficient period of time and concludes, through testing, that these controls are effective.

Our management will continue to monitor the effectiveness of our remediation plan and will make the changes it determines to be appropriate. Although we intend to complete this remediation process as quickly as practicable, we cannot at this time estimate how long it will take, and our initiatives may not prove to be successful in remediating the material weaknesses. Furthermore, we cannot ensure that the measures we have taken to date, and actions we may take in the future, will be sufficient to remediate in a timely manner or at all the control deficiencies that led to our material weaknesses in our internal controls over financial reporting or that they will prevent or avoid potential future material weaknesses due to a failure to implement and maintain adequate internal control over financial reporting or circumvention of these controls. In addition, even if we are successful in strengthening our controls and procedures, in the future these controls and procedures may not be adequate to prevent or identify irregularities or errors or to facilitate the fair presentation of our financial statements.

Any failure to remediate the material weaknesses or otherwise develop or maintain effective controls or any difficulties encountered in their implementation or improvement could limit our ability to prevent or detect a misstatement of our accounts or disclosures that could result in additional material misstatements of our annual or interim financial statements. In such case, we may be unable to maintain compliance with securities law requirements regarding timely filing of periodic reports in addition to the listing requirements of the Nasdaq. For example, in connection with the identification of the material weakness related to the lack of effective review controls over the accounting for complex financial instruments as described above, we were unable to file our Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2022 by the deadline prescribed by the SEC and, as a result, we are not eligible to utilize a Form S-3 registration statement. In addition, we could be subject to sanctions or investigations by the SEC, the Nasdaq Stock Market or other regulatory authorities as well as shareholder litigation which would require additional financial and management resources, and investors may lose confidence in our financial reporting and our stock price may decline as a result. Further, B. Riley has the right to terminate the Purchase Agreement under specified circumstances, including if the related registration statement is unavailable for a specified period of time, including as a result of errors or missing information in our SEC filings. If we fail to make timely and complete filings with the SEC in the future, B. Riley may terminate the Purchase Agreement under specified circumstances. As a result, our ability to obtain any additional financing, or additional financing on favorable terms, could be materially and adversely affected, which in turn, could materially and adversely affect our business, financial condition and the market value of our common stock and require us to incur additional costs to improve our internal control systems and procedures. In addition, perceptions of the Company among customers, suppliers, lenders, investors, securities analysts and others could also be adversely affected.

We have been, and may in the future be, adversely affected by the global COVID-19 pandemic, its various strains or future pandemics.

We face various risks related to epidemics, pandemics, and other outbreaks, including the recent COVID-19 pandemic, including newly discovered strains of the virus. In response to the COVID-19 pandemic, governments have implemented significant measures, including, but not limited to, business closures, quarantines, travel restrictions, shelter-in-place, stay-at-home and other social distancing directives, intended to control the spread of the virus. Companies have also taken precautions, such as requiring employees to work remotely, imposing travel restrictions and temporarily closing businesses. To the extent that these restrictions remain in place, additional prevention and mitigation measures are implemented in the future, or there is uncertainty about the effectiveness of these or any other measures to contain or treat COVID-19 or future pandemics, there is likely to be an adverse impact on our potential customers, our employees and global economic conditions, and consumer confidence and spending, which could materially and adversely affect our operations and demand for our products.

The spread of COVID-19 has and may continue to impact our suppliers by disrupting the manufacturing, delivery and the overall supply chain of parts required to manufacture our quantum computers. In addition, various aspects of our business cannot be conducted remotely, such as the fabrication of quantum processors and the assembly of our quantum computers. Future measures by government authorities may remain in place for a significant period of time and they are likely to adversely affect our future manufacturing plans, sales and marketing activities, business and results of operations. We may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, suppliers, vendors and business partners.

Due to the fluid nature of the COVID-19 pandemic, uncertainties regarding the related economic impact are likely to result in sustained market turmoil, which could also negatively impact our business, financial condition and cash flows. During 2020, we scaled back our recruiting efforts to control costs and experienced weeklong onsite work stoppages due to quarantining related to the COVID-19 pandemic. The extent of COVID-19's effect on our operational and financial performance will depend on future developments, including the duration, spread and intensity of the pandemic, all of which are uncertain and difficult to predict considering the rapidly evolving landscape. As a result, it is not currently possible to ascertain the overall impact of COVID-19 on our business.

[Table of Contents](#)

However, if the pandemic continues to persist as a severe worldwide health crisis, the disease could negatively impact our business, financial condition results of operations and cash flows, and may also have the effect of heightening many of the other risks described in this “Risk Factors” section.

Even after the COVID-19 pandemic has subsided, we may continue to experience an adverse impact to our business as a result of COVID-19’s global economic impact, including any recession that has occurred or may occur in the future.

Our facilities or operations could be damaged or adversely affected as a result of prolonged power outages, natural disasters and other catastrophic events.

Our facilities or operations could be adversely affected by power outages as well as events outside of our control, such as natural disasters and other calamities. We cannot assure you that any backup systems will be adequate to protect us from the effects of fire, floods, typhoons, earthquakes, power loss resulting from such natural disasters, telecommunications failures, break-ins, war, riots, terrorist attacks or similar events. Any of the foregoing events may give rise to interruptions, breakdowns, system failures, technology platform failures or internet failures, which could cause delays in development and fabrication, the loss or corruption of data or malfunctions of software or hardware as well as adversely affect our ability to provide services. A significant power outage may disrupt our operations and could have a material adverse impact on our business, financial condition, results of operations and cash flows

Further, the British National Grid recently warned that the United Kingdom, where we have significant operations, could face planned power cuts to homes and businesses throughout the winter of 2022 and 2023 if the country is unable to import electricity from Europe and it struggles to attract enough gas imports to fuel its gas-fired power plants. A significant power outage could have a material adverse impact on our business, financial condition, results of operations and cash flows.

Risks Related to Litigation and Government Regulation

We are subject to stringent and evolving U.S. state, federal and foreign laws and regulations, rules, contractual obligations, policies and other obligations related to privacy, data use and security. Our actual or perceived failure to comply with such obligations could lead to regulatory investigations or actions; litigation; fines and penalties; disruptions of our business operations; reputational harm; loss of revenue or profits; loss of customers or sales; and otherwise could adversely affect us and our business.

In the ordinary course of business, we collect, receive, store, process, generate, use, transfer, disclose, make accessible, protect, secure, dispose of, transmit, and share (collectively, “processing”) personal data and other sensitive information, including proprietary and confidential business data, trade secrets, and intellectual property. We are, therefore, subject to numerous data privacy and security obligations, such as state and federal laws and regulations, guidance, industry standards, external and internal privacy and security policies, contractual requirements, and other obligations related to privacy, data use and security.

In the United States, federal, state, and local governments have enacted numerous data privacy and security laws, including data breach notification laws, personal data privacy laws, consumer protection laws (e.g., Section 5 of the Federal Trade Commission Act), and other similar laws (e.g., wiretapping laws). In addition, several states have enacted privacy or security breach legislation requiring varying levels of consumer notification in the event of a security breach. For example, the California Consumer Privacy Act (“CCPA”), applies to personal information of consumers, business representatives, and employees, and requires businesses to provide specific disclosures in privacy notices and grants consumers resident in California new rights with respect to the collection of their personal data. The CCPA provides for civil penalties of up to \$7,500 per violation and allows private litigants affected by certain data breaches to recover significant statutory damages. In addition, the California Privacy Rights Act of 2020 (“CPRA”) expands the CCPA’s requirements, including

by adding a new right for individuals to correct their personal information and establishing a new regulatory agency to implement and enforce the law. Several other states such as Virginia and Colorado, have also passed comprehensive privacy laws, and similar laws are being considered in several other states, as well as at the federal and local levels. These developments further complicate compliance efforts, and increase legal risk and compliance costs for us, and the third parties upon whom we rely.

Outside of the United States, foreign governments are raising similar privacy and data security concerns. In particular, the United Kingdom's GDPR ("UK GDPR") imposes strict requirements for processing personal data. For example, under the UK GDPR, companies may face temporary or definitive bans on data processing and other corrective actions; fines of up to 17.5 million pounds or 4% of annual global revenue, whichever is greater; or private litigation related to processing of personal data brought by classes of data subjects or consumer protection organizations authorized at law to represent their interests. In Canada, the Personal Information Protection and Electronic Documents Act ("PIPEDA") and various related provincial laws, as well as Canada's Anti-Spam Legislation ("CASL"), may apply to our operations.

In the ordinary course of business, we may transfer personal data from the United Kingdom (UK), Canada, Australia and other jurisdictions to the United States or other countries. The UK and other jurisdictions have enacted laws requiring data to be localized or limiting the transfer of personal data to other countries. In particular, the UK has significantly restricted the transfer of personal data to the United States and other countries whose privacy laws it believes are inadequate. Other jurisdictions may adopt similarly stringent interpretations of their data localization and cross-border data transfer laws. Although there are currently various mechanisms that may be used to transfer personal data from the UK to the United States in compliance with law, such as the UK's international data transfer addendum, these mechanisms are subject to legal challenges, and there is no assurance that we can satisfy or rely on these measures to lawfully transfer personal data to the United States. If there is no lawful manner for us to transfer personal data from the UK or other jurisdictions to the United States, or if the requirements for a legally-compliant transfer are too onerous, we could face significant adverse consequences, including the interruption or degradation of our operations, the need to relocate part of or all of our business or data processing activities to other jurisdictions at significant expense, increased exposure to regulatory actions, substantial fines and penalties, the inability to transfer data and work with partners, vendors and other third parties, and injunctions against our processing or transferring of personal data necessary to operate our business. Additionally, companies that transfer personal data out of the UK to other jurisdictions, particularly to the United States, are subject to increased scrutiny from regulators, individual litigants, and activist groups.

We are also bound by contractual obligations related to data privacy and security, and our efforts to comply with such obligations may not be successful. For example, certain privacy laws, such as the UK GDPR CCPA, require our customers to impose specific contractual restrictions on their service providers. We publish privacy policies, marketing materials and other statements, such as compliance with certain certifications or self-regulatory principles, regarding data privacy and security. If these policies, materials or statements are found to be deficient, lacking in transparency, deceptive, unfair, or misrepresentative of our practices, we may be subject to investigation, enforcement actions by regulators or other adverse consequences.

Obligations related to data privacy and security are quickly changing, becoming increasingly stringent, and creating regulatory uncertainty. Additionally, these obligations may be subject to differing applications and interpretations, which may be inconsistent or conflict among jurisdictions. Preparing for and complying with these obligations requires us to devote significant resources, which may necessitate changes to our services, information technologies, systems, and practices and to those of any third parties that process personal data on our behalf. In addition, these obligations may require us to change our business model. We may at times fail (or be perceived to have failed) in our efforts to comply with our data privacy and security obligations. Moreover, despite our efforts, our personnel or third parties on whom we rely may fail to comply with such obligations, which could negatively impact our business operations.

If we or the third parties on which we rely fail, or are perceived to have failed, to address or comply with applicable data privacy and security obligations, we could face significant consequences, including but not

[Table of Contents](#)

limited to: government enforcement actions (e.g., investigations, fines, penalties, audits, inspections, and similar); litigation (including class-action claims); additional reporting requirements and/or oversight; bans on processing personal data; orders to destroy or not use personal data; and imprisonment of company officials.

Any of these events could have a material adverse effect on our reputation, business, or financial condition, including but not limited to: loss of customers; interruptions or stoppages in our business operations; interruptions or stoppages of data collection needed to train our algorithms; inability to process personal data or to operate in certain jurisdictions; limited ability to develop or commercialize our products; expenditure of time and resources to defend any claim or inquiry; adverse publicity; or substantial changes to our business model or operations.

Contracts with U.S. government entities subject us to risks including early termination, audits, investigations, sanctions and penalties.

We have several contracts with various government entities, including contracts with NASA, the Defense Advanced Research Project Agency and the Department of Energy, among others, and we may enter into additional contracts with U.S. government entities in the future, which subjects our business to statutes and regulations applicable to companies doing business with the government, including the Federal Acquisition Regulation. These government contracts customarily contain provisions that give the government substantial rights and remedies, many of which are not typically found in commercial contracts and which are unfavorable to contractors. For instance, most U.S. government agencies include provisions that allow the government to unilaterally terminate or modify contracts for convenience, and in that event, the counterparty to the contract may generally recover only its incurred or committed costs and settlement expenses and profit on work completed prior to the termination. If the government terminates a contract for default, the defaulting party may be liable for any extra costs incurred by the government in procuring undelivered items from another source.

In addition, government contracts normally contain additional requirements that may increase our costs of doing business, reduce our profits, and expose us to liability for failure to comply with these terms and conditions. These requirements include, for example:

- specialized disclosure and accounting requirements unique to government contracts;
- financial and compliance audits that may result in potential liability for price adjustments, recoupment of government funds after such funds have been spent, civil and criminal penalties, or administrative sanctions such as suspension or debarment from doing business with the U.S. government;
- public disclosures of certain contract and company information; and
- mandatory socioeconomic compliance requirements, including labor requirements, non-discrimination and affirmative action programs and environmental compliance requirements.

Government contracts are also generally subject to greater scrutiny by the government, which can initiate reviews, audits and investigations regarding our compliance with government contract requirements. In addition, if we fail to comply with government contracting laws, regulations and contract requirements, our contracts may be subject to termination, and we may be subject to financial and/or other liability under our contracts, the Federal Civil False Claims Act (including treble damages and other penalties), or criminal law. In particular, the False Claims Act's "whistleblower" provisions also allow private individuals, including present and former employees, to sue on behalf of the U.S. government. Any penalties, damages, fines or suspension could adversely affect our ability to operate our business and our financial results.

We are subject to U.S. and foreign anti-corruption, anti-bribery and similar laws, and non-compliance with such laws can subject us to criminal or civil liability and harm our business.

We are subject to the U.S. Foreign Corrupt Practices Act of 1977, as amended, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, and other anti-bribery, and anti-corruption laws in

countries in which we conduct activities. Anti-corruption and anti-bribery laws have been enforced aggressively in recent years and are interpreted broadly to generally prohibit companies, their employees, and their third-party intermediaries from authorizing, promising, offering, providing, soliciting, or accepting, directly or indirectly, improper payments or benefits to or from any person whether in the public or private sector. We may engage with partners and third-party intermediaries to market our services and to obtain necessary permits, licenses, and other regulatory approvals. In addition, we or our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities. We can be held liable for the corrupt or other illegal activities of these third-party intermediaries, and of our employees, representatives, contractors, partners, and agents, even if we do not explicitly authorize such activities. We cannot provide any assurance that all of our employees and agents will not take actions in violation of our policies and applicable law, for which we may be ultimately held responsible.

Detecting, investigating, and resolving actual or alleged violations of anti-corruption laws can require a significant diversion of time, resources, and attention from senior management. In addition, noncompliance with anti-corruption or anti-bribery laws could subject us to whistleblower complaints, investigations, sanctions, settlements, prosecution, enforcement actions, fines, damages, other civil or criminal penalties, injunctions, suspension or debarment from contracting with certain persons, reputational harm, adverse media coverage, and other collateral consequences.

We are subject to governmental export and import controls that could impair our ability to compete in international markets due to licensing requirements and subject us to liability if we are not in compliance with applicable laws.

Our products and technologies are subject to U.S. export control and import laws and regulations, including the U.S. Export Administration Regulations, U.S. Customs regulations, and various economic and trade sanctions regulations administered by the U.S. Treasury Department's Office of Foreign Assets Controls. U.S. export control and economic sanctions laws include restrictions or prohibitions on the sale or supply of certain products, technologies, and services to U.S. Government embargoed or sanctioned countries, governments, persons and entities. In addition, certain products and technology may be subject to export licensing or approval requirements. Exports of our products and technology must be made in compliance with export control and sanctions laws and regulations. If we fail to comply with these laws and regulations, we and certain of our employees could be subject to substantial civil or criminal penalties, including the possible loss of export or import privileges; fines, which may be imposed on us and responsible employees or managers; and, in extreme cases, the incarceration of responsible employees or managers.

In addition, changes in our products or technologies or changes in applicable export or import laws and regulations may create delays in the introduction and sale of our products and technologies in international markets or, in some cases, prevent the export or import of our products and technologies to certain countries, governments or persons altogether. Any change in export or import laws and regulations, shift in the enforcement or scope of existing laws and regulations, or change in the countries, governments, persons or technologies targeted by such laws and regulations, could also result in decreased use of our products and technologies, or in our decreased ability to export or sell our products and technologies to existing or potential customers. Any decreased use of our products and technologies or limitation on our ability to export or sell our products and technologies would likely adversely affect our business, financial condition and results of operations.

We expect to incur significant costs in complying with these regulations. Regulations related to quantum computing are currently evolving and we face risks associated with changes to these regulations.

Our business is exposed to risks associated with litigation, investigations and regulatory proceedings.

We may in the future face legal, administrative and regulatory proceedings, claims, demands and/or investigations involving stockholder, consumer, competition and/or other issues relating to our business on a

global basis. Litigation and regulatory proceedings are inherently uncertain, and adverse rulings could occur, including monetary damages, or an injunction stopping us from engaging in certain business practices, or requiring other remedies, such as compulsory licensing of patents. An unfavorable outcome or settlement may result in a material adverse impact on our business, results of operations, financial position and overall trends. In addition, regardless of the outcome, litigation can be costly, time-consuming, and disruptive to our operations. Any claims or litigation, even if fully indemnified or insured, could damage our reputation and make it more difficult to compete effectively or to obtain adequate insurance in the future. In addition, the laws and regulations our business is subject to are complex and change frequently. We may be required to incur significant expense to comply with changes in, or remedy violations of, these laws and regulations.

Furthermore, while we maintain insurance for certain potential liabilities, such insurance does not cover all types and amounts of potential liabilities and is subject to various exclusions as well as caps on amounts recoverable. Even if we believe a claim is covered by insurance, insurers may dispute our entitlement to recovery for a variety of potential reasons, which may affect the timing and, if the insurers prevail, the amount of our recovery.

We may become subject to product liability claims, which could harm our financial condition and liquidity if we are not able to successfully defend or insure against such claims.

We may become subject to product liability claims, even those without merit, which could harm our business prospects, operating results, and financial condition. We may face inherent risk of exposure to claims in the event our quantum computers do not perform as expected or malfunction. A successful product liability claim against us could require us to pay a substantial monetary award. Moreover, a product liability claim could generate substantial negative publicity about our quantum computers and business and inhibit or prevent commercialization of other future quantum computers, which would have material adverse effects on our brand, business, prospects and operating results. Any insurance coverage might not be sufficient to cover all potential product liability claims. Any lawsuit seeking significant monetary damages either in excess of our coverage, or outside of our coverage, may have a material adverse effect on our reputation, business and financial condition. We may not be able to secure additional product liability insurance coverage on commercially acceptable terms or at reasonable costs when needed, particularly if we do face liability for our products and are forced to make a claim under our policy.

We are subject to requirements relating to environmental and safety regulations and environmental remediation matters which could adversely affect our business, results of operations and reputation.

We are subject to numerous federal, state and local environmental laws and regulations governing, among other things, solid and hazardous waste storage, treatment and disposal, and remediation of releases of hazardous materials. There are significant capital, operating and other costs associated with compliance with these environmental laws and regulations. Environmental laws and regulations may become more stringent in the future, which could increase costs of compliance or require us to manufacture with alternative technologies and materials.

Federal, state and local authorities also regulate a variety of matters, including, but not limited to, health, safety and permitting in addition to the environmental matters discussed above. New legislation and regulations may require us to make material changes to our operations, resulting in significant increases to the cost of production.

Our manufacturing process will have hazards such as but not limited to hazardous materials, machines with moving parts, and high voltage and/or high current electrical systems typical of large manufacturing equipment and related safety incidents. There may be safety incidents that damage machinery or product, slow or stop production, or harm employees. Consequences may include litigation, regulation, fines, increased insurance premiums, mandates to temporarily halt production, workers' compensation claims, or other actions that impact our brand, finances, or ability to operate.

Changes in tax laws or regulations that are applied adversely to us may have a material adverse effect on our business, cash flow, financial condition, or results of operations.

New tax laws, statutes, rules, regulations, or ordinances could be enacted at any time. For instance, the recently enacted Inflation Reduction Act imposes, among other rules, a 15% minimum tax on the book income of certain large corporations and a 1% excise tax on certain corporate stock repurchases. Further, existing tax laws, statutes, rules, regulations, or ordinances could be interpreted differently, changed, repealed, or modified at any time. Any such enactment, interpretation, change, repeal, or modification could adversely affect us, possibly with retroactive effect. In particular, changes in corporate tax rates, the realization of our net deferred tax assets, the taxation of foreign earnings, and the deductibility of expenses under the Tax Cuts and Jobs Act, as amended by the Coronavirus Aid, Relief, and Economic Security Act or any future tax reform legislation, could have a material impact on the value of our deferred tax assets, result in significant one-time charges, and increase our future tax expenses.

Risks Related to Intellectual Property

Our failure to obtain, maintain and protect our intellectual property rights could impair our ability to protect and commercialize our proprietary products and technology and cause us to lose our competitive advantage.

Our success depends, in significant part, on our ability to obtain, maintain, enforce and defend our intellectual property rights, including patents and trade secrets. We rely upon a combination of the intellectual property protections afforded by patent, copyright, trademark and trade secret laws in the United States and other jurisdictions, as well as license agreements and other contractual protections, to establish, maintain and enforce rights in our proprietary technologies. In addition, we seek to protect our intellectual property rights through nondisclosure and invention assignment agreements with our employees and consultants, and through non-disclosure agreements with business partners and other third parties.

However, we may not be able to prevent unauthorized use of our intellectual property. Our trade secrets may also be compromised, which could cause us to lose our competitive advantage. Third parties may attempt to copy or otherwise obtain, use or infringe our intellectual property.

Monitoring and detecting unauthorized use of our intellectual property is difficult and costly, and the steps we have taken or will take to prevent infringement or misappropriation may not be sufficient. Any enforcement efforts we undertake, including litigation, could be time-consuming and expensive and could divert management's attention, which could harm our business, results of operations, and financial condition. In addition, existing intellectual property laws and contractual remedies may afford less protection than needed to safeguard our intellectual property portfolio, and third parties may develop competitive offerings in a manner that leaves us with limited means to enforce our intellectual property rights against them.

Patent, copyright, trademark and trade secret laws vary significantly throughout the world. A number of foreign countries do not protect intellectual property rights to the same extent as do the laws of the United States. Therefore, our intellectual property rights may not be as strong or as easily enforced outside of the United States and efforts to protect against the unauthorized use of our intellectual property rights, technology and other proprietary rights may be more expensive and difficult outside of the United States.

Failure to adequately protect our intellectual property rights could result in our competitors using our intellectual property to offer products, potentially resulting in the loss of some of our competitive advantage and a decrease in our revenue, which would adversely affect our business, financial condition and operating results.

Our inability to secure patent protection or enforce our patent rights could have a material adverse effect on our ability to prevent others from commercializing similar products or technology.

The application and registration of patents involves complex legal and factual questions. As a result, we cannot be certain that the patent applications that we file will result in patents being issued, or that our patents

and any future patents that do issue will afford protection against competitors with similar technology. Numerous patents and pending patent applications owned by others exist in the fields in which we have developed and are developing our technology, and this may make it difficult for us to obtain certain patent coverage on our own. Any of our existing or pending patents may also be challenged by others on the basis that they are otherwise invalid or unenforceable. Furthermore, patent applications filed in foreign countries are subject to laws, rules and procedures that differ from those of the United States, and thus we cannot be certain that foreign patent applications related to issued U.S. patents will be issued.

Even if our patent applications succeed, it is still uncertain whether these patents will be contested, circumvented, invalidated or limited in scope in the future. The rights granted under any issued patents may not provide us with meaningful protection or competitive advantages. The intellectual property rights of others could bar us from licensing and exploiting any patents that issue from our pending applications, and the claims under any patents that issue from our patent applications may not be broad enough to prevent others from developing technologies that are similar or that achieve results similar to ours. In addition, patents issued to us may be infringed upon or designed around by others and others may obtain patents that it needs to license or design around, either of which would increase costs and may adversely affect our business, prospects, financial condition and operating results.

We may face patent infringement and other intellectual property claims that could be costly to defend, result in injunctions and significant damage awards, or limit our ability to use certain key technologies in the future, all of which could harm our business.

Our success depends, in part, on our ability to develop and commercialize our products, services and technologies without infringing, misappropriating or otherwise violating the intellectual property rights of third parties. However, we may not be aware that our products, services or technologies are infringing, misappropriating or otherwise violating third-party intellectual property rights and such third parties may bring claims alleging such infringement, misappropriation or violation.

For example, there may be issued patents of which we are unaware, held by third parties that, if found to be valid and enforceable, could be alleged to be infringed by our current or future products, services or technologies. Also, because patent applications can take years to issue and are often afforded confidentiality for some period of time, there may currently be pending applications, unknown to us, that later result in issued patents that could cover our current or future products, services or technologies. The strength of our defenses will depend on the rights asserted, the interpretation of these rights, and our ability to invalidate the asserted rights. However, we could be unsuccessful in advancing non-infringement and/or invalidity arguments in our defense.

Companies that have developed and are developing technology are often required to defend against litigation claims based on allegations of infringement, misappropriation or other violations of intellectual property rights. Our products, services or technologies may not be able to withstand third-party claims against their use. In addition, as compared to us, many companies have the capability to dedicate substantially greater resources to enforce their intellectual property rights and to defend claims that may be brought against them. If a third party is able to obtain an injunction preventing us from using or accessing such third-party intellectual property rights, or if we cannot license or develop alternative technology for any infringing aspect of our business, we may be forced to limit or stop sales of our products, services or technologies or cease business activities related to such intellectual property. Although we carry general liability insurance, our insurance may not cover potential claims of this type or may not be adequate to indemnify us for all liability that may be imposed. We cannot predict the outcome of lawsuits and cannot ensure that the results of any such actions will not have an adverse effect on our business, financial condition or results of operations. Even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and harm our business and operating results. Further, there could be public announcements of the intellectual property litigation, and if securities analysts, investors or

others perceive the potential impact to be negative or risks to be substantial, it could have an adverse effect on the price of our common stock.

- Any intellectual property litigation to which we might become a party, or for which we are required to provide indemnification, regardless of the merit of the claim or our defenses, may require us to do one or more of the following:
- cease selling or using solutions or services that incorporate the intellectual property rights that allegedly infringe, misappropriate or violate the intellectual property of a third party;
- make substantial payments for legal fees, settlement payments or other costs or damages;
- obtain a license, which may not be available on reasonable terms or at all, to sell or use the relevant technology;
- redesign the allegedly infringing solutions to avoid infringement, misappropriation or violation, which could be costly, time-consuming or impossible; or
- indemnify third parties using our products or services.

The occurrence of infringement claims may grow as the market for our products, services and technologies grows. Accordingly, our exposure to damages resulting from infringement claims could increase and this could further exhaust our financial and management resources.

We rely on certain open-source software in our quantum systems. If licensing terms change, our business may be adversely affected.

Our platform utilizes software licensed to us by third-party authors under “open-source” licenses and we expect to continue to utilize open-source software in the future. The use of open-source software may entail greater risks than the use of third-party commercial software, as open-source licensors generally do not provide warranties or other contractual protections regarding infringement claims or the quality of the code. To the extent that our platform depends upon the successful operation of the open-source software we use, any undetected errors or defects in this open-source software could prevent the deployment or impair the functionality of our platform, delay new solution introductions, result in a failure of our platform and injure our reputation. For example, undetected errors or defects in open-source software could render us vulnerable to breaches or security attacks, and, in conjunction, make our systems more vulnerable to data breaches.

Furthermore, some open-source licenses require the release of proprietary source code combined with, linked to or distributed with such open-source software to be released to the public. If we combine, link or distribute our proprietary software with open-source software in a specific manner, we could, under some open-source licenses, be required to release the source code of our proprietary software to the public. This would allow our competitors to create similar solutions with lower development effort and time and ultimately put us at a competitive disadvantage.

Although we monitor our use of open-source software to avoid subjecting our platform to conditions we do not intend to attach to such platform or our proprietary code, we cannot assure you that our processes for controlling such use will be effective. If we are held to have breached the terms of an open-source software license, we could be required to seek licenses from third parties to continue operating using our solution on terms that are not economically feasible, to re-engineer our solution or the supporting computational infrastructure to discontinue use of code, or to make generally available, in source code form, portions of our proprietary code. This could allow our competitors to create similar solutions with lower development effort and time and ultimately put us at a competitive disadvantage.

Some of our intellectual property has been or may be conceived or developed through government-funded research and thus may be subject to federal regulations providing for certain rights for the U.S. government or imposing certain obligations on us, such as a license to the U.S. government under such intellectual property, “march-in” rights, certain reporting requirements and a preference for U.S.-based companies, and compliance with such regulations may limit our exclusive rights and our ability to contract with non-U.S. manufacturers.

As a result, the U.S. government may have certain rights to intellectual property embodied in our current or future product candidates pursuant to the Bayh-Dole Act of 1980, or the Patent and Trademark Law Amendments Act. These U.S. government rights include a non-exclusive, non-transferable, irrevocable worldwide license to use inventions for any governmental purpose. In addition, the U.S. government has the right, under certain limited circumstances, to require the licensor to grant exclusive, partially exclusive or non-exclusive licenses to any of these inventions to a third party if it determines that (1) adequate steps have not been taken to commercialize the invention, (2) government action is necessary to meet public health or safety needs or (3) government action is necessary to meet requirements for public use under federal regulations (also referred to as “march-in” rights). The U.S. government also has the right to take title to these inventions if the licensor fails to disclose the invention to the government or fails to file an application to register the intellectual property within specified time limits. Intellectual property generated under a government funded program is also subject to certain reporting requirements, compliance with which may require us to expend substantial resources. In addition, the U.S. government requires that any products embodying any of these inventions or produced through the use of any of these inventions be manufactured substantially in the United States, and some of our license agreements require that we comply with this requirement. This preference for U.S. industry may be waived by the federal agency that provided the funding if the owner or assignee of the intellectual property can show that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture the products substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible. To the extent any of our owned or licensed future intellectual property is also generated through the use of U.S. government funding, the provisions of the Bayh-Dole Act may similarly apply.

Additional Risks Related to Ownership of Our Securities

The price of our common stock and public warrants has been and may continue to be volatile.

The price of our common stock and public warrants has been and may continue to be volatile. From March 2, 2022, the date our common stock and public warrants began trading on Nasdaq, through April 4, 2023, our stock price fluctuated from a high of \$11.368 to a low of \$0.464, and the price of our public warrants fluctuated from a high of \$2.20 to a low of \$0.0351. As a result of this volatility, investors in our common stock may not be able to sell their shares at or above the prices they paid. Further, as a result of this volatility it may be difficult for us to attract new investments, including additional offerings of our securities, on terms we consider reasonable, or at all. The price of our common stock and public warrants may fluctuate due to a variety of factors, including, without limitation:

- our ability to meet our technological milestones, including any delays;
- changes in the industries in which we and our customers operate;
- variations in our operating performance and the performance of our competitors in general;
- material and adverse impact of the COVID-19 pandemic or the ongoing military conflict between Russia and Ukraine and the related sanctions imposed against Russia on the markets and the broader global economy;
- actual or anticipated fluctuations in our quarterly or annual operating results;
- publication of research reports by securities analysts about us or our competitors or our industry;

Table of Contents

- the public’s reaction to our press releases, our other public announcements and our filings with the SEC;
- our failure or the failure of our competitors to meet analysts’ projections or guidance that we or our competitors may give to the market;
- additions and departures of key personnel;
- changes in laws and regulations affecting our business;
- commencement of, or involvement in, litigation involving the Company;
- changes in our capital structure, such as future issuances of securities or the incurrence of additional debt;
- the volume of shares of our common stock available for public sale, including the significant percentage of shares of our common stock that may be offered for resale;
- the public’s response to press releases or other public announcements by us or third parties, including our filings with the SEC;
- guidance, if any, that we provide to the public, any changes in this guidance or our failure to meet this guidance, including with respect to our technology roadmap;
- the development and sustainability of an active trading market for our stock;
- actions by institutional or activist stockholders;
- changes in accounting standards, policies, guidelines, interpretations or principles; and
- other events or factors, including recessions, increases in inflation and interest rates, disruptions to banking systems, foreign currency fluctuations, international tariffs, social, political and economic risks, natural disasters, acts of war (including the conflict involving Russia and Ukraine), terrorism or responses to such events.

These market and industry factors may materially reduce the market price of our common stock and our public warrants regardless of the operating performance of the Company. In the past, following periods of market volatility, stockholders have instituted securities class action litigation. If we are involved in securities litigation, it could have a substantial cost and divert resources and the attention of executive management from our business regardless of the outcome of such litigation.

We may fail to comply with the rules that apply to public companies, including Section 404 of the Sarbanes-Oxley Act, which could result in sanctions or other penalties that would adversely impact our business.

As a public company, and particularly after we are no longer an “emerging growth company,” we will incur significant legal, accounting, and other expenses that we did not incur as a private company, including costs resulting from public company reporting obligations under the Securities Act or the Exchange Act, and regulations regarding corporate governance practices. The Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the rules of the SEC, the listing requirements of the Nasdaq, and other applicable securities rules and regulations impose various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and corporate governance practices. We have begun to hire additional accounting, finance, and other personnel in connection with our becoming, and our efforts to comply with the requirements of being, a public company, and our management and other personnel will need to devote a substantial amount of time towards maintaining compliance with these requirements. These requirements will increase our legal and financial compliance costs and will make some activities more time-consuming and costly. We are currently evaluating these rules and regulations and cannot predict or estimate the amount of additional costs we may incur or the timing of such costs. These rules and regulations are often subject to varying interpretations, in many cases due to their lack of specificity, and, as a

result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We cannot predict or estimate the amount of additional costs we will incur as a result of recently becoming a public company or the timing of such costs. Any changes we make to comply with these obligations may not be sufficient to allow us to satisfy our obligations as a public company on a timely basis, or at all. These reporting requirements, rules and regulations, coupled with the increase in potential litigation exposure associated with being a public company, could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors or board committees or to serve as executive officers, or to obtain certain types of insurance, including directors' and officers' insurance, on acceptable terms.

Pursuant to Sarbanes-Oxley Act Section 404, we will be required to furnish a report by our management on our internal control over financial reporting in our Annual Reports on Form 10-K with the SEC. In order to continue to maintain effective internal controls to support growth and public company requirements, we will need additional financial personnel, systems and resources. However, while we remain an emerging growth company, we are not required to include an attestation report on internal control over financial reporting issued by our independent registered public accounting firm. To achieve compliance with Sarbanes-Oxley Act Section 404 within the prescribed period, we will be engaged in a process to enhance our documentation and evaluate our internal control over financial reporting, which is both costly and challenging. In this regard, we will need to continue to dedicate internal resources, potentially engage outside consultants, adopt a detailed work plan to assess and document the adequacy of internal control over financial reporting, continue steps to improve control processes as appropriate, validate through testing that controls are functioning as documented, and implement a continuous reporting and improvement process for internal control over financial reporting. Despite our efforts, there is a risk that we will not be able to conclude in the future, within the prescribed timeframe or at all, that our internal control over financial reporting is effective as required by Sarbanes-Oxley Act Section 404. We have identified material weaknesses with respect to our internal control over financial reporting. See *We have identified material weaknesses in our internal control over financial reporting related to the lack of effective review controls over the accounting for complex financial instruments and to the design and operation of our overall closing and financial reporting processes, and we may identify additional material weaknesses in the future. The material weakness over accounting for complex financial instruments has resulted in errors in financial statements for prior periods. If we fail to remediate such material weaknesses, if we identify additional material weaknesses or if we otherwise fail to establish and maintain effective control over financial reporting, it may adversely affect our ability to accurately and timely report our financial results in the future, and may adversely affect investor confidence, our reputation, our ability to raise additional capital and our business operations and financial condition.*

We have incurred and will continue to incur substantial costs as a result of operating as a public company, and our management will continue to devote substantial time to new compliance initiatives. In addition, key members of our management team have limited experience managing a public company.

As a public company, we incur substantial legal, accounting, and other expenses that we did not incur as a private company. For example, we are subject to the reporting requirements of the Exchange Act, the applicable requirements of the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the rules and regulations of the SEC and the listing standards of Nasdaq. The Exchange Act requires, among other things, that we file annual, quarterly, and current reports with respect to our business, financial condition and results of operations. Compliance with these rules and regulations increase our legal and financial compliance costs and increase demand on our systems, particularly after we are no longer an emerging growth company. In addition, as a public company, we may be subject to shareholder activism, which can lead to additional substantial costs, distract management and impact the manner in which we operate our business in ways we cannot currently anticipate. As a result of disclosure of information in this prospectus and in filings required of a public company, our business and financial condition are more visible, which may result in threatened or actual litigation, including by competitors.

[Table of Contents](#)

Certain members of our management team have limited experience managing a publicly traded company, interacting with public company investors, and complying with the increasingly complex laws pertaining to public companies. Our management team may not successfully or efficiently manage the transition to being a public company subject to significant regulatory oversight and reporting obligations under the federal securities laws and the continuous scrutiny of securities analysts and investors. These new obligations and constituents will require significant attention from our senior management and could divert their attention away from the day-to-day management of the business, which could adversely affect our business, financial condition, and results of operations.

Concentration of ownership among our executive officers, directors and their respective affiliates may limit other stockholders' ability to influence corporate matters and delay or prevent a third party from acquiring control over us.

Our current executive officers and directors and their respective affiliates beneficially own, in the aggregate, approximately 24.6% of our outstanding common stock as of March 1, 2023. This significant concentration of ownership may have a negative impact on the trading price for our common stock because investors often perceive disadvantages in owning stock in companies where there is a concentration of ownership in a small number of stockholders. In addition, these stockholders will be able to exercise influence over all matters requiring stockholder approval, including the election of directors and approval of corporate transactions, such as a merger or other sale of us or our assets. This concentration of ownership could limit other stockholders' ability to influence corporate matters and may have the effect of delaying or preventing a change in control, including a merger, consolidation or other business combination, or discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control, even if that change in control would benefit the other stockholders.

We do not intend to pay cash dividends for the foreseeable future.

We currently intend to retain future earnings, if any, to finance the further development and expansion of our business and do not intend to pay cash dividends in the foreseeable future. Any future determination to pay dividends will be at the discretion of our board of directors and will depend on our financial condition, results of operations, capital requirements, restrictions contained in future agreements and financing instruments, business prospects and such other factors as our board of directors deems relevant.

Our quarterly operating results have and may fluctuate significantly and could fall below the expectations of securities analysts and investors due to seasonality and other factors, some of which are beyond our control, resulting in a decline in our stock price.

Our quarterly operating results have and may fluctuate significantly because of several factors, including:

- labor availability and costs for hourly and management personnel;
- profitability of our products, especially in new markets and due to seasonal fluctuations;
- changes in interest rates;
- impairment of long-lived assets;
- macroeconomic conditions, both nationally and locally;
- negative publicity relating to products we serve;
- changes in consumer preferences and competitive conditions; and
- expansion to new markets.

[Table of Contents](#)

Reports published by analysts, including projections in those reports that differ from our actual results, could adversely affect the price and trading volume of our securities.

Securities research analysts have and may establish and publish their own periodic projections for us. These projections may vary widely and may not accurately predict the results we actually achieve. Our share price may decline if our actual results do not match the projections of these securities research analysts. Similarly, if one or more of the analysts who write reports on us downgrades our stock or publishes inaccurate or unfavorable research about our business, our share price could decline. If one or more of these analysts ceases coverage of us or fails to publish reports on us regularly, our share price or trading volume could decline. If analysts cease coverage of us, the market price and volume for our securities could be adversely affected.

There can be no assurance that we will regain compliance with the continued listing standards of Nasdaq. If we fail to cure our current deficiency and regain compliance with the listing requirements of the Nasdaq Capital Market or fail to comply with such listing requirements in the future or fail to cure any future deficiencies, we may be delisted and the price of our common stock and our ability to access the capital markets would be negatively impacted.

Our common stock is currently listed for quotation on the Nasdaq Capital Market. To maintain the listing of our common stock on the Nasdaq Capital Market, we are required to meet certain listing requirements, including, among others:

- a minimum closing bid price of \$1.00 per share, and
- a market value of publicly held shares (excluding shares held by our officers, directors and 10% or more stockholders) of at least \$1.0 million.

In addition to the above requirements, we must meet at least one of the following requirements:

- stockholders' equity of at least \$2.5 million; or
- a market value of listed securities of at least \$35 million; or
- net income from continuing operations of \$500,000.

On January 25, 2023, we received a letter from the Listing Qualifications Department of Nasdaq, indicating that, based on the closing bid price for the previous 30 consecutive business days, the listing of our common stock was not in compliance with Nasdaq Listing Rule 5550(a)(2) to maintain a minimum bid price of \$1.00 per share (the "Bid Price Rule"). Under Nasdaq Listing Rule 5810(c)(3)(A), we were given a period of 180 calendar days, or until July 24, 2023 (the "Compliance Date"), to regain compliance with the Bid Price Rule. If at any time during this 180-day period the closing bid price of our common stock is at least \$1.00 for a minimum of ten consecutive business days, we will regain compliance. If we are unable to regain compliance before the Compliance Date, we may be eligible for an additional 180 calendar days to satisfy the Bid Price Rule. To qualify, we will be required to meet the continued listing requirement for market value of publicly held shares and all other initial listing standards for the Nasdaq Capital Market with the exception of the Bid Price Rule, and will need to provide written notice of our intention to cure the deficiency during such additional compliance period, by effecting a reverse stock split, if necessary. However, if it appears to Nasdaq staff that we will not be able to cure the deficiency, or if we are otherwise not eligible for the additional compliance period, and we do not regain compliance by the Compliance Date, the Nasdaq Capital Market will provide written notification to us that our common stock is subject to delisting. At that time, we may appeal the delisting determination to a hearings panel pursuant to the procedures set forth in the applicable Nasdaq Listing Rules. However, there can be no assurance that, if the Company does appeal the delisting determination by Nasdaq to the panel, such appeal would be successful.

There can be no assurance that we will be able to regain compliance with respect to the current deficiency including by effecting a reverse share split, or that we will be able to maintain compliance with the Nasdaq

[Table of Contents](#)

Capital Market continued listing requirements in the future or regain compliance with respect to any future deficiencies. This could impair the liquidity and market price of our common stock. In addition, the delisting of our common stock from a national exchange would have a material adverse effect on our access to capital markets, and any limitation on market liquidity or reduction in the price of our common stock as a result of that delisting would adversely affect our ability to raise capital on terms acceptable to us, or at all. We intend to actively monitor the closing bid price of our listed common stock and, as appropriate, will consider available options to resolve the deficiency and regain compliance with the Bid Price Rule, including potentially seeking to effect a reverse share split, if necessary.

“Penny stock” rules may make buying or selling our securities difficult which may make our stock less liquid and make it harder for investors to buy and sell our securities.

Trading in our securities is subject to the SEC’s “penny stock” rules and it is anticipated that trading in our securities will continue to be subject to the penny stock rules for the foreseeable future. The SEC has adopted regulations that generally define a penny stock to be any equity security that has a market price of less than \$5.00 per share, subject to certain exceptions. These rules require that any broker-dealer who recommends our securities to persons other than prior customers and accredited investors must, prior to the sale, make a special written suitability determination for the purchaser and receive the purchaser’s written agreement to execute the transaction. Unless an exception is available, the regulations require the delivery, prior to any transaction involving a penny stock, of a disclosure schedule explaining the penny stock market and the risks associated with trading in the penny stock market. In addition, broker-dealers must disclose commissions payable to both the broker-dealer and the registered representative and current quotations for the securities they offer. The additional burdens imposed upon broker-dealers by these requirements may discourage broker-dealers from recommending transactions in our securities, which could severely limit the liquidity of our securities and consequently adversely affect the market price for our securities.

Sales of our securities, or the perception of such sales, by us or holders of our securities in the public market or otherwise could cause the market price for our securities to decline and even in such case certain holders of our securities may still have an incentive to sell our securities.

The sale of our securities in the public market or otherwise, or the perception that such sales could occur, could harm the prevailing market price of shares of our securities. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell securities in the future at a time and at a price that it deems appropriate. Resales of our securities may cause the market price of our securities to drop significantly, even if our business is doing well.

The market price of our common stock could decline if holders of our shares sell them, including pursuant to the resale registration statements, or are perceived by the market as intending to sell them. As such, sales of a substantial number of shares of our common stock in the public market could occur at any time. These sales, or the perception in the market that the holders of a large number of shares intend to sell shares, could reduce the market price of our common stock.

Pursuant to registration rights we have with certain holders of our securities, we filed a resale shelf registration statement covering the resale of up to an aggregate of 96,941,181 shares of our common stock, which was declared effective on June 1, 2022. We filed a registration statement to register the resale of 500,000 shares of our common stock issued upon exercise of the vested portion of the warrant issued to Ampere Computing LLC (the “Ampere Warrant”), which registration statement was declared effective on August 25, 2022. As of March 1, 2023, the number of shares of our common stock that have been registered for resale by holders represented approximately 61.58% of our shares outstanding (after giving effect to the issuance of shares upon exercise of outstanding public warrants, private placement warrants, the exercise or settlement of outstanding warrants, options or restricted stock units of Legacy Rigetti assumed in the Business Combination and exercise of the Ampere Warrant in full). In addition, on August 11, 2022, we entered into the Purchase Agreement and a

Registration Rights Agreement with B. Riley. Pursuant to the Purchase Agreement, subject to the satisfaction of the conditions set forth in the Purchase Agreement, we have the right to sell shares of our common stock in an aggregate amount up to the lesser of (i) \$75.0 million and (ii) an amount not to exceed 23,648,889 shares of our common stock, subject to certain limitations and conditions. We filed the registration statement on Form S-1, of which this prospectus forms a part, under the Securities Act to register the resale of shares of common stock sold pursuant to the Purchase Agreement, which registration statement, of which this prospectus forms a part, became effective on September 14, 2022. Given this substantial number of shares available for resale, the sale of shares by such holders, or the perception in the market that holders of a large number of shares intend to sell shares, could increase the volatility of the market price of our common stock or result in a significant decline in the public trading price of our common stock. Even if our trading price is significantly below \$10.00, the offering price for the units offered in Supernova's IPO, certain holders of our securities may still have an incentive to sell shares of our common stock because they purchased the shares at prices lower than the public investors or the current trading price of our common stock. Further, the purchase price for the shares that we may sell to B. Riley under our committed equity financing will fluctuate based on the price of our common stock. Depending on market liquidity at the time, sales of such shares may cause the trading price of our common stock to fall. If and when we do sell shares to B. Riley, after B. Riley has acquired the shares, B. Riley may resell all, some, or none of those shares at any time or from time to time in its discretion. Therefore, sales to B. Riley by us could result in substantial dilution to the interests of other holders of our common stock. Additionally, the sale of a substantial number of shares of our common stock to B. Riley, or the anticipation of such sales, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales. The decision to sell any shares of our common stock to sell to B. Riley under the committed equity financing will depend on market conditions, the trading prices of our common stock and other considerations, and we cannot guarantee the extent to which we may utilize the committed equity financing.

Future issuances of debt securities and equity securities may adversely affect us, including the market price of our common stock and may be dilutive to existing stockholders.

We expect that significant additional capital will be needed in the near future to continue our planned operations. In the future, we may incur debt or issue equity ranking senior to our common stock. Those securities will generally have priority upon liquidation. Such securities also may be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock. Because our decision to issue debt or equity in the future will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing, nature or success of our future capital raising efforts. As a result, future capital raising efforts may reduce the market price of our common stock and be dilutive to existing stockholders. In addition, our ability to raise additional capital through the sale of equity or convertible debt securities could be significantly impacted by the resale of shares of common stock by selling securityholders which could result in a significant decline in the trading price of our common stock and potentially hinder our ability to raise capital at terms that are acceptable to us or at all.

In addition, we may issue additional shares of common stock from time to time, including under our equity incentive plans or employee stock purchase plan, or preferred stock. Common stock reserved for future issuance under our equity incentive plans will become eligible for sale in the public market once those shares are issued, subject to provisions relating to various vesting agreements and, in some cases, limitations on volume and manner of sale applicable to affiliates under Rule 144, as applicable. The aggregate number of shares of our common stock initially reserved for future issuance under the Rigetti Computing, Inc. 2022 Equity Incentive Plan (the "2022 Plan") is 18,332,215 shares. We have filed a registration statement on Form S-8 under the Securities Act, which became effective on June 10, 2022, to register the issuance of the 18,332,215 shares reserved under the 2022 Plan, the issuance of common stock under the Rigetti Computing, Inc. 2022 Employee Stock Purchase Plan (the "Employee Stock Purchase Plan"), which has an initial reserve of 3,055,370 shares, the resale of up to 18,367,696 shares subject to equity awards issued under the Rigetti & Co, Inc. 2013 Equity Incentive Plan (the "2013 Plan") and the resale of up to 2,053 shares subject to equity awards issued under QxBranch, Inc. 2018

[Table of Contents](#)

Equity Compensation Plan (the “QxBranch Plan”). We have also filed post-effective amendments to this registration statement on Form S-8, which became effective on June 15, 2022 and August 19, 2022, to add the reoffer of “control securities” acquired by certain executive officers under, and since the filing of, the original registration statement on Form S-8. In addition, we may file one or more registration statements on Form S-8 under the Securities Act to register additional shares of common stock or securities convertible into or exchangeable for shares of common stock issued pursuant to our equity incentive plans and employee stock purchase plan, including additional registration statements on Form S-8 to register additional shares of common stock pursuant to the “evergreen” provision under the 2022 Plan, which provides for an annual increase under such plan on January 1 of each year for a period of ten years commencing on January 1, 2023 and ending on (and including) January 1, 2032 by an amount equal to (i) 5% of the total number of shares of our capital stock outstanding on a fully diluted basis on December 31 of the preceding year or (ii) a lesser amount determined by our board of directors, and the “evergreen” provision under the Employee Stock Purchase Plan, which provides for an annual increase under such plan on January 1 of each year for a period of ten years commencing on January 1, 2023 and ending on (and including) January 1, 2032 by an amount equal to the lesser of (i) 1% of the total number of shares of our capital stock outstanding on a fully diluted basis on December 31st of the preceding calendar year, (ii) 3,055,370 shares of common stock or (iii) a lesser amount determined by our board of directors. Any such Form S-8 registration statements will automatically become effective upon filing. Accordingly, shares registered under such registration statements may be immediately available for sale in the open market.

Sales of a substantial number of shares of our common stock in the public market could occur at any time.

Any such issuances of additional shares of common stock or preferred stock:

- may significantly dilute the equity interests of our investors;
- may subordinate the rights of holders of common stock if preferred stock is issued with rights senior to those afforded our common stock;
- could cause a change in control if a substantial number of shares of our common stock are issued, which may affect, among other things, our ability to use our net operating loss carry forwards, if any, and could result in the resignation or removal of our present officers and directors; and
- may adversely affect prevailing market prices for our common stock.

We are currently an “emerging growth company” and “smaller reporting company” within the meaning of the Securities Act, and to the extent we have taken advantage of certain exemptions from disclosure requirements available to emerging growth companies or smaller reporting companies, this could make our securities less attractive to investors and may make it more difficult to compare our performance with other public companies.

We are an “emerging growth company” within the meaning of the Securities Act, as modified by the JOBS Act, and we may take advantage of certain exemptions from various reporting requirements that are applicable to other public companies that are not “emerging growth companies” including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and shareholder approval of any golden parachute payments not previously approved. As a result, our shareholders may not have access to certain information they may deem important. We could be an emerging growth company for up to five years, although circumstances could cause us to lose that status earlier, including if the market value of our common stock held by non-affiliates exceeds \$700 million as of June 30, in which case we would no longer be an emerging growth company as of the following fiscal year. We cannot predict whether investors will find our securities less attractive because we will rely on these exemptions. If some investors find our securities less attractive as a result of our reliance on these exemptions, the trading prices of our securities may be lower than they otherwise would be, there may be a less active trading market for our securities and the trading prices of our securities may be more volatile.

[Table of Contents](#)

Further, Section 102(b)(1) of the JOBS Act exempts emerging growth companies from being required to comply with new or revised financial accounting standards until private companies (that is, those that have not had a Securities Act registration statement declared effective or do not have a class of securities registered under the Exchange Act) are required to comply with the new or revised financial accounting standards. The JOBS Act provides that a company can elect to opt out of the extended transition period and comply with the requirements that apply to non-emerging growth companies but any such an election to opt out is irrevocable. We have elected not to opt out of such extended transition period which means that when a standard is issued or revised and it has different application dates for public or private companies, we, as an emerging growth company, can adopt the new or revised standard at the time private companies adopt the new or revised standard. This may make comparison of our financial statements with another public company which is neither an emerging growth company nor an emerging growth company which has opted out of using the extended transition period difficult or impossible because of the potential differences in accounting standards used.

Delaware law and our Certificate of Incorporation and Bylaws contain certain provisions, including anti-takeover provisions, that limit the ability of stockholders to take certain actions and could delay or discourage takeover attempts that stockholders may consider favorable.

Our Certificate of Incorporation and bylaws of the Company (the “Bylaws”) and the General Corporation Law of the State of Delaware (“DGCL”) contain provisions that could have the effect of rendering more difficult, delaying, or preventing an acquisition deemed undesirable by the board of directors of Rigetti (the “Board”) and therefore depress the trading price of our common stock. These provisions could also make it difficult for stockholders to take certain actions, including electing directors who are not nominated by the current members of the Board or taking other corporate actions, including effecting changes in our management. Among other things, the Certificate of Incorporation and Bylaws include provisions regarding:

- providing for a classified board of directors with staggered, three-year terms;
- the ability of the Board to issue up to 10,000,000 shares of preferred stock, including “blank check” preferred stock, with any rights, preferences and privileges as they may designate, including the right to approve an acquisition or other change of control;
- provide that the authorized number of directors may be changed only by resolution of the Board;
- provide that, subject to the rights of the holders of any series of preferred stock, any individual director or directors may be removed only with cause by the affirmative vote of the holders of at least 66 2/3% of the voting power of all of the then-outstanding shares of our capital stock entitled to vote generally in the election of directors, voting together as a single class;
- provide that all vacancies, including newly created directorships, may, except as otherwise required by law, be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum;
- require that any action to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and not be taken by written consent or electronic transmission;
- provide that stockholders seeking to present proposals before a meeting of stockholders or to nominate candidates for election as directors at a meeting of stockholders must provide advance notice in writing, and also specify requirements as to the form and content of a stockholder’s notice;
- provide that special meetings of our stockholders may be called by the chairperson of the Board, the chief executive officer or by the Board pursuant to a resolution adopted by a majority of the total number of authorized directors; and
- not provide for cumulative voting rights, therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose.

These provisions, alone or together, could delay or prevent hostile takeovers and changes in control or changes in the Board or management.

The Certificate of Incorporation designates the Court of Chancery of the State of Delaware or the United States federal district courts as the sole and exclusive forum for substantially all disputes between us and our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, stockholders, employees or agents.

The Certificate of Incorporation provides that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware shall be the sole and exclusive forum for state law claims for (i) any derivative action or proceeding brought on our behalf; (ii) any action asserting a claim of breach of a fiduciary duty owed by any current or former director, officer or other employee, or stockholder of Rigetti to Rigetti or our stockholders, (iii) any action or claim against the Company or any current or former director, officer or other employee or stockholder of the Company, arising out of or pursuant to any provision of the DGCL or the Certificate of Incorporation or the Bylaws, (iv) any action seeking to interpret, apply, enforce or determine the validity of the Certificate of Incorporation or the Bylaws; (v) any action or claim as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware; and (vi) any action against the Company or any current or former director, officer or other employee or stockholder of the Company, governed by the internal-affairs doctrine of the law of the State of Delaware, in all cases to the fullest extent permitted by law. The foregoing provisions will not apply to any claims as to which the Delaware Court of Chancery determines that there is an indispensable party not subject to the jurisdiction of such court, which is rested in the exclusive jurisdiction of a court or forum other than such court (including claims arising under the Exchange Act), or for which such court does not have subject matter jurisdiction, or to any claims arising under the Securities Act and, unless we consent in writing to the selection of an alternative forum, the United States federal district courts will be the sole and exclusive forum for resolving any action asserting a claim arising under the Securities Act.

Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all suits brought to enforce any duty or liability created by the Securities Act or the rules or regulations thereunder. Accordingly, both state and federal courts have jurisdiction to entertain such Securities Act claims. To prevent having to litigate claims in multiple jurisdictions and the threat of inconsistent or contrary rulings by different courts, among other considerations, the Certificate of Incorporation provides that, unless we consent in writing to the selection of an alternative forum, United States federal district courts shall be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act. There is uncertainty as to whether a court would enforce the forum provision with respect to claims under the federal securities laws.

This choice of forum provision in our Certificate of Incorporation may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or any of our directors, officers, or other employees, which may discourage lawsuits with respect to such claims.

There is uncertainty as to whether a court would enforce such provisions, and the enforceability of similar choice of forum provisions in other companies' charter documents has been challenged in legal proceedings. It is possible that a court could find these types of provisions to be inapplicable or unenforceable, and if a court were to find the choice of forum provision contained in the Certificate of Incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, results of operations and financial condition.

Furthermore, investors cannot waive compliance with the federal securities laws and rules and regulations thereunder.

[Table of Contents](#)

Our warrants, including our public warrants, private placement warrants and other warrants we have issued, are accounted for as liabilities and the changes in value of our warrants could have a material effect on our financial results.

We are subject to complex securities laws and regulations and accounting principles and interpretations. The preparation of our financial statements requires us to interpret accounting principles and guidance and to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported expenses incurred during the reporting periods. We base our interpretations, estimates and judgments on our historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for the preparation of our financial statements. GAAP presentation is subject to interpretation by the SEC, the Financial Accounting Standards Board and various other bodies formed to interpret and create appropriate accounting principles and guidance. If one of these bodies disagrees with our accounting recognition, measurement or disclosure or any of our accounting interpretations, estimates or assumptions, it may have a significant effect on our reported results and may retroactively affect previously reported results.

On April 12, 2021, the Acting Director of the Division of Corporation Finance and Acting Chief Accountant of the SEC together issued a statement regarding the accounting and reporting considerations for warrants issued by special purpose acquisition companies entitled “Staff Statement on Accounting and Reporting Considerations for Warrants Issued by Special Purpose Acquisition Companies (“SPACs”)” (the “SEC Statement”).

Specifically, the SEC Statement focused on certain settlement terms and provisions related to certain tender offers following a business combination, which terms are similar to those contained in the warrant agreement governing our warrants. As a result of the SEC Statement, Rigetti reevaluated the accounting treatment of the 8,625,000 public warrants and 4,450,000 private placement warrants, and determined to classify the warrants as derivative liabilities measured at fair value, with changes in fair value each period reported in earnings.

As a result, included in Rigetti’s balance sheet as of December 31, 2022 contained in this prospectus are derivative liabilities related to embedded features contained within our warrants. Accounting Standards Codification 815, Derivatives and Hedging (“ASC 815”), provides for the remeasurement of the fair value of such derivatives at each balance sheet date, with a resulting non-cash gain or loss related to the change in the fair value being recognized in earnings in the statements of operations. As a result of the recurring fair value measurement, our financial statements and results of operations may fluctuate quarterly, based on factors, which are outside of our control. Due to the recurring fair value measurement, we expect that we will recognize non-cash gains or losses on our warrants each reporting period and that the amount of such gains or losses could be material. The impact of changes in fair value on earnings may have an adverse effect on the market price of our securities.

No assurance can be given that additional guidance or new regulations or accounting principles and interpretations will not be released that would require us to reclassify our warrants as liabilities measured at fair value, with changes in fair value reported each period in earnings and/or require a restatement of our financial statements with respect to treatment of the warrants.

Any such restatement of our financial results could, among other potential adverse effects:

- result in us incurring substantial costs;
- affect our ability to timely file our periodic reports until the restatement is completed;
- divert the attention of our management and employees from managing our business;
- result in material changes to our historical and future financial results;
- result in investors losing confidence in our operating results;

[Table of Contents](#)

- subject us to securities class action litigation; and
- cause our stock price to decline.

For example, in connection with the preparation of our Report on Form 10-Q for the quarterly period ended September 30, 2022, the audit committee of our board of directors, based on the recommendation of, and after consultation with, our management, and as discussed with our independent registered public accounting firm, concluded that our previously issued unaudited interim condensed consolidated financial statements for the quarters ended March 31, 2022 and June 30, 2022 could no longer be relied upon and require restatement in order to revise the volatility assumption in the valuation methodology with respect to Sponsor Vesting Shares, revise the fair value for our private placement warrants and correct an immaterial error related to the valuation of the warrant liability with respect to the warrants issued to Trinity Capital Inc., in addition to other matters. As a result, we filed amendments to our Reports Form 10-Q for the quarters ended March 31, 2022 and June 30, 2022 restating our financial statements for such periods and were unable to file our Report on Form 10-Q for the quarter ended September 30, 2022 by the prescribed deadline. See *“We have identified material weaknesses in our internal control over financial reporting related to the lack of effective review controls over the accounting for complex financial instruments and to the design and operation of our overall closing and financial reporting processes, and we may identify additional material weaknesses in the future. The material weakness over accounting for complex financial instruments has resulted in errors in financial statements for prior periods. If we fail to remediate such material weaknesses, if we identify additional material weaknesses or if we otherwise fail to establish and maintain effective control over financial reporting, it may adversely affect our ability to accurately and timely report our financial results in the future, and may adversely affect investor confidence, our reputation, our ability to raise additional capital and our business operations and financial condition.”*

Our warrants are exercisable for common stock, the exercise of which would increase the number of shares eligible for future resale in the public market and result in dilution to our stockholders.

As a result of the Business Combination being consummated, outstanding warrants to purchase an aggregate of 13,074,972 shares of common stock became exercisable in accordance with the terms of the warrant agreement. These warrants became exercisable on April 1, 2022. The exercise price of these warrants is \$11.50 per share, or approximately \$150.4 million, assuming none of the warrants are exercised through “cashless” exercise. To the extent such warrants are exercised, additional shares of common stock will be issued, which will result in dilution to the holders of common stock and increase the number of shares eligible for resale in the public market. We believe the likelihood that warrant holders will exercise their warrants, and therefore the amount of cash proceeds that we would receive, is dependent upon the trading price of our common stock. If the trading price for our common stock is less than \$11.50 per share, we believe holders of our public warrants and private placement warrants will be unlikely to exercise their warrants. On April 4, 2023, the last reported sales price of our common stock was \$0.6679 per share.

Sales of substantial numbers of such shares in the public market or the fact that such warrants may be exercised could adversely affect the market price of common stock. However, there is no guarantee that the public warrants will ever be in the money prior to their expiration, and as such, the warrants may expire worthless. See *“The warrants may never be in the money, and they may expire worthless and the terms of the public warrants may be amended in a manner adverse to a holder if holders of at least 50% of the then outstanding public warrants approve of such amendment.”*

The warrants may never be in the money, and they may expire worthless and the terms of the public warrants may be amended in a manner adverse to a holder if holders of at least 50% of the then outstanding public warrants approve of such amendment.

The exercise price for our warrants is \$11.50 per share of common stock. We believe the likelihood that warrant holders will exercise their public warrants and private placement warrants, and therefore the amount of

[Table of Contents](#)

cash proceeds that we would receive, is dependent upon the trading price of our common stock. If the trading price for our common stock is less than \$11.50 per share, we believe warrant holders will be unlikely to exercise their warrants. There is no guarantee that the warrants will be in the money following the time they become exercisable and prior to their expiration, and as such, the warrants may expire worthless. Our warrants became exercisable on April 1, 2022.

The warrants were issued in registered form under a warrant agreement between American Stock Transfer & Trust Company, as warrant agent, and Supernova. The warrant agreement provides that the terms of the warrants may be amended without the consent of any holder to cure any ambiguity or correct any defective provision or correct any mistake, but requires the approval by the holders of at least 50% of the then-outstanding public warrants to make any change that adversely affects the interests of the registered holders of public warrants. Accordingly, we may amend the terms of the public warrants in a manner adverse to a holder if holders of at least 50% of the then-outstanding public warrants approve of such amendment and, solely with respect to any amendment to the terms of the private placement warrants or any provision of the warrant agreement with respect to the private placement warrants, 50% of the number of the then outstanding private placement warrants. Although our ability to amend the terms of the public warrants with the consent of at least 50% of the then-outstanding public warrants is unlimited, examples of such amendments could be amendments to, among other things, increase the exercise price of the warrants, convert the warrants into cash, shorten the exercise period or decrease the number of shares of common stock purchasable upon exercise of a warrant.

We may redeem your unexpired warrants prior to their exercise at a time that is disadvantageous to the holder, thereby making such warrants worthless.

We have the ability to redeem outstanding warrants at any time after they become exercisable and prior to their expiration, at a price of \$0.01 per warrant, provided that the last reported sales price of the common stock equals or exceeds \$18.00 per share (as adjusted for share subdivisions, share dividends, rights issuances, subdivisions, reorganizations, recapitalizations and the like) for any 20 trading days within a 30 trading-day period ending on the third trading day prior to the date we send the notice of redemption to the warrant holders. If and when the warrants become redeemable by us, we may exercise our redemption right even if we are unable to register or qualify the underlying securities for sale under all applicable state securities laws. Redemption of the outstanding warrants could force you to: (i) exercise your warrants and pay the exercise price therefore at a time when it may be disadvantageous for you to do so; (ii) sell your warrants at the then-current market price when you might otherwise wish to hold your warrants; or (iii) accept the nominal redemption price which, at the time the outstanding warrants are called for redemption, is likely to be substantially less than the market value of your warrants.

In addition, we may redeem your warrants at any time after they become exercisable and prior to their expiration at a price of \$0.10 per warrant upon a minimum of 30 days' prior written notice of redemption provided that holders will be able to exercise their warrants prior to redemption for a number of shares of common stock determined based on the redemption date and the fair market value of our common stock.

The value received upon exercise of the warrants (1) may be less than the value the holders would have received if they had exercised their warrants at a later time where the underlying share price is higher and (2) may not compensate the holders for the value of the warrants, including because the number of shares of common stock received is capped at 0.361 per share of common stock per warrant (subject to adjustment) irrespective of the remaining life of the warrants. None of the private placement warrants will be redeemable by us, subject to certain circumstances, so long as they are held by Supernova Partners II LLC ("Supernova Sponsor") or its permitted transferees.

The warrant agreement designates the courts of the State of New York or the United States District Court for the Southern District of New York as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by holders of warrants, which could limit the ability of warrant holders to obtain a favorable judicial forum for disputes with us.

The warrant agreement provides that, subject to applicable law, (i) any action, proceeding or claim against us arising out of or relating in any way to the warrant agreement, including under the Securities Act, will be brought and enforced in the courts of the State of New York or the United States District Court for the Southern District of New York, and (ii) that we irrevocably submit to such jurisdiction, which jurisdiction will be the exclusive forum for any such action, proceeding or claim. Under the warrant agreement, we also agree that we will waive any objection to such exclusive jurisdiction and that such courts represent an inconvenient forum.

Notwithstanding the foregoing, these provisions of the warrant agreement do not apply to suits brought to enforce any liability or duty created by the Exchange Act or any other claim for which the federal district courts of the United States of America are the sole and exclusive forum. Any person or entity purchasing or otherwise acquiring any interest in any of the public warrants or private placement warrants will be deemed to have notice of and to have consented to the forum provisions in our warrant agreement.

If any action, the subject matter of which is within the scope of the forum provisions of the warrant agreement, is filed in a court other than a court of the State of New York or the United States District Court for the Southern District of New York (a “foreign action”) in the name of any holder of the public warrants or private placement warrants, such holder will be deemed to have consented to: (x) the personal jurisdiction of the state and federal courts located in the State of New York in connection with any action brought in any such court to enforce the forum provisions (an “enforcement action”), and (y) having service of process made upon such warrant holder in any such enforcement action by service upon such warrant holder’s counsel in the foreign action as agent for such warrant holder.

This choice-of-forum provision may limit a warrant holder’s ability to bring a claim in a judicial forum that it finds favorable for disputes with our company, which may discourage such lawsuits. Alternatively, if a court were to find this provision of our warrant agreement inapplicable or unenforceable with respect to one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could materially and adversely affect our business, financial condition and results of operations and result in a diversion of the time and resources of our management and board of directors.

We may be subject to securities litigation, which is expensive and could divert management attention.

The market price of our common stock may be volatile and, in the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert management’s attention from other business concerns, which could seriously harm our business.

COMMITTED EQUITY FINANCING

On August 11, 2022, we entered into the Purchase Agreement and the Registration Rights Agreement with B. Riley. Under the Purchase Agreement, from and after the Commencement Date, we will have the right to sell to B. Riley up to \$75,000,000 of shares of our common stock, subject to certain limitations and conditions set forth in the Purchase Agreement, from time to time during the term of the Purchase Agreement. Sales of common stock by us to B. Riley under the Purchase Agreement, and the timing of any such sales, are solely at our option, and we are under no obligation to sell any securities to B. Riley under the Purchase Agreement. In accordance with our obligations under the Registration Rights Agreement, we have filed the registration statement that includes this prospectus with the SEC to register under the Securities Act the resale by B. Riley of up to 23,648,889 shares of common stock, consisting of (i) 171,008 Commitment Shares that we issued to B. Riley as consideration for its commitment to purchase shares of common stock at our election under the Purchase Agreement, and (ii) up to 23,477,881 shares of common stock that we may elect, in our sole discretion, to issue and sell to B. Riley under the Purchase Agreement, from time to time from and after the Commencement Date.

We do not have the right to commence any sales of our common stock to B. Riley under the Purchase Agreement until the Commencement Date, which is the date on which all of the conditions to B. Riley's purchase obligation set forth in the Purchase Agreement have initially been satisfied, including that the registration statement that includes this prospectus be declared effective by the SEC. From and after the Commencement Date, we will have the right, but not the obligation, from time to time at our sole discretion over the 24-month period beginning on the Commencement Date, to direct B. Riley to purchase up to a specified maximum amount of shares of common stock in one or more Purchases and Intraday Purchases as set forth in the Purchase Agreement, by timely delivering a written Purchase Notice for each Purchase, and timely delivering a written Intraday Purchase Notice for each Intraday Purchase, if any, to B. Riley in accordance with the Purchase Agreement on any trading day we select as the Purchase Date therefor, so long as (i) the closing sale price of our common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price and (ii) all shares of common stock subject to all prior Purchases and all prior Intraday Purchases effected by us under the Purchase Agreement have been received by B. Riley prior to the time we deliver such notice to B. Riley.

From and after Commencement, the Company will control the timing and amount of any sales of common stock to B. Riley. Actual sales of shares of our common stock to B. Riley under the Purchase Agreement will depend on a variety of factors to be determined by us from time to time, including, among other things, market conditions, the trading price of our common stock and determinations by us as to the appropriate sources of funding for our company and its operations.

Under the applicable Nasdaq rules, in no event may we issue to B. Riley under the Purchase Agreement shares of common stock in excess of the Exchange Cap, which is 23,648,889 shares of common stock (such number of shares equal to approximately 19.99% of the shares of the common stock outstanding immediately prior to the execution of the Purchase Agreement), unless (i) we obtain stockholder approval to issue shares of common stock in excess of the Exchange Cap in accordance with applicable Nasdaq rules, or (ii) the average price per share paid by B. Riley for all of the shares of common stock that we direct B. Riley to purchase from us pursuant to the Purchase Agreement, if any, equals or exceeds \$4.45 per share (which price is calculated based on the lower of the official closing price of our common stock on Nasdaq on the trading day immediately preceding the date of the Purchase Agreement and the average official closing price of our common stock on Nasdaq for the five consecutive trading days ending on the trading day immediately preceding the date of the Purchase Agreement, as adjusted pursuant to applicable Nasdaq rules). Moreover, we may not issue or sell any shares of common stock to B. Riley under the Purchase Agreement which, when aggregated with all other shares of common stock then beneficially owned by B. Riley and its affiliates (as calculated pursuant to Section 13(d) of the Exchange Act and Rule 13d-3 thereunder), would result in B. Riley beneficially owning shares of common stock in excess of the Beneficial Ownership Cap, which is defined in the Purchase Agreement as 4.99% of the outstanding shares of common stock.

[Table of Contents](#)

The net proceeds to us from sales that we elect to make to B. Riley under the Purchase Agreement, if any, will depend on the frequency and prices at which we sell shares of our common stock to B. Riley. We expect that any proceeds received by us from such sales to B. Riley will be used for working capital and general corporate purposes.

Neither we nor B. Riley may assign or transfer our respective rights and obligations under the Purchase Agreement or the Registration Rights Agreement, and no provision of the Purchase Agreement or the Registration Rights Agreement may be modified or waived by us or B. Riley.

As consideration for B. Riley's commitment to purchase shares of common stock at our direction upon the terms and subject to the conditions set forth in the Purchase Agreement, upon execution of the Purchase Agreement, we issued 171,008 shares of common stock to B. Riley. In addition, we reimbursed \$100,000 of fees and disbursements of B. Riley in connection with the transactions contemplated by the Purchase Agreement and the Registration Rights Agreement, and agreed to reimburse an additional \$5,000 of such fees and disbursements per calendar quarter during the term of the Purchase Agreement.

The Purchase Agreement and the Registration Rights Agreement contain customary representations, warranties, conditions and indemnification obligations of the parties. The representations, warranties and covenants contained in such agreements were made only for purposes of such agreements and as of specific dates, were solely for the benefit of the parties to such agreements and may be subject to limitations agreed upon by the contracting parties. Copies of the agreements have been filed as exhibits to the registration statement that includes this prospectus and are available electronically on the SEC's website at www.sec.gov.

Purchases of common stock under the Purchase Agreement

Purchases

From and after the Commencement Date, we will have the right, but not the obligation, from time to time at our sole discretion over the 24-month period beginning on the Commencement Date, to direct B. Riley to purchase a specified number of shares of common stock, not to exceed the applicable Purchase Maximum Amount, in a Purchase under the Purchase Agreement, by timely delivering a written Purchase Notice to B. Riley, prior to 9:00 a.m., New York City time, on any trading day we select as the Purchase Date for such Purchase, so long as:

- the closing sale price of our common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price; and
- all shares of common stock subject to all prior Purchases and all prior Intraday Purchases effected by us under the Purchase Agreement have been received by B. Riley prior to the time we deliver such Purchase Notice to B. Riley.

The Purchase Maximum Amount applicable to such Purchase will be equal to the lesser of:

- 1,000,000 shares of common stock; and
- 20.0% of the total aggregate number (or volume) of shares of our common stock traded on the Nasdaq during the applicable Purchase Valuation Period for such Purchase.

The actual number of shares of common stock that B. Riley will be required to purchase in a Purchase, which we refer to as the Purchase Share Amount, will be equal to the number of shares that we specify in the applicable Purchase Notice, subject to adjustment to the extent necessary to give effect to the applicable Purchase Maximum Amount and other applicable limitations set forth in the Purchase Agreement, including the Beneficial Ownership Cap and, if then applicable, the Exchange Cap.

[Table of Contents](#)

The per share purchase price that B. Riley will be required to pay for the Purchase Share Amount in a Purchase effected by us pursuant to the Purchase Agreement, if any, will be equal to the VWAP of our common stock for the applicable Purchase Valuation Period on the Purchase Date for such Purchase, less a fixed 3.0% discount to the VWAP for such Purchase Valuation Period. The Purchase Valuation Period for a Purchase is defined in the Purchase Agreement as the period beginning at the official open (or “commencement”) of the regular trading session on the Nasdaq on the applicable Purchase Date for such Purchase, and ending at the earlier to occur of:

- 3:59 p.m., New York City time, on such Purchase Date or such earlier time publicly announced by the trading market as the official close of the regular trading session on such Purchase Date; and
- such time that the total aggregate number (or volume) of shares of common stock traded on the Nasdaq during such Purchase Valuation Period reaches the applicable Purchase Share Volume Maximum for such Purchase, which will be determined by dividing (a) the applicable Purchase Share Amount for such Purchase, by (b) 0.20.

For purposes of calculating the VWAP, the Purchase Maximum Amount and the Purchase Share Volume Maximum under the Purchase Agreement, Excluded Transactions during the Purchase Valuation Period are excluded.

Intraday Purchases

In addition to the regular Purchases described above, after the Commencement, we will also have the right, but not the obligation, subject to the continued satisfaction of the conditions set forth in the Purchase Agreement, to direct B. Riley to purchase, on any trading day we select as the Purchase Date therefor (including the same Purchase Date on which an earlier regular Purchase was effected by us (as applicable), although we are not required to effect an earlier regular Purchase on such Purchase Date in order to effect an Intraday Purchase on such Purchase Date), a specified number of shares of common stock, not to exceed the applicable Intraday Purchase Maximum Amount, in an Intraday Purchase under the Purchase Agreement, by timely delivering a written Intraday Purchase Notice to B. Riley after 10:00 a.m., New York City time (and after the Purchase Valuation Period for any prior regular Purchase (if any) and the Intraday Purchase Valuation Period for the most recent prior Intraday Purchase effected on the same Purchase Date (if any) have ended), and prior to 3:30 p.m., New York City time, on such Purchase Date, so long as:

- the closing sale price of our common stock on the trading day immediately prior to such Purchase Date is not less than the Threshold Price; and
- all shares of common stock subject to all prior Purchases and all prior Intraday Purchases effected by us under the Purchase Agreement have been received by B. Riley prior to the time we deliver such Intraday Purchase Notice to B. Riley.

The Intraday Purchase Maximum Amount applicable to such Intraday Purchase will be equal to the lesser of:

- 1,000,000 shares of common stock; and
- 20.0% of the total aggregate number (or volume) of shares of our common stock traded on the Nasdaq during the applicable Intraday Purchase Valuation Period for such Intraday Purchase.

The actual number of shares of common stock that B. Riley will be required to purchase in an Intraday Purchase, which we refer to as the Intraday Purchase Share Amount, will be equal to the number of shares that we specify in the applicable Intraday Purchase Notice, subject to adjustment to the extent necessary to give effect to the applicable Intraday Purchase Maximum Amount and other applicable limitations set forth in the Purchase Agreement, including the Beneficial Ownership Cap and, if then applicable, the Exchange Cap.

The per share purchase price that B. Riley will be required to pay for the Intraday Purchase Share Amount in an Intraday Purchase effected by us pursuant to the Purchase Agreement, if any, will be calculated in the same

Table of Contents

manner as in the case of a regular Purchase, except that the VWAP used to determine the purchase price for the Intraday Purchase Share Amount to be purchased in an Intraday Purchase will be equal to the VWAP for the applicable Intraday Purchase Valuation Period on the Purchase Date for such Intraday Purchase, less a fixed 3.0% discount to the VWAP for such Intraday Purchase Valuation Period. The Intraday Purchase Valuation Period for an Intraday Purchase is defined in the Purchase Agreement as the period during the regular trading session on the Nasdaq on such Purchase Date, beginning at the latest to occur of:

- such time of confirmation of B. Riley's receipt of the Purchase Notice;
- such time that the Purchase Valuation Period for any prior regular Purchase effected on the same Purchase Date (if any) has ended; and
- such time that the Intraday Purchase Valuation Period for the most recent prior Intraday Purchase effected on the same Purchase Date (if any) has ended,

and ending at the earlier to occur of:

- 3:59 p.m., New York City time, on such Purchase Date or such earlier time publicly announced by the trading market as the official close of the regular trading session on such Purchase Date; and
- such time that the total aggregate number (or volume) of shares of common stock traded on the Nasdaq during such Intraday Purchase Valuation Period reaches the applicable Intraday Purchase Share Volume Maximum for such Intraday Purchase, which will be determined by dividing (a) the applicable Intraday Purchase Share Amount for such Intraday Purchase, by (b) 0.20.

For purposes of calculating the VWAP, the Intraday Purchase Maximum Amount and the Intraday Purchase Share Volume Maximum for an Intraday Purchase under the Purchase Agreement, Excluded Transactions during the Intraday Purchase Valuation Period are excluded.

We may, in our sole discretion, timely deliver multiple Intraday Purchase Notices to B. Riley prior to 3:30 p.m., New York City time, on a single Purchase Date to effect multiple Intraday Purchases on such same Purchase Date, provided that the Purchase Valuation Period for any earlier regular Purchase effected on the same Purchase Date (as applicable) and the Intraday Purchase Valuation Period for the most recent prior Intraday Purchase effected on the same Purchase Date have ended prior to 3:00 p.m., New York City time, on such Purchase Date, and so long as all shares of common stock subject to all prior Purchases and all prior Intraday Purchases effected by us under the Purchase Agreement, including those effected earlier on the same Purchase Date (as applicable), have been received by B. Riley prior to the time we deliver to B. Riley Principal a new Intraday Purchase Notice to effect an additional Intraday Purchase on the same Purchase Date as an earlier regular Purchase (as applicable) and one or more earlier Intraday Purchases effected on such same Purchase Date.

The terms and limitations that will apply to each subsequent additional Intraday Purchase effected on the same Purchase Date will be the same as those applicable to any earlier regular Purchase (as applicable) and any earlier Intraday Purchase effected on the same Purchase Date as such subsequent additional Intraday Purchase, and the per share purchase price for the shares of common stock that we elect to sell to B. Riley in each subsequent additional Intraday Purchase effected on the same Purchase Date as an earlier regular Purchase (as applicable) and/or earlier Intraday Purchase(s) effected on such Purchase Date will be calculated in the same manner as in the case of such earlier regular Purchase (as applicable) and such earlier Intraday Purchase(s) effected on the same Purchase Date as such subsequent additional Intraday Purchase, with the exception that the Intraday Purchase Valuation Period for each subsequent additional Intraday Purchase will begin and end at different times (and may vary in duration) during the regular trading session on such Purchase Date, in each case as determined in accordance with the Purchase Agreement.

In the case of Purchases and Intraday Purchases effected by us under the Purchase Agreement, if any, all share and dollar amounts used in determining the purchase price per share of common stock to be purchased by B. Riley in a Purchase or an Intraday Purchase (as applicable), or in determining the applicable maximum

[Table of Contents](#)

purchase share amounts or applicable volume or price threshold amounts in connection with any such Purchase or Intraday Purchase (as applicable), in each case, will be equitably adjusted for any reorganization, recapitalization, non-cash dividend, stock split, reverse stock split or other similar transaction occurring during any period used to calculate such per share purchase price, maximum purchase share amounts or applicable volume or price threshold amounts.

At or prior to 5:30 p.m., New York City time, on the applicable Purchase Date for a Purchase and/or Intraday Purchase, B. Riley will provide us with a written confirmation for such Purchase and/or Intraday Purchase, as applicable, setting forth the applicable purchase price (both on a per share basis and the total aggregate purchase price) to be paid by B. Riley for the shares of common stock purchased by B. Riley in such Purchase and/or Intraday Purchase, as applicable.

The payment for, against delivery of, shares of common stock purchased by B. Riley in any Purchase or any Intraday Purchase under the Purchase Agreement will be fully settled within two trading days immediately following the applicable Purchase Date for such Purchase or such Intraday Purchase (as applicable), as set forth in the Purchase Agreement.

Conditions Precedent to Commencement and Each Purchase

B. Riley's obligation to accept Purchase Notices and Intraday Purchase Notices that are timely delivered by us under the Purchase Agreement and to purchase shares of our common stock in Purchases and Intraday Purchases under the Purchase Agreement are subject to (i) the initial satisfaction, at the Commencement, and (ii) the satisfaction, at the applicable "Purchase Commencement Time" and "Intraday Purchase Commencement Time" (as such terms are defined in the Purchase Agreement) on the applicable Purchase Date for each Purchase and Intraday Purchase after the Commencement Date, of the conditions precedent thereto set forth in the Purchase Agreement, all of which are entirely outside of B. Riley's control, which conditions include the following:

- the accuracy in all material respects of the representations and warranties of the Company included in the Purchase Agreement;
- the Company having performed, satisfied and complied in all material respects with all covenants, agreements and conditions required by the Purchase Agreement to be performed, satisfied or complied with by the Company;
- the registration statement that includes this prospectus (and any one or more additional registration statements filed with the SEC that include shares of common stock that may be issued and sold by the Company to B. Riley under the Purchase Agreement) having been declared effective under the Securities Act by the SEC, and B. Riley being able to utilize this prospectus (and the prospectus included in any one or more additional registration statements filed with the SEC under the Registration Rights Agreement) to resell all of the shares of common stock included in this prospectus (and included in any such additional prospectuses);
- we shall have delivered or caused to be delivered to the transfer agent irrevocable instructions and an opinion of counsel, in each case directing the transfer agent to issue to B. Riley or its designated broker-dealer the shares included in the applicable registration statement in accordance with the terms of the Purchase Agreement and Registration Rights Agreement;
- the SEC or any other governmental authority shall not have requested any additional information relating to a registration statement or any post-effective amendment thereto or any applicable prospectus or prospectus supplement;
- the SEC shall not have issued any stop order suspending the effectiveness of the registration statement that includes this prospectus (or any one or more additional registration statements filed with the SEC that include shares of common stock that may be issued and sold by the Company to B. Riley under the

Table of Contents

Purchase Agreement) or prohibiting or suspending the use of this prospectus (or the prospectus included in any one or more additional registration statements filed with the SEC under the Registration Rights Agreement), and the absence of any suspension of qualification or exemption from qualification of the common stock for offering or sale in any jurisdiction;

- FINRA shall not have provided an objection to, and shall have confirmed in writing that it has determined not to raise any objections with respect to the fairness and reasonableness of, the terms and arrangements of the transactions contemplated by the Purchase Agreement and the Registration Rights Agreement;
- there shall not have occurred any event and there shall not exist any condition or state of facts, which makes any statement of a material fact made in the registration statement that includes this prospectus (or in any one or more additional registration statements filed with the SEC that include shares of common stock that may be issued and sold by the Company to B. Riley under the Purchase Agreement) untrue or which requires the making of any additions to or changes to the statements contained therein in order to state a material fact required by the Securities Act to be stated therein or necessary in order to make the statements then made therein (in the case of this prospectus or the prospectus included in any one or more additional registration statements filed with the SEC under the Registration Rights Agreement, in the light of the circumstances under which they were made) not misleading;
- the final prospectus included in any post-effective amendment to the registration statement, and any prospectus supplement thereto, required to be filed by us with the SEC under the Purchase Agreement and the Registration Rights Agreement shall have been filed and all reports, schedules, registrations, forms, statements, information and other documents required to have been filed by the Company with the SEC pursuant to the reporting requirements of the Exchange Act shall have been filed with the SEC;
- trading in the common stock shall not have been suspended by the SEC, Nasdaq or FINRA, the Company shall not have received any final and non-appealable notice that the listing or quotation of the common stock on Nasdaq shall be terminated on a date certain (unless, prior to such date, the common stock is listed or quoted on any other Eligible Market, as such term is defined in the Purchase Agreement), and there shall be no suspension of, or restriction on, accepting additional deposits of the common stock, electronic trading or book-entry services by DTC with respect to the common stock imposed or contemplated;
- the Company shall have complied with all applicable federal, state and local governmental laws, rules, regulations and ordinances in connection with the execution, delivery and performance of the Purchase Agreement and the Registration Rights Agreement;
- the issuance and sale of the shares pursuant to the Purchase Notice or applicable Intraday Purchase Notice shall not exceed, as applicable, the Purchase Maximum Amount or the Intraday Purchase Maximum Amount, cause the shares to exceed the aggregate limit, cause B. Riley to own in excess of the Beneficial Ownership Cap or the Exchange Cap (unless our stockholders have approved the issuance of shares in excess of the Exchange Cap);
- the absence of any statute, regulation, order, decree, writ, ruling or injunction by any court or governmental authority of competent jurisdiction which prohibits the consummation of or that would materially modify or delay any of the transactions contemplated by the Purchase Agreement or the Registration Rights Agreement;
- the absence of any action, suit or proceeding before any arbitrator or any court or governmental authority seeking to restrain, prevent or change the transactions contemplated by the Purchase Agreement or the Registration Rights Agreement, or seeking material damages in connection with such transactions;

Table of Contents

- all of the shares of common stock that may be issued pursuant to the Purchase Agreement shall have been approved for listing or quotation on Nasdaq (or if the common stock is not then listed on Nasdaq, then on any Eligible Market), subject only to notice of issuance;
- no condition, occurrence, state of facts or event constituting a Material Adverse Effect (as such term is defined in the Purchase Agreement) shall have occurred and be continuing;
- the absence of any bankruptcy proceeding against the Company commenced by a third party, and the Company shall not have commenced a voluntary bankruptcy proceeding, consented to the entry of an order for relief against it in an involuntary bankruptcy case, consented to the appointment of a custodian of the Company or for all or substantially all of its property in any bankruptcy proceeding, or made a general assignment for the benefit of its creditors; and
- the receipt by B. Riley of the Commitment Shares, legal opinions and negative assurances, and bring-down legal opinions and negative assurance letters as required under the Purchase Agreement.

Termination of the Purchase Agreement

Unless earlier terminated as provided in the Purchase Agreement, the Purchase Agreement will terminate automatically on the earliest to occur of:

- the first day of the month next following the 24-month anniversary of the Commencement Date;
- the date on which B. Riley shall have purchased shares of common stock under the Purchase Agreement for an aggregate gross purchase price equal to \$75,000,000;
- the date on which the common stock shall have failed to be listed or quoted on Nasdaq or any other Eligible Market for one trading day;
- the 30th trading day after the date on which a voluntary or involuntary bankruptcy proceeding involving our company has been commenced that is not discharged or dismissed prior to such trading day; and
- the date on which a bankruptcy custodian is appointed for all or substantially all of our property, or we make a general assignment for the benefit of our creditors.

We have the right to terminate the Purchase Agreement at any time after Commencement, at no cost or penalty, upon ten trading days' prior written notice to B. Riley. We and B. Riley may also terminate the Purchase Agreement at any time by mutual written consent.

B. Riley also has the right to terminate the Purchase Agreement upon ten trading days' prior written notice to us, but only upon the occurrence of certain events, including:

- the occurrence and continuation of a Material Adverse Effect (as such term is defined in the Purchase Agreement);
- the occurrence of a Fundamental Transaction (as such term defined in the Purchase Agreement) involving our company;
- if we are in breach or default in any material respect of any of our covenants and agreements in the Purchase Agreement or in the Registration Rights Agreement, and, if such breach or default is capable of being cured, such breach or default is not cured within ten trading days after notice of such breach or default is delivered to us;
- the effectiveness of the registration statement that includes this prospectus or any additional registration statement we file with the SEC pursuant to the Registration Rights Agreement lapses for any reason (including the issuance of a stop order by the SEC), or this prospectus or the prospectus included in any additional registration statement we file with the SEC pursuant to the Registration

[Table of Contents](#)

Rights Agreement otherwise becomes unavailable to B. Riley for the resale of all of the shares of common stock included therein, and such lapse or unavailability continues for a period of 30 consecutive trading days or for more than an aggregate of 90 trading days in any 365-day period, other than due to acts of B. Riley; or

- trading in the common stock on Nasdaq (or if the common stock is then listed on an Eligible Market, trading in the common stock on such Eligible Market) has been suspended for a period of three consecutive trading days.

No termination of the Purchase Agreement by us or by B. Riley will become effective prior to the fifth trading day immediately following the date on which any pending Purchase and any pending Intraday Purchase has been fully settled in accordance with the terms and conditions of the Purchase Agreement, and no termination will affect any of our respective rights and obligations under the Purchase Agreement with respect to any pending Purchase, any pending Intraday Purchase, the Commitment Shares, and any fees and disbursements of B. Riley's legal counsel in connection with the transactions contemplated by the Purchase Agreement and the Registration Rights Agreement. Both we and B. Riley have agreed to complete our respective obligations with respect to any such pending Purchase and any pending Intraday Purchase under the Purchase Agreement. Furthermore, no termination of the Purchase Agreement will affect the Registration Rights Agreement, which will survive any termination of the Purchase Agreement.

No Short-Selling or Hedging by B. Riley

B. Riley has agreed not to engage in or effect, directly or indirectly, for its own principal account or for the principal account of its sole member, any of its or its sole member's respective officers, or any entity managed or controlled by it or its sole member, any (i) "short sale" (as such term is defined in Rule 200 of Regulation SHO of the Exchange Act) of the common stock or (ii) hedging transaction, which establishes a net short position with respect to the common stock, during the term of the Purchase Agreement.

Prohibition on Variable Rate Transactions

Subject to specified exceptions included in the Purchase Agreement, we are limited in our ability to enter into specified "Variable Rate Transactions" (as such term is defined in the Purchase Agreement) during the term of the Purchase Agreement. Such transactions include, among others, the issuance of convertible securities with a conversion or exercise price that is based upon or varies with the trading price of our common stock after the date of issuance, or our entry into any agreement for an "equity line of credit" (other than with B. Riley), whereby we may sell common stock at a future determined price.

Effect of Sales of our Common Stock under the Purchase Agreement on our Stockholders

All shares of common stock that may be issued or sold by us to B. Riley under the Purchase Agreement that are being registered under the Securities Act for resale by B. Riley in this offering are expected to be freely tradable. The shares of common stock being registered for resale in this offering may be issued and sold by us to B. Riley from time to time at our discretion over a period of up to 24 months commencing on the Commencement Date. The resale by B. Riley of a significant amount of shares registered for resale in this offering at any given time, or the perception that these sales may occur, could cause the market price of our common stock to decline and to be highly volatile. Sales of our common stock, if any, to B. Riley under the Purchase Agreement will depend upon market conditions and other factors to be determined by us. We may ultimately decide to sell to B. Riley all, some or none of the shares of our common stock that may be available for us to sell to B. Riley pursuant to the Purchase Agreement.

If and when we do elect to sell shares of our common stock to B. Riley pursuant to the Purchase Agreement, after B. Riley has acquired such shares, B. Riley may resell all, some or none of such shares at any time or from

[Table of Contents](#)

time to time in its discretion and at different prices. As a result, investors who purchase shares from B. Riley in this offering at different times will likely pay different prices for those shares, and so may experience different levels of dilution and in some cases substantial dilution and different outcomes in their investment results. Investors may experience a decline in the value of the shares they purchase from B. Riley in this offering as a result of future sales made by us to B. Riley at prices lower than the prices such investors paid for their shares in this offering. In addition, if we sell a substantial number of shares to B. Riley under the Purchase Agreement, or if investors expect that we will do so, the actual sales of shares or the mere existence of our arrangement with B. Riley may make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect such sales.

Because the purchase price per share to be paid by B. Riley for the shares of common stock that we may elect to sell to B. Riley under the Purchase Agreement, if any, will fluctuate based on the market prices of our common stock during the applicable Purchase Valuation Period for each Purchase, and during the applicable Intraday Purchase Valuation Period for each Intraday Purchase, made pursuant to the Purchase Agreement, if any, as of the date of this prospectus it is not possible for us to predict the number of shares of common stock that we will sell to B. Riley under the Purchase Agreement, the actual purchase price per share to be paid by B. Riley for those shares, or the actual gross proceeds to be raised by us from those sales, if any. As of March 1, 2023, there were 126,964,206 shares of our common stock outstanding, of which 103,749,097 shares were held by non-affiliates. Although the Purchase Agreement provides that we may sell up to an aggregate of \$75,000,000 of our common stock to B. Riley, only 23,648,889 shares of our common stock (representing the maximum number of shares of common stock we may issue and sell under the Purchase Agreement under the Exchange Cap limitation) are being registered for resale under the registration statement that includes this prospectus. If all of the 23,648,889 shares offered for resale by B. Riley under this prospectus were issued and outstanding as of March 1, 2023, such shares would represent approximately 15.7% of the total number of shares of our common stock outstanding and approximately 18.6% of the total number of outstanding shares held by non-affiliates, in each case as of March 1, 2023.

If it becomes necessary for us to issue and sell to B. Riley under the Purchase Agreement more shares than are being registered for resale under this prospectus in order to receive aggregate gross proceeds equal to \$75,000,000 under the Purchase Agreement, we must first (i) obtain stockholder approval to issue shares of common stock in excess of the Exchange Cap under the Purchase Agreement in accordance with applicable Nasdaq rules and (ii) file with the SEC one or more additional registration statements to register under the Securities Act the resale by B. Riley of any such additional shares of our common stock we wish to sell from time to time under the Purchase Agreement, which the SEC must declare effective, in each case before we may elect to sell any additional shares of our common stock to B. Riley under the Purchase Agreement. The number of shares of our common stock ultimately offered for sale by B. Riley is dependent upon the number of shares of common stock, if any, we ultimately sell to B. Riley under the Purchase Agreement.

The issuance of our common stock to B. Riley pursuant to the Purchase Agreement will not affect the rights or privileges of our existing stockholders, except that the economic and voting interests of each of our existing stockholders will be diluted. Although the number of shares of our common stock that our existing stockholders own will not decrease, the shares of our common stock owned by our existing stockholders will represent a smaller percentage of our total outstanding shares of our common stock after any such issuance.

[Table of Contents](#)

The following table sets forth the amount of gross proceeds we would receive from B. Riley from our sale of shares of common stock to B. Riley under the Purchase Agreement at varying purchase prices:

<u>Assumed Average Purchase Price Per Share</u>	<u>Number of Registered Shares to be Issued if Full Purchase⁽¹⁾</u>	<u>Percentage of Outstanding Shares After Giving Effect to the Issuance to B. Riley⁽²⁾</u>	<u>Gross Proceeds from the Sale of Shares to B. Riley Under the Purchase Agreement</u>
\$1.00	23,477,881	15.6%	\$ 23,477,881
\$2.00	23,477,881	15.6%	\$ 46,955,762
\$3.00	23,477,881	15.6%	\$ 70,433,643
\$4.00	18,750,000	12.9%	\$ 75,000,000
\$5.00	15,000,000	10.6%	\$ 75,000,000
\$6.00	12,500,000	9.0%	\$ 75,000,000
\$7.00	10,714,286	7.8%	\$ 75,000,000

- (1) Excludes the 171,008 Commitment Shares that we issued to B. Riley. Although the Purchase Agreement provides that we may sell up to \$75,000,000 of our common stock to B. Riley, we are only registering 23,648,889 shares under the registration statement that includes this prospectus, which may or may not cover all of the shares we ultimately sell to B. Riley under the Purchase Agreement. We will not issue more than an aggregate of 23,648,889 shares of our common stock (the Exchange Cap, unless otherwise approved by our stockholders or if the average price of shares of our common stock sold under the Purchase Agreement equals or exceeds \$4.45. The number of shares to be issued as set forth in this column (i) gives effect to the Exchange Cap and (ii) is without regard for the Beneficial Ownership Cap. The assumed average purchase prices are solely for illustration and are not intended to be estimates or predictions of future stock performance.
- (2) The denominator is based on 126,964,206 shares of common stock outstanding as of March 1, 2023 (which includes the 171,008 Commitment Shares we issued to B. Riley on August 11, 2022), adjusted to give effect to the issuance of the number of shares set forth in the adjacent column that we would have sold to B. Riley, assuming the average purchase price in the first column. The numerator is based on the number of shares issuable under the Purchase Agreement (that are the subject of this offering) at the corresponding assumed average purchase price set forth in the first column.

USE OF PROCEEDS

This prospectus relates to shares of our common stock that may be offered and sold from time to time by B. Riley. All of the common stock offered by B. Riley pursuant to this prospectus will be sold by B. Riley for its own account. We will not receive any of the proceeds from these sales. We may receive up to \$75.0 million aggregate gross proceeds under the Purchase Agreement from any sales we make to B. Riley pursuant to the Purchase Agreement. The net proceeds from sales, if any, under the Purchase Agreement will depend on the frequency and prices at which we sell shares of common stock to B. Riley after the date of this prospectus. See the section titled “Plan of Distribution (Conflict of Interest)” elsewhere in this prospectus for more information.

We expect to use any proceeds that we receive under the Purchase Agreement for working capital and general corporate purposes, including to fund potential future investments and acquisitions of companies that we believe are complementary to our business and consistent with our growth strategy. The precise amount and timing of the application of such proceeds will depend upon our liquidity needs and the availability and cost of other capital over which we have little or no control. As of the date of this prospectus, we cannot specify with certainty all of the particular uses, and the respective amounts we may allocate to those uses, for any net proceeds we receive. Accordingly, we will retain broad discretion over the use of these proceeds. Pending our use of the net proceeds as described above, we intend to invest the net proceeds pursuant to the Purchase Agreement in interest-bearing, investment-grade instruments.

MARKET INFORMATION FOR SECURITIES AND DIVIDEND POLICY

Market Information

Our common stock and public warrants are currently listed on Nasdaq under the symbols “RGTI” and “RGTIW,” respectively. Prior to the consummation of the Business Combination, Supernova Class A common shares and public warrants were listed on The New York Stock Exchange under the symbols “SNII” and “SNIW,” respectively. As of March 22, 2023, there were 209 holders of record of our common stock, one holder of record of the public warrants and four holders of record of the private placement warrants.

Dividend Policy

We have never declared or paid any dividends on shares of our common stock. We anticipate that we will retain all of our future earnings, if any, for use in the operation and expansion of our business and do not anticipate paying cash dividends in the foreseeable future. Any decision to declare and pay dividends in the future will be made at the sole discretion of our Board and will depend on, among other things, our results of operations, cash requirements, financial condition, contractual restrictions and other factors that our Board may deem relevant.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations section should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this prospectus. This discussion and analysis contains forward-looking statements, such as statements of our plans, objectives, expectations and intentions. Any statements that are not statements of historical fact are forward-looking statements. When used, the words "believe," "plan," "intend," "anticipate," "target," "estimate," "expect," "will," "continue," "project," and the like, and/or future tense or conditional constructions ("will," "may," "could," "should," etc.), or similar expressions, identify certain of these forward-looking statements. These forward-looking statements are subject to risks and uncertainties, including those we describe under "Risk Factors" and elsewhere in this prospectus that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. Our actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of a variety of factors.

For purposes of this discussion, "Rigetti," "the Company," "we," "us" or "our" refer to Rigetti Computing, Inc. and its subsidiaries unless the context otherwise requires.

Overview

On March 2, 2022 (the "Closing Date"), we consummated the transactions contemplated by that certain Agreement and Plan of Merger dated as of October 6, 2021, as amended on December 23, 2021 and January 10, 2022 (as amended, the "Merger Agreement"), by and among Supernova Partners Acquisition Company II, Ltd., a Cayman Islands exempted company ("Supernova"), Supernova Merger Sub, Inc., a Delaware corporation and a direct wholly owned subsidiary of Supernova (the "First Merger Sub"), Supernova Romeo Merger Sub, LLC, a Delaware limited liability company and a direct wholly owned subsidiary of Supernova (the "Second Merger Sub"), and Rigetti Holdings, Inc., a Delaware corporation ("Legacy Rigetti"). As contemplated by the Merger Agreement, on March 1, 2022 Supernova was domesticated as a Delaware corporation and changed its name to "Rigetti Computing, Inc." (the "Domestication"). On the Closing Date, (i) First Merger Sub merged with and into Legacy Rigetti, the separate corporate existence of First Merger Sub ceased and Legacy Rigetti survived as a wholly owned subsidiary of Rigetti Computing, Inc. (the "Surviving Corporation" and, such merger, the "First Merger"), and (ii) immediately following the First Merger, the Surviving Corporation merged with and into the Second Merger Sub, the separate corporate existence of the Surviving Corporation ceased and Second Merger Sub survived as a wholly owned subsidiary of Rigetti Computing, Inc. and changed its name to "Rigetti Intermediate LLC" (such merger transaction, the "Second Merger" and, together with the First Merger, the "Merger", and, collectively with the Domestication, the "PIPE Financing" (as defined below) and the other transactions contemplated by the Merger Agreement, the "Business Combination"). The closing of the Business Combination is herein referred to as "the Closing."

We build quantum computers and the superconducting quantum processors that power them. We believe quantum computing represents one of the most transformative emerging capabilities in the world today. By leveraging quantum mechanics, we believe our quantum computers process information in fundamentally new, more powerful ways than classical computers. When scaled, it is anticipated that these systems will be poised to solve problems of staggering computational complexity at unprecedented speed.

With the goal of unlocking this opportunity, we have developed the world's first multi-chip quantum processor for scalable quantum computing systems. We believe that this patented and patent pending, modular chip architecture is the building block for new generations of quantum processors that we expect to achieve a clear advantage over classical computers. Our long-term business model centers on revenue generated from quantum computing systems made accessible via the cloud in the form of Quantum Computing as a Service ("QCaaS") products. However, the substantial majority of our revenues are derived from development contracts,

[Table of Contents](#)

and we anticipate this market opportunity will exist for at least the next several years as we work to ramp up our QCaaS business. Additionally, we are working to further develop a revenue stream and forging important customer relationships by entering into technology development contracts with various partners.

We are a vertically integrated company. We own and operate Fab-1, a dedicated and integrated laboratory and manufacturing facility, through which we own the means of producing our breakthrough multi-chip quantum processor technology. We leverage our chips through a full-stack product development approach, from quantum chip design and manufacturing through cloud delivery. We believe this full-stack development approach offers both the fastest and lowest risk path to building commercially valuable quantum computers.

We have been generating revenue since 2018 through partnerships with government agencies and commercial organizations; however, we have not yet generated profits. We have incurred significant operating losses since inception. Our net losses were \$71.5 million and \$38.2 million for the year ended December 31, 2022, and 11 months ended December 31, 2021, respectively. We expect to continue to incur additional losses for the foreseeable future as we invest in research development and infrastructure in line with our long-term business strategy. As of December 31, 2022, we had an accumulated deficit of \$278.7 million.

Based on our estimates and current business plan, we expect that we will need to obtain additional capital by late 2024 or early 2025 in order to continue our research and development efforts and achieve our business objectives. There is no assurance that additional financing will be available. If we are unable to raise additional funding when needed, we may be required to delay, limit or substantially reduce our quantum computing development efforts.

In February 2023, we announced an updated business strategy, including revisions to our technology roadmap. In connection with this updated strategy, we have implemented a workforce reduction in order to focus the organization and our resources on nearer-term strategic priorities. In March 2023, we further refined our business strategy after internally deploying Ankaa-1, our 84-qubit system delivering denser qubit spacing and tunable couplers, within our company for testing. We plan to concentrate on refining the performance of Ankaa-1. Upon the anticipated external launch of the Ankaa-1 84-qubit system, which is expected to be to select customers, we plan to continue efforts to improve the performance of the system with the goal of reaching at least 98% 2-qubit gate fidelity to support the anticipated Ankaa-2 84-qubit system. We then plan to launch the anticipated Ankaa-2 84 qubit system, continuing to work to improve performance with the goal of reaching at least 99% gate fidelity on Ankaa-2. If these targets are achieved, we plan to shift focus to scaling to develop Lyra, an anticipated 336-qubit system. We believe that this business plan should enable us to concentrate our software application development strategy on what we believe to be the highest likelihood applications for demonstrating nearer term narrow quantum advantage.

The reduction in workforce impacted approximately 50 employees or 28% of our workforce. We began implementing activities with respect to the revised business plan and reduction in workforce in February 2023. Affected employees were offered separation benefits, including severance payments and temporary healthcare coverage assistance. We currently expect to incur restructuring charges of approximately \$1.4 million for severance payments and temporary healthcare coverage for effected employees. Such restructuring charges are expected to be incurred and recorded in the first quarter of 2023.

The Business Combination and PIPE Financing

On October 6, 2021, SNII entered into the Merger Agreement by and among Supernova, First Merger Sub, Second Merger Sub, and Legacy Rigetti. On March 2, 2022, the Business Combination was consummated. While the legal acquirer in the Merger Agreement was Supernova, for financial accounting and reporting purposes under United States generally accepted accounting principles (“U.S. GAAP”), Rigetti was the accounting acquirer and the Merger was accounted for as a “reverse recapitalization.” A reverse recapitalization does not result in a new basis of accounting, and financial statements of Rigetti represent the continuation of the financial

[Table of Contents](#)

statements of Legacy Rigetti in many respects. Under this method of accounting, Supernova was treated as the “acquired” company for financial reporting purposes. For accounting purposes, Rigetti was deemed to be the accounting acquirer in the transaction and, consequently, the transaction was treated as a recapitalization of Rigetti (i.e., a capital transaction involving the issuance of stock by Supernova for the stock of Rigetti).

As a result of the Business Combination, all of the shares of Legacy Rigetti Common Stock outstanding immediately prior to the Closing (including Legacy Rigetti Common Stock resulting from the Legacy Rigetti preferred stock conversion) were converted into the right to receive an aggregate of 78,959,579 shares of our Common Stock, par value \$0.0001 per share (“Common Stock”). Additionally, each issued and outstanding share of Supernova Class A and Class B Common Stock held by Supernova automatically converted to 20,209,462 shares of Common Stock (of which 3,059,273 shares are subject to vesting under certain conditions). Upon consummation of the Business Combination, the most significant change in our reported financial position and results of operations was an increase in cash of \$205.0 million (as compared to Rigetti’s balance sheet at December 31, 2021), including \$225.6 million of proceeds from the Business Combination and PIPE Financing net of transaction costs incurred by us of \$20.6 million.

Additional direct and incremental transaction costs were also incurred by Rigetti in connection with the Business Combination. Generally, costs (e.g., SPAC shares) are recorded as a reduction to additional paid-in capital. Costs allocated to liability-classified instruments that are subsequently measured at fair value through earnings (e.g., certain SPAC warrants) are expensed. Rigetti’s transaction costs totaled \$20.6 million, of which \$19.7 million was allocated to equity-classified instruments and recorded as a reduction to additional paid-in capital, and the remaining \$0.9 million was allocated to liability-classified instruments that are subsequently measured at fair value through earnings and recognized as expense in the consolidated statements of operations during the year ended December 31, 2022.

As a result of the Business Combination, we became subject to the reporting requirements under the Securities Exchange Act of 1934, as amended, and listing standards of the Nasdaq Capital Market, which has and will necessitate us to hire additional personnel and implement procedures and processes to address such public company requirements. We expect to incur additional ongoing expenses as a public company for, among other things, directors’ and officers’ liability insurance, director fees, and additional internal and external accounting, legal and administrative resources.

Our future results of consolidated operations and financial position may not be comparable to historical results as a result of the Business Combination.

Macroeconomic Considerations

Unfavorable conditions in the economy in the United States and abroad may negatively affect the growth of our business and our results of operations. For example, macroeconomic events, including the COVID-19 pandemic, rising inflation, the U.S. Federal Reserve raising interest rates, the Russia-Ukraine war, and recent bank failures have led to economic uncertainty globally. The effect of macroeconomic conditions may not be fully reflected in our results of operations until future periods. If, however, economic uncertainty increases or the global economy worsens, our business, financial condition and results of operations may be harmed. For further discussion of the potential impacts of macroeconomic events on our business, financial condition, and operating results, see the section titled “Risk Factors,” including the risk factor titled “*Unstable market and economic conditions have had and may continue to have serious adverse consequences on our business, financial condition and share price.*”

Specifically, the COVID-19 pandemic has limited and could further limit the ability of suppliers and business partners to perform, including third-party suppliers’ ability to provide components, services and materials. We have experienced and may experience further increases in the cost of raw materials.

[Table of Contents](#)

Furthermore, during the year ended December 31, 2022, we experienced supply chain challenges, which we largely attribute to the COVID-19 pandemic and the general disruptions resulting from the ongoing conflict between Ukraine and Russia and related sanctions, as well as increases in costs of component parts, labor and raw materials, which we largely attribute to rising inflation and high demand as a result of restricted supply. We expect these increased costs to remain high as the COVID-19 pandemic, the Ukraine-Russia conflict and their respective effects persist. As global economic conditions recover from the COVID-19 pandemic, the Ukraine-Russia conflict and the related sanctions, business activity may not recover as quickly as anticipated, and it is not possible at this time to estimate the long-term impact that these and related events could have on our business, as the impact will depend on future developments, which are highly uncertain and cannot be predicted. For instance, product demand may be reduced due to an economic recession, a decrease in corporate capital expenditures, prolonged unemployment, rising inflation and interest rates, labor shortages, reduction in consumer confidence, adverse geopolitical and macroeconomic events, or any similar negative economic condition. In addition, global economic conditions have been worsening, with disruptions to, and volatility and uncertainty in, the credit and financial markets in the U.S. and worldwide resulting from the effects of COVID-19 and increases in inflation, interest rates and recent and potential future disruptions in access to bank deposits or lending commitments due to bank failures. If these conditions persist and deepen, we could experience an inability to access additional capital or our liquidity could otherwise be impacted. If we are unable to raise capital when needed or on attractive terms, we would be forced to delay, reduce or eliminate our research and development programs and other efforts. However, like many other companies, we are taking actions to monitor our operations to account for the increases in cost of capital. Specifically, this includes efforts to enhance our operational efficiency, maximize our R&D spend through strategic collaborations, and being highly selective in hiring top-tier talent.

Change in Fiscal Year

In October 2021, the board of directors of Legacy Rigetti (the “Legacy Rigetti Board”) approved a change in fiscal year end from January 31 to December 31, effective December 31, 2021. As a result of this change, our fiscal year begins on January 1 and ends on December 31 of each year, starting on January 1, 2022. For fiscal year 2021, this covers a period of 11 months starting from February 1, 2021 and ending on December 31, 2021. See below “Result of Operations” regarding comparability of prior periods relating to the change in fiscal year.

Key Components of Results of Operations

Revenue

We generate revenue through our development contracts, as well as from our QCaaS offerings and other services including training and provision of quantum computing components. Development contracts are generally multi-year, non-recurring arrangements pursuant to which we provide professional services regarding collaborative research in practical applications of quantum computing to technology and business problems within the customer’s industry or organization and assists the customer in developing quantum algorithms and applications to assist customers in areas of business interest. QCaaS revenue is recognized on a ratable basis over the contract term or on a usage basis, which generally ranges from three months to two years. Revenue related to development contracts and other services is recognized as the related milestones are completed or over time, as the work required to complete milestones deemed probable of being met is completed. Revenue related to the sale of custom quantum computing components is recognized at a point in time upon acceptance by the customer.

Cost of Revenue

Cost of revenue consists primarily of all direct and indirect cost associated with providing QCaaS offerings and development contracts and other services, including employee salaries and related taxes, bonuses, and benefit costs of program management and personnel associated with the delivery of goods and services to customers and sub-contract costs for work performed by third parties. Cost of revenue also includes an allocation of facility costs, depreciation and amortization directly related to providing the QCaaS offerings and development contracts and other services. Cost of revenue is expected to increase with any growth in revenues as we expand our operations, enhance our service offerings and expand our customer base.

[Table of Contents](#)

Operating Expenses

Our operating expenses consist of sales and marketing, general and administrative and research and development expenses.

Research and Development

Research and development costs are expensed as incurred. Research and development expenses include compensation, employee benefits, stock-based compensation, outside consultant fees, facility costs, depreciation and amortization, materials and components purchased for research and development. We expect research and development expenses to increase as we invest in the enhancement of our product offerings. We do not currently capitalize any research and development expenditures.

Sales and Marketing

Sales and marketing expenses consist primarily of compensation including stock-based compensation, employee benefits, outside consultant's fees, travel and marketing promotion costs. We expect selling and marketing expenses to increase after we achieve narrow and broad quantum advantage, and subsequently enhance our service offerings, expand our customer base, and implement new marketing strategies.

General and Administrative

General and administrative expenses include compensation, employee benefits, stock-based compensation, insurance, facility costs), professional service fees, and other general overhead costs other than those associated with providing QCaaS offerings and development contracts and other services. We expect our general and administrative expenses to increase as we continue to grow our business. We also expect to incur additional expenses as a result of operating as a public company.

Provision for Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recorded for deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. We have recorded a full valuation allowance against our deferred tax assets.

Results of Operations

As described above in “—Change in Fiscal Year,” the board of Legacy Rigetti changed the fiscal year from January 1 to December 31, effective December 31, 2021. Accordingly, the fiscal year ended December 31, 2021 covers a period of 11 months from February 1, 2021 to December 31, 2021 (“fiscal year 2021”). Financial statements for the fiscal year ended December 31, 2022 include the 12 months ended December 31, 2022 (“fiscal year 2022”).

The comparability of our results of operations for fiscal year 2022 with fiscal year 2021 is affected by the change in fiscal year since fiscal year 2021 includes an 11-month period versus a 12-month period for fiscal year 2022. For comparability purposes, to supplement the discussion of our historical results of operations for fiscal year 2022 and comparative period in 2021, we have included a discussion of unaudited supplemental recast

Table of Contents

information for the 12 months ended December 31, 2021. The unaudited supplemental recast information for the 12-month period ended December 31, 2021 includes historical consolidated results of operations for fiscal year 2021 and one month of results of operations for January 2021.

All dollar amounts in tables, except share and per share amounts, are presented in thousands unless otherwise noted.

Year ended December 31, 2022 compared to 11 months ended December 31, 2021 and Supplemental Information – Year ended December 31, 2022 compared to Unaudited 12 months ended December 31, 2021

The following tables set forth our results of operations for fiscal year 2022 compared to fiscal year 2021 and supplemental information comparing fiscal year 2022 to the unaudited 12 month period ended December 31, 2021:

	Fiscal Year				Supplemental Information			
	Year Ended December 31, 2022	11 Months Ended December 31, 2021	Year Ended December 31, 2022 versus 11 Months Ended December 31, 2021		Year Ended December 31, 2022	12 Months Ended December 31, 2021 (unaudited)	Year Ended December 31, 2022 versus 12 Months Ended December 31, 2021 (unaudited)

Revenue

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Revenue increased \$4.9 million, or 60%, to \$13.1 million for the year ended December 31, 2022, up from \$8.2 million for the 11 months ended December 31, 2021. The period over period increase was attributable to a \$5.3 million increase in revenue from extension of three government contracts into year-two and year-three phases, a \$0.7 million increase from a non-governmental QCaaS customer, and other increases in revenue from existing projects totaling \$0.4 million. These increases were offset in part by a \$0.9 million decrease in revenue from a U.S. government contract that is nearing completion and a \$0.6 million decrease in revenue from other customers.

Our development contracts are fixed price milestone or cost share-based contracts and the timing and amounts of revenue recognized in each quarter vary based on the delivery of the associated milestones and/or work performed. We expect to continue to generate the majority of our revenue from development contracts over at least the next several years and that revenue will vary in timing and size as we work to ramp up our QCaaS business for the longer term. There may be some near-term reduction in revenue as we align to our new strategy announced in February 2023.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

Revenue increased \$4.5 million, or 52%, to \$13.1 million for the year ended December 31, 2022, up from \$8.6 million for the unaudited 12 months ended December 31, 2021. The period over period increase was primarily attributable to the reasons discussed in the section above, offset in part by one more month of activity in the 2021 comparison period. We earned \$0.4 million of revenue in January 2021 which was included in the unaudited 12 months ended December 31, 2021.

Cost of Revenue

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Cost of revenue increased by \$1.3 million, or 77%, to \$2.9 million for the year ended December 31, 2022, as compared to \$1.6 million for the 11 months ended December 31, 2021. The increase was mainly attributable to an increase in employee-related costs of \$0.4 million and subcontractor costs of \$0.9 million associated with specific projects and collaborative development contract services work with government agencies.

We expect subcontractor costs to increase and employee-related costs to decline in the near term as a result of the reorganization efforts, including the reduction in workforce, that we announced in February 2023. In addition, we have incurred and may continue to incur increased costs associated with equipment, system components and labor due to current global economic conditions, including inflation, labor shortages and supply conditions.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

Cost of revenue increased by \$1.1 million, or 62%, to \$2.9 million for the year ended December 31, 2022, as compared to \$1.8 million for the unaudited 12 months ended December 31, 2021. The increase was mainly attributable to the reasons described in the section above and one more month in the 2021 comparison period. We incurred \$0.2 million of employee-related costs in January 2021 which was included in the unaudited 12 month periods ended December 31, 2021.

[Table of Contents](#)

Operating Expenses

Research and Development Expenses

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Research and development expenses increased by \$33.0 million, or 123%, to \$60.0 million for the year ended December 31, 2022, from \$26.9 million for the 11 months ended December 31, 2021. The period over period increase was primarily attributable to the following factors and one less month of activity in the 2021 comparison period:

- a \$22.6 million increase in employee-related costs for the year ended December 31, 2022 due to an increase in headcount and resulting wage increase of \$9.5 million, a \$13.1 million increase in stock-based compensation expense, which includes annual refresh grants of restricted stock to employees in the year ended December 31, 2022 and a one-time cumulative recognition of previously deferred stock-based compensation expense of \$1.6 million related to the satisfaction of the liquidity condition with respect to outstanding stock units recognized as a result of the close of the Business Combination in March 2022.
- a \$7.4 million increase associated with the ongoing and expanded investment in research and development efforts, including a \$3.5 million increase in software subscription costs, a \$2.0 million increase in depreciation, a \$0.9 million increase in equipment spares and materials costs, a \$0.3 million increase in other costs, a \$0.4 million increase in other expenses relates to travel and meal costs, and a \$0.3 million increase in consultant fees.
- a \$3.0 million increase in facility costs, including a \$1.3 million one-time catch up for electricity usage at our Berkeley facility from February 2019 to December 31, 2021, which was an out-of-period adjustment; additional electricity usage of \$0.7 million, and an increase in operating lease expense of \$1.0 million due to an expansion of office space.

We expect research and development expenses to remain consistent during the next two years as a result of anticipated increase in expenses as we shift our focus to further developing the Ankaa-1 84-qubit system and improving performance with the anticipated Ankaa-2 84-qubit system, offset by our reorganization efforts announced in February 2023. Thereafter our plan is to shift to development of the anticipated Lyra 336-qubit system, working towards the goal of achieving narrow quantum advantage. We expect research and development expenses to increase as and if we near the point of achieving narrow quantum advantage. Our ability to limit research and development costs in the nearer term will be impacted by increasing costs for labor, including stock-based compensation expenses in order to attract and retain qualified personnel, equipment and component costs impacted by the current macroeconomic environment, including supply chain constraints, and labor shortages.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

Research and development expenses increased by \$31.2 million, or 108%, to \$60.0 million for the year ended December 31, 2022, from \$28.8 million for the unaudited 12 months ended December 31, 2021. The increase was primarily attributable to the reasons discussed in the section above and one more month of expenses included in the 2021 comparison period specifically related to the following:

- \$1.6 million of employee-related costs, including \$1.4 million for wages and \$0.2 million for stock-based compensation expense.
- \$0.2 million of depreciation expense.

Sales and Marketing Expenses

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Sales and marketing increased \$3.9 million, or 156%, to \$6.3 million for the year ended December 31, 2022, from \$2.5 million for the 11 months ended December 31, 2021. The period over period increase was primarily

Table of Contents

attributable to a \$0.8 million increase in employee related costs, a \$2.0 million increase in stock-based compensation of which \$0.4 million was related to the satisfaction of the liquidity condition with respect to outstanding stock units recognized as a result of the close of the Business Combination in March 2022, a \$1.1 million increase for consultants and other spending for sales development activities.

We expect selling and marketing expenses to marginally decrease or stay consistent during the next few years due to the reduction in workforce we implemented in February 2023 and other cost control efforts. We expect sales and marketing expenses to increase if and when we near the point of narrow quantum advantage.

Supplemental Information Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

Sales and marketing increased \$3.8 million, or 148%, to \$6.3 million for the year ended December 31, 2022, from \$2.6 million for the unaudited 12 months ended December 31, 2021. The increase was primarily driven by the reasons discussed in the section above and one more month of activity in the 2021 comparison period.

General and Administrative Expenses

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

General and administrative expenses increased by \$36.3 million, or 322%, to \$47.6 million for the year ended December 31, 2022, from \$11.3 million for the 11 months ended December 31, 2021.

The increase was attributable to the following factors:

- a \$27.9 million increase in stock-based compensation expense, including a one-time cumulative recognition of previously deferred stock-based compensation expense of \$6.9 million related to the satisfaction of the liquidity condition with respect to outstanding stock units recognized as a result of the closing of the Business Combination.
- a \$7.8 million increase in other expenses, including \$4.6 million in legal and accounting costs related to public company reporting requirements, investor relation costs, other software acquisition costs, and a \$3.2 million increase in consultant costs.
- a \$2.7 million increase for directors' and officers' insurance and other office expenses attributable to a return to in-person office work related to the Covid-19 pandemic;
- a \$1.8 million increase for transaction bonuses awarded to employees in recognition of the closing of the Business Combination,
- a \$1.8 million increase in employee related costs as a result of operating as a public company and the build out of our information security team, including higher executive salaries and increased headcount.
- a \$0.5 million increase in depreciation expense.

These costs were partially offset by the gain in change in fair value of our Forward Warrant Agreement of \$5.8 million which was entered into with Ampere in October 2021 as part of our strategic collaboration agreement.

We expect general and administrative expenses to decrease or stay consistent during the next few years due to the reduction in workforce we implemented in February 2023 and other efforts to control costs.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

General and administrative expenses increased by \$34.5 million, or 264%, to \$47.6 million for the year ended December 31, 2022, from \$13.1 million for the unaudited 12 months ended December 31, 2021. The

[Table of Contents](#)

increase was attributable to the reasons described in the section above and one more month of activity in the 2021 comparison period.

The Company incurred the following costs totaling \$1.8 million in January 2021 which were included in the unaudited 12 months ended December 31, 2021:

- \$0.5 million in other expenses including legal and accounting costs related to private company financing initiatives, audit, third party consulting services, preparing the company to go public and other software acquisition costs;
- \$0.5 million in employee related costs;
- \$0.3 million in other costs attributable to return to office work;
- \$0.2 million in depreciation;
- \$0.1 million in stock-based compensation expense.
- \$0.2 million in other costs

Goodwill impairment

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Goodwill impairment increased by \$5.4 million for the year ended December 31, 2022, when compared to the 11 months ended December 31, 2021. We test for goodwill impairment on the first of November each year and at interim dates when indicators of impairment exist. When assessing goodwill for possible impairment, we first consider qualitative factors, including but not limited to macroeconomic conditions, industry and market considerations, our overall performance and events directly affecting us. It was noted during our annual goodwill impairment assessment on November 1, 2022 that the Company had experienced a sustained decline in stock price, however, we determined at that time that our goodwill was not impaired. Subsequently, our stock price continued to decline, resulting in a triggering event that required us to evaluate goodwill for possible impairment as of December 31, 2022. After adjusting the Company's stock market capitalization for a control premium based on market comparable transactions, we determined that the fair value of the Company was less than its carrying value or stockholder's equity, resulting in a non-cash goodwill impairment charge of \$5.4 million for the year ended December 31, 2022.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

As the goodwill impairment occurred during the year ended December 31, 2022, the increase in impairment during the year ended December 31, 2022 as compared to the unaudited 12 months ended December 31, 2021 is related to the matter described in the above section.

Other Income (Expense), net

Interest Expense

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Interest expense was \$5.3 million and \$2.5 million for the year ended December 31, 2022 and the 11 months ended December 31, 2021, respectively. The increase in expense was a result of the Loan Agreement we entered into with Trinity Capital Inc. ("Trinity") in March 2021 (as amended from time to time, the "Loan Agreement"). The period over period increase was a combination of the Federal Reserve increasing interest rates in response to inflation and a longer interest period during the year ended December 31, 2022. For the year ended December 31, 2022, interest expense was based on the overall borrowings under the Loan Agreement of \$32.0 million with higher interest rates. For the 11 months ended December 31, 2021 interest expense reflected lower borrowings and interest rates, with borrowings ranging from \$12.0 to \$27.0 million.

[Table of Contents](#)

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

The increase in interest expense during the year ended December 31, 2022 as compared to the unaudited 12 months ended December 31, 2021 is related to the matter described in the above section. As the Loan Agreement was entered into in March 2021, no interest costs were incurred in January 2021.

Interest Income

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Interest income was \$2.4 million and virtually nil for the year ended December 31, 2022, and the 11 months ended December 31, 2021, respectively. The increase in interest income was a result of the available-for-sales investments we hold and the increase in interest rates on deposits due to Federal Reserve rate increases. As of December 31, 2022, investment securities in our Trust Account consisted of \$36.3 million in money market funds, \$58.2 million in United States Treasury securities, \$3.6 million in corporate bonds and \$23.1 million in commercial paper. We earned interest on such investments. We did not hold available-for-sales investments and did not earn interest on such investments during the 11 months ended December 31, 2021.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

The period over period increase was attributable to the reasons explained in the section above and one more month of interest income recognized in the unaudited 12 months ended December 31, 2021.

Change in Fair Value of Warrant Liabilities

A discussion of change in fair value of warranty liabilities is included in Note 13 to our consolidated financial statements for the year ended December 31, 2022, included elsewhere in this prospectus.

Change in Fair Value of Earn-out Liability

A discussion of change in fair value of earn-out liability is included in Note 2, Sponsor Earn-Out Liability, to our consolidated financial statements for the year ended December 31, 2022, included elsewhere in this prospectus.

Transaction Costs

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

A portion of transaction costs arising from the Business Combination were allocated to liability-classified instruments that are subsequently measured at fair value through earnings. Transaction costs allocated to these instruments must be expensed as incurred. We incurred and expensed total transaction costs of \$0.9 million allocated to liability-classified instruments for the year ended December 31, 2022. We did not incur any transaction costs for the 11 months ended December 31, 2021.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

As no transaction costs were incurred during the unaudited 12 months ended December 31, 2021, the increase in transaction costs during the year ended December 31, 2022 is related to the matter described in the section above.

Liquidity and Capital Resources

We have incurred net losses since inception, and experienced negative cash flows from operations. Prior to the Business Combination, we financed our operations primarily through the issuance of preferred stock,

[Table of Contents](#)

warrants, convertible notes, venture backed debt and revenues. During the year ended December 31, 2022, we incurred a net loss of \$71.5 million. As of December 31, 2022, we had an accumulated deficit of \$278.7 million, and we expect to incur additional losses for the foreseeable future. In connection with the closing of the Business Combination on March 2, 2022, we received net proceeds of \$225.6 million. We believe that our existing balances of cash, cash equivalents and marketable securities should be sufficient to meet our anticipated operating cash needs for at least the next 12 months, based on our current business plan, and expectations and assumptions considering current macroeconomic conditions. Based on our estimates and current business plan, we expect that we will need to obtain additional capital by late 2024 or early 2025 in order to continue our research and development efforts and achieve our business objectives. We cannot be sure that additional financing will be available. If we are unable to raise additional funding when needed, we may be required to delay, limit or substantially reduce our quantum computing development efforts. We have based these estimates on assumptions that may prove to be wrong and we could use our available capital resources sooner than we currently expect, and future capital requirements and the adequacy of available funds will depend on many factors, including those described in the section titled “Risk Factors” in this prospectus. Global economic conditions have been worsening, with disruptions to, and volatility in, the credit and financial markets in the U.S. and worldwide resulting from the continuing effects of COVID-19 pandemic, disruptions in banking systems, international conflicts and otherwise. If these conditions persist and deepen, we could experience an inability to access additional capital or our liquidity could otherwise be impacted. If we are unable to raise capital when needed or on attractive terms, we would be forced to delay, reduce or eliminate our research and development programs and/or other efforts. A recession or additional market corrections resulting from the impact of the continuing effects of the COVID-19 pandemic and macroeconomic conditions could materially affect our business and the value of our securities.

Our short-term cash requirements include capital expenditures for materials and components for research and development and quantum computing fridges; working capital requirements; and strategic collaborative arrangements and investments.

Our long-term requirements include expenditures for the planned expansion of our quantum chip fabrication facility; planned development of multiple generations of quantum processors; and anticipated additional investments to scale our QCaaS offering.

We will require a significant amount of cash for expenditures as we invest in ongoing research and development and business operations. Until such time as we can generate significant revenue from sales of our development contracts and other services, including our QCaaS offering, we expect to finance our cash needs primarily through our Loan Agreement with Trinity, our arrangements with Ampere, our committed equity financing with B. Riley, and other potential securities financings or other capital sources, including development contract revenue with government agencies and strategic partnerships. To the extent that we raise additional capital through the sale of equity or convertible debt securities, including through the use of our committed equity financing with B. Riley, the ownership interest of our stockholders will be, or could be, diluted, and the terms of these securities may include liquidation or other preferences that adversely affect the rights of our common stockholders. Debt financing and equity financing, if available, may involve agreements that include covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. If we are unable to raise additional funds through equity or debt financings when needed, we may be required to delay, limit, or substantially reduce our quantum computing development efforts. Our future capital requirements and the adequacy of available funds will depend on many factors, including those set forth in the section titled “Risk Factors” included in this prospectus.

In addition, actual sales, if any, of shares of our Common Stock to B. Riley pursuant to the committed equity financing will depend on a variety of factors to be determined by us from time to time, including, among other things, market conditions, the trading price of our Common Stock and determinations by us as to appropriate sources of funding for our business and operations. We cannot guarantee the extent to which we may utilize the committed equity financing.

[Table of Contents](#)

Loan and Security Agreement

On March 10, 2021, we entered into the Loan Agreement with Trinity for term loans with a principal amount of \$12.0 million, bearing an interest rate at the greater of 7.5% plus the prime rate published by the Wall Street Journal or 11.0%. In addition, we are required to pay a final payment fee equal to 2.75% of the aggregate amount of all term loan advances. The term loans under the Loan Agreement are secured by all of our assets. The Loan Agreement contains customary representations, warranties and covenants, but does not include any financial covenants. The negative covenants include restrictions on the ability to incur indebtedness, pay dividends, execute fundamental change transactions, and other specified actions. In connection with entry into the Loan Agreement, we issued a warrant to purchase shares of our Common Stock to Trinity. The Guarantor of the loan is Rigetti Holdings, Inc. and the loan is secured by substantially all of our assets.

On May 18, 2021, we entered into a first amendment to the Loan Agreement, which modified certain financial covenants, including an additional good faith deposit of \$20,000 and adding a tranche B to the Loan Agreement in an aggregate amount of \$15.0 million, consisting of two advances of \$8.0 million and \$7.0 million each. In connection with such amendment, the maturity date was modified to be the date equal to 48 months from the first payment date of each specific cash advance. In connection with such amendment, we cancelled the initial warrants and issued a warrant to purchase 995,099 shares of our Common Stock.

On October 21, 2021, we entered into a second amendment to the Loan Agreement, which modified the date requiring us to deliver evidence of completion of the PIPE transaction and execution of a definitive merger agreement with a special purpose acquisition company to October 31, 2021.

Pursuant to the second amendment, the maturity date was modified to be the date equal to 48 months from the first payment date of each specific cash advance. Subject to an interest only period of 18 months following each specific cash advance date, the term loan incurs interest at the greater of a variable interest rate based on prime rate or 11% per annum, payable monthly. Interest-only payments are due monthly immediately following an advance for a period of 18 months and, beginning on the 19th month, principal and interest payments are due monthly.

In January 2022, we entered into the third amendment to the Loan Agreement to increase the debt commitment by \$5.0 million to \$32.0 million. The amendment allows us to draw an additional \$5.0 million immediately with an additional \$8.0 million to be drawn at the sole discretion of the lender. We drew the additional \$5.0 million upon signing the amendment. Other modifications per the amendment included an extension of the requirement to raise an additional \$75.0 million of equity and a defined exit fee for the additional \$5.0 million to be at 20% of the advanced funds under the amendment. In conjunction with the amendment, we also guaranteed payment of all monetary amounts owed and performance of all covenants, obligations and liabilities. As of December 31, 2022, the total principal amount outstanding under the Loan Agreement was approximately \$30.7 million. We use borrowings under the Loan Agreement for working capital purposes.

The Loan Agreement is secured by a first-priority security interest in substantially all of our assets. As of the date of this prospectus, we are in compliance with all covenants under the Loan Agreement.

Our cash commitments as of December 31, 2022 were primarily as follows:

	<u>Total</u>	<u>Short-Term</u>	<u>Long-Term</u>
Financing obligations	\$30,709	\$ 9,491	\$ 21,218
Estimated cash interest on financing obligations	4,683	1,447	3,236
Operating lease obligations	12,839	2,422	10,417
Total	<u>\$48,231</u>	<u>\$ 13,360</u>	<u>\$ 34,871</u>

[Table of Contents](#)

Financing obligations consist of cash principal payments related to the Loan and Security Agreement and are presented gross. These balances on the consolidated balance sheet are presented net of issuance costs. Estimated cash interest on financing obligations are based on the interest rate on the Loan and Security Agreement as of February 2023 of 15.25%. Operating lease obligations consist of obligations under non-cancelable operating leases for our offices and facilities. The cash requirements in the table above are associated with contracts that are enforceable and legally binding and that specify all significant terms, including fixed or minimum services to be used, fixed, minimum or variable price provisions, and the approximate timing of the actions under the contracts. The table does not include obligations under agreements that we can cancel without a significant penalty.

Summary of Historical Cash Flows

The following table summarizes our cash flows for the periods indicated:

	Fiscal Year			Supplemental Information		
	Year Ended December 31, 2022	11 Months Ended December 31, 2021	Year Ended December 31, 2022 versus 11 Months Ended December 2021 \$ Change	Year Ended December 31, 2022	12 Months Ended December 31, 2021 (Unaudited)	Year Ended December 31, 2022 versus 12 Months Ended December 2021 \$ Change (Unaudited)
Net cash used in operating activities	\$ (62,689)	\$ (29,044)	\$ (33,645)	\$ (62,689)	\$ (30,642)	\$ (32,047)
Net cash used in investing activities	(107,024)	(7,008)	(100,016)	(107,024)	(7,354)	(99,670)
Net cash provided by financing activities	215,454	25,583	189,871	215,454	25,601	189,853

Cash Flows Used in Operating Activities

Our cash flows from operating activities are significantly affected by our ability to achieve significant growth to offset expenditures related to research and development, sales and marketing, and general and administrative activities. Our operating cash flows are also affected by our working capital needs to support growth in personnel-related expenditures and fluctuations in accounts payable and other current assets and liabilities.

Year ended December 31, 2022 vs. 11 months ended December 31, 2021

Net cash used in operating activities increased by \$33.6 million, or 116%, when comparing the year ended December 31, 2022 to the 11 months ended December 31, 2021. The increase in spending was primarily due to:

- an increase in headcount and payroll related costs of \$20.8 million as a result of investments in research and development efforts combined with upgrading internal and external resources to operate as a public company including a one-time bonus related to the business combination of \$2.1 million;
- a \$6.3 million increase in legal and accounting costs related to enhanced public reporting requirements, investor relation costs, and other software acquisition costs;
- a \$3.3 million prepayment of insurance premiums for directors and officers liability insurance;
- \$2.8 million in additional interest costs related to increased borrowing amounts associated with the Loan Agreement; and
- transaction costs of \$1.0 million incurred in connection with the closing of the Business Combination.

[Table of Contents](#)

Net cash used in operating activities during the year ended December 31, 2022 was \$62.7 million, resulting primarily from a net loss of \$71.5 million, adjusted for non-cash charges of \$11.2 million. These non-cash charges were partially offset by changes in operating assets and liabilities during the period. Changes in operating assets and liabilities accounted for \$2.3 million of cash used in operations. The changes primarily consisted of an increase in accounts receivable of \$4.7 million; an increase in prepaid and current assets of \$1.1 million; a decrease in accounts payable of \$0.7 million, and a decrease in other liabilities of \$0.3 million; offset by an increase in accrued expenses and other current liabilities of \$4.5 million.

Net cash used in operating activities during the 11 months ended December 31, 2021 was \$29.0 million, resulting primarily from a net loss of \$38.2 million, adjusted for non-cash charges of \$9.0 million. Changes in operating assets and liabilities accounted for \$0.2 million of cash provided by operations, which primarily consisted of an increase in prepaid and current assets of \$0.3 million; an increase in deferred revenue of \$0.5 million, an increase in accounts receivable of \$1.1 million, offset by an increase in accounts payable, accrued expenses and other liabilities of \$1.1 million.

In connection with the reorganization efforts announced in February 2023, we transitioned to a newly appointed CFO and CTO and are implementing a workforce reduction in order to focus the organization and its resources on nearer-term strategic priorities. As a result of the reorganization, we expect to incur costs related to management transition, and reduce operating expenses in activities outside of focus areas in the nearer term and prioritize cash resources.

Supplemental Information - Year ended December 31, 2022 vs. Unaudited 12 months ended December 31, 2021

Net cash used in operating activities increased by \$32.0 million, or 105%, when comparing the year ended December 31, 2022 to the unaudited 12 months ended December 31, 2021. The increase in spending was primarily due to reasons explained in the section above.

Cash Flows Used in Investing Activities

Net cash used in investing activities during the year ended December 31, 2022 was \$107.0 million, resulting from the addition of \$22.7 million in property and equipment and the addition of \$84.3 million in available-for-sale securities. Investments in property and equipment during this period relate primarily to process computing equipment, quantum computing fridges, and development tools for our chip fabrication facility. Investments in available-for-sale securities consist of U.S Treasury securities, commercial paper, and corporate bonds that have a maturity of one year or less.

Net cash used in investing activities during the 11 months ended December 31, 2021, and unaudited 12 months ended December 31, 2021 was \$7.0 million and \$7.4 million, respectively, and is attributable to additions to property and equipment.

Net cash used in investing activities during the year ended December 31, 2022, increased by \$100.0 million and \$99.6 million compared to the 11 months and unaudited 12 months ended December 31, 2021, respectively, largely as a result of increased investment in available-for-sale securities and research and development infrastructure, including additional investments for electricity upgrades. Investments in our Fab 1 facility and quantum computing fridges will continue to be made to the extent necessary to support our new strategic direction referred to above.

Cash Flows provided by Financing Activities

Net cash provided by financing activities during the year ended December 31, 2022 was \$215.5 million, reflecting proceeds of \$225.6 million from the Business Combination and PIPE Investment net of transaction costs, additional proceeds from the issuance of debt and warrants of \$5.0 million associated with the Loan Agreement, less principal payments of \$1.3 million, debt issuance costs and exit fees totaling \$1.1 million; and proceeds from issuance of Common Stock upon exercise of stock options and warrants of \$6.1 million.

[Table of Contents](#)

Net cash provided by financing activities was the same for the 11 months ended December 31, 2021 and unaudited 12 months ended December 31, 2021 for a total of \$25.6 million, mainly reflecting proceeds from the issuance of debt totaling \$27.0 million less cash payments for debt issuance costs of \$0.3 million, proceeds from issuance of Common Stock upon exercise of stock options and warrants for a total \$0.3 million, and payment of deferred offering costs of \$1.5 million.

Net cash provided by financing activities during the year ended December 31, 2022 increased by \$189.9 million as compared to both the 11 months and unaudited 12 months ended December 31, 2021, largely from the close of the Business Combination and PIPE Investment net of transaction costs, and additional proceeds from the issuance of debt and warrants during the year ended December 31, 2022. We expect to continue finance our cash needs primarily through our arrangements with Ampere, our committed equity financing with B. Riley, and other potential securities financings or capital sources.

Critical Accounting Policies and Estimates

This Management's Discussion and Analysis of Financial Condition and Results of Operations is based on our consolidated financial statements included in this prospectus, which have been prepared in accordance with U.S. GAAP. Preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities. We also make estimates and assumptions that affect revenue and expenses during the reporting periods. Our estimates are based on historical experience and on various other factors that we believe are reasonable under the circumstances. The results of these estimates form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

While our significant accounting policies are described in the Notes to our consolidated financial statements for the year ended December 31, 2022, included elsewhere in this prospectus, we believe the following critical accounting policies and estimates are most important to understanding and evaluating our reported financial results.

Public and Private Warrants

Prior to the Business Combination, Supernova issued 4,450,000 private placement warrants ("Private Warrants") and 8,625,000 public warrants ("Public Warrants" and collectively, "Warrants"). Each whole warrant entitles the holder to purchase one share of our Common Stock at a price of \$11.50 per share, subject to adjustments and will expire five years after the Merger or earlier upon redemption or liquidation.

The Private Warrants do not meet the derivative scope exception and are accounted for as derivative liabilities. Specifically, the Private Warrants contain provisions that cause the settlement amounts to be dependent upon the characteristics of the holder of the warrant which is not an input into the pricing of a fixed-for-fixed option on equity shares. Therefore, the Private Warrants are not considered indexed to our stock and should be classified as a liability. Since the Private Warrants meet the definition of a derivative, we recorded the Private Warrants as liabilities in the consolidated balance sheet at fair value upon the closing of the Business Combination, with subsequent changes in the fair value recognized in the consolidated statements of operations at each reporting date. The fair value of the Private Warrants was measured using the Black-Scholes option-pricing model at each measurement date. The Public Warrants also fail to meet the indexation guidance in ASC 815 and are accounted for as liabilities as the Public Warrants include a provision whereby in a scenario in which there is not an effective registration statement, the warrant holders have a cap, 0.361 shares of Common Stock per warrant (subject to adjustment), on the issuable number of shares in a cashless exercise.

Subsequent to the separate listing and trading of the Public Warrants, the fair value of the Public Warrants has been measured based on the observable listed prices for such warrants and the fair value of the Private Warrants are measured using a Monte Carlo Pricing Model.

[Table of Contents](#)

On the consummation of the Business Combination, we recorded a liability related to the Private Warrants of \$9.6 million, with an offsetting entry to additional paid-in capital. As of December 31, 2022, the fair value of the Private Warrants decreased to \$1.1 million, with the gain on the change in fair value of derivative warrant liabilities recorded in the consolidated statements of operations for the year ended December 31, 2022.

Similarly, on the consummation of the Business Combination, we recorded a liability related to the Public Warrants of \$16.3 million, with an offsetting entry to additional paid-in capital. As of December 31, 2022, the fair value of the Public Warrants decreased to \$0.7 million with the gain on the change in fair value of derivative warrant liabilities recorded in the consolidated statements of operations for the year ended December 31, 2022.

Other Derivative Warrant Liabilities

We currently do not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. We evaluate all of our financial instruments, including issued stock purchase warrants, to determine if such instruments are derivatives or contain features that qualify as embedded derivatives, pursuant to ASC 815, "Derivatives and Hedging" ("ASC 815") at the initial recognition date.

Other than the Public and Private Warrants noted above, we also issued a total of 783,129 Common Stock warrants in conjunction with the Loan Agreement in 2021. Such derivative warrant liabilities are classified as non-current as their liquidation is not reasonably expected to require the use of current assets or require the creation of current liabilities. We utilized the Black-Scholes model to determine the inception date fair value of the warrants of approximately \$2.7 million which was recorded as part of Debt Issuance Cost. The outstanding Common Stock warrants were subsequently remeasured at each reporting period using the Black-Scholes model with the change in fair value recorded as a component of other income in the Company's consolidated statements of operations.

On June 2, 2022, the 783,129 Common Stock warrants that were issued in connection with the Loan Agreement were exercised and the \$6.4 million warrant liability was reclassified to equity. We recorded a loss of \$2.0 million from the change in the fair value of the warrant liability for the year ended December 31, 2022.

Earn-Out Liability

At Business Combination Closing, Supernova Sponsor subjected certain shares ("Sponsor Vesting Shares") of Common Stock held by Supernova Sponsor and its permitted transferees (the "Sponsor Holders") to forfeiture and vesting as of the Closing if thresholds related to the weighted average price of Common Stock are not met for the duration of various specified consecutive day trading periods during the five-year period following the Closing (the "Earn-out Triggering Events"). Any such shares held by the Sponsor Holders that remain unvested after the fifth anniversary of the Closing will be forfeited.

The Sponsor Vesting Shares are accounted for as liability classified instruments because the Earn-Out Triggering Events that determine the number of Sponsor Vesting Shares to be earned back by the Sponsor Holders include outcomes that are not solely indexed to our Common Stock. The aggregate fair value of the Sponsor Vesting Shares at the time of the Business Combination Closing was estimated using a Monte Carlo simulation model and was determined to be \$20.4 million.

As of December 31, 2022, the Earn-Out Triggering Events were not achieved for any of the tranches, and as such, the Company adjusted the carrying amount of the liability to its estimated fair value of \$1.2 million. The change in the fair value of \$19.2 million is included in change in fair value of earn-out liability in the consolidated statements of operations for the year ended December 31, 2022.

Forward Warrant Agreement

In connection with the execution of the Merger Agreement in October 2021, we entered into the Forward Warrant Agreement with Ampere for the purchase of a warrant for an aggregate purchase price (including amounts from exercise) of \$10.0 million. The Forward Warrant Agreement provides for the issuance of a warrant for the purchase of an aggregate of 1,000,000 shares of Common Stock at an exercise price of \$0.0001. The purchase of the warrant was conditioned upon, among other things, the consummation of the Business Combination and the entry into a collaboration agreement between Ampere and us. The collaboration agreement was entered into in January 2022. Ampere was required to pay \$5.0 million to us no later than the later of (i) the Closing and (ii) June 30, 2022.

On June 30, 2022, pursuant to the Warrant Subscription Agreement, we issued the warrant to Ampere upon receipt of an aggregate of \$5.0 million (including the exercise price), and upon such payment and issuance, 500,000 shares of our Common Stock vested under the warrant and were immediately exercised by Ampere pursuant to the terms of the warrant. Ampere is required to pay an additional \$5.0 million to us no later than the closing date of the listing of Ampere's capital stock, provided that if the listing has not occurred by the second anniversary of the warrant subscription agreement, Ampere is not obligated to make the additional payment and we are not obligated to issue the warrants. The warrant subscription agreement further provides that we will use commercially reasonable efforts to file a registration statement to register the resale of the shares issued or issuable pursuant to the warrant and upon such payment the warrant will vest and be exercisable by Ampere with respect to 500,000 shares of Common Stock pursuant to the terms of the warrant. We filed such registration statement and it became effective in the year ended December 31, 2022.

We evaluated the Forward Warrant Agreement as a derivative in accordance with the guidance of ASC 480, "Distinguishing Liabilities from Equity". We calculated fair value of the Forward Warrant Agreement by using the Forward Contract Pricing methodology at inception and at the end of December 31, 2022. The fair value of the Forward Warrant Agreement was estimated based on the following key inputs and assumptions 1) Assumed holding period 2) Related risk-free rate and 3) Likelihood of the outcome of the various contingencies specified in the agreement. Based on these inputs and assumption, we calculated the fair value of the Forward Warrant Agreement to be a \$2.2 million derivative asset at December 31, 2022 and a \$0.2 million derivative liability at December 31, 2021. We have included the derivative asset separately as a forward contract asset and the derivative liability as a forward contract liability in the accompanying consolidated balance sheets as of December 31, 2022 and December 31, 2021, respectively. The change in fair value is recorded as part of general and administrative expense in our consolidated statements of operations.

Revenue Recognition

Revenue consists primarily of our contracts that provide access to Rigetti quantum computing systems, collaborative research services, professional services, and the sale of custom quantum computing components. Access to Rigetti quantum computing systems can be purchased as a quantum computing subscription, or on a usage basis for a specified quantity of hours. Revenue related to subscription-based access to Rigetti quantum computing systems (i.e., quantum computing subscriptions) is recognized on a ratable basis over the subscription term, which can range from three months to two years. Revenue related to usage-based access to Rigetti quantum computing systems is recognized over time as the systems are accessed using an output method based on compute credit hours expended. Revenue related to collaborative research services and professional services is recognized over time based on completed milestones or hours or costs incurred as appropriate. Revenue for partially completed milestones deemed probable of being met is recognized using an input measure based on actual labor hours incurred to date relative to total estimated labor hours needed to complete the milestone. Revenue related to cost share contracts is recognized as the reimbursable costs are incurred. For Fixed price Milestone based contracts, revenue is recognized based on the input measure explained above as control is expected to transfer over the time period a milestone is completed. Revenue related to the sale of custom quantum computing components is recognized at a point in time upon acceptance by the customer.

[Table of Contents](#)

Our fixed fee development contracts vary in term from one to five years, with the majority of such contracts having a term of 18 months to two years. When establishing the pricing for our fixed fee arrangements, we determine the pricing based on estimated costs to complete and expected margins taking into account the scope of work outlined within the contract being evaluated and our historical experience with similar services and contracts. Actual costs incurred over the period in which these contracts are fulfilled could vary from these estimates and therefore, these estimates are subject to uncertainty. On a quarterly basis, management reviews the progress with respect to each contract and its related milestones and evaluates whether any changes in estimates exists. As a result of the quarterly reviews, revisions in the estimated effort to complete the contract are reflected in the period in which the change is identified. These revisions may impact the overall progress related to transfer of control and therefore, result in either increases or decreases in revenues as well as increase or decreases in fulfillment costs and contract margins. In accordance, with ASC No. 250, Accounting Changes and Error Corrections, any changes in estimates are reflected in our consolidated statements of operations in the period in which the circumstances that give rise to the revision become known to management. To date, we have not experienced any changes in estimates that have had a material impact on our results from operations or financial position.

When our contracts with customers contain multiple performance obligations, the transaction price is allocated on a relative standalone selling price basis to each performance obligation. We typically determine standalone selling price based on observable selling prices of our products and services. In instances where standalone selling price is not directly observable, standalone selling price is determined using information that may include market conditions and other observable inputs. Standalone selling price is typically established as a range. In situations in which the stated contract price for a performance obligation is outside of the applicable standalone selling price range and has a different pattern of transfer to the customer than the other performance obligations in the contract, we will reallocate the total transaction price to each performance obligation based on the relative standalone selling price of each.

The transaction price is the amount of consideration to which we expect to be entitled in exchange for transferring goods and services to the customer. Revenue is recorded based on the transaction price, which includes fixed consideration and estimates of variable consideration. The amount of variable consideration included in the transaction price is constrained and is included only to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

Our contracts with customers may include renewal or other options at fixed prices. Determining whether such options are considered distinct performance obligations that provide the customer with a material right and therefore should be accounted for separately requires significant judgment. Judgment is required to determine the standalone selling price for each renewal option to determine whether the renewal pricing is reflective of standalone selling price or is reflective of a discount that would provide the customer with a material right. Based on our assessment of standalone selling prices, we determined that there were no significant material rights provided to our customers requiring separate recognition.

Goodwill Impairment Review

In December 2022, we tested our goodwill for impairment. See Note 5 – Goodwill of our consolidated financial statements for the year ended December 31, 2022 included elsewhere in this prospectus for additional information on how the impairment was measured. We have determined that the Company is a single reporting unit. As such, management estimated the fair value of the Company based on its market capitalization as of December 31, 2022, as adjusted for a control premium based on recent market comparable transactions.

Based on our analysis, we determined that the carrying value of the Company (stockholder's equity) exceeded its fair value. As a result, we recorded a non-tax-deductible goodwill impairment charge of \$5.4 million for the year ended December 31, 2022.

Recently Issued Accounting Pronouncements

A description of recently issued accounting pronouncements that may potentially impact our financial position and results of operations is disclosed in Note 2 of our consolidated financial statements for the year ended December 31, 2022 included elsewhere in this prospectus.

Emerging Growth Company and Smaller Reporting Company Status

In April 2012, the JOBS Act was enacted. Section 107 of the JOBS Act provides that an “emerging growth company” may take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. Therefore, an emerging growth company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. Following the Business Combination, we still qualify as an emerging growth company and plan to take advantage of the extended transition period that emerging growth company status permits. During the extended transition period, it may be difficult or impossible to compare our financial results with the financial results of another public company that complies with public company effective dates for accounting standard updates because of the potential differences in accounting standards used.

We will remain an emerging growth company under the JOBS Act until the earliest of (a) December 31, 2026, the last day of our first fiscal year following the fifth anniversary of the completion of SNII’s initial public offering, (b) the last date of our fiscal year in which we have total annual gross revenue of at least \$1.24 billion, (c) the date on which we are deemed to be a “large accelerated filer” under the rules of the SEC with at least \$700.0 million of outstanding securities held by non-affiliates or (d) the date on which we have issued more than \$1.0 billion in non-convertible debt securities during the previous three years.

We are also a “smaller reporting company” as defined in the Exchange Act. We may continue to be a smaller reporting company even after we are no longer an emerging growth company. We may take advantage of certain of the scaled disclosures available to smaller reporting companies and will be able to take advantage of these scaled disclosures for so long as the market value of our voting and non-voting Common Stock held by non-affiliates is less than \$250.0 million measured on the last business day of our second fiscal quarter, or our annual revenue is less than \$100.0 million during the most recently completed fiscal year and the market value of our voting and non-voting Common Stock held by non-affiliates is less than \$700.0 million measured on the last business day of our second fiscal quarter.

BUSINESS

Overview

OUR MISSION IS TO BUILD THE WORLD’S MOST POWERFUL COMPUTERS TO HELP SOLVE HUMANITY’S MOST IMPORTANT AND PRESSING PROBLEMS.

Today, many of the world’s most important computational challenges remain intractable, lying beyond the capabilities of traditional supercomputers and cloud infrastructure. We build and operate quantum computers. We believe quantum computing represents one of the most transformative emerging capabilities in the world today. By leveraging quantum mechanics, our quantum computers process information in fundamentally new, more powerful ways compared to classical computing. When scaled, we believe these systems are poised to solve problems of staggering computational complexity at unprecedented speed.

The availability of scalable quantum computers is expected to enable scientists and engineers to address problems in areas like climate change, fusion energy, quantitative finance, drug development and discovery, materials science, and artificial intelligence. A July 2021 Boston Consulting Group report predicts that fully fault tolerant quantum computers could ultimately produce between \$450 billion and \$850 billion in annual value creation on an operating income basis for end users after 2040.

To unlock this opportunity, we have developed the world’s first multi-chip quantum processor for scalable quantum computing systems. We expect this patented and patent pending, modular chip architecture to be the building block for new generations of quantum processors that we expect to achieve a clear advantage over classical computers.

We are a vertically integrated company. We own and operate Fab-1, a unique wafer fabrication facility dedicated to prototyping and producing our quantum processors. Through Fab-1, we own the means of production of our breakthrough multi-chip quantum processor technology. We leverage our chips through a full-stack product development approach, from quantum chip design and manufacturing through cloud delivery. We believe this full-stack development approach offers both the fastest and lowest risk path to building commercially valuable quantum computers.

We have been deploying our quantum computers to end users over the cloud since 2017. We offer our full-stack quantum computing platform as a cloud service to a wide range of end-users, directly through our Rigetti QCS platform, and also through cloud service providers.

We have developed strong customer relationships and collaborative partnerships to accelerate the development of key technologies for high-value use cases to potentially unlock strategic market opportunities. Our partners and customers include commercial enterprises such as Amazon Web Services, Ampere, Astex Pharmaceuticals, Deloitte, Microsoft, Nasdaq and Standard Chartered Bank, along with U.S. government organizations such as DARPA, DOE, and NASA.

The company is enabled by a deep technical team that includes global experts in quantum chip design and manufacturing, quantum computing systems architecture, quantum software, and quantum algorithms and applications.

Powered by the production of our scalable multi-chip quantum processors in Fab-1 and our full-stack product development approach, we are working to develop quantum computing systems that demonstrate clear performance advantages over classical computing alternatives for multiple high-impact application areas.

Potential Market Opportunity

Demand for computing power capable of solving computationally complex problems is increasing. Many of these types of problems are approached through the use of High Performance Computing (“HPC”), which relies

primarily on large classical computers located either in the cloud or on-premise. Company management estimates the global market for HPC to be approximately \$54 billion by 2027. We believe our quantum computers will be able to solve many computational problems with greater speed and at a lower cost than today's high performance computers, thereby unlocking considerable value for the users of current HPC systems. Furthermore, we believe that quantum computing will be applicable to many use cases that today lie within the realm of the much larger cloud computing market.

Advanced scientific and technical computing applied in fields like drug discovery, materials science, computational fluid dynamics, machine learning, and quantitative finance have underpinned many of society's greatest scientific and industrial advancements over the past half-century. Yet, despite the availability of the latest cloud and supercomputing capabilities, these and many other fields remain constrained by the intractable nature of their thorniest problems. Typically, the computational limits of classical computers are reached because of either the size or complexity of the required calculations. In certain cases, algorithms have been developed that in theory solve a particular computation problem; however, classical computers are limited in their ability to implement and process such algorithms.

For decades, classical computing power increased exponentially as the number of transistors on a microchip were doubling about every two years, while the cost of computing simultaneously decreased significantly. Over the past ten years, this rate of progress in classical computing power has significantly slowed as physical limits on the miniaturization of transistors in nano-scale devices are being reached.

Stages of Evolution of Quantum Computing Maturation

We believe that market demand for our quantum computers will grow in phases that map to the increasing capabilities of our commercially available quantum computing systems similar to that of classical computer technology. With each new phase, we expect quantum computers to solve an ever-increasing breadth of high-impact commercial problems and to do so with greater speed and accuracy. Qubits do not need the latest semiconductor lithography node and, in fact, can be made using 1990's era lithography.

Emerging Quantum Advantage ("eQA") Phase

This phase is characterized by the availability of practical, fully functional and operational quantum computers, whose capabilities do not yet enable them to demonstrate clear performance advantages relative to traditional computers. Currently, our quantum computers are of sufficient scale and capability to be useful in applied research for quantum algorithm development, the exploration of potential applications of quantum computing, and for understanding the skill gaps an organization must resolve in order to be prepared to take advantage of quantum computing capabilities.

We consider the eQA phase to have begun three years ago, and during this time we have worked with business and government researchers, commercial software developers and academic institutions who access our quantum computers via cloud-based services.

We anticipate that indications that this phase is coming to a close will occur when there are repeated demonstrations solving practical problems, of substantial commercial or customer value, with a level of performance that is competitive with the best available classical computing performance.

Narrow Quantum Advantage ("nQA") Phase

If and when our quantum computing processing capabilities have scaled to the point where they can be used to solve practical, operationally relevant problems with improved accuracy, speed or cost over classical computers, we believe we will have reached the phase of nQA.

In the nQA phase, we expect that large enterprises and government organizations would increase their investment in quantum computing as the superior computational capabilities of the technology will have progressed from projected to verifiably advantaged for certain applications. In addition to quantum-based research and development, quantum machine learning (“QML”) is likely to emerge as a strong avenue for growth as it can be leveraged in a wide range of business and scientific applications. Research into quantum simulation and quantum optimization opportunities is predicted to increase in the nQA phase.

Broad Quantum Advantage (“bQA”)

We will consider the phase of bQA to have begun if and when our quantum computing processing abilities have scaled to the point where they can be used to solve practical problems that would be physically impossible to solve on any classical computer. At such point, with both scaled qubit counts and strong error correction capabilities, we believe our quantum computers would be suitable for many applications of quantum machine learning and begin to be used for a growing number of quantum simulation and quantum optimization problems. In the event we demonstrate bQA, we expect many new potential clients to emerge as the range and value of the problems that are addressable by our quantum computing systems significantly increases.

Large-Scale Fault Tolerant Quantum Computing (“IFTQC”)

We will consider the phase of IFTQC to begin when systems are available with hundreds of logical qubits, which can be universally controlled and measured with substantially error-free operation through the full course of a quantum computation. It is currently believed in the quantum computing industry that this likely requires systems with 10,000 to 1,000,000 physical qubits. We believe our scalable multi-chip architecture paves the way to scale up to these large systems.

We anticipate the beginning of the large-scale fault tolerant phase to be likely at least a decade away. As quantum computing further matures through this phase, systems will likely continue to grow in scale and performance, culminating in full-scale fault tolerance that operates using potentially thousands of effectively perfect logical qubits. This ultimate goal of full-scale fault tolerance represents the largest commercial opportunity at an estimated \$850 billion per year in potential annual value creation for end users and technology providers.

Business Strategy

Our approach to developing and sustaining strong competitive advantage relies on a four-pronged strategy:

- ***Create high performance quantum computing systems through full-stack product development.*** From the outset, we have approached the market opportunity with a strategy to build quantum computers, the superconducting processors that power them, and the software required to access and program these systems. We believe that vertical integration, from chip manufacturing through cloud delivery, unlocks the fastest and lowest risk path to broad commercialization and the largest, long-term market opportunity. This was underscored by our announcement of the industry’s first multi-chip quantum processor for scalable quantum computers, a capability realized through many innovations from Fab-1.
- ***Leverage cloud to provide broad access to our quantum computers.*** We have been providing cloud access to our quantum computers since 2017 and have since expanded the availability of our machines through distribution agreements with other solution providers including Amazon Braket, Microsoft, Oak Ridge National Laboratory (“ORNL”) and Strangeworks. Cloud services efficiently simplify access to our quantum computers and allow for pricing that enables a broad range of scientific, commercial and academic developers to readily participate in the development of quantum computing algorithms, applications and software development tools. Collectively, these cloud services provide a range of choices and capabilities designed to meet the diverse needs of large and small organizations alike.

[Table of Contents](#)

- **Develop deep partnerships that accelerate the development and commercialization of quantum computing.** We have formed commercial partnerships with business and government entities that are designed to advance their mutual understanding of the opportunities, challenges and solutions necessary for quantum computing to excel in specific real-world applications. Examples of these partnerships include our contracted relationships with DARPA, the DOE's Fermi National Accelerator Laboratory ("Fermilab") and ORNL. We believe these types of highly collaborative, multi-year relationships will yield specialized and proprietary market insights and technological advancements. We expect the number and scope of these types of partnerships to expand as the capabilities of our quantum computers continue to grow.
- **Advance our technology leadership position.** We have invested heavily in a world-class and multidisciplinary team of scientists, hardware and software engineers, system designers and algorithm and application developers to rapidly innovate, invent, engineer and commercialize our quantum computing technologies. We have also developed numerous proprietary technologies required to create quantum computing chips, quantum computer systems, software and cloud-based services and we rigorously protect our unique intellectual property through a portfolio of 165 patents issued and pending (as of April 5, 2023). We intend to continue deeply investing in finding and fostering the talent required to remain at the forefront of quantum computing innovation, while protecting our growing base of intellectual property.

In February 2023, we updated our business strategy and revised our technology roadmap to focus on nearer-term priorities and focus efforts to achieve narrow quantum advantage. We made further refinements following our internal deployment for testing in March 2023 of Ankaa-1, our 84-qubit system delivering denser qubit spacing and tunable couplers.

We now plan to:

- Concentrate on refining the performance of Ankaa-1.
- Upon the anticipated external launch of the Ankaa-1 84-qubit system, which is expected to be to select customers, continue efforts to improve the performance of the system with the goal of reaching at least 98% 2-qubit gate fidelity to support the anticipated Ankaa-2 84-qubit system.
- Launch the anticipated Ankaa-2 84 qubit system, continuing to work to improve performance with the goal of reaching at least 99% gate fidelity on Ankaa-2.
- If the above targets are achieved, we plan to shift focus to scaling to develop Lyra, an anticipated 336-qubit system.

Business Model & Services

Currently, we generate the majority of our revenues from technology development contracts with various partners. We believe our longer term business model will be more weighted towards recurring revenues generated from quantum computing systems made accessible via the cloud in the form of QCaaS products.

Quantum Computing as a Service (QCaaS)

We design, build, own, and operate quantum computers and sell access to these systems through cloud-based services, commonly referred to as QCaaS. This approach enables us to serve a wide range of customers without the complexity and cost associated with shipping, operating and servicing complex and cryogenic computing equipment on customer premises.

Rigetti Quantum Cloud Services

The company's flagship product is Rigetti Quantum Cloud Services. QCS is a platform to deliver high-performance quantum computing over the cloud. QCS features a hybrid quantum-classical computing

[Table of Contents](#)

environment that incorporates Rigetti quantum computers operating in tandem with cloud infrastructure. It provides support for a broad range of programming capabilities, the ability to integrate over public or private clouds, and high-speed connectivity to auxiliary classical computing resources.

The product is designed to meet the needs of a diverse set of customers that all benefit from the high-performance nature of its core computational capabilities. Central to QCS are two very powerful sets of technologies developed by our quantum processing units (“QPUs”), and our quantum operating system, as described below.

Rigetti Quantum Processing Units. At the heart of QCS are the proprietary QPUs that perform quantum computations. Our QPUs contain fabricated silicon-based chips featuring superconducting qubits. These high-performance chips provide fast gate times, low latency conditional logic, and fast program execution times.

Rigetti QPUs are designed and fabricated at Fab-1, leveraging novel manufacturing methods to create state-of-the-art superconducting qubits.

Production versions of QCS currently utilize our Aspen-M series chips with 80 qubits.

Quantum Operating System Software. QCS’s computing environment is powered by a distributed quantum operating system that natively supports both public and private cloud architectures.

The operating system software includes a rich set of quantum application and software development tools designed to unlock the capabilities of the quantum computing ecosystem by:

- Enabling customers to access Rigetti QPUs through a broad range of quantum application software, development frameworks and algorithm libraries;
- Providing software and algorithm developers with the performance and fine-grained control required to expedite a new era of computational breakthroughs; and
- Facilitating the implementation of high performance public and private clouds with ultra-low latency connectivity between classical hardware and Rigetti QPUs.

Rigetti's quantum computing facility in Berkeley, California includes both research and development and production quantum processing units, which are each housed in a cryogenic refrigerator.

Direct QCaaS Distribution

We provide access on a commercial basis to our quantum computers over QCS, directly engaging with enterprises and government organizations making significant investments in quantum computing research, development and readiness.

We believe many of these customers will have performance, customization and integration requirements best met by our ability to engage deeply, and directly, with these kinds of clients. We believe the company's full-stack product development approach, and strategy of forging collaborative customer partnerships, positions the company to be a highly valued and long-term provider of quantum computing services to these organizations.

To date, these direct customer relationships have been with customers using QCS for general quantum computing research, algorithm development, algorithm benchmarking and software development activities. They represent a cross section of industries, government agencies and partners in the quantum computing ecosystem.

Indirect QCaaS Distribution

There are a large and growing number of providers of classical computing services over the cloud. This creates an opportunity for us to efficiently reach a broad set of end-users, indirectly, by partnering with cloud computing service providers, who in turn sell access to our quantum computer systems to their own customers.

The indirect distribution model is enabled by the same QCS platform used in the direct distribution model, providing us with powerful business leverage in addressing the needs of customers in different market segments. In this instance, we can capitalize on our full-stack product development capabilities to meet the unique requirements of cloud-service providers. For example, one cloud provider or HPC operator might need deep and high-performance integration with a specific Machine Learning service they provide, while another might desire a fast and easy way for small customers to be introduced to quantum computing.

We have signed a distribution agreement with Amazon's Braket service and Microsoft's Azure Quantum Service, providing access to our quantum computing systems to AWS and Azure customers. We have also signed a distribution agreement with ORNL, a U.S. government entity that provides state-of-the-art computational infrastructure to government researchers. Similarly, we have signed a distribution agreement with Strangeworks, a provider of quantum computing enablement software, services and computational resources.

Key Technology Development Partnerships

We enter into multi-year development partnerships with organizations that have specialized technical expertise and a strong interest in advancing their understanding and application of quantum computing technology. These partnerships can provide us with deep insight into the unique requirements of market leaders in key industries; advance our engineering and product development capabilities; and lead to the creation of new hardware and software products.

Examples of our development partnerships include contracts with:

- Fermilab and the U.S. DOE's Superconducting Quantum Materials and Systems Center ("SQMS"), to advance the development of scalable and high performance quantum processors;
- DARPA and National Aeronautics and Space Administration ("NASA") to create quantum computing systems, software and algorithms for optimization applications; and
- Innovate UK, as part of the British government's effort to accelerate commercialization of quantum computing in the United Kingdom and to pursue practical applications in machine learning, molecular simulation and financial optimization.

We expect to add new development partnerships as the capabilities of our quantum computer systems grow and the market's readiness and interest in quantum computing continues to mature.

Rigetti Foundry Services

Rigetti Foundry Services leverages the company's US-based in-house fabrication facility to deliver superconducting quantum chips to advance and accelerate quantum information science and technology research and development efforts. Customers include researchers spanning academia, defense laboratories, and national laboratories.

A Rigetti employee inspects a silicon wafer with superconducting quantum integrated circuits that was fabricated at Rigetti's Fab-1 facility.

Professional Services

In certain engagements, we provide professional services that enhance and advance our customers' ability to consume our core products and services. Our engineers can augment a client's internal capabilities with expertise in algorithm development, benchmarking, quantum application programming and software development. These fee-based services can enhance our customer's readiness for quantum, accelerate our customer's timelines for meaningful discoveries, and increase our depth of knowledge about key application domains and customer requirements for quantum computing in different industries.

Key Applications

Quantum computing is expected to drive value across many different applications and industries. We believe that many of the principal benefits in these areas will spring from four different types of computational problems that are particularly well suited to quantum computing: optimization, machine learning, simulation and quantum mechanical system simulation.

Optimization

The computational properties of a quantum computer inherently support the problem-solving requirements of extremely complex optimization calculations because quantum computers possess the ability to simultaneously evaluate very large numbers of variables, and each additional qubit in a quantum computer exponentially scales our information processing capacity. We believe that quantum computers could allow highly accurate optimization models to be continuously refreshed to reflect the impact of changing conditions on available solutions, ultimately leading to better and more responsive plans and decision-making.

[Table of Contents](#)

Many of the world's largest and most valuable industries could potentially benefit from enhanced optimization enabled by quantum computing. In financial services, optimization could be applied to portfolio management, algorithmic trading and risk assessment. In telecommunications, optimization could be applied to call routing and network capacity planning. In manufacturing, optimization could help with workforce, warehouses and supply chain planning. In transport, there are logistics applications like fleet routing, driver scheduling, and package loading and delivery that could benefit from further optimization.

These types of problems can quickly overwhelm classical computers due to the large numbers of variables that need to be evaluated, which exponentially scales the computational power required with each additional possibility to be considered. For example, in a vehicle routing problem involving roundtrips to just 10 destinations there can be more than 300,000 permutations to be considered; with 15 destinations, the number of possible routes exceeds 87 billion. If you factor in other real-world considerations such as delivery cost, fleet size, driver availability, or service level agreements, you can see the intractable nature of these kinds of problems in full display.

One of the most active fields of quantum algorithm research is the area of constrained combinatorial optimization. These mathematical equations can arrive at approximate results with a close-to-optimal solution across many possible outcomes—a result that would create high value in many different industries, particularly when the exact solution is unknowable utilizing a classical computer.

We are exploring the application of our quantum computers for high value optimization problems including a partnership with NASA and DARPA for secure dynamic message scheduling using high-demand space and national security assets. In January 2022, we were selected to deliver hardware, software and benchmarks for Phase 2 of DARPA's ONISQ program to develop quantum computers capable of solving complex scheduling optimization problems, with a focus on quantum advantage for currently available or soon to be available quantum processors. The award was based upon us successfully completing our performance milestones in Phase I of the program, and is targeting Rigetti's Aspen-M 80 processor, and our next generation Ankaa processor.

In March 2022, we were selected to lead a program to develop benchmarks for quantum application performance on large-scale quantum computers as part of DARPA's Quantum Benchmarking Program. The goal of this program is to re-invent key quantum computing metrics, make those metrics testable, and estimate the required quantum and classical resources needed to reach critical performance thresholds

Machine Learning

Machine learning is a well-established field, with broad application, that today is already having a transformative impact on a myriad of markets. The potential market opportunity for machine-learning is currently estimated at \$16 billion with expected compound annual growth rates through 2028 of 39%, according to market research from Fortune Business Insights. Boston Consulting Group projects that machine learning applications with fully fault tolerant quantum computers could produce \$150 billion to \$220 billion in annual potential value creation for end users and technology providers. At the core of any machine learning application is a series of computations, typically expressed in linear algebra, applied to vast amounts of data in order to do things such as reliably classifying objects and making data-driven predictions. Today, cloud computing and HPC have been the predominant sources of the computational capabilities required to create effective machine learning algorithms, models and data analysis applications.

But, the efficiency of HPC-powered machine learning algorithms is limited when faced with richer and larger data sets. For that reason, computer scientists have looked toward the computational promise of quantum computers, and the development of quantum-based algorithms, as a means of both accelerating current machine learning algorithms and creating new approaches that are currently impossible on classical computers.

Given these factors, the emerging field of QML is the focus of much of the current research and development occurring on quantum computers today. We already see emerging machine learning algorithms that take advantage of the unique capabilities of quantum computing to tackle the complex linear algebra problems at the heart of many machine learning tasks. In fact, recent research has emerged demonstrating that quantum algorithms could work better than classical ones for critical machine learning classification problems. As algorithmic research continues to progress, some of these quantum algorithms are improving to the point where their benefits may be realized on smaller scale quantum computers.

Research has also demonstrated the promising application of QML, for Generative Adversarial Networks, (“GANs”), a deep learning technique where a neural network is used to generate highly accurate and new examples that could plausibly have come from an original dataset. The potential utilization of quantum computing for GANs alone is far-reaching and could be impactful in large markets like:

- healthcare - for medical image analysis used to detect and categorize tumors and predict their growth;
- drug discovery - for generating molecular structure candidates for medicines to target or cure diseases;
- finance and banking - for creating models that can detect financial fraud based upon predictive patterns rather than rules determined by previously observed behaviors; and
- defense and intelligence - for reliably enhancing low resolution satellite imagery into high resolution photography.

In 2022, we previously partnered with researchers at a U.S. government agency on a generative modeling application for weather forecasting. In this instance, we leveraged a combination of classical and QML techniques to produce high-quality synthetic weather radar data. Meteorological scoring metrics for storm prediction were in some cases augmented using the QML relative to the purely classical implementation. With additional refinement to the underlying methods, combined with the current pace of scaling and performance improvements in quantum hardware, the researchers believe the synthetic weather data application could be a strong candidate for quantum advantage and operational deployment.

In addition, we believe QML for finance is poised to be an early domain of quantum advantage. We recently partnered with Standard Chartered using QML to provide a deeper understanding of QML capabilities and the value of their datasets.

Simulation

Classical computers have been used for decades in critical applications that model real-world processes or systems in order to study their behaviors over time. These computer-based simulations have had an enormous impact on fields like pharmaceuticals, material science, finance, logistics, aerospace, defense and computer-aided design and engineering.

The global market for simulation software alone is projected to grow from \$12.7 billion in 2020 to \$26.9 billion in 2026 according to Markets & Markets. BCG projects that simulation applications with fully fault tolerant quantum computers could produce \$160 billion to \$330 billion in annual potential value creation for end users and technology providers over the next 15 to 30 years. Simulations are essentially mathematical models of a system and hence are logical candidates to benefit from quantum computing. Many important systems, such as molecular structures, cannot be accurately modeled due to the level of complexity associated with representing the properties and behaviors of the key elemental components.

We believe that quantum computers possess inherent advantages that will allow them to accurately model systems with large numbers of variables that are far outside the reach of classical computers today.

Quantum Mechanical System Simulations

The essential building blocks of nature, whose understanding has been the driver of many breakthrough innovations in pharmaceuticals, healthcare, energy, and material science, are the microscopic systems of molecules, atoms and subatomic particles like electrons and protons. The properties and behaviors of these quantum mechanical systems can be expressed in mathematical rules that have been verified experimentally with high degrees of accuracy, but the complexity associated with such calculations, and their applicability to existing and potential molecular and atomic structures, has proven to be outside the realm of capability for today's classical computers.

Scientists have not found a way to rapidly and accurately model most quantum mechanical systems on a computational device that itself is not quantum in nature. Conversely, we believe quantum computers have the potential to efficiently model the relevant set of potential interactions between quantum mechanical elements because they natively reflect the essential properties of quantum systems and behaviors like entanglement, superposition and wave functions.

Drug discovery is among the fields where research into the applicability of quantum computing for simulating quantum mechanical systems is producing considerable enthusiasm. With the growing high costs to develop new drugs, a quantum-based approach that could help pharmaceutical companies evaluate thousands of potential compounds for a targeted therapeutic, and avoid failed outcomes in costly clinical trials, would have an enormously positive economic and societal effect.

Other high potential impact areas for quantum mechanical simulations include the design of chemical catalysts, computational fluid dynamics in aerospace engineering, and nuclear fusion for clean energy.

We have several active partnerships with clients developing simulations of quantum mechanical systems. One such partnership is with Astex Pharmaceuticals, a United Kingdom-based company, which is working with our quantum computers on approaches that may speed up the process of drug discovery. We are also partnering with two U.S. DOE agencies on simulation applications in the areas of nuclear fusion and high energy physics.

Our Technology

Introduction to Quantum Computing

Quantum computers encode and process data using a new kind of information storing electrical circuit called a quantum bit, or qubit. By leveraging the quantum mechanical principle of superposition, qubits can represent complex mathematical combinations of *both* zero and one at the same time. In contrast, classical computers are composed of transistors, electronic devices that hold binary zero or one states, therefore requiring billions of transistors in order to execute complex algorithms. This qubit property of superposition creates unique capabilities. By enabling qubits to encode more information than classical bits, it allows for a quantum computer's power to scale exponentially, rather than linearly as with traditional computers based on transistors. Additionally, it makes it possible to construct algorithms that can evaluate all possible solutions to a problem simultaneously, rather than sequentially as is the case with classical computing. Furthermore, making qubits does not require expensive, continually shrinking lithography in order to improve performance, as transistor-based computers do. Qubits can be made using trailing edge semiconductor tools, so computer performance is decoupled from chip manufacturing cost.

These properties enable quantum computers to excel at solving problems with a large number of variables, highly complex and numerous solutions, or strong correlations or interactions. Many of these problems are currently intractable due to the scaling limits of classical computers and thus represent opportunities for computational advancement across many industries, including finance, pharma and biotechnology, energy, logistics, aerospace, defense and intelligence, and basic research and development.

How Quantum Computers Compute

To execute a quantum computation, classical data, which represents the problem to be solved and the algorithm, is translated into control sequences, or quantum logic gates, and applied to the qubits in the quantum computer. These sequences are called quantum circuits. Once the circuit has been executed on the quantum computer, the qubits are measured, resulting in classical data flowing out of the quantum computer and back into classical memory. The level of performance of a quantum computer in executing these circuits and solving computational problems is dictated by many factors. These include the *scale*, or number of qubits available in the quantum processor to encode the problem and algorithm, with more qubits enabling exponentially more complex and challenging problems to be represented; the *fidelity* of the quantum logic gates from which circuits are composed, which determines how often errors occur when the circuit is executed; the *gate speed*, which shapes the time taken to execute a given circuit; the *co-processing* technology and integration, which determines the rate at which classical data representing the problem and algorithm can be loaded into the quantum computer, and the rate at which it flows back out upon completion of the circuit execution; and *re-programmability*, or the speed with which the specific quantum circuit being executed may be updated to move on to the next step in a computational process.

Several candidate physical systems, or modalities, have been proposed or are being pursued, to form the basic physical qubits in quantum computers. These include, first and foremost, the superconducting qubit technology leveraged by us. They also include approaches based on trapped ions, trapped neutral atoms, and photonics. There is a varying degree of promise, potential and risk in building machines capable of meeting the above requirements for broad commercial utility. As outlined below, it is widely believed that superconducting qubit technology is the most mature, the most advanced, and most likely to ultimately lead to broad commercial success.

Requirements for Practical Workloads: Path to Quantum Advantage

Unlocking the broad commercial market for quantum computing calls for quantum computers that are able to solve practical commercial problems better, faster, or cheaper than the best alternative classical computing solution, including even the most powerful supercomputers. This inflection point is referred to as *quantum advantage*. Achieving quantum advantage imposes requirements on the quantum computer itself, the most important of which relate to the above performance factors of *scale*, *fidelity*, *speed*, *co-processing*, and *re-programmability*.

Scale. In order for quantum computers to solve problems out of reach for classical computers, such as modeling molecules with many electrons in order to enhance drug discovery, they require a significant number of high-performing qubits, likely starting at between a few hundred to 1,000 qubits.

Fidelity. A gate fidelity estimates the reliability of an operation. For instance, a two-qubit gate with a gate fidelity of 99% means that 99 out of 100 times the operation will provide the correct result. Errors can be caused by imperfect control, natural manufacturing variations, finite qubit lifetimes (coherence) or other sources. Overall, high fidelities of over 99% are likely necessary to enable performance benefits on practical workloads. An error per operation is defined as (1-fidelity).

Speed. Speed is a crucial metric for all types of computers, both quantum and classical. Since quantum algorithms are ultimately composed of logic gates applied sequentially to qubits in a quantum computer, the speed with which these gates can be executed translates directly into processing speed and workload throughput. Therefore, faster quantum processing speeds can result in a larger number of addressable problems and larger market opportunity, as well as a more direct path to outperforming classical alternatives and a higher intrinsic revenue potential per unit time.

Co-processing. Hybrid architectures that leverage quantum computers as co-processors, pioneered by us since the company's inception, have now become widely adopted in the quantum computing industry. Quantum

co-processing delivered over the cloud, such as Rigetti Quantum Cloud Services platform, is the predominant framework for building and using quantum computers today. In this paradigm, quantum processors are tightly integrated with classical computing systems and infrastructure to ensure the rate of data flowing in and out of the quantum processor can meet the needs of commercial applications. Effective implementation of co-processing hinges on both the intrinsic technological features of the specific qubit technology, as well as product innovations and system architectures aimed to prioritize this capability. For example, just as in classical computing architecture, fast gate speeds, coupled with a network architecture that achieves low network latency for data flow, are some requirements for high performance co-processing.

Reprogrammability. Reprogrammable quantum computers are general purpose machines that should be able to run any quantum algorithm, provided the machine has the scale, fidelity, and other attributes needed to support the particular problem instance. While gate-model quantum computers, such as those made by us, IBM, IonQ and Google, are typically reprogrammable, different technology approaches and architecture choices lead to varying constraints in applying this capability in a practical setting. Specifically, the ability to dynamically reprogram the quantum processor during the execution of a quantum circuit or within the coherence time of its qubits is of particular importance for many anticipated applications and use cases.

While research and development funding and investments into quantum computing have accelerated, we believe that long-term commercial demand for quantum computing systems hinges on the ability to meet the above criteria for running practical workloads. Multiple quantum hardware modalities are being pursued. Among these, we believe the superconducting qubit is the only such modality that has, to date, demonstrated viability across all these requisite metrics.

Our Superconducting Quantum Processors

Introduction to Superconducting Qubits

We build and operate quantum computers based on superconducting qubits. Superconducting qubits are silicon-based electronic devices that encode information in quantum states associated with currents and voltages. Superconducting qubits benefit from the fact that their basic properties can be engineered through well-established semiconductor industry design and manufacturing techniques. This enables chip design and architecture tradeoffs to be made to overcome various practical constraints in building commercial quantum computing systems. They are also improving along these key metrics faster than approaches based on other qubit modalities, such as ion traps, photonics and neutral atoms. As an example, in June 2011, the largest algorithms demonstrated on programmable, gate model quantum computers across these modalities were in the range of a few qubits. In the ensuing ten-year period from 2011 to 2021, superconducting systems have successfully scaled up to the range of 30 to 60 or more qubits, including demonstrations of quantum supremacy. This rate of scaling has easily outpaced other approaches. We believe this leadership results in part from an intrinsic advantage: superconducting qubits have many inherent similarities to traditional silicon-based chips. As a result, progress in superconducting quantum computers may be achieved by leveraging the existing capabilities - expertise, technologies, workforces, and supply chains, for example - of the semiconductor manufacturing industry, rather than needing to establish such capabilities anew.

Rigetti Quantum Processors

Rigetti quantum processors are based on transmon-style superconducting qubits. Quantum logic gates are actuated by applying electronic signals to the qubits. Chips are packaged, connected to input and output circuitry, and operated in a low-temperature environment. Control and readout signals are generated and processed in a control system operating at room temperature. This control system is subsequently integrated with, or networked into, auxiliary classical computing hardware to enable co-processing system requirements. Our competitive advantage begins at the chip level and extends through the full-stack, with a distinct focus on fabricating scalable hardware meeting the requirements for practical workloads.

Scale

Achieving the scale of quantum processor needed for practical workloads is perhaps the hardest requirement of all. To address this, we have developed a unique patented and patent-pending multi-chip quantum processor technology. This approach leverages techniques long used in classical computer microprocessors and memory (“RAM”). Our scalable processor architecture enables multiple core processor chips, each having many qubits, within a multi-chip assembly to function cohesively as a single, large quantum computer-without introducing additional error sources, network latency or other overhead. Using our modular chip architecture, larger quantum processors may be constructed by assembling more core processors together. From a manufacturing perspective, this enables a single type of core processor chip to support multiple quantum processor generations of increasing scale and performance. We believe that this solution facilitates rapid scaling and can enable even faster development cycles in future chip generations.

In addition to accelerating the pace of scaling, we believe our proprietary modular chip architecture has significant manufacturability and cost benefits. For example, rather than producing large, complex individual chips with 1,000 qubits, we may fabricate 10 chips with 100 qubits each, and use our multi-chip technology to assemble them together to produce a 1,000 qubit quantum processor. This solution makes it much easier to produce large processor chips with high yield. As a result, we believe our modular approach to be fundamentally more manufacturable, predictable, and scalable.

Our multi-chip technology incorporates several advances in integrated circuit design, architecture, and silicon device manufacturing. These advances include superconducting multi-chip bonding technology for chip-level 3D integration, superconducting through-silicon via process technology and interchip coupling technology that enables high-fidelity two-qubit logic gates between qubits disposed on different silicon dies. These innovations have resulted from our investment in more than five years of technology development to establishing

[Table of Contents](#)

the essential capabilities to produce quantum processors meeting the requirements for broad commercial utility. We believe our approach to scaling quantum computers will accelerate us toward quantum advantage systems.

Rigetti's proprietary multi-chip architecture enables larger quantum processors to be constructed by assembling individual chips together, thereby supporting multiple quantum processor generations of increasing scale and performance

Fab-1. We have developed, own and operate the distinctive manufacturing capabilities needed to produce quantum processors in our proprietary scalable architecture. In 2017, we became the first company to build a dedicated and integrated Fab for producing quantum processors. In addition to vertically integrating the process capabilities to produce our proprietary chips, Fab-1 delivers a high mix of development chips to internal teams. This in-house fabrication capability allows for rapid design-fab-test cycles of learning, enabling an innovation cycle we estimate to be two to five times faster than a typical MEMS or semiconductor foundry. In Fab-1, our engineers focus their efforts on rapidly exploring then optimizing new chip designs and establishing repeatable manufacturing processes. Fab-1 also includes semi-automated chip testing and characterization capabilities. Additionally, by leveraging traditional semiconductor tools and processes, Fab-1 builds on expertise from the existing semiconductor industry, a distinct advantage over other qubit modalities. This in-house fab capability has enabled us to accumulate the hands-on experience and intellectual property, including know-how, patents, and trade secrets, to produce quantum computer chips within our scalable, proprietary architecture. Furthermore, we believe Fab-1 has enough wafer capacity to supply all of our chip needs for at least the next four years.

[Table of Contents](#)

Cooling. Like all high-performance computing systems, Rigetti quantum computers require an advanced cooling system. In this case, commercially available dilution refrigerators maintain chip temperatures at around 0.02 Kelvin. Cooling power requirements and associated electricity costs will scale approximately linearly with qubit count, while expected computational utility increases exponentially. As a result, we expect the electricity costs to run the cooling systems of our quantum computers to make up an ever-decreasing fraction of the overall revenue generated from each machine. In addition, we work closely with refrigerator vendors and anticipate the commercial availability of dilution refrigerator systems with the capabilities to support our product roadmap.

Fidelity

Improvements to the coherence times of superconducting qubits, combined with methods for ever-faster and more precise quantum logic gates, have kept superconducting qubits on a pace of continuous fidelity improvement for approximately two decades. Over the last several years, algorithms have been developed on processors with average two-qubit gate fidelities of 95-98%. As processors scale to broad quantum advantage, fidelity will need to improve, likely to 99% and beyond.

We are focused on delivering advances to fidelity through a systematic engineering approach centered on our design-fab-test flywheel powered by our in-house design and manufacturing. Uniquely, our modular processor technology enables improvements to fidelity to be achieved separately from efforts to increase scale; fidelity advancements can be developed on the individual core processor chips, and these improvements can be rapidly integrated into scaled processors through our multi-chip integration technology.

Our commercially available 80-qubit Aspen systems typically have similar gate fidelities to its 32-qubit systems. Significantly, our 80-qubit multi-chip processors leverage our interchip coupling technology to form an 80-qubit lattice of similar fidelity to the 40-qubit chips on which they are based. Looking forward, we plan to combine core elements of this multi-chip scaling technology with the expected higher performance and connectivity of our next generation chips.

We currently see higher performance in test devices of our next generation core quantum processor, the Ankaa-1 84 qubit system, which we recently deployed internally within the company in March 2023 for testing. This next-generation chip design uses tunable couplers to enable active cancellation of unwanted interactions between qubits to improve control and decrease error. Recent tests on a 9-qubit system utilizing these new chips have demonstrated mean two-qubit gate fidelities of 98.3%, median fidelities of 98.1% and maximum fidelities of 99.6%. As development has progressed, we continue to see high two-qubit gate fidelities around 99% on test devices.

Speed

One of the strengths of superconducting qubit technology, and our technology in particular, is that gate operations on superconducting processors are faster than other commercially available modalities today.

The speed of gate operations in superconducting qubits are determined by the intentional design of circuit elements on-chip and their optimized parameters, rather than relying on atomic properties. Our slowest class of gate operations, two-qubit entangling gates, have a median duration of less than 200 nanoseconds. Moreover, for future computer systems from us, high quality entangling gates as fast as 36 nanoseconds have recently been achieved through the introduction of an additional circuit element to tune the interaction strength between qubits, showcasing the value of engineered approaches. We believe that superconducting processors' speed advantage will result in a larger market for superconducting quantum computers compared to other modalities, as there are a multitude of high value use cases that require timely results, such as real-time decision making, risk calculations, and more. As in conventional computing, faster gate speeds also equate to higher throughput in commercial deployment and therefore greater potential revenue opportunity.

[Table of Contents](#)

In February 2022, we announced speed test results for Circuit layer operations per second, or CLOPS, for our Aspen 11 and Aspen-M series processors. CLOPS is a quantum computer performance metric initially developed and published by IBM in October 2021. Conducting tests based on 100 shots, as set forth in the original published definition, the 40-qubit Aspen-11 system demonstrated a CLOPS of 844, while the 80-qubit Aspen-M system demonstrated a CLOPS of 892. These results suggest that our current systems perform as well or better on this CLOPS speed test as the number of qubits in the system increases. To reflect what users can potentially expect in typical use cases, we also evaluated CLOPS using 1000 shots. In this case, Aspen-11 performed at 7512 CLOPS and Aspen-M performed at 8333 CLOPS, demonstrating that comparable or better system speed persists at both higher shot counts and higher qubit counts. In July and August, 2022, we successfully achieved a CLOPS performance greater than 4,000 on both our 80-qubit Aspen-M-2 system and our 40-qubit Aspen-11 system, respectively, representing a 4.5 times acceleration since February. These speed tests were conducted using our production QCS environment. CLOPS, characterizes quantum processing speeds inclusive of gate speeds, reprogrammability, and co-processing capabilities, among other factors. CLOPS is calculated as $M \times K \times S \times D / \text{time taken}$ where: M = number of templates = 100; K = number of parameter updates = 10; S = number of shots = 100 or 1000; and D = number of QV layers = \log_2 QV.

Co-processing

It is widely believed that unlocking the commercial value of quantum computing requires quantum computers to be tightly integrated with classical computing systems and technology. High-performance co-processing integration accelerates the path to quantum advantage by enabling both quantum and classical computing resources to work in tandem to address computational bottlenecks best suited to their particular strengths. This approach also facilitates adoption and usability by end users who are more familiar with classical programming. The inherent speed with which superconducting processors can execute circuits and be dynamically re-programmed makes them ideally suited to high-speed co-processing integration. Other modalities have not demonstrated the gate speeds necessary to support high-performance co-processing.

We have invented and patented capabilities at the hardware and software level, such as parametric code compilation, to enable high performance co-processing on a cloud platform. Parametric code compilation supports running faster hybrid algorithms through memory registers shared between classical programs and embedded logic on a QPU control system. This means that users can run algorithms without incurring latency that would otherwise be caused by updating parameters at each step.

Reprogrammability

Our systems are dynamically reprogrammable. Instructions are streamed into the quantum computer or updated within the execution time of the quantum logic circuit. This allows our machines to effectively run both the hybrid variational algorithms that underpin current use cases and quantum error correction routines in future systems. In a production setting, dynamic reprogrammability translates to higher customer job throughput per unit time. Since many applications are expected to require streamed data processing or error correction, we believe this dynamic reprogrammability is central to unlocking the full market potential of quantum computing systems, especially in comparison to alternative modalities that are unable to implement high speed re-programming.

Our quantum computers are orchestrated with a control system operated at room temperature. In our architecture, reprogramming the quantum processor occurs exclusively within this control system. Unlike photonics, for example, reprogramming the system to run a new quantum circuit does not require slow on-chip updates, but only requires changes to the sequence of signals applied to the chip. Our QPUs today support dynamic programming protocols within microsecond feedback loops. For example, re-setting registers of qubits conditional on the outcomes of previous measurements, can increase overall quantum circuit throughput by 5x relative to non-dynamic implementations of the same workload.

The QPU control system includes hardware for networking, classical microprocessors, FPGAs for control and readout pulse sequencing, and analog signal processing. The integrated system is designed and built to meet the requirements for co-processing and reprogrammability over the cloud. This capability enables high-speed data flow within the quantum processor, and between the quantum processor and auxiliary classical compute and networking infrastructure. Our systems are thus enabled for high-performance hybrid quantum-classical computing, the implementation of high-throughput quantum programs for practical workloads, and the dynamic control flow and feedback that underpins practical quantum error correction. The control system drives the quantum processor, calibrates and operates gates, and measures qubit states at the end of a computation.

Quantum Error Correction

Direct improvements to qubits and gate fidelities are currently the primary means of advancing the performance of quantum computers. However, at the scale of a few hundred qubits and beyond, a method called quantum error correction can be applied to further accelerate this rate of progress.

In quantum error correction, a large number of individual physical qubits can be transformed, through repeated application of gate and readout operations designed to detect and fix physical errors, into single “logical” qubits, whose properties are exponentially improved relative to the constituent physical qubits. While the methodology of quantum error correction is well-established in the field of quantum computing, systems capable of running such codes at a commercially useful scale are not currently available. Eventually, solving certain classes of problems will require the ability to compute with tens to hundreds or even thousands of logical qubits. This makes the ability to build large qubit count processors at this commercial scale an even more crucial capability.

Additionally, because errors must be identified at a specific physical location within the quantum processor in order to be corrected, those errors must also be well-localized within small regions of the quantum processor. For example, a qubit in one region must not induce errors on some distant qubit, but rather be constrained to influencing errors on nearby qubits. This essential requirement underpins modern quantum error correction theory and practice.

Turning to the processor’s physical qubit array, the necessity of localizing errors has led to the predominance of nearest-neighbor connectivity graphs in quantum processor design. Our quantum processors meet these essential requirements with a nearest-neighbor, planar connectivity graph. Planar codes are expected to show a high error threshold of approximately 1% error probability per operation. This means that if error rates are below the required threshold (e.g. 1%), then increasing the redundancy (*i.e.*, the number of physical qubits making up a single logical qubit) results in an exponential reduction in logical error. In other words, adding a small number of additional physical qubits per logical qubit will provide exponential improvements. Notably, codes for other modalities, such as Bacon-Shor codes for trapped ion qubits, lack such a threshold behavior and is one reason why we believe superconducting quantum computers to be superior to trapped ion modalities.

We aim to deliver the physical qubit count needed, with the requisite nearest-neighbor connectivity, to enable developers and customers to benefit from this exponential error reduction. In contrast to known approaches for other qubit modalities, our systems are expected to be able to run the same code family at multiple different levels of redundancy without requiring additional complexity such as code concatenation. This approach enables developers to scale the effective error rate and associated overheads up and down as dictated by their use-case requirements. For example, the smallest surface code logical qubit for superconducting processors is 17:1 physical qubits to logical qubits, in comparison to 16:1 for trapped ions. However, for complex applications, the ability to pack more physical qubits into the code (such as 100:1 or 1000:1) is critical because it allows developers to further reduce errors for algorithms based on many quantum gates where errors are more likely to accumulate. In comparison to trapped ions, we believe superconducting processors are better positioned to scale up to the large number of qubits required to run these valuable large codes while also having the fast gate speeds for them to be useful.

[Table of Contents](#)

Our processor architecture, software tools, and cloud services platform are designed to enable users and partners to directly construct, test and deploy error correction and error mitigation protocols, and to tailor such codes to specific computational tasks through software. This capability is enabled by the re-programmability, co-processing integration, and system design we have established.

Intellectual Property

Our intellectual property portfolio plays a strategic role in advancing our innovation and leadership in quantum computing.

Our patent portfolio seeks to protect our current developments and the intellectual property space for the company's technology roadmap and anticipated areas of development. We rely upon a combination of protections afforded to owners of patents, copyrights, trade secrets, and trademarks, along with confidentiality and proprietary rights agreements with employees, consultants, contractors, vendors and business partners to establish and protect our intellectual property rights.

As of April 5, 2023, we have 165 issued and pending patents that are designed to protect our full-stack technology across hardware, software, and services. These patents cover a broad range of key technology areas of the business including (i) quantum computing systems, software and access; (ii) quantum processor hardware; (iii) algorithms and applications for problem solving; and (iv) chip design & fabrication.

We pursue international registration of our domain names and trademarks. We are the registered holder of a variety of domain name registrations, including "rigetti.com." Our trademark registrations include "Rigetti" in the US, U.K. and EU.

Sales & Marketing

During this period of eQA, our go-to-market strategy is focused on being a leader in the key market segments driving the early application of quantum computing. Our sales and marketing efforts are focused on technology development and distribution partnerships with the leading organizations in these markets. In the U.S. government, for example, the Department of Defense, the DOE and the Intelligence Community have each been making significant investments in quantum computing, and we have technology development partnerships with leading agencies and national laboratories. We are pursuing similar arrangements with customers in other important vertical market segments, like finance, where we are developing specific expertise in several application areas and are collaborating with Nasdaq and Standard Chartered Bank. We also have distribution relationships with customers like Amazon Web Services, Microsoft, ORNL and Strangeworks.

As we work to develop new generations of our hardware with the goal of continuing to scale and achieve nQA and then BQA, we anticipate increasing our investment in both sales and marketing to expand the number of enterprise companies directly licensing our QCS platform. However, with the reorganization and reduction in force announced in February 2023, we anticipate that the costs will decrease in the near term until we achieve narrow quantum advantage, at which point we expect costs to increase.

Customers & Key Partners

We believe that the realization of quantum computing's promise requires strong relationships across an ecosystem of innovative and quantum-committed organizations and have been developing commercial relationships and collaborative partnerships with organizations that possess a keen understanding of specific industry problems and deep technical expertise in key scientific and engineering disciplines.

To date, we have focused on developing a range of client relationships and research partnerships with:

- enterprise-sized organizations working on quantum-assisted breakthroughs in applications areas like drug discovery, network optimization, financial modeling, weather forecasting and fusion energy with

[Table of Contents](#)

organizations like Astex Pharmaceuticals, Deloitte, NASA, Nasdaq, Standard Chartered Bank, the U.S. DOE and certain military branches within the U.S. Department of Defense;

- materials science researchers and quantum algorithm developers at renowned laboratories like Fermilab, Lawrence Livermore National Laboratory, MIT Lincoln Laboratory, NASA Quantum Artificial Intelligence Laboratory and ORNL;
- quantum-focused software and algorithm companies like 1Qbit, Phasecraft, Riverlane, Q-CTRL and Zapata;
- Cloud service providers like Amazon Web Services, Microsoft Azure, and Strangeworks; and
- We also enter into multi-year technology development partnerships with organizations that possess specialized technical expertise and strong interests in advancing the development of quantum computing (as referenced in *Business - Key Technology Development Partnerships*). These organizations include DARPA, SQMS, and Innovate UK.

Competition

The quantum computing market is evolving and highly competitive. With the introduction of new innovations and the potential entry of new competitors into the market, we expect competition to increase in the future, which could harm our business, results of operations, or financial condition.

Our current and prospective competitors include companies engaged in the research, development, and operation of quantum computing capabilities. Major companies now developing both quantum hardware and software include IBM, Google, Microsoft, IonQ, Quantinuum, PsiQuantum, Xanadu and ColdQuanta. In addition, because of the importance of quantum computing, most large public cloud providers and traditional chip makers are researching and investing in quantum computing initiatives, in some cases seeking to build quantum computers. For example, Amazon and Intel are engaged in the research and development of quantum computers. A number of development-stage companies are also seeking to build quantum computers, quantum software and applications, and quantum cloud computing services.

We believe our primary direct competition will come from other companies building or seeking to build universal, gate-model quantum computing systems that can meet the requirements for solving commercial problems. We believe competition will be based on a number of factors, including: different approaches to building quantum computers; quantum computer system performance, including scale, speed, and fidelity; system accessibility and ease of use; supported software and applications; compatibility with existing classical workflows; rate of technological innovation; ability to create value through long-term partnerships; end-user support and customer experience; solutions and insight delivery; price; brand recognition and trust; financial resources; and access to key personnel.

We believe that we are favorably positioned to compete on the basis of these factors. However, we face various risks relating to competition as described in “*Risk Factors-Risks Related to Rigetti’s Business and Industry-The quantum computing industry is competitive on a global scale and Rigetti may not be successful in competing in this industry or establishing and maintaining confidence in our long-term business prospects among current and future partners and customers.*”

Regulatory

U.S. government contracts, grants, and agreements are subject to regulations and procurement laws. The majority of our current programs are subject to Title 2 of the Code of Federal Regulations, covering Grants and Agreements. We also perform programs authorized under Other Transaction Authority and the Federal Acquisition Regulation. Several of our agreements are also subject to agency level acquisition regulation supplements, including the Defense Federal Acquisition Regulation Supplement and the Department of Energy Acquisition Regulation. These regulations mandate uniform policies and procedures for the administration of government funded programs.

[Table of Contents](#)

This includes requiring compliance with eligibility and responsibility requirements, contractor qualifications, financial and reporting requirements, as well as subjecting the company audits and to other government reviews covering issues such as cost, performance, internal controls and accounting practices.

Employees & Core Values

Our deep and talented workforce is the key to our success. As of March 1, 2023, we employ 144 people globally, the majority of whom are employed in areas of quantum physics, chip and hardware engineering and software development. Most of our employees are based in the United States with the remainder based in the United Kingdom, Australia and Canada. In addition, we also engage a small number of consultants and contractors to enhance our research and development and selling general and administrative areas of our business.

To date, we have not experienced any work stoppages and maintain good working relationships with our employees. None of our employees are subject to a collective bargaining agreement or are represented by labor unions at this time.

Facilities

Our corporate headquarters is located in Berkeley, California, where the Company leases 15,625 square feet pursuant to a lease that expires October 31, 2025. Our Fab-1 facility is located in Fremont, California, where the company leases approximately 53,800 square feet pursuant to a lease that expires September 30, 2029. We also have offices for our international operations in the United Kingdom and Australia. We believe that our current facilities are suitable and adequate to meet our current needs. We intend to add new facilities or expand existing facilities as we add employees, and we believe that suitable additional or substitute space will be available as needed to accommodate any such expansion of our operations.

Corporate Information

Rigetti Computing, Inc., formerly known as Supernova Partners Acquisition Company II, Ltd. (“Supernova”), was incorporated on December 22, 2020 as a Cayman Islands exempted company and a special purpose acquisition company. On October 6, 2021, Supernova entered into the Merger Agreement. Pursuant to the Merger Agreement, on March 1, 2022, Supernova effected a domestication after which it continues as a Delaware corporation, changing its name to “Rigetti Computing, Inc.” On March 2, 2022, pursuant to the Merger Agreement, First Merger Sub merged with and into Legacy Rigetti, the separate corporate existence of First Merger Sub ceasing and Legacy Rigetti being the surviving corporation and (ii) immediately following the First Merger, Legacy Rigetti merged with and into the Second Merger Sub, with the separate corporate existence of Legacy Rigetti ceasing and the Second Merger Sub being the surviving entity and changing its name to “Rigetti Intermediate LLC”. Our principal executive offices are located at 775 Heinz Avenue, Berkeley, CA 94710 and our telephone number is (510) 210-5550.

Legal Proceedings

From time to time, we may become involved in actions, claims, suits and other legal proceedings arising from the ordinary course of business. Our management believes we are not currently a party to any actions, claims, suits or other legal proceedings, the outcome of which, if determined adversely to the company, would have a material adverse effect on its results of operations, financial condition or cash flows.

MANAGEMENT

Executive Officers and Directors

The brief biographies below include information, as of April 5, 2023, regarding the specific and particular experience, qualifications, attributes and skills for each member of our board of directors.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Executive Officers		
Subodh Kulkarni	58	President, Chief Executive Officer and Director
Jeff Bertelsen	60	Chief Financial Officer
Rick Danis	53	General Counsel and Corporate Secretary
David Rivas	62	Chief Technology Officer
Non-Employee Directors		
Alissa Fitzgerald	53	Director
Ray Johnson	67	Director
David Cowan	57	Director
Cathy McCarthy	75	Director
Michael Clifton	43	Director
H. Gail Sandford	59	Director

Executive Officers

Subodh Kulkarni. Dr. Subodh Kulkarni has served as President, Chief Executive Officer and director of Rigetti since December 2022. Dr. Kulkarni previously served as president, chief executive officer, and member of the board of directors of CyberOptics Corporation (“CyberOptics”), a developer and manufacturer of high precision sensors and inspection systems for the semiconductor and electronics industry. He held these roles from 2014 until CyberOptics was acquired by Nordson Corporation in November 2022. Prior to CyberOptics, Dr. Kulkarni was chief executive officer of Prism Computational Sciences, a developer of software tools for scientific and commercial applications in the semiconductor industry. Earlier in his career, he held additional leadership positions, including chief technology officer and senior vice president of OEM/Emerging business, global commercial business, R&D and manufacturing at Imation, a global scalable storage and data security company. Dr. Kulkarni began his career in research and management positions with 3M Corporation and IBM. He received his B.S. in chemical engineering from the Indian Institute of Technology, Mumbai, and later obtained a M.S. and Ph.D. in chemical engineering from MIT. Dr. Kulkarni currently serves on the board of directors of KeyTronic Corporation (Nasdaq: KTCC), an electronics manufacturing services company, as well as chairman of the board of directors of Prism Computational Sciences. We believe Dr. Kulkarni is well qualified to serve on our Board because of his prior leadership and officer positions at technology and software companies.

Jeff Bertelsen. Mr. Bertelsen was most recently Chief Financial Officer and Chief Operating Officer of CyberOptics Corporation, a developer and manufacturer of high precision sensors and inspection systems for the semiconductor and electronics industry. Mr. Bertelsen joined CyberOptics as Vice President—Finance and Chief Financial Officer in 2005. In February 2014, Mr. Bertelsen was appointed Chief Operating Officer of CyberOptics, and also retained his positions as Vice President—Finance and Chief Financial Officer. Mr. Bertelsen was also appointed Secretary of CyberOptics in February 2016. Before joining CyberOptics, Mr. Bertelsen held various positions with Computer Network Technology Corporation, a provider of storage networking equipment and solutions (“CNT”), as Vice President, Finance, Corporate Controller and Treasurer and Assistant Secretary. Prior to joining CNT, Mr. Bertelsen was a Certified Public Accountant with KPMG LLP.

Rick Danis. Mr. Danis has served as General Counsel and Corporate Secretary of Rigetti since immediately following the consummation of the Business Combination and served as Legacy Rigetti's General Counsel and Corporate Secretary from July 2019 until the consummation of the Business Combination. Prior to joining Legacy Rigetti, Mr. Danis served as Chief Legal Officer and corporate secretary at Kymeta Corporation from May 2018 to July 2019. Mr. Danis also served as Senior Vice President and Assistant General Counsel at Funko from December 2017 to May 2018 and as General Counsel and Corporate Secretary at publicly traded Rightside Group, Ltd. from August 2014 until August 2017. In addition, Mr. Danis has served as a director on the board of F3 Nation, Inc. since January 2020. In all, Mr. Danis has over 25 years of experience practicing law, almost exclusively in-house at technology companies. Mr. Danis received a B.B.A. in accounting from Ohio University and a J.D. from DePaul University College of Law.

David Rivas. Mr. Rivas has served as Chief Technology Officer since February 2023 and previously was Senior Vice President, Systems and Services at Rigetti since March 2019, where he oversaw the engineering and operations of Rigetti's Quantum Cloud Services platform. Mr. Rivas served as Vice President Engineering at Bolt Threads from March 2017- February 2018. He served as President and COO and later as CEO of Stage 3 Systems from 2013-2015. He held several roles at Nokia from 2007-2012 including Vice President, Emerging Products and Vice President, Product & Technology Management. From October 2003- February 2006 he served as Chief Technology Officer - Client Systems Group at Sun Microsystems. He holds a B.S. and M.S. in electrical and computer engineering, both from the University of California, San Diego.

Non-Employee Directors

Alissa M. Fitzgerald. Dr. Fitzgerald has served as a member of the Board since March 2022 and previously served as a member of the Legacy Rigetti Board from April 2018 until the consummation of the Business Combination. She has also served as the Chief Executive Officer and Managing Member of A.M. Fitzgerald & Associates, LLC, a consulting services firm for micro electromechanical systems (MEMS) product development and technology since 2003. She had previously worked in engineering or management positions at several technology companies. She currently serves as a member of the board of directors of Transducer Research Foundation since 2016 and served as a board director for the MEMS Industry Group (MIG) from 2008 to 2014. Dr. Fitzgerald received a PhD. in aeronautics and astronautics from Stanford University and an M.S. and B.S. in aeronautics and astronautics from the Massachusetts Institute of Technology. We believe Dr. Fitzgerald is qualified to serve as a member of the Board because of her extensive experience as a senior executive and substantial knowledge in semiconductor and electronics technology.

Dr. Ray O. Johnson. Dr. Johnson has served as a member of the Board since March 2022 and previously served as a member of the Legacy Rigetti Board from August 2019 until the consummation of the Business Combination. He has served as Chief Executive Officer of the Technology Innovation Institute since August 2021, and also has served as Operating Partner at Bessemer Venture Partners since July 2020, after joining Bessemer Venture Partners as an Executive In Residence in June 2015. Prior to that, Dr. Johnson served as Senior Vice President and Chief Technology Officer of the Lockheed Martin Corporation from July 2006 to February 2015. He also served as Senior Vice President and Chief Operating Officer of Modern Technology Solutions, Inc. from June 2005 to July 2006 and as Senior Vice President and Business Unit General Manager at SAIC from January 1996 to June 2005. Dr. Johnson is also a member of the board of directors of Xanadu Quantum Technologies. Dr. Johnson received a B.S. in electrical engineering from Oklahoma State University and a PhD. and M.S. in electrical engineering from the U.S. Air Force Institute of Technology. We believe Dr. Johnson is qualified to serve as a member of the Board because of his integral involvement in the technology industry, generally, and management roles at global venture capital firms.

David Cowan. Mr. Cowan has served as a member of the Board since March 2022 and previously served as a member of the Legacy Rigetti Board from April 2021 until the consummation of the Business Combination. Mr. Cowan is a partner at Bessemer Venture Partners, a venture capital investment firm. Mr. Cowan is or has been a member of the board of directors of a number of portfolio companies of Bessemer Venture Partners,

[Table of Contents](#)

including Xanadu Quantum Technologies. Mr. Cowan is also a member of the board of directors of Rocket Lab USA, Inc. Mr. Cowan holds an A.B. in Computer Science and Mathematics from Harvard University and an MBA from Harvard Business School. We believe Mr. Cowan is qualified to serve as a member of the Board because of his integral involvement in the technology industry, generally, and his experience in the venture capital industry.

Cathy McCarthy. Ms. McCarthy has served as a member of the Board since March 2022 and, has served as Chair of the Board since July 15, 2022. Ms. McCarthy previously served as a member of Legacy Rigetti Board from July 2021 until the consummation of the Business Combination. Ms. McCarthy is currently President and CEO of Cross Tack Consulting, a strategy consulting firm. Ms. McCarthy previously served as Chief Executive Officer and as Chief Financial Officer of SM&A, a publicly traded company specializing in business capture and program services support services to government contractors. Ms. McCarthy served on the board of directors, compensation committee and audit committee of Solta Medical, Inc., prior to its merger with Valeant Pharmaceuticals International, Inc. She currently serves as a board member and audit committee chair of the Middleby Corporation, a publicly-traded leader in the foodservice equipment industry. Ms. McCarthy began her career at Mellon Bank, N.A., where she was Vice President of several lending departments and was responsible for oversight of highly leveraged and distress assets. We believe Ms. McCarthy is qualified to serve as a member of the Board because of her extensive experience and prior public board and audit committee experience.

Michael Clifton. Mr. Clifton has served as a member of the Board since March 2022 and previously served as the Chief Financial Officer and a director of Supernova since its inception. Mr. Clifton currently serves as a Partner at Falfurrias Management where he helps lead Falfurrias Growth Partners. Prior to that, he was Chief Financial Officer and/or a director of Supernova Partners Acquisition Company I Inc. and Supernova Partners Acquisition Company III Ltd. Prior to that he was a senior investment professional at The Carlyle Group from 2010 to 2020 as a member of its flagship U.S. Buyout team where he helped lead Carlyle's investing activities in the technology and business services sectors. During his tenure he worked on transactions involving companies in multiple sectors, including enterprise software, financial technology, semiconductors, and IT services. He has served on four private boards and has been a board observer of a public company. Over his career, Mr. Clifton has been involved in several leveraged buyouts, growth investments, and carve-outs. Mr. Clifton has substantial public market experience and has helped lead the public offerings of three companies. Prior to joining Carlyle, Mr. Clifton worked at two middle market private equity firms, as well as in the M&A group of Bank of America Securities. He earned a Bachelor of Arts, cum laude, in classics from Davidson College, and an MBA with High Distinction from the Harvard Business School where he was a Baker Scholar. We believe Mr. Clifton is qualified to serve on the Board due to his corporate finance experience and experience investing in technology companies, including semiconductor businesses.

H. Gail Sandford. Ms. Sandford has served as a member of the Board since March 2022. Currently Ms. Sandford holds the position as Principal Director, Business Transformation Office at The Aerospace Corporation. Prior to joining The Aerospace Corporation, Ms. Sandford served as Chief Operations Officer of Recros Medica, an aesthetic medical device startup from 2017 to 2022, and as Chief Operations Officer of PFMG Solar, a leading solar developer in the municipal and school market from 2011 to 2017. Previously, Ms. Sandford served as Vice President at SM&A, a publicly traded consulting firm specializing in business capture and program support services for clients in aerospace, defense, homeland security, and information services, and as Director of Proprietary Programs at Boeing, where she led a program to deliver a novel classified space system. Ms. Sandford holds a B.S. in physics from North Georgia College, an M.S. in engineering from The George Washington University, and an MBA from the University of Southern California. We believe Ms. Sandford is qualified to serve on the Board due to her experience in managing large, complex technical programs and her significant government contract experience.

Family Relationships

There are no family relationships among any of our directors or executive officers.

Board Composition

Our business and affairs are organized under the direction of the Board. The Board will meet on a regular basis and additionally as required.

In accordance with the terms of the Bylaws, the Board may establish the authorized number of directors from time to time by resolution. The Board consists of seven members. In accordance with the Certificate of Incorporation, the Board is divided into three classes with staggered three-year terms. At each annual meeting of stockholders, the successors to directors whose terms then expire will be elected to serve from the time of election and qualification until the third annual meeting following election. The Board is divided among the three classes as follows:

- the Class I directors are Subodh Kulkarni, Ray Johnson and H. Gail Sandford, and their terms will expire at the annual meeting of stockholders to be held in 2023;
- the Class II directors are Alissa Fitzgerald and David Cowan, and their terms will expire at the annual meeting of stockholders to be held in 2024; and
- the Class III directors are Cathy McCarthy and Michael Clifton and their terms will expire at the annual meeting of stockholders to be held in 2025.

As nearly as possible, each class will continue to consist of one-third of the directors.

The division of the Board into three classes with staggered three-year terms may delay or prevent a change of our management or a change in control.

Director Independence

Under the Nasdaq Stock Market (“Nasdaq”) listing standards, a majority of the members of a listed company’s Board must qualify as “independent,” as affirmatively determined by the Board. The Board consults with the Company’s counsel to ensure that the Board’s determinations with respect to independence are consistent with relevant securities and other laws and regulations regarding the definition of “independent,” including those set forth in pertinent listing standards of Nasdaq, as in effect from time to time.

Based on information provided by each director concerning his or her background, employment and affiliations, the Board determined that none of our directors, other than Mr. Kulkarni, has any relationships that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director, and that each of our directors, other than Mr. Kulkarni, is “independent” as that term is defined under the Nasdaq listing standards. In addition, our Board previously determined that Peter Pace, who served as a director and chair of the Board during 2022, including as a member of the audit committee and the compensation committee, and resigned effective July 2022, was “independent” as that term is defined under the Nasdaq listing standards. In making these determinations, the Board considered the current and prior relationships that each non-employee director has with Rigetti and all other facts and circumstances our Board deemed relevant in determining their independence, including the beneficial ownership of securities of Rigetti by each non-employee director and the transactions described in the section titled “*Certain Relationships and Related Person Transactions*.” The Board also determined that each member of our Audit, Compensation and Nominating and Corporate Governance Committees satisfies the independence standards for such committees established by the SEC and the Nasdaq listing standards, as applicable.

Role of the Board in Risk Oversight/Risk Committee

One of the key functions of the Board is the informed oversight of our risk management process. The Board does not have a standing risk management committee, but rather administers this oversight function directly through the Board as a whole, as well as through various standing committees of the Board that address risks

[Table of Contents](#)

inherent in their respective areas of oversight. In particular, the Board is responsible for monitoring and assessing strategic risk exposure and the Board's audit committee has the responsibility to consider and discuss our major financial risk exposures and the steps our management will take to monitor and control such exposures, including guidelines and policies to govern the process by which risk assessment and management is undertaken. The Board's audit committee also monitors compliance with legal and regulatory requirements and assesses cybersecurity risks, including through its standing subcommittee focused on cybersecurity. The Board's compensation committee also assesses and monitor whether our compensation plans, policies and programs comply with applicable legal and regulatory requirements.

Committees of the Board

The Board adopted a charter for each of its committees, which comply with the applicable requirements of current SEC and Nasdaq rules. We intend to comply with future requirements to the extent applicable. Copies of the charters for each committee are available on the investor relations portion of our website.

Audit Committee

The audit committee consists of Cathy McCarthy, H. Gail Sandford, Alissa Fitzgerald and Michael Clifton, each of whom the Board has determined satisfies the independence requirements under Nasdaq listing standards and Rule 10A-3(b)(1) of the Exchange Act. The chair of the audit committee is Ms. McCarthy. The Board has determined that Ms. McCarthy is an "audit committee financial expert" within the meaning of SEC regulations. Each member of the audit committee can read and understand fundamental financial statements in accordance with applicable requirements. In arriving at these determinations, the Board examined each audit committee member's scope of experience and the nature of their employment.

The primary purpose of the audit committee is to discharge the responsibilities of the Board with respect to the corporate accounting and financial reporting processes, systems of internal control and financial statement audits, and to oversee the independent registered public accounting firm. Specific responsibilities of the audit committee include:

- oversee our accounting and financial reporting processes, systems of internal control, financial statement audits and the integrity of our financial statements;
- manage the selection, engagement terms, fees, qualifications, independence, and performance of the registered public accounting firms engaged as our independent outside auditors for the purpose of preparing or issuing an audit report or performing audit services (the "Auditors");
- maintain and foster an open avenue of communication with our management, internal audit group (if any) and Auditors;
- review any reports or disclosures required by applicable law and stock exchange listing requirements;
- oversee the design, implementation, organization and performance of our internal audit function (if any);
- help our Board oversee our legal and regulatory compliance, including risk assessment;
- oversee our technology security and data privacy programs;
- prepare the audit committee report required by the SEC to be included in our annual proxy statement, and
- provide regular reports and information to the Board.

Compensation Committee

The compensation committee consists of Ray Johnson and Michael Clifton. The chair of the compensation committee is Mr. Clifton. The Board has determined that each member of the compensation committee is

[Table of Contents](#)

independent under the Nasdaq listing standards and a “non-employee director” as defined in Rule 16b-3 promulgated under the Exchange Act.

The primary purpose of the compensation committee is to discharge the responsibilities of the Board in overseeing the compensation policies, plans and programs and to review and determine the compensation to be paid to executive officers, directors and other senior management, as appropriate. Specific responsibilities of the compensation committee include:

- help the Board oversee our compensation policies, plans and programs with a goal to attract, incentivize, retain and reward top quality executive management and employees;
- review and determine the compensation to be paid to our executive officers and directors;
- when required, review and discuss with management our compensation disclosures in the “Compensation Discussion and Analysis” section of our annual reports, registration statements, proxy statements or information statements filed with the SEC;
- when required, prepare and review the Committee report on executive compensation included in our annual proxy statement; and
- review and ensure our talent management strategies are aligned to best practices and ensure we attract, retain and develop top talent.

Nominating and Corporate Governance Committee

The nominating and corporate governance committee consists of Alissa Fitzgerald, H. Gail Sandford, and David Cowan. The chair of the nominating and corporate governance committee is Ms. Sandford. The Board has determined that each member of the nominating and corporate governance committee is independent under the Nasdaq listing standards.

Specific responsibilities of the nominating and corporate governance committee include:

- help the Board oversee our corporate governance functions and develop, update as necessary and recommend to the Board the governance principles applicable to Rigetti;
- identify, evaluate and recommend and communicate with candidates qualified to become Board members or nominees for directors of the Board consistent with criteria approved by the Board; and
- make other recommendations to the Board relating to the directors of Rigetti.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation committee has ever been an executive officer or employee of Rigetti. None of our executive officers currently serve, or has served during the last completed fiscal year, on the compensation committee or board of directors of any other entity that has one or more executive officers that serve as a member of the Board or compensation committee.

Code of Business Conduct and Ethics

The Board adopted a Code of Business Conduct and Ethics (the “Code of Conduct”) applicable to all of our employees, executive officers and directors. The Code of Conduct is available at the investors section of our website at <https://www.rigetti.com/investor-information>. Information contained on or accessible through the website is not a part of this prospectus, and the inclusion of the website address in this prospectus is an inactive textual reference only. Any amendments to the Code of Conduct, or any waivers of its requirements, are expected to be disclosed on our website at the above location to the extent required by applicable rules and exchange requirements, including in order to satisfy Item 5.05 of Form 8-K. The reference to our website address does not constitute incorporation by reference of the information contained at or available through our website, and you should not consider it to be a part of this prospectus.

Corporate Governance Guidelines

Our Board has adopted the Rigetti Computing, Inc. Corporate Governance Guidelines for the conduct and operation of the Board in order to give directors a flexible framework for effectively pursuing our objectives for the benefit of our stockholders. The Corporate Governance Guidelines set forth the practices the Board intends to follow with respect to board composition and selection, board meetings and involvement of senior management, Chief Executive Officer performance evaluation and management succession planning and board committees and compensation. The Corporate Governance Guidelines are available in the investors section of our website at <https://www.rigetti.com/investor-information>.

Limitation on Liability and Indemnification of Directors and Officers

The Certificate of Incorporation limits a directors' liability to the fullest extent permitted under the DGCL. The DGCL provides that directors of a corporation will not be personally liable for monetary damages for breach of their fiduciary duties as directors, except for liability:

- for any transaction from which the director derives an improper personal benefit;
- for any act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;
- for any unlawful payment of dividends or redemption of shares; or
- for any breach of a director's duty of loyalty to the corporation or our stockholders.

If the DGCL is amended to authorize corporate action further eliminating or limiting the personal liability of directors, then the liability of the directors will be eliminated or limited to the fullest extent permitted by the DGCL, as so amended.

Delaware law and the Bylaws provide that the Company will, in certain situations, indemnify our directors and officers and may indemnify other employees and other agents, to the fullest extent permitted by law. Any indemnified person is also entitled, subject to certain limitations, to advancement, direct payment, or reimbursement of reasonable expenses (including attorneys' fees and disbursements) in advance of the final disposition of the proceeding.

In addition, the Company entered into separate indemnification agreements with our directors and officers. These agreements, among other things, require the Company to indemnify our directors and officers for certain expenses, including attorneys' fees, judgments, fines and settlement amounts incurred by a director or officer in any action or proceeding arising out of their services as one of our directors or officers or any other company or enterprise to which the person provides services at our request.

We maintain a directors' and officers' insurance policy pursuant to which our directors and officers are insured against liability for actions taken in their capacities as directors and officers. We believe these provisions in the Charter and Bylaws and these indemnification agreements are necessary to attract and retain qualified persons as directors and officers.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers, or control persons, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

EXECUTIVE COMPENSATION

Unless the context otherwise requires, any reference in this section of this prospectus to “Rigetti,” “we,” “us,” “our” or “the Company” refers to Legacy Rigetti and its consolidated subsidiaries prior to the consummation of the Business Combination and to Rigetti and its consolidated subsidiaries following the Business Combination.

For the fiscal year ended December 31, 2022 (“fiscal year 2022”), our named executive officers were:

- Subodh Kulkarni, Current President and Chief Executive Officer;
- Rick Danis, Rigetti’s Former Interim President and Chief Executive Officer;
- Chad Rigetti, Former President and Chief Executive Officer;
- Brian Sereda, Former Chief Financial Officer;
- Michael Harburn, Former Chief Technology Officer; and
- Taryn Naidu, Former Chief Operating Officer

Mr. Kulkarni joined Rigetti as President and Chief Executive Officer in December 2022 and was not a named executive officer for fiscal year 2021. On November 12, 2022, the board accepted the resignation of Dr. Rigetti as the Company’s President and Chief Executive Officer and appointed Rick Danis as the Interim President and Chief Executive Officer. Dr. Rigetti continued as a director and non-executive employee of Rigetti until December 15, 2022. On February 9, 2023, Mr. Harburn’s employment with Rigetti ended and Mr. Sereda ceased serving as Chief Financial Officer of Rigetti. On April 18, 2022, Mr. Naidu’s employment with Rigetti terminated. Dr. Rigetti, Mr. Sereda and Mr. Naidu were also named executive officers for the 11-months ended December 31, 2021 (“fiscal year 2021”).

Summary Compensation Table

The following table sets forth information concerning the compensation of our named executive officers for the fiscal years ended December 31, 2021 and December 31, 2022:

Name, Principal Position	Fiscal Year	Salary ⁽¹⁾ (\$)	Bonus ⁽²⁾ (\$)	Stock Awards ⁽³⁾ (\$)	Option Awards ⁽⁴⁾ (\$)	Non-Equity Incentive Plan Compensation ⁽⁵⁾ (\$)	All Other Compensation ⁽⁶⁾ (\$)	Total (\$)
Subodh Kulkarni ⁽⁷⁾ <i>President and CEO</i>	2022	16,619	—	—	1,527,975	—	—	1,544,594
Rick Danis ⁽⁸⁾ <i>Former Interim President and CEO, General Counsel and Secretary</i>	2022	393,962	460,309	2,220,086	—	—	2,352	3,076,709
Chad Rigetti ⁽⁹⁾ <i>Former President and CEO</i>	2022	411,053	402,350	36,454,550	—	—	168,957	37,436,910
Brian Sereda ⁽¹⁰⁾ <i>Former Chief Financial Officer</i>	2021	320,833	1,300	2,998,877	—	56,000	584	3,377,594
Michael Harburn ⁽¹¹⁾ <i>Former Chief Technology Officer</i>	2022	344,080	25,000	768,694	—	—	384	1,138,158
Taryn Naidu ⁽¹²⁾ <i>Former Chief Operating Officer</i>	2021	121,875	75,000	3,010,271	—	19,500	160	3,226,806
	2022	329,659	—	2,335,189	—	—	384	2,665,232
	2021	258,098	—	1,378,794	—	45,540	4,343	1,686,775

(1) Salary amounts represent actual amounts earned during fiscal year 2022. See “Narrative Disclosure to Summary Compensation Table—Base Salaries” below.

Table of Contents

- (2) This column reflects amounts awarded as discretionary bonuses in 2022. See “*Narrative Disclosure to Summary Compensation Table—Bonuses*” below.
- (3) This column reflects the aggregate grant date fair value of the transaction stock awards and restricted stock units granted to the named executive officer during fiscal year 2022 and fiscal year 2021 under the 2013 Plan and 2022 Plan. The aggregate grant date fair value is computed in accordance with ASC Topic 718 for stock-based compensation transactions. Assumptions used in the calculation of these amounts are included in the notes to our financial statements included elsewhere in this prospectus. This amount does not reflect the actual economic value that may be realized by the named executive officer.
- (4) This column reflects the aggregate grant date fair value of the option awards granted during fiscal year 2022 computed in accordance with ASC Topic 718 for stock-based compensation transactions. Assumptions used in the calculation of these amounts are included in the notes to our audited financial statements included elsewhere in this prospectus. These amounts do not reflect the actual economic value that will be realized by the named executive officer upon the vesting of the stock options, the exercise of the stock options, or the sale of the common stock underlying such stock options. The amounts reported for 2022 for Mr. Kulkarni include the aggregate grant-date fair value of a time-vesting option awarded to the Mr. Kulkani in December 2022, calculated in accordance with Topic 718. Mr. Kulkani was also granted a performance-vesting option in December 2022 that is subject to time-based vesting and performance conditions as defined under applicable accounting standards.
- (5) See “—Narrative to Summary Compensation Table—Non-Equity Incentive Plan Compensation” below for a description of the material terms of the program for fiscal year 2021 pursuant to which this compensation was awarded. The amounts shown for non-equity incentive plan compensation represent amounts earned for the fiscal years presented, whether or not actually paid during such year.
- (6) This column reflects the aggregate value of other categories of payment, consisting of (i) for Mr. Danis, \$384 for life insurance premiums for fiscal year 2022, and \$1,968 for professional membership fees for fiscal year 2022; (ii) Dr. Rigetti, \$584 for life insurance premiums for each of fiscal year 2022 and fiscal year 2021, respectively, and \$168,957 for reimbursement for legal fees paid in connection with negotiation of separation from the Company in fiscal year 2022; (iii) for Mr. Sereda, \$384 and \$160 for life insurance premiums for fiscal year 2022 and fiscal year 2021, respectively; (iv) for Mr. Harburn, \$384 for life insurance premiums for fiscal year 2022; and (v) for Mr. Naidu, \$384 and \$552 for life insurance premiums for fiscal year 2022 and fiscal year 2021, respectively, and \$3,791 for professional membership fees for fiscal year 2021.
- (7) Dr. Kulkarni joined Rigetti as Chief Financial Officer in December 2022. Dr. Kulkarni was not a named executive officer for fiscal year 2021.
- (8) On November 12, 2022, Mr. Danis was appointed Interim President and Chief Executive Officer. On December 12, 2022, Mr. Danis stepped down from such position and continued with the Company in his role as the Company’s General Counsel and Corporate Secretary. Mr. Danis was not a named executive officer in 2021.
- (9) On November 12, 2022, the board accepted the resignation of Dr. Rigetti as the Company’s President and Chief Executive Officer. Dr. Rigetti continued as a director and non-executive employee of Rigetti until December 15, 2022.
- (10) Mr. Sereda ceased serving as Chief Financial Officer of Rigetti on February 9, 2023 and his employment ended with Rigetti on March 27, 2023. Mr. Sereda joined Rigetti as Chief Financial Officer in August 2021.
- (11) Mr. Harburn’s employment with Rigetti ended on February 9, 2023. Mr. Harburn was not a named executive officer in 2021.
- (12) On April 18, 2022, Mr. Naidu’s employment with Rigetti terminated. Mr. Naidu is included as a named executive officer for 2022 because he would have been required to be included but for the fact that he was not serving as an executive officer at the end of the 2022.

Narrative Disclosure to Summary Compensation Table

Base Salaries

Our named executive officers receive a base salary to compensate them for the services they provide to our company. The base salary payable to each named executive officer is intended to provide a fixed component of compensation reflecting the executive's skill set, experience, role and responsibilities.

Dr. Kulkarni had an annual base salary of \$585,000 commencing on December 7, 2022. Mr. Rigetti had an annual base salary of \$446,000 in fiscal year 2022 and \$350,000 for fiscal year 2021. Mr. Danis had an annual base salary of \$309,000 for fiscal year 2022 which was increased to \$392,333 from November 12, 2022 to December 12, 2022, which was the duration of his position as Interim President and Chief Executive Officer. Mr. Sereda has an annual base salary of \$348,000 in fiscal year 2022 and \$325,000 in fiscal year 2021. Mr. Harburn had an annual base salary of \$345,000 for fiscal year 2022. Mr. Naidu had an annual base salary of \$379,000 for fiscal year 2022. Mr. Naidu had a base salary of \$275,000 from February 1, 2021 to July 14, 2021 and a base salary of \$284,625 commencing on July 15, 2021 for fiscal year 2021.

The actual salaries earned by each named executive officer for fiscal year 2022 and fiscal year 2021 (the 11-month period from February 1, 2021 to December 31, 2021) are set forth in the "Summary Compensation Table" above in the column titled "Salary."

Bonuses

Transaction Cash Bonuses.

In recognition of contributions in connection with the Business Combination, the Legacy Rigetti Board approved cash bonuses that were paid to Dr. Rigetti, Mr. Naidu, Mr. Danis and Mr. Sereda in the amount of \$400,000, \$400,000, \$350,000 and \$25,000, respectively, in connection with the closing of the Business Combination in fiscal year 2022.

Discretionary Bonuses.

In fiscal year 2022, Dr. Rigetti received a discretionary bonus of \$2,350. In fiscal year 2021, Dr. Rigetti received a discretionary bonus of \$700 in March 2021 and \$600 in May 2021.

Mr. Sereda Signing Bonus.

In 2021, Mr. Sereda received a sign-on bonus in an aggregate amount of \$75,000 as an incentive for him to join the Company.

Non-Equity Incentive Plan Compensation

For fiscal year 2022, we did not have an annual performance-based cash bonus program. In 2021, the Legacy Rigetti Board implemented an annual performance-based cash bonus program in which each of the named executive officers participate. Mr. Sereda was eligible for a performance-based cash bonus under the Company's 2021 performance bonus program pursuant to his offer letter, which is described in "Employment Arrangements with Executive Officers—Brian Sereda." Under the performance bonus program for fiscal year 2021, each named executive officer was eligible to be considered for a cash performance bonus based on (1) a target bonus, as a percentage of base salary, and (2) the achievement of 2021 corporate goals established by the Legacy Rigetti Board in its sole discretion. Each named executive officer for fiscal year 2021 was assigned a maximum target performance bonus of 16% of current base salary with respect to Dr. Rigetti and Mr. Naidu (\$350,000 and \$284,625 for Dr. Rigetti and Mr. Naidu, respectively) and base salary actually received in fiscal year 2021 with respect to Mr. Sereda. The payout amounts under the 2021 performance bonus program were \$56,000 for Dr. Rigetti, \$45,540 for Mr. Naidu and \$19,500 for Mr. Sereda.

Equity-Based Incentive Awards

Our equity award program is the primary vehicle for offering long-term incentives to our executives. We believe that equity awards provide our executive officers with a strong link to long-term performance, create an ownership culture and help to align the interests of Rigetti's executive officers and stockholders. To date, we have historically granted stock options, both incentive stock options and nonstatutory stock options, restricted stock units ("RSUs") and stock awards to our executive officers. We believe that our equity awards are an important retention tool for our executive officers, as well as for our other employees. We grant equity awards broadly to our employees, including to our non-executive employees. The Board is responsible for approving equity grants.

Prior to the closing of the Business Combination on March 2, 2022, all of the equity incentive awards that we have granted to executive officers were made pursuant to the 2013 Plan. Following the closing of the Business Combination, all of the equity incentive awards have been and will continue to be granted under the terms of the 2022 Plan. The material terms of the equity awards granted to our named executive officers prior to December 31, 2022 are set forth in the section titled "Outstanding Equity Awards as of December 31, 2022." All options are granted with an exercise price per share that is no less than the fair market value of our common stock on the date of grant of such award. Stock option awards and RSU awards generally vest over a four year period with a one-year cliff and may be subject to acceleration of vesting and exercisability under certain termination and change in control events. See "*—Outstanding Equity Awards as of December 31, 2022.*" Upon the closing of the Business Combination, outstanding Legacy Rigetti options and Legacy Rigetti restricted stock unit awards under the 2013 Plan were assumed by us and converted into options to purchase common stock and RSUs for common stock.

CEO Award

On December 12, 2022, Mr. Kulkarni was granted an option to purchase up to 1,250,000 shares of common stock, at an exercise price of \$0.9638 per share, and an option to purchase up to 500,000 shares of common stock, at an exercise price of \$0.9638 per share. Mr. Kulkarni's grant included his initial grant provided upon his commencement of employment. See "*—Employment Arrangements—Dr. Subodh Kulkarni*" for additional information on the vesting conditions for Mr. Kulkarni's grants.

Interim CEO Award

On December 9, 2022, Mr. Danis was awarded 147,058 RSUs in connection with his service as Interim CEO. The RSUs vest one-third on each of December 31, 2022, January 31, 2023 and February 28, 2023, subject to Mr. Danis's continuous service as of the applicable vesting date.

Rigetti 2022 Alignment RSU Awards and Annual RSU Awards

On June 10, 2022, 5,132,962 RSUs in the aggregate were granted to employees of Rigetti as alignment awards for the purpose of better aligning executive and employee equity ownership in the company with similarly situated companies (collectively the "Alignment RSUs"), of 2,857,444, 164,685, 8,791 and 207,178 Alignment RSUs were granted to Dr. Rigetti, Mr. Danis, Mr. Sereda and Mr. Harburn, respectively. The Alignment RSUs vest (i) 50% in 12 equal monthly installments on the last day of each month commencing March 31, 2022 and (ii) 50% vested or shall vest in 48 equal monthly installments on the last day of each month commencing March 31, 2022, subject to continuous service of the named executive officer on each such date. Dr. Rigetti was employed by the Company until December 15, 2022 and as of this date, 1,339,426 of his Alignment RSUs had vested.

In addition, on June 10, 2022, 1,232,300 RSUs in the aggregate were granted to employees of Rigetti as 2022 annual equity awards (the "Rigetti 2022 Annual RSUs"), of which 334,700, 102,800, 128,600 and

[Table of Contents](#)

107,900 Rigetti 2022 Annual RSUs were granted to Dr. Rigetti, Mr. Danis, Mr. Sereda and Mr. Harburn, respectively. The Rigetti 2022 Annual RSUs vest in 48 equal installments commencing on March 31, 2022, subject to continuous service of the named executive officer on each such date. Dr. Rigetti was employed by the Company until December 15, 2022 and as of this date, 62,756 of his Rigetti 2022 Annual RSUs had vested.

Transaction Bonus Stock Awards

On June 10, 2022, 120,000 shares of common stock in the aggregate were granted to employees as transaction bonus stock awards, of which 45,000, 25,000 and 5,000 individual stock awards were granted to Dr. Rigetti, Mr. Danis and Mr. Sereda, respectively.

2022 Legacy Rigetti RSUs

On January 25, 2022, the Legacy Rigetti awarded 4,963,063 RSUs in the aggregate to employees of Legacy Rigetti, of which 2,174,346, 125,315, 6,689, 157,650 and 338,199 were granted to Dr. Rigetti, Mr. Danis, Mr. Sereda, Mr. Harburn and Mr. Naidu, respectively. These RSUs were granted pursuant to the terms of the 2013 Plan and for the purpose of better aligning executive and employee equity ownership in the company with similarly situated companies. The RSUs vest in 48 equal monthly installments commencing February 25, 2022, subject to continuous service of the named executive officer on each such date. Upon the closing of the Business Combination, these RSUs were assumed and converted into RSUs to acquire common stock. Dr. Rigetti was employed by the Company until December 15, 2022 and as of this date, 1,132,469 of his RSUs had vested. Mr. Naidu was employed by the Company until April 18, 2022 and as of this date, 35,228 of his RSUs had vested.

On April 21, 2021, Legacy Rigetti awarded RSUs to each of Dr. Rigetti and Mr. Naidu in the amounts of 1,044,905, and 378,082, respectively. On August 18, 2021, Rigetti awarded RSUs to Mr. Sereda in the amount of 1,048,875. The RSUs are subject to time-based vesting requirements and liquidity-event vesting requirements. The RSU awards to Dr. Rigetti and Mr. Naidu vest in 48 equal installments commencing on May 21, 2021, subject to continuous service of the named executive officer on each such date. Dr. Rigetti was employed by the Company until December 15, 2022 and as of this date, 413,608 of his RSUs had vested. Mr. Naidu was employed by the Company until April 18, 2022 and as of this date, 86,643 of his RSUs had vested. 25% of the RSU award to Mr. Sereda vested on August 12, 2022, and the remainder vests in 36 equal monthly installments, subject to continuous service of Mr. Sereda on each such date. The liquidity-event vesting requirement was satisfied upon the consummation of the Business Combination.

Reimbursement

Rigetti reimbursed Dr. Rigetti for legal fees paid in the amount of \$168,957 in connection with internal matters and the negotiation of his separation from the Company in fiscal 2022.

Outstanding Equity Awards as of December 31, 2022

The following table presents information regarding outstanding equity awards held by our named executive officers as of December 31, 2022. All awards were granted pursuant to the 2013 Plan and 2022 Plan. See the section titled “—Equity Incentive Plans-2013 Plan” and “—Equity Incentive Plans- Rigetti Computing, Inc. 2022 Equity Incentive Plan” below for additional information. Mr. Naidu’s employment with the Company ended on April 18, 2022 and his post-termination exercise period expired on July 18, 2022.

- (1) The market value of unvested shares is calculated by multiplying the number of unvested shares by the closing market price of our common stock on Nasdaq on December 30, 2022, the last trading day of fiscal year 2022, which was \$0.7292 per share.
- (2) One-third (1/3rd) of the shares subject to the option vest on December 12, 2023, and the remaining shares subject to the option shall vest in twenty-four (24) equal monthly installments thereafter, subject to Dr. Kulkarni’s continuous service through each such vesting date (the “time-based vesting requirement”).

Table of Contents

- (3) This option is subject to the aforementioned time-based vesting requirement and a performance-based vesting requirement. The performance-based vesting requirement uses the Company's stock price as vesting hurdles over a five-year period. There are two vesting hurdles at \$5 and \$10 per share, with each hurdle price applying to 50% of the shares underlying the option granted. A hurdle is met when the Company's closing trading stock price equals or exceeds the hurdle amount for any twenty (20) trading days during any consecutive thirty (30) trading day period. To the extent that the performance-based vesting requirement is satisfied prior to the termination of Dr. Kulkarni's continuous service, the option will vest and become exercisable without regard to the time-based vesting requirement. The option will not vest and become exercisable unless and until the performance-based vesting requirement has been satisfied, even if the time-based vesting requirement has been satisfied.
- (4) 14.44808% of this option vested and became exercisable on July 23, 2020, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (5) 20% of this option vested and became exercisable on July 23, 2020, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (6) This option vests and becomes exercisable in equal monthly installments over a period of four years commencing August 15, 2020, subject to continuous service on each such date.
- (7) The RSU vests in three equal monthly installments commencing on December 31, 2022, subject to continuous service on each such date.
- (8) The RSU vests in 48 equal installments commencing on May 21, 2021, subject to continuous service on each such date.
- (9) The RSU vests (i) 50% in 12 equal monthly installments on the last day of each month commencing February 28, 2022 and (ii) 50% vested or shall vest in 48 equal monthly installments on the last day of each month commencing February 28, 2022, subject to continuous service on each such date.
- (10) The RSU vests (i) 50% in 12 equal monthly installments on the last day of each month commencing March 31, 2022 and (ii) 50% vested or shall vest in 48 equal monthly installments on the last day of each month commencing March 31, 2022, subject to continuous service on each such date.
- (11) The RSU vests in 48 equal installments commencing on March 31, 2022, subject to continuous service on each such date.
- (12) 25% of this option vested and became exercisable on February 18, 2021, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date, until Dr. Rigetti's departure on December 15, 2022.
- (13) 25% of the RSU vested on August 12, 2022, and the remainder shall vest in 36 equal monthly installments, subject to continuous service on each such date.
- (14) The RSU shall vest in 48 equal monthly installments commencing February 25, 2022, subject to continuous service on each such date.
- (15) 11.49988% of this option vested and became exercisable on February 18, 2020, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (16) 20% of this option vested and became exercisable on July 18, 2019, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (17) This option vests and became exercisable in equal monthly installments over a period of five years commencing April 1, 2019, subject to continuous service on each such date.
- (18) 6.99996% of this option vested and became exercisable on February 18, 2020, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (19) 20% of this option vested and became exercisable on March 18, 2020, with the remainder vesting in 48 equal monthly installments thereafter, subject to continuous service on each such date.
- (20) Dr. Kulkarni was appointed the Company's President and Chief Executive Officer on December 12, 2022.
- (21) Mr. Danis served as the Company's Interim President and Chief Executive Officer from November 12, 2022 to December 12, 2022.
- (22) Dr. Rigetti resigned as the Company's President and Chief Executive Officer on November 12, 2022 and served as a director and non-executive employee of the Company until December 15, 2022. The shares included in this table represent the shares vested with respect to option awards held by Dr. Rigetti as of the last date of his employment with the Company on December 15, 2022. Dr. Rigetti's post-termination exercise period for option awards expired on March 15, 2023.

Health and Welfare and Retirement Benefits; Perquisites

All of Rigetti's named executive officers are eligible to participate in Rigetti's employee benefit plans, including medical, dental, vision, disability and life insurance plans, in each case on the same basis as all of Rigetti's other full-time employees. We pay the premiums for medical, dental, vision, group term life, disability and accidental death and dismemberment insurance for all of our employees, including our named executive officers. We generally do not provide perquisites or personal benefits to our named executive officers, except in limited circumstances.

401(k) Plan

Our named executive officers are eligible to participate in a defined contribution retirement plan that provides eligible U.S. employees with an opportunity to save for retirement on a tax advantaged basis. Eligible employees may defer eligible compensation on a pre-tax or after-tax (Roth) basis, up to the statutorily prescribed annual limits on contributions under the Code. Contributions are allocated to each participant's individual account and are then invested in selected investment alternatives according to the participants' directions. The 401(k) plan is intended to be qualified under Section 401(a) of the Code with the 401(k) plan's related trust intended to be tax exempt under Section 501(a) of the Code. As a tax-qualified retirement plan, contributions to the 401(k) plan (except for Roth contributions) and earnings on those contributions are not taxable to the employees until distributed from the 401(k) plan.

Employment Arrangements with Executive Officers

Each of Dr. Kulkarni, Mr. Danis and Mr. Harburn are, and each of Dr. Rigetti, Mr. Sereda and Mr. Naidu was, an at-will employee. Except as set forth below, as of the date of this prospectus, we have not entered into any employment agreements or offer letters with our named executive officers.

Dr. Subodh Kulkarni

In December 2022, we entered into an executive employment agreement with Dr. Kulkarni. Pursuant to the executive employment agreement, Dr. Kulkarni will perform the Chief Executive Officer's duties; provided that, for the initial period beginning on the December 12, 2022 and continuing through January 8, 2023, Dr. Kulkarni will perform the Chief Executive Officer's duties within a time commitment averaging approximately fifty percent (50%) of that of a full-time professional while Dr. Kulkarni provides transition consulting services to CyberOptics. Pursuant to the executive employment agreement, Dr. Kulkarni will receive an annual base salary of \$585,000 (prorated for the period described in the foregoing sentence) and will be eligible: (i) to participate in the Company's benefit plans; (ii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which the Company may have in effect from time to time; (iv) to receive a one-time relocation benefit in the gross amount of \$130,000 if Dr. Kulkarni relocates to the Bay Area, California by no later than 120 days following December 12, 2022, which will be paid in lump sum within thirty (30) days after completion of the relocation; and (iii) starting with calendar year 2023, a discretionary annual cash bonus of a target amount equal to \$290,000, subject to review and adjustment by the Company and dependent on his continuous performance of services to the Company through the last date of the applicable performance period and the actual achievement by him and the Company of applicable performance targets and goals set by the Board or the Compensation Committee of the Board.

The executive employment agreement also provides for the grant of an option to purchase up to 1,250,000 shares of common stock (the "Dr. Kulkarni Initial Option"), which award was granted on December 12, 2022 pursuant to the form of option award agreement previously adopted and disclosed by the Company. The Dr. Kulkarni Initial Option will have an exercise price equal to the closing price per share of the Company's common stock on the grant date, and will vest in accordance with the following schedule: 12/36ths of the total shares subject to the Dr. Kulkarni Initial Option will vest on the one year anniversary of the vesting commencement date, and 1/36th of the total shares subject to the Dr. Kulkarni Initial Option will vest each month thereafter on the same day of the month as the vesting commencement date (or if there is no corresponding day, on the last day of the month), in each case, subject to Dr. Kulkarni's continuous service through each such date.

[Table of Contents](#)

Additionally, the executive employment agreement provides for the grant of an option to purchase up to 500,000 shares of common stock (the “Dr. Kulkarni Performance Options”), which award was granted on December 12, 2022 pursuant to the form of option award agreement previously adopted and disclosed by the Company. The Dr. Kulkarni Performance Option will have an exercise price equal to the closing price per share of the Company’s common stock on the grant date, and will be subject to a time-based vesting requirement (the “Dr. Kulkarni Time-Based Vesting Requirement”) and a performance-based vesting requirement (the “Dr. Kulkarni Performance-Based Vesting Requirement”). To the extent that the Dr. Kulkarni Performance-Based Vesting Requirement is satisfied prior to the termination of Dr. Kulkarni’s continuous service, the Dr. Kulkarni Performance Option will vest and become exercisable without regard to the Time-Based Vesting Requirement. However, the Dr. Kulkarni Performance Option will not vest and become exercisable unless and until the Dr. Kulkarni Performance-Based Vesting Requirement has been satisfied, even if the Dr. Kulkarni Time-Based Vesting Requirement has been satisfied. The Dr. Kulkarni Time-Based Vesting Requirement will be satisfied as follows: 12/36ths of the total shares subject to the Performance Option will satisfy the Dr. Kulkarni Time-Based Vesting Requirement on the one year anniversary of the vesting commencement date, and 1/36th of the total shares subject to the Dr. Kulkarni Performance Option will satisfy the Dr. Kulkarni Time-Based Vesting Requirement each month thereafter on the same day of the month as the vesting commencement date (or if there is no corresponding day, on the last day of the month), in each case, subject to Mr. Kulkarni’s continuous service through each such date. The Dr. Kulkarni Performance-Based Vesting Requirement will be satisfied with respect to 250,000 shares to the extent that the closing price per share of the Company’s common stock is \$5.00 or higher and, with respect to the other 250,000 shares, the closing price per share of the Company’s common stock is \$10.00 or higher, for any twenty trading days during any consecutive thirty trading day period during the five-year period beginning on the December 12, 2022 and ending on the fifth anniversary thereof. Any portion of the Dr. Kulkarni Performance Option that has not satisfied the Dr. Kulkarni Performance-Based Vesting Requirement on or prior to the fifth anniversary of the December 12, 2022 will be forfeited.

Rick Danis

Executive Employment Agreement

In January 2022, we entered into an executive employment agreement with Mr. Danis, which was amended and restated on February 2, 2022 and became effective upon and concurrent with the Closing of the Business Combination. Pursuant to the executive employment agreement, Mr. Danis receives an annual base salary of \$309,000 and is eligible: (i) to participate in Rigetti’s benefit plans; (ii) subject to the approval of the Board, to receive restricted stock units to acquire shares of common stock (the “PSU Awards”), if certain performance-based milestones established by Rigetti are satisfied in the future and provided that Mr. Danis remains continuously employed by Rigetti through the date that the Board or the Compensation Committee grants such PSU Awards (subject to continued employment for a three-year period); (iii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which Rigetti may have in effect from time to time; and (iv) a discretionary annual cash bonus of a target amount equal to 25% of the base salary, subject to review and adjustment by the Board. Mr. Danis is entitled to certain severance benefits as described below in “—Potential Payments Upon Termination or Change in Control.”

The executive employment agreement also provided for the grant of an initial restricted stock unit award to purchase 164,685 (the “Mr. Danis Initial RSU Award”) shares of common stock, which was approved by the Board, contingent upon and subject to the filing and effectiveness of a registration statement on Form S-8 (the “Form S-8”) with respect to the 2022 Plan, following the Closing and which will be granted upon the effectiveness of the Form S-8.

This award vests in accordance with the following schedule: (i) 50% of the total number of Mr. Danis Initial RSU Awards will vest in substantially equal installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of 12 months and (ii) the remaining 50% of the total number of Mr. Danis Initial RSU Awards will vest in in substantially equal

[Table of Contents](#)

installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of four years, with prongs (i) and (ii) occurring concurrently, such that, at the end of the 12-month period immediately following the vesting commencement date, 62.5% of the total number of Initial RSU Awards will have vested (subject to the Executive's Continuous Service (as defined in the 2022 Plan) on such vesting date). The executive employment agreement also provided that, contingent upon the occurrence of the Closing and Mr. Danis' continued employment with Rigetti through such date, Mr. Danis shall receive a cash bonus between \$50,000 and \$500,000, determined by the Board based on the gross proceeds of the transactions contemplated by the Merger Agreement, in recognition of his contributions to Rigetti and 25,000 shares of common stock subject to the approval of the Board or the Compensation Committee of the Board and Mr. Danis' continued employment with Rigetti through such date. In addition, the executive employment agreement provides that Mr. Danis will receive Rigetti 2022 Annual RSUs (as defined below) to purchase 334,700 shares of common stock, which will vest monthly over four years, provided that Mr. Danis is continuously employed for such period, or vesting 100% upon a Change in Control (as defined in the 2022 Plan). The executive employment agreement further provides that Rigetti will reimburse Mr. Danis for reasonable business expenses in accordance with the company's standard expense reimbursement policy, as the same may be modified from time to time. In addition, Mr. Danis is eligible to receive certain employee benefits, including medical, vision, dental, life insurance, and participation in a Section 401(k) retirement plan (as described above).

Interim CEO Letter Agreement

On December 1, 2022, the Company entered into a letter agreement (the "Interim CEO Letter") with Mr. Danis, governing the terms of his service as the Company's Interim President and Chief Executive Officer from November 12, 2022 to December 12, 2022 (the "Interim CEO Period"). During the Interim CEO Period, Mr. Danis' base salary increased to \$83,333 per month. Mr. Danis was also eligible to receive a one-time bonus in the amount of \$67,109.47, provided that, all of the stock options held by Mr. Danis as of the date of the Interim CEO Letter were exercised prior to the three-month anniversary of the date of the Interim CEO Letter.

Under the Interim CEO Letter, subject to the approval of the Board or an authorized committee thereof, Mr. Danis is eligible to receive the following restricted stock unit ("RSU") awards: (i) a RSU award having a grant date fair value equal to \$150,000 following the entry of the Interim CEO Letter (the "Initial RSU Award"); (ii) a RSU award having a grant date fair value equal to \$250,000 following the end of the Interim CEO Period (the "End of Term RSU Award"); and (iii) a RSU award having a grant date fair value equal to \$50,000 on each monthly anniversary of November 12, 2022 starting with March 12, 2023 (each, an "Additional RSU Award"). Each of such RSU awards will be governed by the Company's 2022 Equity Incentive Plan and a RSU award agreement adopted thereunder. The Initial RSU Award of 147,058 RSUs was granted on December 9, 2022. Subject to Mr. Danis' continued service with the Company through each applicable vesting date, the Initial RSU Award vests in three equal monthly installments following the vesting commencement date; the End of Term RSU Award will vest in twelve equal monthly installments following the vesting commencement date; and each Additional RSU Award will fully vest at the end of the month following the applicable vesting commencement date. In the event of a change in control of the Company, the vesting of such RSU awards will be accelerated in full immediately prior to the consummation of such change in control, subject to Mr. Danis' continued service with the Company through such date.

Chad Rigetti

Executive Employment Agreement

In January 2022, we entered into an executive employment agreement with Dr. Rigetti, which was amended and restated on February 2, 2022 and became effective upon and concurrent with the Closing of the Business Combination. Dr. Rigetti resigned as the Company's President and Chief Executive Officer on November 12, 2022 and resigned from the Board on December 15, 2022. Pursuant to the executive employment agreement,

[Table of Contents](#)

Dr. Rigetti received an annual base salary of \$446,000 and was eligible: (i) to participate in Rigetti's benefit plans; (ii) subject to the approval of the Board, to receive PSU Awards, if certain performance-based milestones established by Rigetti are satisfied in the future and provided that Dr. Rigetti has remained continuously employed by Rigetti through the date that the Board or the Compensation Committee grants such PSU Awards (subject to continued employment for a three-year period); (iii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which Rigetti may have in effect from time to time; and (iv) a discretionary annual cash bonus of a target amount equal to 25% of the base salary, subject to review and adjustment by the Board. Dr. Rigetti was entitled to certain severance benefits as described below in "—Potential Payments Upon Termination or Change in Control."

The executive employment agreement also provided for the grant of an initial restricted stock unit award to purchase 2,857,444 (the "Dr. Rigetti Initial RSU Award") shares of common stock, which was approved by the Board, contingent upon and subject to the filing and effectiveness of the Form S-8 with respect to the 2022 Plan, following the Closing and which will be granted upon the effectiveness of the Form S-8. Dr. Rigetti Initial RSU Award was granted on June 10, 2022.

This award vested in accordance with the following schedule: (i) 50% of the total number of Dr. Rigetti Initial RSU Awards will vest in substantially equal installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of 12 months and (ii) the remaining 50% of the total number of Dr. Rigetti Initial RSU Awards will vest in substantially equal installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of four years, with prongs (i) and (ii) occurring concurrently, such that, at the end of the 12-month period immediately following the vesting commencement date, 62.5% of the total number of Initial RSU Awards will have vested (subject to the Executive's Continuous Service (as defined in the 2022 Plan) on such vesting date). The executive employment agreement also provided that, contingent upon the occurrence of the Closing and Dr. Rigetti's continued employment with Rigetti through such date, Dr. Rigetti would receive a cash bonus between \$50,000 and \$750,000, determined by the Board based on the gross proceeds of the transactions contemplated by the Merger Agreement, in recognition of his contributions to Rigetti and 45,000 shares of common stock subject to the approval of the Board or the Compensation Committee of the Board and Dr. Rigetti's continued employment with Rigetti through such date. The transaction cash bonus and transaction bonus stock awards to Mr. Rigetti were granted in fiscal year 2022. In addition, the executive employment agreement provides that Dr. Rigetti would receive Rigetti 2022 Annual RSUs to purchase 334,700 shares of common stock, which vested monthly over four years, provided that Dr. Rigetti is continuously employed for such period, or vesting 100% upon a Change in Control (as defined in the 2022 Plan). The Rigetti 2022 Annual RSUs to Mr. Rigetti were granted on June 10, 2022. The executive employment agreement further provided that Rigetti would reimburse Dr. Rigetti for reasonable business expenses in accordance with the company's standard expense reimbursement policy, as the same may be modified from time to time. In addition, Dr. Rigetti was eligible to receive certain employee benefits, including medical, vision, dental, life insurance, and participation in a Section 401(k) retirement plan (as described above). On November 12, 2022, the board accepted the resignation of Dr. Rigetti as the Company's President and Chief Executive Officer. Dr. Rigetti continued as a director and non-executive employee of Rigetti until December 15, 2022.

Separation Agreement

In connection with Dr. Rigetti's resignation as the Company's President and Chief Executive Officer, we entered into a Separation Agreement with Dr. Rigetti on February 14, 2023 (the "Separation Agreement"), under which Dr. Rigetti is entitled to: (i) cash severance of \$446,000, which is an amount equal to 12 months of Dr. Rigetti's base salary in effect as of the Separation Date, payable in installments commencing on the Company's first regular payroll date that is at least sixty (60) days following the Separation Date (but no earlier than the effective date of the Separation Agreement), provided that on the first payment date, the Company will make a catch-up payment equal to the aggregate amount of cash severance payments that would have been paid

[Table of Contents](#)

to him through such date had the payments commenced on the first regularly scheduled payroll date following the Separation Date, and (ii) provided Dr. Rigetti timely elects continued coverage under COBRA, payment of COBRA premiums to continue health insurance coverage for him and his eligible dependents until the earliest of (a) twelve (12) months following the Separation Date, (b) the date when Dr. Rigetti becomes eligible for substantially equivalent health insurance coverage in connection with new employment or self-employment, or (c) the date when Dr. Rigetti ceases to be eligible for COBRA continuation coverage for any reason, including plan termination, or a taxable payment in lieu of such payment if determined necessary by the Company to comply with law. The Separation Agreement additionally includes a customary general release of claims by Dr. Rigetti in favor of the Company and certain related parties.

Brian Sereda

We entered into an offer letter agreement with Mr. Sereda as Chief Financial Officer on July 1, 2021, pursuant to which Mr. Sereda is entitled to an annual base salary of \$325,000. In addition, Mr. Sereda received a start bonus in the amount of \$75,000 that is subject to repayment if Mr. Sereda's employment with Rigetti is terminated for any reason prior to the one-year anniversary of his start date. Pursuant to the offer letter agreement, Mr. Sereda received 1,048,875 RSUs for shares of common stock. The offer letter agreement provides that Mr. Sereda is eligible to receive an annual performance-based cash bonus for each fiscal year under Rigetti's performance-based bonus program with a target bonus opportunity of 16% of his base salary actually paid based on the achievement of performance criteria established by the Board, the compensation committee of the Board (or their designee) for fiscal year 2021.

In January 2022, we entered into an executive employment agreement with Mr. Sereda, which was amended and restated on February 2, 2022 and became effective upon and concurrent with the Closing of the Business Combination and which replaced Mr. Sereda's existing offer letter agreement. Pursuant to the executive employment agreement, Mr. Sereda will receive an annual base salary of \$348,000 and will be eligible: (i) to participate in Rigetti's benefit plans; (ii) subject to the approval of the Board, to receive PSU's, if certain performance-based milestones established by Rigetti are satisfied in the future and provided that Mr. Sereda has remained continuously employed by Rigetti through the date that the Board or the Compensation Committee grants such PSU Awards (subject to continued employment for a three-year period); (iii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which Rigetti may have in effect from time to time; and (iv) a discretionary annual cash bonus of a target amount equal to 25% of the base salary, subject to review and adjustment by the Board. Mr. Sereda is entitled to certain severance benefits as described below in "*Potential Payments Upon Termination or Change in Control.*"

The executive employment agreement also provided for the grant of an initial restricted stock unit award to purchase 8,791 (the "Sereda Initial RSU Award") shares of common stock, which was approved by the Board, contingent upon and subject to the filing and effectiveness of the Form S-8 with respect to the 2022 Plan, following the Closing and were granted upon the effectiveness of the Form S-8 on June 10, 2022.

This award vests in accordance with the following schedule: one-forty eighth (1/48th) of the total number of Sereda Initial RSU Awards (rounded down, except for the final scheduled vesting installment) will satisfy time-based vesting each month following the vesting commencement date over a period of four years. The executive employment agreement also provided that, contingent upon the occurrence of the Closing and Mr. Sereda's continued employment with Rigetti through such date, Mr. Sereda would receive a bonus between \$0 and \$25,000, determined by the Board based on the gross proceeds of the transactions contemplated by the Merger Agreement, in recognition of his contributions to Rigetti and 5,000 shares of common stock subject to the approval of the Board or the Compensation Committee of the Board and Mr. Sereda's continued employment with Rigetti through such date. The transaction cash bonus and transaction bonus stock awards were granted to Mr. Sereda in fiscal year 2022. In addition, the executive employment agreement provides that Mr. Sereda would receive Rigetti 2022 Annual RSUs to purchase 128,600 shares of common stock, which vest monthly over four years, provided that Mr. Sereda is continuously employed for such period, or vesting 100% upon a Change in

[Table of Contents](#)

Control (as defined in the 2022 Plan). The Rigetti 2022 Annual RSUs were granted on June 10, 2022. The executive employment agreement further provides that Rigetti will reimburse Mr. Sereda for reasonable business expenses in accordance with Rigetti's standard expense reimbursement policy, as the same may be modified from time to time. In addition, Mr. Sereda is eligible to receive certain employee benefits, including medical, vision, dental, life insurance, and participation in a Section 401(k) retirement plan (as described above).

Michael Harburn

In January 2022, we entered into an executive employment agreement with Mr. Harburn, which was amended and restated on February 2, 2022 and became effective upon and concurrent with the Closing of the Business Combination. Pursuant to the executive employment agreement, Mr. Harburn received an annual base salary of \$345,000 and was eligible: (i) to participate in Rigetti's benefit plans; (ii) subject to the approval of the Board, to receive PSU Awards, if certain performance-based milestones established by Rigetti are satisfied in the future and provided that Mr. Harburn has remained continuously employed by Rigetti through the date that the Board or the Compensation Committee grants such PSU Awards (subject to continued employment for a three-year period); (iii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which Rigetti may have in effect from time to time; and (iv) a discretionary annual cash bonus of a target amount equal to 25% of the base salary, subject to review and adjustment by the Board. Mr. Harburn is entitled to certain severance benefits as described below in "—Potential Payments Upon Termination or Change in Control."

The executive employment agreement also provided for the grant of an initial restricted stock unit award to purchase 207,178 (the "Mr. Harburn Initial RSU Award") shares of common stock, which was approved by the Board, contingent upon and subject to the filing and effectiveness of the Form S-8 with respect to the 2022 Plan, following the Closing and which was granted upon the effectiveness of the Form S-8 on June 10, 2022.

This award vested in accordance with the following schedule: (i) one-forty eighth (1/48th) of the total number of Mr. Harburn Initial RSU Awards (rounded down, except for the final scheduled vesting installment) will satisfy time-based vesting each month following the vesting commencement date over a period of four years. The executive employment agreement also provides that Mr. Harburn would receive Rigetti 2022 Annual RSUs (as defined below) to purchase 102,900 shares of common stock, which vested monthly over four years, provided that Mr. Harburn is continuously employed for such period, or vesting 100% upon a Change in Control (as defined in the 2022 Plan). The Rigetti 2022 Annual RSUs were granted on June 10, 2022. The executive employment agreement further provided that Rigetti would reimburse Mr. Harburn for reasonable business expenses in accordance with the company's standard expense reimbursement policy, as the same may be modified from time to time. In addition, Mr. Harburn was eligible to receive certain employee benefits, including medical, vision, dental, life insurance, and participation in a Section 401(k) retirement plan (as described above). On February 9, 2023, Mr. Harburn's employment with the Company ended.

Taryn Naidu

We originally entered into an offer letter with Mr. Naidu in March 2019. Pursuant to this offer letter, Mr. Naidu was granted an option to purchase 157,397 shares of common stock at an original exercise price of \$7.09 per share (not reflecting the Exchange Ratio) on April 4, 2019, such exercise price being reduced to \$0.272 per share by a unanimous written consent of the Legacy Rigetti Board on May 22, 2020 in connection with the Repricing. In connection with the Repricing on May 22, 2020, Mr. Naidu was also granted a "refresh" option to purchase 647,032 shares of common stock.

In January 2022, we entered into an executive employment agreement with Mr. Naidu, which was amended and restated on February 2, 2022 and which became effective contingent upon and concurrent with the Closing of the Business Combination. Pursuant to the executive employment agreement and prior to the termination of Mr. Naidu's employment on April 18, 2022, Mr. Naidu was entitled to receive an annual base salary of \$379,000 and was eligible: (i) to participate in Rigetti's benefit plans; (ii) subject to the approval of the Board, to

[Table of Contents](#)

receive PSU Awards if certain performance-based milestones established by Rigetti are satisfied in the future and provided that Mr. Naidu remained continuously employed by Rigetti through the date that the Board or the Compensation Committee were to grant such PSU Awards (subject to continued employment for a three-year period); (iii) to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements which Rigetti may have in effect from time to time; and (iv) a discretionary annual cash bonus of a target amount equal to 25% of the base salary, subject to review and adjustment by the Board. Under certain circumstances, Mr. Naidu was entitled to certain severance benefits as described below in “—Potential Payments Upon Termination or Change in Control.”

The executive employment agreement also provided for the grant of an initial restricted stock unit award to purchase 444,450 (the “Naidu Initial RSU Award”) shares of common stock, which was approved by the Board, contingent upon and subject to the filing and effectiveness of the Form S-8 with respect to the 2022 Plan, following the Closing and which was to be granted upon the effectiveness of the Form S-8. The executive employment agreement also provided that to be eligible for the Naidu Initial RSU Award, Mr. Naidu was required to be employed by the Company when the Board or the Compensation Committee grants the Naidu Initial RSU Award. This award would have vested in accordance with the following schedule: (i) 50% of the total number of Initial RSU Awards vest in substantially equal installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of 12 months and (ii) the remaining 50% of the total number of Naidu Initial RSU Awards vest in substantially equal installments (rounded down, except for the final scheduled vesting installment) at the end of each month following the vesting commencement date over a period of four years, with prongs (i) and (ii) occurring concurrently, such that, at the end of the 12-month period immediately following the vesting commencement date, 62.5% of the total number of Naidu Initial RSU Awards were to have vested (subject to the Executive’s Continuous Service (as defined in the 2022 Plan) on such vesting date). The executive employment agreement also provided that, contingent upon the occurrence of the Closing and Mr. Naidu’s continued employment with Rigetti through such date, Mr. Naidu would be entitled to receive a bonus between \$50,000 and \$750,000, determined by the Board based on the gross proceeds of the transactions contemplated by the Merger Agreement, in recognition of his contributions to Rigetti and 45,000 shares of common stock subject to the approval of the Board or the Compensation Committee of the Board and Mr. Naidu’s continued employment with Rigetti through such date. In addition, the executive employment agreement provided that Mr. Naidu would receive Rigetti 2022 Annual RSUs to purchase 161,300 shares of common stock, contingent upon and subject to the filing and effectiveness of the Form S-8 with respect to the 2022 Plan, which would have vested monthly over four years, provided that Mr. Naidu is continuously employed for such period, or vesting 100% upon a Change in Control (as defined in the 2022 Plan). The executive employment agreement also provided that to be eligible for the Rigetti 2022 Annual RSUs, Mr. Naidu was required to be employed by the Company when the Board or the Compensation Committee grants the Rigetti 2022 Annual RSUs. The executive employment agreement further provided that Rigetti would reimburse Mr. Naidu for reasonable business expenses in accordance with Rigetti’s standard expense reimbursement policy, as the same may be modified from time to time. In addition, Mr. Naidu was eligible to receive certain employee benefits, including medical, vision, dental, life insurance, and to participate in a Section 401(k) retirement plan (as described above). On April 18, 2022, Mr. Naidu’s employment with Rigetti was terminated.

Potential Payments Upon Termination or Change in Control

Each of Dr. Kulkarni, Mr. Danis and Mr. Sereda is entitled, and each of Dr. Rigetti prior to his resignation, Mr. Harburn prior to his departure, and Mr. Naidu prior to his termination, was entitled, to the following severance benefits pursuant to his respective employment agreement if his employment is terminated by Rigetti without “Cause” or by the executive for “Good Reason,” and provided such executive officer timely executes and does not revoke a release of claims in Rigetti’s favor, (a) continuing payments of his then-current annual base salary for twelve months; (b) payment of the premiums necessary to continue health insurance coverage for himself and his eligible dependents under Rigetti’s group health plans pursuant to COBRA or similar state insurance laws, for up to twelve months; and (c) Accrued Obligations (as defined in the respective executive

[Table of Contents](#)

employment agreement), which include accrued but unpaid salary through the date of termination, unreimbursed expenses, and benefits owed to such executive officer under retirement or health plans in which such executive officer was a participant.

If the named executive officer's employment is terminated by Rigetti other than for "Cause," death or disability or by such executive officer for "Good Reason" within three months prior to or twelve months after a Change in Control (as defined in the 2022 Plan), then, in lieu of and not in addition to any other severance benefit, (i) 100% of the then-unvested portion of each of his outstanding equity awards will become fully vested; (ii) Rigetti will pay such executive officer a lump sum equal to his then current annual base salary; (iii) subject to such executive officer making certain elections, Rigetti will pay certain COBRA premiums necessary to continue his and his covered dependents' health insurance coverage; and (iv) Rigetti will pay a bonus to such executive officer equivalent to a pro rata share of his full Target Amount (as defined in the respective executive employment agreement), for the portion of the performance year completed when his termination occurs.

Under each of the named executive officer's employment agreement, "Cause" means that we have determined in our sole discretion that the executive officer has engaged in any of the following: (i) his material breach of any covenant or condition under the executive employment agreement or any other agreement between the parties, and, to the extent curable, such executive officer has not cured such breach after the expiration of ten (10) days after written notice from us of such breach; (ii) his material act constituting dishonesty, fraud, immoral or disreputable conduct in connection with his duties to us; (iii) any conduct which constitutes a felony or a crime of moral turpitude under applicable law; (iv) material violation of our policy or any act of misconduct; (v) refusal to follow or implement a clear and reasonable directive of the Company; (vi) negligence or incompetence in the performance of Rigetti's duties or failure to perform such duties in a manner satisfactory to us after the expiration of ten (10) days without cure after written notice of such failure; or (vii) his breach of fiduciary duty to the Company.

Under each named executive officer's employment agreement, "Good Reason" means the occurrence of any of the following events without such executive officer's consent: (i) a material reduction in his base salary, other than a reduction applied in a similar proportional amount to all similarly situated executives; (ii) a material breach of the executive employment agreement by Rigetti; (iii) a material reduction in the his duties, authority and responsibilities relative to the his duties, authority, and responsibilities in effect immediately prior to such reduction; or (iv) the relocation of his principal place of employment, without his consent, in a manner that lengthens his one-way commute distance by twenty-five (25) or more miles from his then-current principal place of employment immediately prior to such relocation; not to include a requirement to return to in-person work, in which circumstance Good Reason will not apply; provided, however, that, any such termination by such executive officer shall only be deemed for Good Reason pursuant to this definition if: (1) such executive officer gives Rigetti written notice of his intent to terminate for Good Reason within thirty (30) days following the first occurrence of the condition(s) that he believes constitute(s) Good Reason, which notice shall describe such condition(s); (2) Rigetti fails to remedy such condition(s) within thirty (30) days following receipt of the written notice (the "Cure Period"); and (3) such executive officer voluntarily terminates employment within thirty (30) days following the end of the Cure Period, or the parties agree in writing to extend such Cure Period. With respect to the executive employment agreements entered into by and between Rigetti and each of Dr. Rigetti and Messrs. Naidu and Sereda, "Good Reason" shall also mean the occurrence of a material change in the executive officer's reporting relationship, other than such change made directly in connection with organizational changes resulting from a Change in Control (as defined in the executive employment agreements).

Director Compensation

The following table sets forth information concerning the compensation of Legacy Rigetti's directors for fiscal year 2022. Dr. Rigetti, our Chief Executive Officer, did not receive additional compensation for his service

Table of Contents

as a director in fiscal year 2022, and therefore is not included in the Director Compensation table below. All compensation paid to Dr. Rigetti is reported above in the “Summary Compensation Table.”

Name	Cash ⁽¹⁾ (\$)	Stock Awards ⁽²⁾ (\$)	All Other Compensation (\$)	Total (\$)
Alissa Fitzgerald	124,167	349,986	—	474,153
Ray Johnson	43,333	349,986	—	393,319
David Cowan	37,083	349,986	—	387,069
Cathy McCarthy	146,425	349,986	—	496,411
Michael Clifton	38,333	349,986	—	388,319
H. Gail Sandford	40,583	349,986	—	390,569
General Peter Pace ⁽³⁾	32,064	349,986	—	382,050

- (1) This column represents cash compensation for their service as a director during the fiscal year ended December 31, 2022. Cash compensation for non-employee directors for fiscal year 2022 was determined pursuant to the Non-Employee Director Compensation Policy described below. Ms. Fitzgerald and Ms. McCarthy were each awarded additional cash compensation of \$75,000 in connection with their significant time and commitment to performing services as non-employee directors of the Board during fiscal year 2022.
- (2) This column reflects the aggregate grant date fair value of the restricted stock units granted to the director during fiscal year 2022 under the 2013 Plan and 2022 Plan, as applicable. The aggregate grant date fair value is computed in accordance with ASC Topic 718 for stock-based compensation transactions. Assumptions used in the calculation of these amounts are included in the notes to our financial statements included elsewhere in this prospectus. This amount does not reflect the actual economic value that may be realized by the director.
- (3) General Peter Pace resigned as a director of the Company, effective July 15, 2022.
- (4) The table below shows for each non-employee director who was serving, and held outstanding equity awards, as of December 31, 2022.

Name	Shares Underlying Options Outstanding (Vested) at Fiscal Year End	Shares Underlying Options Outstanding (Unvested) at Fiscal Year End	Unvested Stock Awards at Fiscal Year End
Alissa Fitzgerald	241,445	53,664	67,436
Ray Johnson	203,320	91,800	67,436
David Cowan	—	—	67,436
Cathy McCarthy	—	—	221,340
Michael Clifton	—	—	67,436
H. Gail Sandford	—	—	67,436
General Peter Pace*	—	—	—

* General Peter Pace resigned as a director of the Company, effective July 15, 2022.

Non-Employee Director Compensation Policy

The Company’s amended non-employee director compensation policy, effective as of June 8, 2022, consists of annual cash retainers of \$40,000 for each non-employee director and an additional \$25,000 for the chairperson of the Board; an additional \$20,000 and \$10,000 for the chairperson and each member of the audit committee of the Board, respectively; an additional \$12,000 and \$6,000 for the chairperson and each member of the compensation committee of the Board, respectively; and an additional \$9,000 and \$4,500 for the chairperson and each member of the nominating and corporate governance committee of the Board, respectively.

[Table of Contents](#)

For each member of the Board who is not also serving as an employee of or consultant to the Company or any of its subsidiaries (each such member, an “Eligible Director”) and who is (i) serving on the Board immediately following the effective date of the non-employee director compensation policy (the “Effective Date”) or (ii) first elected or appointed to the Board following the Effective Date, (A) on the date on which a registration statement on Form S-8 is filed and effective covering the RSUs (“Form S-8”), with respect to clause (i) and (B) on the date of such director’s initial election or appointment to the Board (or, if such date is not a market trading day, the first market trading day thereafter or, if there is not a Form S-8 on the date of such initial election or appointment, then the date on which a Form S-8 is filed and effective), with respect to clause (ii), the director will be automatically, and without further action by the Board or its Compensation Committee, granted RSUs with respect to shares of common stock with an aggregate Fair Market Value (as defined in the Plan) as of the grant date equal to \$210,000 (the “Director Initial RSU Grant”); provided that such director remains in Continuous Service (as defined in the 2022 Plan) through the grant date. The grant of any Director Initial RSU Grant pursuant to clause (i) above is contingent upon, subject to and effective upon the filing and effectiveness of a Form S-8.

The Director Initial RSU Grant will vest over a three-year period, with one-third (1/3) of the Initial RSU Grant vesting on the first anniversary of the grant date, one-third (1/3) of the Initial RSU Grant vesting on the second anniversary of the grant date and the remaining one-third (1/3) of the Initial RSU Grant vesting on the third anniversary of the grant date, such that the Initial RSU Grant is fully vested on the third anniversary of the date of grant, subject to the Eligible Director’s Continuous Service through each such vesting date. On June 10, 2022, each non-employee director of the Board was granted a Director Initial RSU Grant of 40,462 RSUs.

The amended non-employee director compensation policy also provides for annual grants of RSUs to each director equivalent to \$140,000 starting in 2022 and in future years, will vest in full on the earlier of (i) the date of the following year’s Annual Meeting (or the date immediately prior to the next Annual Meeting if the Eligible Director’s service as a director ends at such Annual Meeting due to the director’s failure to be re-elected or the director not standing for re-election); or (ii) the one-year anniversary measured from the date of grant, in each case. In the event of a Change in Control (as defined in the 2022 Plan), any unvested portion of the RSUs would vest immediately prior to the consummation of such Change in Control. On June 10, 2022, each non-employee director of the Board was granted an annual grant of 26,974 RSUs.

The Company will reimburse Eligible Directors for ordinary, necessary and reasonable out-of-pocket travel expenses to cover in-person attendance at and participation in Board and committee meetings; provided, that the Eligible Director timely submit to the Company appropriate documentation substantiating such expenses in accordance with the Company’s travel and expense Policy, as in effect from time to time.

The description of the amended non-employee director compensation policy is not complete and is subject to and qualified in its entirety by reference to the amended non-employee director compensation policy, a copy of which is included as Exhibit 10.22 to this prospectus.

Emerging Growth Company Status

As an emerging growth company, we are exempt from certain requirements related to executive compensation, including the requirements to hold a nonbinding advisory vote on executive compensation or golden parachute payments, and to provide information relating to the ratio of total compensation of our CEO to the median of the annual total compensation of all of our employees, each as required by the Investor Protection and Securities Reform Act of 2010, which is part of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

[Table of Contents](#)

We are also a “smaller reporting company” as defined in the Exchange Act. We may continue to be a smaller reporting company even after we are no longer an emerging growth company. We may take advantage of certain of the scaled disclosures available to smaller reporting companies and will be able to take advantage of these scaled disclosures for so long as the market value of our voting and non-voting common stock held by non-affiliates is less than \$250.0 million measured on the last business day of our second fiscal quarter, or our annual revenue is less than \$100.0 million during the most recently completed fiscal year and the market value of our voting and non-voting common stock held by non-affiliates is less than \$700.0 million measured on the last business day of our second fiscal quarter.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Other than compensation arrangements for our directors and executive officers, which are described elsewhere in this prospectus, below is a description of transactions since January 1, 2021 to which Rigetti was a party or will be a party, in which:

- the amounts involved exceeded or will exceed \$120,000; and
- any of our directors, executive officers or holders of more than 5% of the company's capital stock, or any member of the immediate family of, or person sharing the household with, the foregoing persons, had or will have a direct or indirect material interest.

Supernova Class B Ordinary Shares

On December 22, 2020, Supernova Sponsor paid \$25,000, or approximately \$0.004 per share, to cover certain offering and formation costs in consideration of 5,750,000 Supernova Class B ordinary shares. On January 14, 2021, Supernova effected a share dividend, resulting in 7,187,500 Supernova Class B ordinary shares outstanding. On February 22, 2021, the Supernova Sponsor transferred 28,750 Supernova Class B ordinary shares to each of Supernova's six former independent director nominees. On March 1, 2021, Supernova effected a share dividend, resulting in 8,625,000 Supernova Class B ordinary shares. In connection with the consummation of the Business Combination, the Supernova Class B ordinary shares were converted into 8,625,000 shares of common stock. In August 2022, Supernova Sponsor effected a liquidating pro rata distribution of its shares of common stock to its members, pursuant to which Mr. Clifton, one of our directors, received 1,052,250 of common stock, of which 382,409 shares are subject to vesting conditions.

Private Placement Warrants

On March 4, 2021, Supernova Sponsor purchased an aggregate of 4,450,000 private placement warrants for a purchase price of \$2.00 per whole warrant, or \$8,900,000 in the aggregate, in a private placement that occurred simultaneously with the closing of Supernova's IPO. Each private placement warrant entitles the holder to purchase one share of common stock at \$11.50 per share, subject to adjustment. The private placement warrants (including the common stock issuable upon exercise thereof) may not, subject to certain limited exceptions, be transferred, assigned or sold by the holder until 30 days after the completion of the Business Combination. In connection with the consummation of the Business Combination, the Supernova private placement warrants were converted into 4,450,000 private placement warrants of the Company to purchase one share of common stock at an exercise price of \$11.50. In August 2022, Supernova Sponsor effected a liquidating pro rata distribution of its private placement warrants to its members, pursuant to which Mr. Clifton, one of our directors, received 556,250 private placement warrants.

Expense Reimbursement

On December 22, 2020, Supernova Sponsor agreed to loan Supernova an aggregate of up to \$300,000 to cover expenses related to Supernova's IPO pursuant to a promissory note (the "Note"). This Note was non-interest bearing and payable upon the completion of the IPO. Supernova borrowed \$275,000 under the Note and repaid the Note in full on March 4, 2021.

Subscription Agreements

At the closing of the Business Combination, (i) Bessemer Venture Partners X L.P. and Bessemer Venture Partners X Institutional L.P. purchased 9,481,710 and 10,100,508 shares of common stock in the PIPE Financing, for a purchase price of \$10.00 per share pursuant to separate Subscription Agreements, each dated October 6, 2021, and (ii) 62,500 shares of common stock were issued to one of our directors, Mr. Clifton, pursuant to the PIPE Financing.

Rigetti Holders Support Agreement

On October 6, 2021, in connection with the execution of the Merger Agreement, Supernova entered into the Rigetti Holders Support Agreement with Legacy Rigetti and certain stockholders of Legacy Rigetti pursuant to which such stockholders agreed to vote to adopt and approve, upon the registration statement on Form S-4 being declared effective, the Merger Agreement and all other documents and transactions contemplated thereby.

Sponsor Support Agreement

On October 6, 2021, in connection with the execution of the Merger Agreement, Supernova entered into a sponsor support agreement (the “Sponsor Support Agreement”) with the Supernova Sponsor, Legacy Rigetti and Supernova’s directors and officers. Pursuant to the Sponsor Support Agreement, the Supernova Sponsor and Supernova’s directors and officers (“Sponsor Holders”), among other things, agreed to vote all of their shares of Supernova capital stock in favor of the approval of the Business Combination. In addition, pursuant to the Sponsor Support Agreement, (i) 2,479,000 shares of common stock held by the Sponsor Holders became unvested and subject to forfeiture as of the Closing and will only vest if, during the five year period following the Closing, the volume weighted average price of common stock equals or exceeds \$12.50 for any twenty trading days within a period of thirty consecutive trading days, and (ii) 580,273 shares of common stock held by the Sponsor Holders became unvested and subject to forfeiture as of the Closing and will only vest if, during the five year period following the Closing, the volume weighted average price of common stock equals or exceeds \$15.00 for any twenty trading days within a period of thirty consecutive trading days. Any such shares held by the Sponsor Holders that remain unvested after the fifth anniversary of the Closing will be forfeited.

Compensation Arrangements, Stock Option Grants and Indemnification for Executive Officers and Directors

We have employment arrangements with our executive officers that, among other things, provide for certain change in control benefits, as well as severance benefits for executive officers. For a description of these agreements with our named executive officers, see “Executive Compensation.”

We have granted stock options, restricted stock units and stock awards to our executive officers and our directors. For a description of these equity awards to our named executive officers and directors, see “Executive Compensation.”

Amended and Restated Registration Rights Agreement

In connection with the Closing, we, Supernova Sponsor, Supernova directors and officers, Legacy Rigetti directors and officers and certain of Legacy Rigetti securityholders entered into an amended and restated registration rights agreement. Pursuant to the agreement, we agreed that we would file with the SEC a registration statement registering the resale of certain securities held by or issuable to such holders, and we will use reasonable best efforts to have such registration statement declared effective as soon as practicable after the filing thereof. In certain circumstances, certain holders can demand up to two underwritten offerings in any 12 month period, and certain holders are entitled to piggyback registration rights.

Indemnification Agreements

We have entered into indemnification agreements with each of our directors and executive officers in addition to the indemnification provided in the Bylaws. The indemnification agreements require us to indemnify our directors to the fullest extent permitted by Delaware law. See “Directors, Executive Officers and Corporate Governance—Limitation on Liability and Indemnification of Directors and Officers” for information about indemnification agreements and director and officer liability insurance which the Company maintains.

Related Person Transactions Policy

The Board adopted a written related person transactions policy that sets forth our policies and procedures regarding the identification, review, consideration and oversight of “related person transactions.” For purposes of our policy only, a “related person transaction” is a transaction, arrangement or relationship (or any series of similar transactions, arrangements or relationships) in which we or any of our subsidiaries are participants involving an amount that exceeds \$120,000, in which any “related person” has a material interest.

Transactions involving compensation for services provided to us by an employee, consultant or director will not be considered related person transactions under this policy. A related person is any executive officer, director, nominee to become a director or a holder of more than 5% of any class of our voting securities (including our common stock), including any of their immediate family members and affiliates and entities owned or controlled by any related person.

Under the policy, the related person in question or, in the case of transactions with a holder of more than 5% of any class of our voting securities, an officer with knowledge of the proposed related person transaction, must present information regarding the proposed related person transaction to our audit committee (or, where review by our audit committee would be inappropriate, to another independent body of our Board) for review. To identify related person transactions in advance, we will rely on information supplied by our executive officers, directors and certain significant stockholders. In considering related person transactions, our audit committee will take into account the relevant available facts and circumstances, which may include, but are not limited to:

- the risks, costs, and benefits to us;
- the impact on a director’s independence in the event the related person is a director, immediate family member of a director or an entity with which a director is affiliated;
- the terms of the transaction;
- the availability of other sources for comparable services or products; and
- the terms available to or from, as the case may be, unrelated third parties.

Our audit committee will approve only those transactions that it determines are fair to and in the best interests of the Company. All of the transactions described above were entered into prior to the adoption of such policy.

BENEFICIAL OWNERSHIP OF SECURITIES

The following table sets forth information known to the Company regarding the beneficial ownership of common stock as of March 1, 2023, by:

- each person known by the Company to be the beneficial owner of more than 5% of outstanding shares of common stock;
- each of the Company's named executive officers, including its former Chief Operating Officer, and directors;
- all executive officers and directors of the Company as a group, excluding its former Chief Operating Officer.

Beneficial ownership is determined according to the rules of the SEC, which generally provide that a person has beneficial ownership of a security if he, she or it possesses sole or shared voting or investment power over that security, including options and warrants that are currently exercisable or exercisable within 60 days.

The beneficial ownership percentages set forth in the table below are based on 126,964,206 shares of common stock issued and outstanding as of March 1, 2023 and other than as noted below, do not take into account the issuance of any shares of common stock upon the exercise of the Unexercised Warrant Shares. Unless otherwise noted in the footnotes to the following table, and subject to applicable community property laws, the persons and entities named in the table have sole voting and investment power with respect to the securities they beneficially owned.

Name of Beneficial Owner ¹	Number of Shares of Common Stock Beneficially Owned	% of Ownership
<i>Directors and Named Executive Officers</i>

(1) Unless otherwise noted, the mailing address of each of those listed in the table above is 775 Heinz Avenue, Berkeley, CA, 94710.

(2) Dr. Kulkarni was appointed President and Chief Executive Officer on December 12, 2022 and as a director of the Board on December 15, 2022.

Table of Contents

- (3) Consists of 335,503 shares of common stock, 92,576 shares of common stock subject to outstanding stock options that are exercisable within 60 days of March 1, 2023 and 218,022 shares of common stock issuable upon the settlement of restricted stock units releasable within 60 days of March 1, 2023.
- (4) Consists of 151,312 shares of common stock and 124,267 shares of common stock issuable upon the settlement of restricted stock units releasable within 60 days of March 1, 2023.
- (5) Information based on a Schedule 13D/A filed by Dr. Rigetti on January 26, 2023 with the SEC. Includes 2,669,371 shares vested and issuable upon exercise of options as of January 26, 2023.
- (6) Information provided for Mr. Naidu is as of the date of his termination of April 18, 2022. Consists of 199,075 shares of common stock held by Mr. Naidu, the former Chief Operating Officer of Rigetti, or his affiliated entity AlphaNuma LLC, and 453,135 shares of common stock subject to outstanding stock options that were exercisable at the time of Mr. Naidu's termination, 121,871 shares of common stock issuable upon the settlement of restricted stock units that were releasable at the time of Mr. Naidu's termination and 22,245 shares subject to the exercise of warrants of the Company.
- (7) Information provided for Mr. Harburn is as of his resignation date of February 9, 2022. Consists of 136,368 shares of common stock, 275,607 shares of common stock subject to outstanding stock options that were exercisable at the time of Mr. Harburn's termination and 33,143 shares of common stock issuable upon the settlement of restricted stock units at the time of Mr. Harburn's termination.
- (8) David Cowan, a member of the Board, is a partner at Bessemer Venture Partners. Mr. Cowan disclaims beneficial ownership interest of the securities held by the Bessemer Entities (as defined below) referred to in footnote 14 below, except to the extent of his pecuniary interest, if any, in such securities through an indirect interest in the Bessemer Entities.
- (9) Consists of 221,097 shares of common stock subject to outstanding stock options that are exercisable within 60 days of March 1, 2023.
- (10) Consists of 22,788 shares of common stock and 224,977 shares of common stock subject to outstanding stock options that are exercisable within 60 days of March 1, 2023.
- (11) Consists of 73,780 shares of common stock.
- (12) Consists of 1,114,750 shares of common stock and 556,250 issuable upon the exercise of 556,250 private placement warrants to purchase common stock.
- (13) Consists of (i) 860,629 shares of common stock held by AVG - BIV Rigetti Trust1 2020, (ii) 1,022,123 shares of common stock held by AVG - BIV Rigetti Trust2 2020, (iii) 5,585,461 shares of common stock held by AVG - BIV Rigetti Trust3 2020, (iv) 20,429 shares of common stock held by AVGF-BIV 2 Rigetti 2017, LLC, and (v) 100,000 shares of common stock purchased by Alumni Ventures – Rigetti Trust 2022 in the PIPE Financing. Alumni Ventures Group, LLC is the manager of each of the funds, and has power to vote or direct the voting of shares held by each fund. The address of Alumni Ventures Group, LLC and the funds is 670 N. Commercial Street, Suite 403, Manchester, NH 03101.
- (14) Consists of (i) 9,481,710 shares of common stock held by Bessemer Venture Partners X Institutional L.P., or Bessemer Institutional, and 10,100,508 shares of common stock held by Bessemer Venture Partners X L.P., or Bessemer X, and together with Bessemer Institutional, the Bessemer Entities, and (ii) 968,400 shares of common stock purchased by Bessemer Institutional and 1,031,600 shares of common stock purchased by Bessemer X in the PIPE Financing. Deer X & Co. L.P., or Deer X L.P., is the general partner of the Bessemer Entities. Deer X & Co. Ltd., or Deer X Ltd., is the general partner of Deer X L.P. Adam Fisher, Robert P. Goodman, David Cowan, Jeremy Levine, Byron Deeter, Ethan Kurzweil, Alex Ferrara, Brian Feinstein and Stephen Kraus are the directors of Deer X Ltd. and hold the voting and dispositive power for the Bessemer Entities. Investment and voting decisions with respect to the securities held by the Bessemer Entities are made by the directors of Deer X Ltd. acting as an investment committee. Mr. Cowan disclaims beneficial ownership interest of the securities of the Company held by the Bessemer Entities except to the extent of his pecuniary interest, if any, in such securities through an indirect interest in the Bessemer Entities. The address for the Bessemer Entities is c/o Bessemer Venture Partners, 1865 Palmer Avenue, Suite 104, Larchmont, NY 10538.
- (15) Consists of 9,178,816 shares of common stock held by Insurance Company of the West. The address for Insurance Company of the West is 15025 Innovation Drive, San Diego, CA 92128.

SELLING STOCKHOLDER

This prospectus relates to the offer and sale by B. Riley of up to 23,648,889 shares of common stock that have been and may be issued by us to B. Riley under the Purchase Agreement. For additional information regarding the shares of common stock included in this prospectus, see the section titled “Committed Equity Financing” above. We are registering the shares of common stock included in this prospectus pursuant to the provisions of the Registration Rights Agreement in order to permit B. Riley to offer the shares included in this prospectus for resale from time to time. Except for the transactions contemplated by the Purchase Agreement and the Registration Rights Agreement and as set forth in the section titled “Plan of Distribution (Conflict of Interest)” in this prospectus, B. Riley has not had any material relationship with us within the past three years.

The table below presents information regarding B. Riley and the shares of common stock that may be resold by B. Riley from time to time under this prospectus. This table is prepared based on information supplied to us by B. Riley, and reflects holdings as of August 12, 2022. The number of shares in the column “Maximum Number of Shares of Common Stock to be Offered Pursuant to this Prospectus” represents all of the shares of common stock being offered for resale by B. Riley under this prospectus. B. Riley may sell some, all or none of the shares being offered for resale in this offering. We do not know how long B. Riley will hold the shares before selling them and, except as set forth in the section titled “Plan of Distribution (Conflict of Interest)” in this prospectus, we are not aware of any existing arrangements between B. Riley and any other stockholder, broker, dealer, underwriter or agent relating to the sale or distribution of the shares of our common stock being offered for resale by this prospectus.

Beneficial ownership is determined in accordance with Rule 13d-3(d) promulgated by the SEC under the Exchange Act, and includes shares of common stock with respect to which the selling stockholder has sole or shared voting and investment power. The percentage of shares of common stock beneficially owned by the selling stockholder prior to the offering shown in the table below is based on an aggregate of 126,964,206 shares of our common stock outstanding on March 1, 2023. Because the purchase price to be paid by the selling stockholder for shares of common stock, if any, that we may elect to sell to the selling stockholder in one or more Purchases and one or more Intraday Purchases from time to time under the Purchase Agreement will be determined on the applicable Purchase Dates therefor, the actual number of shares of common stock that we may sell to the selling stockholder under the Purchase Agreement may be fewer than the number of shares being offered for resale under this prospectus. The fourth column assumes the resale by the selling stockholder of all of the shares of common stock being offered for resale pursuant to this prospectus.

<u>Name of Selling Stockholder</u>	<u>Number of Shares of Common Stock Beneficially Owned Prior to Offering</u>		<u>Maximum Number of Shares of Common Stock to be Offered Pursuant to this Prospectus</u>	<u>Number of Shares of Common Stock Beneficially Owned After Offering</u>	
	<u>Number⁽¹⁾</u>	<u>Percent⁽²⁾</u>		<u>Number⁽³⁾</u>	<u>Percent⁽²⁾</u>
B. Riley ⁽⁴⁾	171,008	*	23,648,889	0	—

* Represents beneficial ownership of less than 1% of the outstanding shares of our common stock.

(1) Represents the 171,008 shares of common stock we issued to B. Riley on August 11, 2022 as Commitment Shares in consideration for entering into the Purchase Agreement with us. In accordance with Rule 13d-3(d) under the Exchange Act, we have excluded from the number of shares beneficially owned prior to the offering all of the shares of common stock that B. Riley may be required to purchase under the Purchase Agreement, because the issuance of such shares is solely at our discretion and is subject to conditions contained in the Purchase Agreement, the satisfaction of which are entirely outside of B. Riley’s control, including the registration statement of which this prospectus forms a part becoming and remaining effective. Furthermore, the Purchases and the Intraday Purchases of common stock under the Purchase Agreement are subject to certain agreed upon limitations set forth in the Purchase Agreement. Also, the Purchase Agreement prohibits us from issuing and selling any shares of our common stock to B. Riley to the extent such shares, when aggregated with all other shares of our common stock then beneficially owned by B.

Table of Contents

Riley, would cause B. Riley's beneficial ownership of our common stock to exceed the 4.99% Beneficial Ownership Cap. The Purchase Agreement also prohibits us from issuing or selling shares of our common stock under the Purchase Agreement in excess of the 19.99% Exchange Cap, unless we obtain stockholder approval to do so, or unless the average price for all shares of our common stock purchased by B. Riley under the Purchase Agreement equals or exceeds \$4.45 per share, such that the Exchange Cap limitation would not apply under applicable Nasdaq rules. Neither the Beneficial Ownership Cap nor the Exchange Cap (to the extent applicable under Nasdaq rules) may be amended or waived under the Purchase Agreement.

- (2) Applicable percentage ownership is based on 126,964,206 shares of our common stock outstanding as of March 1, 2023.
- (3) Assumes the sale of all shares of common stock being offered pursuant to this prospectus.
- (4) The business address of B. Riley is B. Riley Principal Capital II, LLC, 11100 Santa Monica Blvd., Suite 800, Los Angeles, California 90025. B. Riley's principal business is that of a private investor. The sole member of B. Riley is B. Riley Principal Investments, LLC ("BRPI"), which is an indirect subsidiary of B. Riley Financial, Inc. ("BRF"). An Investment Committee of B. Riley (the "Investment Committee"), which is composed of three members appointed by BRPI, has sole voting power and sole investment power over securities beneficially owned, directly, by B. Riley. All decisions with respect to the voting and disposition of securities beneficially owned, directly, by B. Riley are made exclusively by majority vote of the Investment Committee, each member of the Investment Committee having one vote, and no single member of the Investment Committee has any ability to make any such decisions unilaterally or any veto power with respect to decisions that are made by the vote of a majority of the members of the Investment Committee. The sole voting and investment powers of the Investment Committee over securities beneficially owned, directly, by B. Riley are exercised independently from all other direct and indirect subsidiaries of BRF, and the voting and investment powers over securities beneficially owned directly or indirectly by all other direct and indirect subsidiaries of BRF are exercised independently from B. Riley. We have been advised that neither BRPI nor B. Riley is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA") or an independent broker-dealer, and that none of the Investment Committee members is a registered FINRA member or an associated person of a FINRA member or an independent broker-dealer.

DESCRIPTION OF SECURITIES

The following summary of the material terms of our securities is not intended to be a complete summary of the rights and preferences of such securities, and is qualified by reference to our certificate of incorporation, our Bylaws and the warrant-related documents described herein and filed as exhibits to the registration statement of which this prospectus forms a part.

Authorized Capitalization

Our Certificate of Incorporation authorizes the issuance of 1,000,000,000 shares of common stock, \$0.0001 par value per share, and 10,000,000 shares of preferred stock, \$0.0001 par value per share. As of March 1, 2023, there were approximately 126,964,206 shares of common stock and no shares of preferred stock issued and outstanding.

Common Stock

Voting Rights

Each holder of common stock will be entitled to one (1) vote for each share of common stock held of record by such holder on all matters voted upon by our stockholders, provided, however, that, except as otherwise required in the Certificate of Incorporation or by applicable law, the holders of common stock will not be entitled to vote on any amendment to the Certificate of Incorporation that alters or changes the powers, preferences, rights or other terms of one or more outstanding series of preferred stock if the holders of such affected series are entitled, either separately or together with the holders of one or more other such series, to vote thereon pursuant to the Certificate of Incorporation (including any certificate of designation relating to any series of preferred stock) or pursuant to the DGCL. When a quorum is present, the affirmative vote of a majority of the voting power of the shares present in person, by remote communication, if applicable, or represented by proxy at the meeting and entitled to vote generally on the subject matter is required to take action, unless otherwise specified by law, the Bylaws or the Certificate of Incorporation, and except for the election of directors, which is determined by a plurality vote. There are no cumulative voting rights.

Dividend Rights

Subject to the rights of the holders of preferred stock and any other provisions of the Certificate of Incorporation, as it may be amended from time to time, holders of common stock will be entitled to receive such dividends and other distributions in cash, stock or property of the Company when, as and if declared thereon by the Board, in its discretion, from time to time out of assets or funds of the Company legally available therefor.

Rights upon Liquidation, Dissolution and Winding-Up

Subject to the rights of holders of preferred stock, in the event of any liquidation, dissolution or winding up of our affairs, whether voluntary or involuntary, after payment or provision for payment of our debts and any other payments required by law and amounts payable upon shares of preferred stock ranking senior to the shares of common stock upon such dissolution, liquidation or winding up, if any, the Company's remaining net assets will be distributed to the holders of common stock and the holders of any other class or series of capital stock ranking equally with the common stock upon such dissolution, liquidation or winding up, equally on a per share basis.

Other Rights

There are no redemption or sinking fund provisions applicable to the common stock. The rights, preferences and privileges of holders of common stock will be subject to those of the holders of preferred stock that the Company may issue in the future.

[Table of Contents](#)

Election of Directors

Our Board is divided into three classes, Class I, Class II and Class III, with members of each class serving staggered three-year terms with only one class of directors being elected in each year. Under the Bylaws, the election of directors is determined by plurality vote.

Preferred Stock

The Board has the authority to issue shares of preferred stock from time to time on terms it may determine, to divide shares of preferred stock into one or more series and to fix the designations, preferences, privileges, and restrictions of preferred stock, including dividend rights, conversion rights, voting rights, terms of redemption, liquidation preference, sinking fund terms and the number of shares constituting any series or the designation of any series to the fullest extent permitted by the DGCL. The issuance of preferred stock could have the effect of decreasing the trading price of our common stock, restricting dividends on the capital stock, diluting the voting power of the holders of common stock, impairing the liquidation rights of the capital stock, or delaying or preventing a change in control of the company.

Warrants

As of March 1, 2023, there were 13,074,972 warrants outstanding, consisting of public warrants and private placement warrants.

Public Warrants

Each whole public warrant entitles the registered holder to purchase one share of common stock at a price of \$11.50 per whole share, subject to adjustment as discussed below, at any time commencing 30 days after the completion of the Business Combination, except as discussed in the immediately succeeding paragraph. Pursuant to the warrant agreement, a warrant holder may exercise its warrants only for a whole number of shares of common stock. This means only a whole warrant may be exercised at a given time by a warrant holder and only whole warrants trade. The warrants will expire five years after the Closing Date, at 5:00 p.m., New York City time, or earlier upon redemption or liquidation.

We will not be obligated to deliver any shares of common stock pursuant to the exercise of a warrant and will have no obligation to settle such warrant exercise unless a registration statement under the Securities Act with respect to the shares of common stock underlying the warrants is then effective and a prospectus relating thereto is current, subject to our satisfying our obligations described below with respect to registration, or a valid exemption from registration is available. No warrant will be exercisable and we will not be obligated to issue a share of common stock upon exercise of a warrant unless the share of common stock issuable upon such warrant exercise has been registered, qualified or deemed to be exempt under the securities laws of the state of residence of the registered holder of the warrants. In the event that the conditions in the two immediately preceding sentences are not satisfied with respect to a warrant, the holder of such warrant will not be entitled to exercise such warrant and such warrant may have no value and expire worthless. In no event will we be required to net cash settle any warrant.

We have filed with the SEC a registration statement for the registration, under the Securities Act, of the shares of common stock issuable upon exercise of the warrants, and we will use our commercially reasonable efforts to maintain the effectiveness of such registration statement and a current prospectus relating to those shares of Rigetti common stock until the warrants expire or are redeemed, as specified in the warrant agreement; provided that if shares of common stock are at the time of any exercise of a warrant not listed on a national securities exchange such that they satisfy the definition of a “covered security” under Section 18(b)(1) of the Securities Act, we may, at our option, require holders of public warrants who exercise their warrants to do so on a “cashless basis” in accordance with Section 3(a)(9) of the Securities Act and, in the event we so elect, we will

[Table of Contents](#)

not be required to file or maintain in effect a registration statement, but we will use our commercially reasonable efforts to register or qualify the shares under applicable blue sky laws to the extent an exemption is not available.

Redemption of warrants when the price per share of common stock equals or exceeds \$18.00. Once the warrants become exercisable, we may redeem the outstanding warrants (except as described herein with respect to the private placement warrants):

- in whole and not in part;
- at a price of \$0.01 per warrant;
- upon a minimum of 30 days' prior written notice of redemption to each warrant holder; and
- if, and only if, the closing price of the shares of common stock equals or exceeds \$18.00 per share (as adjusted for adjustments to the number of shares issuable upon exercise or the exercise price of a warrant as described under the heading "*—Anti-dilution Adjustments*") on the trading day prior to the date on which we send the notice of redemption to the warrant holders.

We will not redeem the warrants as described above unless a registration statement under the Securities Act covering the issuance of the shares of common stock issuable upon exercise of the warrants is then effective and a current prospectus relating to those shares of common stock is available throughout the 30-day redemption period. If and when the warrants become redeemable by us, we may exercise our redemption right even if we are unable to register or qualify the underlying securities for sale under all applicable state securities laws.

We have established the last of the redemption criterion discussed above to prevent a redemption call unless there is at the time of the call a significant premium to the warrant exercise price. If the foregoing conditions are satisfied and we issue a notice of redemption of the warrants, each warrant holder will be entitled to exercise his, her or its warrant prior to the scheduled redemption date. Any such exercise would not be done on a "cashless" basis and would require the exercising warrant holder to pay the exercise price for each warrant being exercised. However, the price of the shares of common stock may fall below the \$18.00 redemption trigger price (as adjusted for adjustments to the number of shares issuable upon exercise or the exercise price of a warrant as described under the heading "*—Anti-dilution Adjustments*") as well as the \$11.50 (for whole shares) warrant exercise price after the redemption notice is issued.

Redemption of warrants when the price per share of common stock equals or exceeds \$10.00. Once the warrants become exercisable, we may redeem the outstanding warrants (except as described herein with respect to the private placement warrants):

- in whole and not in part;
- at \$0.10 per warrant;
- upon a minimum of 30 days' prior written notice of redemption *provided* that holders will be able to exercise their warrants on a cashless basis prior to redemption and receive that number of shares determined by reference to the table below, based on the redemption date and the "fair market value" of our shares of common stock except as otherwise described below; and
- if, and only if, the closing price of shares of common stock equals or exceeds \$10.00 per public share (as adjusted for adjustments to the number of shares issuable upon exercise or the exercise price of a warrant as described under the heading "*—Anti-dilution Adjustments*") on the trading day prior to the date on which we send the notice of redemption to the warrant holders.

Beginning on the date the notice of redemption is given until the warrants are redeemed or exercised, holders may elect to exercise their warrants on a cashless basis. The numbers in the table below represent the number of shares of common stock that a warrant holder will receive upon such cashless exercise in connection with a redemption by us pursuant to this redemption feature, based on the "fair market value" of shares of

[Table of Contents](#)

common stock on the corresponding redemption date (assuming holders elect to exercise their warrants and such warrants are not redeemed for \$0.10 per warrant), determined for these purposes based on volume weighted average price of shares of common stock for the 10 trading days ending on the third trading day prior to the date on which the notice of redemption is sent to the holders of warrants, and the number of months that the corresponding redemption date precedes the expiration date of the warrants, each as set forth in the table below. We will provide our warrant holders with the final fair market value no later than one business day after the 10-trading day period described above ends.

The share prices set forth in the column headings of the table below will be adjusted as of any date on which the number of shares issuable upon exercise of a warrant or the exercise price of a warrant is adjusted as set forth under the heading “—*Anti-dilution Adjustments*” below. If the number of shares issuable upon exercise of a warrant is adjusted, the adjusted share prices in the column headings will equal the share prices immediately prior to such adjustment, multiplied by a fraction, the numerator of which is the exercise price of the warrant after such adjustment and the denominator of which is the price of the warrant immediately prior to such adjustment. In such an event, the number of shares in the table below shall be adjusted by multiplying such share amounts by a fraction, the numerator of which is the number of shares deliverable upon exercise of a warrant immediately prior to such adjustment and the denominator of which is the number of shares deliverable upon exercise of a warrant as so adjusted. If the exercise price of a warrant is adjusted, in the case of an adjustment pursuant to the second paragraph under the heading “—*Anti-dilution Adjustments*” below, the adjusted share prices in the column headings will equal the unadjusted share price less the decrease in the exercise price of a warrant pursuant to such exercise price adjustment.

Redemption Date (period to expiration of warrants)	Fair Market Value of Common Stock								
	≤ 10.00	11.00	12.00	13.00	14.00	15.00	16.00	17.00	≥18.00

3 months	0.034	0.065	0.104	0.150	0.197	0.243	0.286	0.326	0.361
0 months	—	—	0.042	0.115	0.179	0.233	0.281	0.323	0.361

The exact fair market value and redemption date may not be set forth in the table above, in which case, if the fair market value is between two values in the table or the redemption date is between two redemption dates in the table, the number of shares of common stock to be issued for each warrant exercised will be determined by a straight-line interpolation between the number of shares set forth for the higher and lower fair market values and the earlier and later redemption dates, as applicable, based on a 365 or 366-day year, as applicable. For example,

if the volume weighted average price of our shares of common stock for the 10 trading days ending on the third trading day prior to the date on which the notice of redemption is sent to the holders of the warrants is \$11.00 per share, and at such time there are 57 months until the expiration of the warrants, holders may choose to, in connection with this redemption feature, exercise their warrants for 0.277 shares of common stock for each whole warrant. For an example where the exact fair market value and redemption date are not as set forth in the table above, if the volume weighted average price of shares of common stock for the 10 trading days ending on the third trading day prior to the date on which the notice of redemption is sent to the holders of the warrants is \$13.50 per share, and at such time there are 38 months until the expiration of the warrants, holders may choose to, in connection with this redemption feature, exercise their warrants for 0.298 shares of common stock for each whole warrant. In no event will the warrants be exercisable on a cashless basis in connection with this redemption feature for more than 0.361 shares of common stock per warrant (subject to adjustment). Finally, as reflected in the table above, if the warrants are out of the money and about to expire, they cannot be exercised on a cashless basis in connection with a redemption by us pursuant to this redemption feature, since they will not be exercisable for any shares of common stock.

This redemption feature differs from the typical warrant redemption features used in many other blank check companies, which typically only provide for a redemption of warrants for cash (other than the private placement warrants) when the trading price for the shares of common stock exceeds \$18.00 per share for a specified period of time. This redemption feature is structured to allow for all of the outstanding warrants to be redeemed when the shares of common stock are trading at or above \$10.00 per public share, which may be at a time when the trading price of shares of common stock is below the exercise price of the warrants. We have established this redemption feature to provide us with the flexibility to redeem the warrants without the warrants having to reach the \$18.00 per share threshold set forth above under “—Redemption of warrants when the price per share of common stock equals or exceeds \$18.00.” Holders choosing to exercise their warrants in connection with a redemption pursuant to this feature will, in effect, receive a number of shares for their warrants based on an option pricing model with a fixed volatility input as of the of this prospectus. This redemption right provides us with an additional mechanism by which to redeem all of the outstanding warrants, and therefore have certainty as to our capital structure as the warrants would no longer be outstanding and would have been exercised or redeemed. We will be required to pay the applicable redemption price to warrant holders if we choose to exercise this redemption right and it will allow us to quickly proceed with a redemption of the warrants if we determine it is in our best interest to do so. As such, we would redeem the warrants in this manner when we believe it is in our best interest to update our capital structure to remove the warrants and pay the redemption price to the warrant holders.

As stated above, we can redeem the warrants when the shares of common stock are trading at a price starting at \$10.00, which is below the exercise price of \$11.50, because it will provide certainty with respect to our capital structure and cash position while providing warrant holders with the opportunity to exercise their warrants on a cashless basis for the applicable number of shares. If we choose to redeem the warrants when the shares of common stock are trading at a price below the exercise price of the warrants, this could result in the warrant holders receiving fewer shares of common stock than they would have received if they had chosen to wait to exercise their warrants for shares of common stock if and when such shares of common stock were trading at a price higher than the exercise price of \$11.50.

No fractional shares of common stock will be issued upon exercise. If, upon exercise, a holder would be entitled to receive a fractional interest in a share, we will round down to the nearest whole number of the number of shares of common stock to be issued to the holder. If, at the time of redemption, the warrants are exercisable for a security other than the shares of common stock pursuant to the warrant agreement, the warrants may be exercised for such security. At such time as the warrants become exercisable for a security other than the shares of common stock, we (or surviving company) will use our commercially reasonable efforts to register under the Securities Act the security issuable upon the exercise of the warrants.

Redemption procedures. A holder of a warrant may notify us in writing in the event it elects to be subject to a requirement that such holder will not have the right to exercise such warrant, to the extent that after giving

[Table of Contents](#)

effect to such exercise, such person (together with such person's affiliates), to the warrant agent's actual knowledge, would beneficially own in excess of 9.8% (or such other amount as a holder may specify) of the shares of common stock issued and outstanding immediately after giving effect to such exercise.

Anti-dilution Adjustments. If the number of outstanding shares of common stock is increased by a capitalization or share dividend payable in shares of common stock, or by a sub-division of ordinary shares or other similar event, then, on the effective date of such capitalization or share dividend, sub-division or similar event, the number of shares of common stock issuable on exercise of each warrant will be increased in proportion to such increase in the outstanding ordinary shares. A rights offering made to all or substantially all holders of ordinary shares entitling holders to purchase shares of common stock at a price less than the "historical fair market value" (as defined below) will be deemed a share dividend of a number of shares of common stock equal to the product of (i) the number of shares of common stock actually sold in such rights offering (or issuable under any other equity securities sold in such rights offering that are convertible into or exercisable for shares of common stock) and (ii) one minus the quotient of (x) the price per share of common stock paid in such rights offering and (y) the historical fair market value. For these purposes, (i) if the rights offering is for securities convertible into or exercisable for shares of common stock, in determining the price payable for shares of common stock, there will be taken into account any consideration received for such rights, as well as any additional amount payable upon exercise or conversion and (ii) "historical fair market value" means the volume weighted average price of shares of common stock as reported during the 10 trading day period ending on the trading day prior to the first date on which the shares of common stock trade on the applicable exchange or in the applicable market, regular way, without the right to receive such rights.

In addition, if we, at any time while the warrants are outstanding and unexpired, pay a dividend or make a distribution in cash, securities or other assets to all or substantially all of the holders of the shares of common stock on account of such shares of common stock (or other securities into which the warrants are convertible), other than (a) as described above and, (b) any cash dividends or cash distributions which, when combined on a per share basis with all other cash dividends and cash distributions paid on the shares of common stock during the 365-day period ending on the date of declaration of such dividend or distribution does not exceed \$0.50 (as adjusted to appropriately reflect any other adjustments and excluding cash dividends or cash distributions that resulted in an adjustment to the exercise price or to the number of shares of common stock issuable on exercise of each warrant) but only with respect to the amount of the aggregate cash dividends or cash distributions equal to or less than \$0.50 per share, then the warrant exercise price will be decreased, effective immediately after the effective date of such event, by the amount of cash and/or the fair market value of any securities or other assets paid on each share of common stock in respect of such event.

If the number of outstanding shares of common stock is decreased by a consolidation, combination or reclassification of shares of common stock or other similar event, then, on the effective date of such consolidation, combination, reclassification or similar event, the number of shares of common stock issuable on exercise of each warrant will be decreased in proportion to such decrease in outstanding shares of common stock. Whenever the number of shares of common stock purchasable upon the exercise of the warrants is adjusted, as described above, the warrant exercise price will be adjusted by multiplying the warrant exercise price immediately prior to such adjustment by a fraction (x) the numerator of which will be the number of shares of common stock purchasable upon the exercise of the warrants immediately prior to such adjustment and (y) the denominator of which will be the number of shares of common stock so purchasable immediately thereafter.

In case of any reclassification or reorganization of the outstanding shares of common stock (other than those described above or that solely affects the par value of such shares of common stock), or in the case of any merger or consolidation of us with or into another corporation (other than a consolidation or merger in which we are the continuing corporation and that does not result in any reclassification or reorganization of our outstanding shares of common stock), or in the case of any sale or conveyance to another corporation or entity of the assets or other property of us as an entirety or substantially as an entirety in connection with which we are dissolved, the holders of the warrants will thereafter have the right to purchase and receive, upon the basis and upon the terms and

[Table of Contents](#)

conditions specified in the warrants and in lieu of the shares of common stock immediately theretofore purchasable and receivable upon the exercise of the rights represented thereby, the kind and amount of shares of common stock or other securities or property (including cash) receivable upon such reclassification, reorganization, merger or consolidation, or upon a dissolution following any such sale or transfer, that the holder of the warrants would have received if such holder had exercised their warrants immediately prior to such event. However, if such holders were entitled to exercise a right of election as to the kind or amount of securities, cash or other assets receivable upon such consolidation or merger, then the kind and amount of securities, cash or other assets for which each warrant will become exercisable will be deemed to be the weighted average of the kind and amount received per share by such holders in such consolidation or merger that affirmatively make such election, and if a tender, exchange or redemption offer has been made to and accepted by such holders (other than a tender, exchange or redemption offer made by the company in connection with redemption rights held by shareholders of the company as provided for in the company's amended and restated memorandum and articles of association or as a result of the redemption of shares of common stock by the company if a proposed initial business combination is presented to the shareholders of the company for approval) under circumstances in which, upon completion of such tender or exchange offer, the maker thereof, together with members of any group (within the meaning of Rule 13d-5(b)(1) under the Exchange Act) of which such maker is a part, and together with any affiliate or associate of such maker (within the meaning of Rule 12b-2 under the Exchange Act) and any members of any such group of which any such affiliate or associate is a part, own beneficially (within the meaning of Rule 13d-3 under the Exchange Act) more than 50% of the issued and outstanding shares of common stock, the holder of a warrant will be entitled to receive the highest amount of cash, securities or other property to which such holder would actually have been entitled as a shareholder if such warrant holder had exercised the warrant prior to the expiration of such tender or exchange offer, accepted such offer and all of the shares of common stock held by such holder had been purchased pursuant to such tender or exchange offer, subject to adjustment (from and after the consummation of such tender or exchange offer) as nearly equivalent as possible to the adjustments provided for in the warrant agreement. If less than 70% of the consideration receivable by the equityholders of Rigetti in such a transaction is payable in the form of shares of common stock in the successor entity that is listed for trading on a national securities exchange or is quoted in an established over-the-counter market, or is to be so listed for trading or quoted immediately following such event, and if the registered holder of the warrant properly exercises the warrant within thirty days following public disclosure of such transaction, the warrant exercise price will be reduced as specified in the warrant agreement based on the Black-Scholes value (as defined in the warrant agreement) of the warrant. The purpose of such exercise price reduction is to provide additional value to holders of the warrants when an extraordinary transaction occurs during the exercise period of the warrants pursuant to which the holders of the warrants otherwise do not receive the full potential value of the warrants. The purpose of such exercise price reduction is to provide additional value to holders of the warrants when an extraordinary transaction occurs during the exercise period of the warrants pursuant to which the holders of the warrants otherwise do not receive the full potential value of the warrants.

The warrants have been issued in registered form under a warrant agreement between American Stock Transfer & Trust Company, as warrant agent, and us. The warrant agreement provides that the terms of the warrants may be amended without the consent of any holder for the purpose of (i) curing any ambiguity or correct any mistake, including to conform the provisions of the warrant agreement to the description of the terms of the warrants and the warrant agreement set forth in this prospectus, or defective provision (ii) amending the provisions relating to cash dividends on ordinary shares as contemplated by and in accordance with the warrant agreement or (iii) adding or changing any provisions with respect to matters or questions arising under the warrant agreement as the parties to the warrant agreement may deem necessary or desirable and that the parties deem to not adversely affect the rights of the registered holders of the warrants, provided that the approval by the holders of at least 50% of the then-outstanding public warrants is required to make any change that adversely affects the interests of the registered holders. You should review a copy of the warrant agreement, which is filed as an exhibit to the registration statement of which this prospectus is a part, for a complete description of the terms and conditions applicable to the warrants.

[Table of Contents](#)

The warrant holders do not have the rights or privileges of holders of ordinary shares and any voting rights until they exercise their warrants and receive shares of common stock. After the issuance of shares of common stock upon exercise of the warrants, each holder will be entitled to one vote for each share held of record on all matters to be voted on by shareholders.

No fractional warrants will be issued upon separation of the units and only whole warrants will trade. If, upon exercise of the warrants, a holder would be entitled to receive a fractional interest in a share, we will, upon exercise, round down to the nearest whole number the number of shares of common stock to be issued to the warrant holder. We have agreed that, subject to applicable law, any action, proceeding or claim against us arising out of or relating in any way to the warrant agreement will be brought and enforced in the courts of the State of New York or the United States District Court for the Southern District of New York, and we irrevocably submit to such jurisdiction, which jurisdiction will be the exclusive forum for any such action, proceeding or claim. See *“Risk Factors—The warrant agreement designates the courts of the State of New York or the United States District Court for the Southern District of New York as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by holders of warrants, which could limit the ability of warrant holders to obtain a favorable judicial forum for disputes with us.”* This provision applies to claims under the Securities Act but does not apply to claims under the Exchange Act or any claim for which the federal district courts of the United States of America are the sole and exclusive forum.

Private Placement Warrants

Except as described below, the private placement warrants have terms and provisions that are identical to those of the public warrants. The private placement warrants (including the shares of common stock issuable upon exercise of the private placement warrants) will not be transferable, assignable or salable until 30 days after the completion of the Business Combination (except pursuant to limited exceptions, to our officers and directors and other persons or entities affiliated with the initial purchasers of the private placement warrants) and they will not be redeemable by us so long as they are held by Supernova Sponsor or its permitted transferees. Supernova Sponsor, or its permitted transferees, has the option to exercise the private placement warrants on a cashless basis. If the private placement warrants are held by holders other than Supernova Sponsor or its permitted transferees, the private placement warrants will be redeemable by us in all redemption scenarios and exercisable by the holders on the same basis as the warrants included in the units being sold in Supernova’s initial public offering. Any amendment to the terms of the private placement warrants or any provision of the warrant agreement with respect to the private placement warrants will require a vote of holders of at least 50% of the number of the then outstanding private placement warrants.

If holders of the private placement warrants elect to exercise them on a cashless basis, they would pay the exercise price by surrendering his, her or its warrants for that number of shares of common stock equal to the quotient obtained by dividing (x) the product of the number of shares of common stock underlying the warrants, multiplied by the excess of the “Sponsor fair market value” (defined below) over the exercise price of the warrants by (y) the Sponsor fair market value. For these purposes, the “Sponsor fair market value” shall mean the average reported closing price of the shares of common stock for the 10 trading days ending on the third trading day prior to the date on which the notice of warrant exercise is sent to the warrant agent.

Dividends

We have not paid any cash dividends on our common stock to date. The payment of cash dividends in the future will be dependent upon our revenues and earnings, if any, capital requirements, general financial condition, contractual restrictions and other factors that our Board may deem relevant and will be within the discretion of our Board at such time. In addition, our ability to pay dividends may be limited by covenants of any existing and future outstanding indebtedness that we or our subsidiaries incur. We do not anticipate declaring any cash dividends to holders of common stock in the foreseeable future.

Certain Anti-Takeover Provisions of Delaware Law and our Second Amended and Restated Certificate of Incorporation and Bylaws

Section 203 of the Delaware General Corporation Law

We are subject to Section 203 of the DGCL, which generally prohibits a publicly held Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years after the date that such stockholder became an interested stockholder, with the following exceptions:

- before such date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction began, excluding for purposes of determining the voting stock outstanding, but not the outstanding voting stock owned by the interested stockholder, those shares owned (1) by persons who are directors and also officers and (2) employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- on or after such date, the business combination is approved by the board of directors and authorized at an annual or special meeting of the stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock that is not owned by the interested stockholder.

In general, Section 203 defines a “business combination” to include the following:

- any merger or consolidation involving the corporation and the interested stockholder;
- any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested stockholder;
- subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder;
- any transaction involving the corporation that has the effect of increasing the proportionate share of the stock or any class or series of the corporation beneficially owned by the interested stockholder; or
- the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits by or through the corporation.

In general, Section 203 defines an “interested stockholder” as an entity or person who, together with the person’s affiliates and associates, beneficially owns or within three years prior to the time of determination of interested stockholder status did own, 15% or more of the outstanding voting stock of the corporation.

A Delaware corporation may “opt out” of these provisions with an express provision in its original certificate of incorporation or an express provision in an amended and restated certificate of incorporation or amended and restated bylaws resulting from a stockholders’ amendment approved by at least a majority of the outstanding voting shares. We have not opted out of these provisions. As a result, mergers or other takeover or change in control attempts of us may be discouraged or prevented.

Certificate of Incorporation and Bylaws

Among other things, our Certificate of Incorporation and Bylaws:

- providing for a classified board of directors with staggered, three-year terms;
- the ability of the Board to issue up to 10,000,000 shares of preferred stock, including “blank check” preferred stock, with any rights, preferences and privileges as they may designate, including the right to approve an acquisition or other change of control;

Table of Contents

- provide that the authorized number of directors may be changed only by resolution of the Board;
- provide that, subject to the rights of the holders of any series of preferred stock, any individual director or directors may be removed only with cause by the affirmative vote of the holders of at least 66 2/3% of the voting power of all of the then-outstanding shares of our capital stock entitled to vote generally in the election of directors, voting together as a single class;
- provide that all vacancies, including newly created directorships, may, except as otherwise required by law, be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum;
- require that any action to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and not be taken by written consent or electronic transmission;
- provide that stockholders seeking to present proposals before a meeting of stockholders or to nominate candidates for election as directors at a meeting of stockholders must provide advance notice in writing, and also specify requirements as to the form and content of a stockholder's notice;
- provide that special meetings of our stockholders may be called by the chairperson of the Board, the chief executive officer or by the Board pursuant to a resolution adopted by a majority of the total number of authorized directors; and
- not provide for cumulative voting rights, therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose.

The combination of these provisions will make it more difficult for the existing stockholders to replace our Board as well as for another party to obtain control of us by replacing our Board. Because our Board has the power to retain and discharge its officers, these provisions could also make it more difficult for existing stockholders or another party to effect a change in management. In addition, the authorization of undesignated preferred stock makes it possible for our Board to issue preferred stock with voting or other rights or preferences that could impede the success of any attempt to change our control.

These provisions are intended to enhance the likelihood of continued stability in the composition of our Board and its policies and to discourage coercive takeover practices and inadequate takeover bids. These provisions are also designed to reduce our vulnerability to hostile takeovers and to discourage certain tactics that may be used in proxy fights. However, such provisions could have the effect of discouraging others from making tender offers for our shares and may have the effect of delaying changes in our control or management. As a consequence, these provisions may also inhibit fluctuations in the market price of our stock.

Exclusive Forum of Certain Actions

The Certificate of Incorporation requires, unless the we consent in writing to the selection of an alternative forum, that Court of Chancery of the State of Delaware (or, if and only if the Court of Chancery of the State of Delaware lacks subject matter jurisdiction, any state court located within the State of Delaware or, if and only if all such state courts lack subject matter jurisdiction, the federal district court for the District of Delaware) and any appellate court therefrom is the sole and exclusive forum for the following types of actions or proceedings under Delaware statutory or common law: (i) derivative actions brought on behalf of the Company; (ii) actions against current or former directors, officers or other employees or stockholders of the Company for breach of fiduciary duty to the Company or the Company's stockholders; (iii) actions against the Company or any current or former director, officer or other employee or stockholder of the Company, arising out of or pursuant to any provision of the DGCL or the Certificate of Incorporation or the Bylaws; (iv) actions to interpret, apply, enforce or determine the validity of the Certificate of Incorporation or the Bylaws; (v) actions as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware; and (vi) actions against the Company or any current or former director, officer or other employee or stockholder of the Company, governed by the

[Table of Contents](#)

internal-affairs doctrine of the law of the State of Delaware, in all cases to the fullest extent permitted by law and subject to the court having personal jurisdiction over the indispensable parties named as defendants. However, this provision will not apply to claims or actions brought to enforce a duty or liability created by the Securities Act or Exchange Act, or any other claim for which the federal courts have exclusive jurisdiction. The Certificate of Incorporation further provides that unless we consent in writing to the selection of an alternative forum, to the fullest extent permitted by law, the federal district courts of the United States of America will be the exclusive forum for the resolution of any complaint asserting a cause or causes of action arising under the Securities Act, including all causes of action asserted against any defendant named in such complaint. Additionally, the Certificate of Incorporation provides that any person or entity holding, owning or otherwise acquiring any interest in any of our securities shall be deemed to have notice of and consented to these provisions.

Although we believe this provision benefits us by providing increased consistency in the application of Delaware law in the types of lawsuits to which it applies, the provision may have the effect of discouraging lawsuits against our directors and officers. Additionally, we cannot be certain that a court will decide that this provision is either applicable or enforceable, and if a court were to find the choice of forum provision contained in the amended and restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, operating results and financial condition.

Amendment to Certificate of Incorporation and Bylaws

The DGCL provides generally that the affirmative vote of a majority of the outstanding stock entitled to vote on amendments to a corporation's certificate of incorporation or bylaws is required to approve such amendment, unless a corporation's certificate of incorporation or bylaws, as the case may be, requires a greater percentage.

The Certificate of Incorporation provides, in addition to the votes required by law, that the following provisions therein may be amended, altered, repealed or rescinded only by the affirmative of the holders of at least sixty-six and two-thirds percent (66 2/3%) of the voting power of all of the then-outstanding shares of capital stock of Rigetti common stock and preferred stock entitled to vote generally in the election of directors, voting together as a single class, including provisions regarding the classified board structure, the size of the Board, the election and removal of directors to the Board, the filling of vacancies, the limited liability of directors and officers of Rigetti and exclusive forums for certain actions.

The Bylaws may be amended or repealed (A) by the affirmative vote of a majority of the entire Board then in office, without the assent or vote of any stockholder (subject to any bylaw requiring the affirmative vote of a larger percentage of the members of the Board) or (B) without the approval of the Board, by the affirmative vote of the holders of any class or series of stock of Rigetti required by law or by the Certificate of Incorporation, such action by stockholders requiring the affirmative vote of the holders of at least sixty-six and two-thirds percent (66 2/3%) of the voting power of all of the then-outstanding shares of the capital stock of Rigetti entitled to vote generally in the election of directors, voting together as a single class.

Limitations of Liability and Indemnification

See "Management—Limitation on Liability and Indemnification of Directors and Officers."

Rule 144

Pursuant to Rule 144 under the Securities Act ("Rule 144"), a person who has beneficially owned restricted shares of our common stock or our warrants for at least six months would be entitled to sell their securities provided that (i) such person is not deemed to have been our affiliate at the time of, or at any time during the three months preceding, a sale and (ii) we are subject to the Exchange Act periodic reporting requirements for at

[Table of Contents](#)

least three months before the sale and have filed all required reports under Section 13 or 15(d) of the Exchange Act during the 12 months (or such shorter period as we are required to file reports) preceding the sale.

Persons who have beneficially owned restricted shares of our common stock or our warrants for at least six months but who are our affiliates at the time of, or at any time during the three months preceding, a sale, would be subject to additional restrictions, by which such person would be entitled to sell within any three-month period only a number of securities that does not exceed the greater of:

- 1% of the total number of our common stock then outstanding; or
- the average weekly reported trading volume of our common stock during the four calendar weeks preceding the filing of a notice on Form 144 with respect to the sale.

Sales by our affiliates under Rule 144 are also limited by manner of sale provisions and notice requirements and to the availability of current public information about us.

Restrictions on the Use of Rule 144 by Shell Companies or Former Shell Companies

Rule 144 is not available for the resale of securities initially issued by shell companies (other than business combination related shell companies) or issuers that have been at any time previously a shell company. However, Rule 144 also includes an important exception to this prohibition if the following conditions are met:

- the issuer of the securities that was formerly a shell company has ceased to be a shell company;
- the issuer of the securities is subject to the reporting requirements of Section 13 or 15(d) of the Exchange Act;
- the issuer of the securities has filed all Exchange Act reports and material required to be filed, as applicable, during the preceding 12 months (or such shorter period that the issuer was required to file such reports and materials), other than Form 8-K reports; and
- at least one year has elapsed from the time that the issuer filed current Form 10 type information with the SEC reflecting its status as an entity that is not a shell company.

Transfer Agent and Warrant Agent

The transfer agent for common stock and warrant agent for the warrants is American Stock Transfer & Trust Company.

Listing of Securities

Our common stock and public warrants are listed on the Nasdaq Capital Market under the symbols "RGTT" and "RGTIW," respectively.

CERTAIN MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES FOR NON-U.S. HOLDERS

The following is a summary of certain material U.S. federal income tax consequences applicable to non-U.S. holders (as defined below) with respect to their ownership and disposition of shares of our common stock, but does not purport to be a complete analysis of all potential tax effects. This discussion is based on current provisions of the U.S. Internal Revenue Code of 1986, as amended (the “Code”) existing and proposed U.S. Treasury Regulations promulgated thereunder, current administrative rulings and judicial decisions, all as in effect as of the date of this prospectus and, all of which are subject to change or to differing interpretation, possibly with retroactive effect. Any such change or differing interpretation could alter the tax consequences to non-U.S. holders described in this prospectus. There can be no assurance that the Internal Revenue Service, which we refer to as the IRS, will not challenge one or more of the tax consequences described herein. We assume in this discussion that a non-U.S. holder holds shares of our common stock as a capital asset within the meaning of Section 1221 of the Code, which is generally property held for investment.

This discussion does not address all aspects of U.S. federal income taxation that may be relevant to a particular non-U.S. holder in light of that non-U.S. holder’s individual circumstances nor does it address any U.S. state, local or non-U.S. tax considerations, the alternative minimum tax, the Medicare tax on net investment income, the rules regarding qualified small business stock within the meaning of Section 1202 of the Code, or any other aspect of any U.S. federal tax other than the income tax. This discussion also does not consider any specific facts or circumstances that may apply to a non-U.S. holder and does not address the special tax rules applicable to particular non-U.S. holders, such as:

- insurance companies;
- tax-exempt or governmental organizations;
- financial institutions;
- brokers or dealers in securities;
- regulated investment companies;
- pension plans;
- “controlled foreign corporations,” “passive foreign investment companies,” and corporations that accumulate earnings to avoid U.S. federal income tax;
- “qualified foreign pension funds,” or entities wholly owned by a “qualified foreign pension fund”;
- persons deemed to sell our common stock under the constructive sale provisions of the Code;
- persons that hold our common stock as part of a straddle, hedge, conversion transaction, synthetic security or other integrated investment; and
- certain U.S. expatriates.

For purposes of this discussion, a non-U.S. holder means a beneficial owner of our common stock that is for U.S. federal income tax purposes:

- a non-resident alien individual;
- a corporation or other organization taxable as a corporation for U.S. federal income tax purposes that is created or organized in or under laws other than the laws of the United States, any state thereof, or the District of Columbia;
- an estate the income of which is not subject to U.S. federal income tax on a net income basis; or
- a trust the income of which is not subject to U.S. federal income tax on a net income basis and that (1) is not subject to the primary supervision of a court within the United States or over which no U.S. persons have authority to control all substantial decisions and (2) has not made an election to be treated as a U.S. person

[Table of Contents](#)

- This discussion does not address the tax treatment of partnerships or other entities that are pass-through entities for U.S. federal income tax purposes or persons that hold their common stock through partnerships or other pass-through entities. A partner in a partnership or other pass-through entity that will hold our common stock should consult his, her or its tax advisor regarding the tax consequences of acquiring, holding and disposing of our common stock through a partnership or other pass-through entity, as applicable.

This discussion is for general information only and is not tax advice. Accordingly, all prospective non-U.S. holders of our common stock should consult their tax advisors with respect to the U.S. federal, state, local and non-U.S. tax consequences of the purchase, ownership and disposition of our common stock.

Distributions on Our Common Stock

Distributions, if any, on our common stock will constitute dividends for U.S. federal income tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. If a distribution exceeds our current and accumulated earnings and profits, the excess will be treated as a tax-free return of the non-U.S. holder's investment, up to such holder's tax basis in the common stock. Any remaining excess will be treated as capital gain, subject to the tax treatment described below in "Gain on Sale or Other Taxable Disposition of Our Common Stock." Any such distributions will also be subject to the discussions below under the sections titled "Backup Withholding and Information Reporting" and "Withholding and Information Reporting Requirements—FATCA."

Subject to the discussion in the following two paragraphs in this section, dividends paid to a non-U.S. holder generally will be subject to withholding of U.S. federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty between the United States and such holder's country of residence.

Dividends that are treated as effectively connected with a trade or business conducted by a non-U.S. holder within the United States and, if an applicable income tax treaty so provides, that are attributable to a permanent establishment or a fixed base maintained by the non-U.S. holder within the United States, are generally exempt from the 30% withholding tax if the non-U.S. holder satisfies applicable certification and disclosure requirements. However, such U.S. effectively connected income, net of specified deductions and credits, is taxed at the same U.S. federal income tax rates applicable to United States persons (as defined in the Code). Any U.S. effectively connected income received by a non-U.S. holder that is a corporation may also, under certain circumstances, be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty between the United States and such holder's country of residence.

A non-U.S. holder of our common stock who claims the benefit of an applicable income tax treaty between the United States and such holder's country of residence generally will be required to provide a properly executed IRS Form W-8BEN or W-8BEN-E (or successor form), as applicable, to the applicable withholding agent and satisfy applicable certification and other requirements. Non-U.S. holders are urged to consult their tax advisors regarding their entitlement to benefits under a relevant income tax treaty. A non-U.S. holder that is eligible for a reduced rate of U.S. withholding tax under an income tax treaty may obtain a refund or credit of any excess amounts withheld by timely filing a U.S. tax return with the IRS.

Gain on Sale or Other Taxable Disposition of Our Common Stock

Subject to the discussions below under "Backup Withholding and Information Reporting" and "Withholding and Information Reporting Requirements—FATCA," a non-U.S. holder generally will not be subject to any U.S. federal income tax on any gain realized upon such holder's sale or other taxable disposition of shares of our common stock unless:

- the gain is effectively connected with the non-U.S. holder's conduct of a U.S. trade or business and, if an applicable income tax treaty so provides, is attributable to a permanent establishment or a fixed-base maintained by such non-U.S. holder in the United States, in which case the non-U.S. holder generally

will be taxed on a net income basis at the U.S. federal income tax rates applicable to United States persons (as defined in the Code) and, if the non-U.S. holder is a foreign corporation, the branch profits tax described above in “Distributions on Our Common Stock” also may apply;

- the non-U.S. holder is a nonresident alien individual who is present in the United States for a period or periods aggregating 183 days or more in the taxable year of the disposition and certain other conditions are met, in which case the non-U.S. holder will be subject to a 30% tax on the net gain derived from the disposition, which may be offset by certain U.S. source capital losses of the non-U.S. holder, if any (even though the individual is not considered a resident of the United States), provided that the non-U.S. holder has timely filed U.S. federal income tax returns with respect to such losses; or
- we are, or have been, at any time during the five-year period preceding such sale of other taxable disposition (or the non-U.S. holder’s holding period, if shorter) a “U.S. real property holding corporation,” unless our common stock is regularly traded on an established securities market as defined for purposes of applicable Treasury Regulations and the non-U.S. holder holds no more than 5% of our outstanding common stock, directly or indirectly, actually or constructively, during the shorter of the 5-year period ending on the date of the disposition or the period that the non-U.S. holder held our common stock. Generally, a corporation is a U.S. real property holding corporation only if the fair market value of its U.S. real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide real property interests plus its other assets used or held for use in a trade or business. Although there can be no assurance, we do not believe that we are, or have been, a U.S. real property holding corporation, or that we are likely to become one in the future. No assurance can be provided that our common stock will be regularly traded on an established securities market for purposes of the rules described above.

Backup Withholding and Information Reporting

We must report annually to the IRS and to each non-U.S. holder the gross amount of the distributions on our common stock paid to such holder and the tax withheld, if any, with respect to such distributions. Non-U.S. holders may have to comply with specific certification procedures to establish that the holder is not a United States person (as defined in the Code) in order to avoid backup withholding at the applicable rate with respect to distributions on our common stock. Dividends paid to non-U.S. holders subject to withholding of U.S. federal income tax, as described above in “Distributions on Our Common Stock,” generally will be exempt from U.S. backup withholding.

Information reporting and backup withholding will generally apply to the proceeds of a disposition of our common stock by a non-U.S. holder effected by or through the U.S. office of any broker, U.S. or foreign, unless the holder certifies its status as a non-U.S. holder and satisfies certain other requirements, or otherwise establishes an exemption. Generally, information reporting and backup withholding will not apply to a payment of disposition proceeds to a non-U.S. holder where the transaction is effected outside the United States through a non-U.S. office of a broker. However, for information reporting purposes, dispositions effected through a non-U.S. office of a broker with substantial U.S. ownership or operations generally will be treated in a manner similar to dispositions effected through a U.S. office of a broker.

Non-U.S. holders should consult their tax advisors regarding the application of the information reporting and backup withholding rules to them. Copies of information returns may be made available to the tax authorities of the country in which the non-U.S. holder resides or is incorporated under the provisions of a specific treaty or agreement. Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules from a payment to a non-U.S. holder can be refunded or credited against the non-U.S. holder’s U.S. federal income tax liability, if any, provided that an appropriate claim is filed with the IRS in a timely manner.

Withholding and Information Reporting Requirements—FATCA

The Foreign Account Tax Compliance Act and guidance issued thereunder (“FATCA”) imposes withholding taxes on certain types of payments made to “foreign financial institutions” and certain other foreign

entities (including financial intermediaries). FATCA generally imposes withholding at a rate of 30% on payments to certain foreign entities of dividends on our common stock and certain other withholdable payments, unless various U.S. information reporting and due diligence requirements (generally relating to ownership by U.S. persons of interests in or accounts with those entities) have been satisfied or the entity otherwise qualifies for an exemption. An intergovernmental agreement between the United States and an applicable foreign country may modify these requirements. Such withholding may apply to gross proceeds from the sale or other disposition of our common stock, although under proposed U.S. Treasury Regulations, no withholding would apply to such gross proceeds. The preamble to the proposed regulations specifies that taxpayers (including withholding agents) are permitted to rely on the proposed regulations pending finalization. You should consult your tax advisor regarding the application of FATCA.

The preceding discussion of U.S. federal tax consequences is for general information only. It is not tax advice. Each prospective investor should consult its own tax advisor regarding the particular U.S. federal, state and local and non-U.S. tax consequences of purchasing, holding and disposing of our common stock, including the consequences of any proposed change in applicable laws.

PLAN OF DISTRIBUTION (CONFLICT OF INTEREST)

The shares of our common stock offered by this prospectus are being offered by the selling stockholder, B. Riley. The shares may be sold or distributed from time to time by the selling stockholder directly to one or more purchasers or through brokers, dealers, or underwriters who may act solely as agents at market prices prevailing at the time of sale, at prices related to the prevailing market prices, at negotiated prices, or at fixed prices, which may be changed. The sale of the shares of our common stock offered by this prospectus could be effected in one or more of the following methods:

- ordinary brokers' transactions;
- transactions involving cross or block trades;
- through brokers, dealers, or underwriters who may act solely as agents;
- "at the market" into an existing market for our common stock;
- in other ways not involving market makers or established business markets, including direct sales to purchasers or sales effected through agents;
- in privately negotiated transactions; or
- any combination of the foregoing.

In order to comply with the securities laws of certain states, if applicable, the shares may be sold only through registered or licensed brokers or dealers. In addition, in certain states, the shares may not be sold unless they have been registered or qualified for sale in the state or an exemption from the state's registration or qualification requirement is available and complied with.

B. Riley is an "underwriter" within the meaning of Section 2(a)(11) of the Securities Act.

B. Riley has informed us that it presently anticipates using, but is not required to use, BRS, a registered broker-dealer and FINRA member and an affiliate of B. Riley, as a broker to effectuate resales, if any, of our common stock that it may acquire from us pursuant to the Purchase Agreement, and that it may also engage one or more other registered broker-dealers to effectuate resales, if any, of such common stock that it may acquire from us. Such resales will be made at prices and at terms then prevailing or at prices related to the then current market price. Each such registered broker-dealer will be an underwriter within the meaning of Section 2(a)(11) of the Securities Act. B. Riley has informed us that each such broker-dealer it engages to effectuate resales of our common stock on its behalf, excluding BRS, may receive commissions from B. Riley for executing such resales for B. Riley and, if so, such commissions will not exceed customary brokerage commissions.

Except as set forth above, we know of no existing arrangements between the selling stockholder and any other stockholder, broker, dealer, underwriter or agent relating to the sale or distribution of the shares of our common stock offered by this prospectus.

Brokers, dealers, underwriters or agents participating in the distribution of the shares of our common stock offered by this prospectus may receive compensation in the form of commissions, discounts, or concessions from the purchasers, for whom the broker-dealers may act as agent, of the shares sold by the selling stockholder through this prospectus. The compensation paid to any such particular broker-dealer by any such purchasers of shares of our common stock sold by the selling stockholder may be less than or in excess of customary commissions. Neither we nor the selling stockholder can presently estimate the amount of compensation that any agent will receive from any purchasers of shares of our common stock sold by the selling stockholder.

We may from time to time file with the SEC one or more supplements to this prospectus or amendments to the registration statement of which this prospectus forms a part to amend, supplement or update information contained in this prospectus, including, if and when required under the Securities Act, to disclose certain

[Table of Contents](#)

information relating to a particular sale of shares offered by this prospectus by the selling stockholder, including with respect to any compensation paid or payable by the selling stockholder to any brokers, dealers, underwriters or agents that participate in the distribution of such shares by the selling stockholder, and any other related information required to be disclosed under the Securities Act.

We will pay the expenses incident to the registration under the Securities Act of the offer and sale of the shares of our common stock covered by this prospectus by the selling stockholder.

As consideration for its irrevocable commitment to purchase our common stock under the Purchase Agreement, we have issued to B. Riley 171,008 shares of our common stock as Commitment Shares. In addition, reimbursed B. Riley for the reasonable legal fees and disbursements of B. Riley's legal counsel of \$100,000. In accordance with FINRA Rule 5110 these reimbursed fees and expenses are deemed to be underwriting compensation in connection with sales of our common stock by B. Riley to the public.

We also have agreed to indemnify B. Riley and certain other persons against certain liabilities in connection with the offering of shares of our common stock offered hereby, including liabilities arising under the Securities Act or, if such indemnity is unavailable, to contribute amounts required to be paid in respect of such liabilities. B. Riley has agreed to indemnify us against liabilities under the Securities Act that may arise from certain written information furnished to us by B. Riley specifically for use in this prospectus or, if such indemnity is unavailable, to contribute amounts required to be paid in respect of such liabilities. Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers, and controlling persons, we have been advised that in the opinion of the SEC this indemnification is against public policy as expressed in the Securities Act and is therefore, unenforceable.

We estimate that the total expenses for the offering will be approximately \$525,000.

B. Riley has represented to us that at no time prior to the date of the Purchase Agreement has B. Riley, its sole member, any of their respective officers, or any entity managed or controlled by B. Riley or its sole member, engaged in or effected, in any manner whatsoever, directly or indirectly, for its own account or for the account of any of its affiliates, any short sale (as such term is defined in Rule 200 of Regulation SHO of the Exchange Act) of our common stock or any hedging transaction, which establishes a net short position with respect to our common stock. B. Riley has agreed that during the term of the Purchase Agreement, none of B. Riley, its sole member, any of their respective officers, or any entity managed or controlled by B. Riley or its sole member, will enter into or effect, directly or indirectly, any of the foregoing transactions for its own account or for the account of any other such person or entity.

We have advised the selling stockholder that it is required to comply with Regulation M promulgated under the Exchange Act. With certain exceptions, Regulation M precludes the selling stockholder, any affiliated purchasers, and any broker-dealer or other person who participates in the distribution from bidding for or purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of the distribution until the entire distribution is complete. Regulation M also prohibits any bids or purchases made in order to stabilize the price of a security in connection with the distribution of that security. All of the foregoing may affect the marketability of the securities offered by this prospectus.

This offering will terminate on the date that all shares of our common stock offered by this prospectus have been sold by the selling stockholder.

Our common stock is currently listed on Nasdaq under the symbol "RGTI."

B. Riley and/or one or more of its affiliates has provided, currently provides and/or from time to time in the future may provide various investment banking and other financial services for us and/or one or more of our affiliates that are unrelated to the transactions contemplated by the Purchase Agreement and the offering of

[Table of Contents](#)

shares for resale by B. Riley to which this prospectus relates, for which investment banking and other financial services they have received and may continue to receive customary fees, commissions and other compensation from us, aside from any discounts, fees and other compensation that B. Riley has received and may receive in connection with the transactions contemplated by the Purchase Agreement, including the Commitment Shares we have agreed to issue to B. Riley as consideration for its irrevocable commitment to purchase shares of our common stock from us under the Purchase Agreement, the 3.0% fixed discount to current market prices of our common stock reflected in the purchase prices payable by B. Riley for our common stock that we may require it to purchase from us from time to time under the Purchase Agreement, and our payment of \$100,000 to B. Riley legal fees in connection with the preparation, negotiation, execution and delivery of the transaction documents and legal due diligence of the Company.

Conflict of Interest

B. Riley is an affiliate of BRS, a registered broker-dealer and FINRA member, which will act as an executing broker that will effectuate resales of our common stock that have been and may be acquired by B. Riley from us pursuant to the Purchase Agreement to the public in this offering. Because B. Riley will receive all the net proceeds from such resales of our common stock made to the public through BRS, BRS is deemed to have a “conflict of interest” within the meaning of FINRA Rule 5121. Consequently, this offering will be conducted in compliance with the provisions of FINRA Rule 5121. Pursuant to that rule, the appointment of a “qualified independent underwriter” is not required in connection with this offering, as a “bona fide public market,” as defined in Rule 5121, exists for the securities offered. In accordance with FINRA Rule 5121, BRS is not permitted to sell shares of our common stock in this offering to an account over which it exercises discretionary authority without the prior specific written approval of the account holder.

LEGAL MATTERS

The validity of any securities offered by this prospectus will be passed upon for us by Cooley LLP.

EXPERTS

The consolidated financial statements of Rigetti Computing, Inc. as of December 31, 2022 and 2021, and for the year ended December 31, 2022 and eleven months ended December 31, 2021, included in this Prospectus and in the Registration Statement have been so included in reliance on the report of BDO USA, LLP, an independent registered public accounting firm, appearing elsewhere herein and in the Registration Statement, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act, with respect to the securities being offered by this prospectus. This prospectus, which constitutes part of the registration statement, does not contain all of the information in the registration statement and its exhibits. For further information with respect to Rigetti and the securities offered by this prospectus, we refer you to the registration statement and its exhibits. Statements contained in this prospectus as to the contents of any contract or any other document referred to are not necessarily complete, and in each instance, we refer you to the copy of the contract or other document filed as an exhibit to the registration statement. Each of these statements is qualified in all respects by this reference. You can read our SEC filings, including the registration statement, over the internet at the SEC's website at www.sec.gov.

Our corporate website address is www.rigetti.com. We make available on our website, free of charge, our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The SEC maintains a website that contains reports, proxy and information statements and other information regarding our filings at www.sec.gov. We use our corporate website as a channel of distribution of material company information. For example, financial and other material information regarding our company is routinely posted on and accessible on our website. Accordingly, investors should monitor this channel, in addition to following our press releases, SEC filings and public conference calls and webcasts. The information found on our website is not incorporated by reference into this prospectus or any reports we file with or furnish to the SEC.

Report of Independent Registered Public Accounting Firm

Shareholders and Board of Directors
Rigetti Computing, Inc.
Berkeley, California

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Rigetti Computing, Inc. (the “Company”) as of December 31, 2022 and 2021, the related consolidated statements of operations, comprehensive loss, redeemable convertible preferred stock and stockholders’ equity (deficit), and cash flows for the year ended December 31, 2022 and for the eleven months ended December 31, 2021, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2022 and 2021, and the results of its operations and its cash flows for the year ended December 31, 2022 and the eleven months ended December 31, 2021, in conformity with accounting principles generally accepted in the United States of America.

Change in Accounting Principle

As discussed in Notes 2 and 8 to the consolidated financial statements, the Company has changed its accounting method for accounting for leases in 2022 due to the adoption of Topic 842: Leases.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ BDO USA, LLP

We have served as the Company’s auditor since 2021.

RIGETTI COMPUTING, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF BUSINESS

Rigetti Computing, Inc. and its subsidiaries (collectively, the “Company” or “Rigetti”), builds quantum computers and the superconducting quantum processors that power them. Through the Company’s Quantum Computing as a Service (“QCaaS”) platform, the Company’s machines can be integrated into any public, private or hybrid cloud. The Company offers product types of Platform, Research and Software Tools usage in application areas of benchmarking, chemical simulation, education/entertainment, machine learning, and optimization.

The Company is located and headquartered in Berkeley, California. The Company also operates in Fremont, California; London, United Kingdom; Adelaide, Australia; British Columbia, Canada and Munich, Germany. The Company’s revenue is derived primarily from operations in the United States and the United Kingdom.

Basis of Presentation

On March 2, 2022 (the “Closing Date”), a merger transaction between Rigetti Holdings, Inc. (“Legacy Rigetti”) and Supernova Partners Acquisition Company II, Ltd. (“SNII”) was completed (the “Business Combination”, see Note 3). In connection with the closing of the Business Combination, the Company changed its name to Rigetti Computing, Inc. and all of SNII Class A ordinary shares and SNII Class B ordinary shares automatically converted into shares of Common Stock, par value \$0.0001, of the Company (the “Common Stock”) on a one-for-one basis. The SNII Public Warrants and the Private Warrants held by SNII became warrants for Common Stock. The Company’s Common Stock and Public Warrants trade on the Nasdaq Capital Market under the ticker symbols “RGTI” and “RGTIW,” respectively. For more information on this transaction, see Note 3.

The Company determined that Legacy Rigetti was the accounting acquirer in the Business Combination based on an analysis of the criteria outlined in Accounting Standards Codification (ASC) 805, Business Combination.

The determination was primarily based on the following facts:

- Former Legacy Rigetti stockholders have a controlling voting interest in the Company;
- The Company’s board of directors as of immediately after the closing is comprised of eight board members, six seats occupied by previous Rigetti board members and one seat being occupied by a previous Supernova representative. The final eighth seat was filled by an individual who did not have ties to either Rigetti or Supernova pre-merger; and
- Legacy Rigetti management continues to hold executive management roles for the post-combination company and be responsible for the day-to-day operations.

Accordingly, for accounting purposes, the Business Combination was treated as the equivalent of Legacy Rigetti issuing stock for the net assets of SNII, accompanied by a recapitalization. The primary asset acquired from SNII was cash. Separately, the Company also assumed warrants that were deemed to be derivatives and meet liability classification subject to fair value adjustment measurements upon closing of the Business Combination (the “Closing”). No goodwill or other intangible assets were recorded as a result of the Business Combination.

[Table of Contents](#)

While SNII was the legal acquirer in the Business Combination, because Legacy Rigetti was deemed the accounting acquirer, the historical financial statements of Legacy Rigetti became the historical financial statements of the combined company, upon the consummation of the Business Combination. As a result, the financial statements included in this report reflect (i) the historical operating results of Legacy Rigetti prior to the Business Combination; (ii) the combined results of SNII and Legacy Rigetti following the closing of the Business Combination; (iii) the assets and liabilities of Legacy Rigetti at their historical cost; and (iv) the Company's equity structure for all periods presented.

The equity structure has been retroactively restated in all comparative periods up to the Closing Date, to reflect the number of shares of the Company's Common Stock, \$0.0001 par value per share, issued to Legacy Rigetti shareholders and Legacy Rigetti convertible preferred shareholders in connection with the Business Combination. As such, the shares and corresponding capital amounts and earnings per share related to Legacy Rigetti redeemable convertible preferred stock and Legacy Rigetti Common Stock prior to the Business Combination have been retroactively restated as shares reflecting the exchange ratio established in the Business Combination.

The accompanying consolidated financial statements of the Company and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") and applicable rules and regulations of the U.S. Securities and Exchange Commission ("SEC"). The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation. All dollar amounts in tables, except share and per share amounts, in the notes to the consolidated financial statements are presented in thousands unless otherwise noted.

Risks and Uncertainties — The Company is subject to a number of risks similar to those of other companies of similar size in its industry, including, but not limited to, the need for successful development of products, the need for additional capital (or financing) to fund operating losses, competition from substitute products and services from larger companies, protection of proprietary technology, patent litigation, dependence on key individuals, and risks associated with changes in information technology.

Based on our forecasts, we believe that our existing cash and cash equivalents and available for sale investments will be sufficient to meet our anticipated operating cash needs for at least the next 12 months from the issuance of these financial statements based on our current business plan and expectations and assumptions considering current macroeconomic conditions.

COVID-19 and Macroeconomic Conditions — As of December 31, 2022, and December 31, 2021, the Company's financial position was not significantly impacted by the effects of COVID-19. However, the duration and intensity of the COVID-19 pandemic and any resulting disruption to the Company's operations remains somewhat uncertain. Global economic conditions have been worsening, with disruptions to, and volatility in, the credit and financial markets, disruption to banking systems, and rising inflation and interest rates in the U.S. and worldwide resulting from the effects of COVID-19 and otherwise. If these conditions persist and deepen, the Company could experience an inability to access additional capital or our liquidity could otherwise be impacted. If the Company is unable to raise capital when needed or on attractive terms, it would be forced to delay, reduce or eliminate its research and development programs and other efforts.

Change in Fiscal Year — In October 2021, the board of directors of Rigetti approved a change to Rigetti's fiscal year-end from January 31 to December 31, effective December 31, 2021. The Company believes the year-end change is important and useful to its financial statement users to allow for increased comparability with its industry peers. As a result of this change, the Company's fiscal year now begins on January 1 and ends on December 31 of each year, starting on January 1, 2022. Rigetti's fiscal year 2021 covers a period of 11 months starting from February 1, 2021 and ending on December 31, 2021.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Emerging Growth Company — Following the Business Combination, the Company qualifies as an emerging growth company (“EGC”) as defined in the Jumpstart our Business Startups (“JOBS”) Act. The JOBS Act permits companies with EGC status to take advantage of an extended transition period to comply with new or revised accounting standards, delaying the adoption of these accounting standards until they would apply to private companies. The Company intends to use this extended transition period to enable us to comply with new or revised accounting standards that have different effective dates for public and private companies until the earlier of the date the Company (i) is no longer an EGC or (ii) affirmatively and irrevocably opts out of the extended transition period provided in the JOBS Act. As a result, the consolidated financial statements may not be comparable to companies that comply with the new or revised accounting standards as of public company effective dates.

Use of Estimates — The preparation of the consolidated financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect reported amounts and disclosures. Such management estimates include, but are not limited to, the fair value of share-based awards, the fair value of the convertible preferred stock warrants, the fair value of the Forward Warrant Agreement (as defined below), the fair value of derivative warrant liabilities, the fair value of Sponsor Vesting Shares issued in connection with the business combination (See Note 3), goodwill and intangible assets, accrued liabilities and contingencies, depreciation and amortization periods, revenue recognition and accounting for income taxes. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, and makes adjustments when facts and circumstances dictate. These estimates are based on information available as of the date of the consolidated financial statements; therefore, actual results could differ from those estimates.

Principals of Consolidation — The consolidated financial statements include the accounts of Rigetti and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Reclassifications — Certain amounts reported previously have been reclassified to conform to current presentation, with no effect on stockholders’ equity or net loss as previously presented.

Segments — Operating segments are defined as components of an entity for which discrete financial information is available and that information is regularly reviewed by the Chief Operating Decision Maker (“CODM”) in deciding how to allocate resources and in assessing performance. The Company’s Chief Executive Officer is its CODM, who has ultimate responsibility for the operating performance of the Company and the allocation of resources. The Company’s CODM reviews financial information presented on a consolidated basis for the purposes of making operating decisions, allocating resources and evaluating financial performance. As such, the Company has determined that it operates in one operating and one reportable segment.

Foreign Currency — The Company’s reporting currency is the US dollar. The functional currencies of the Company’s foreign subsidiaries are the local currencies (UK pounds sterling, Australian dollar and Canadian Dollar), which are the monetary unit of account of the principal economic environment in which the Company’s foreign subsidiaries operate. All assets and liabilities of the foreign subsidiaries are translated at the current exchange rate as of the end of the period, and revenue and expenses are translated at average exchange rates in effect during the period. The gain or loss resulting from the process of translating foreign currency financial statements into US dollars is reflected as a foreign currency cumulative translation adjustment and reported as a component of accumulated other comprehensive gain (loss). Foreign currency transaction gains and losses resulting from or expected to result from transactions denominated in a currency other than the functional currency are recognized in other income (expense), net in the consolidated statements of operations and are de minimis for the year ended December 31, 2022 and 11 months ended December 31, 2021.

[Table of Contents](#)

Comprehensive Loss — Comprehensive loss consists of two components including net loss and other comprehensive loss. The Company's other comprehensive loss consists of foreign currency translation adjustments that result from consolidation of its foreign subsidiaries and unrealized loss on available-for-sale securities.

Cash, Cash Equivalents and Restricted Cash — As of December 31, 2022 and December 31, 2021, cash consists primarily of checking and savings deposits. As of December 31, 2022, cash equivalents consist primarily of money market funds. There were no cash equivalents as of December 31, 2021. The Company considers all highly liquid investment securities with remaining maturities at the date of purchase of three months or less to be cash equivalents. These cash equivalents are stated at cost, which approximates fair value.

The Company's restricted cash balance includes cash whose use is limited by contractual provisions. As of December 31, 2022, there was no restricted cash. As of December 31, 2021, restricted cash consists of cash secured as collateral for letters of credit in favor of the Company's landlord and its corporate credit card program.

The following table provides a reconciliation of cash, cash equivalents and restricted cash in the consolidated balance sheets to the total amount shown in the consolidated statements of cash flows:

	December 31, 2022	December 31, 2021
Cash	\$ 21,542	\$ 11,729
Cash equivalents	36,346	—
Restricted cash	—	317
Total cash, cash equivalents and restricted cash	<u>\$ 57,888</u>	<u>\$ 12,046</u>

Investments — The Company classifies its investments in fixed income securities as available-for-sale debt investments. The Company's investments consist of U.S Treasury securities, commercial paper, and corporate bonds that have a maturity of one year or less. These investments are recorded in the consolidated balance sheets at fair value. The fair value of our underlying investments is based on observable inputs and classified as Level 1 and Level 2. Unrealized gains and losses on these investments are included as a separate component of Accumulated Other Comprehensive Loss. The Company evaluates its investments to assess whether those with unrealized loss positions are other than temporarily impaired. Impairments are considered other than temporary if they are related to deterioration in credit risk or if it is likely the Company will sell the securities before the recovery of the cost basis. Realized gains and losses and declines in value determined to be other than temporary are determined based on the specific identification method and are reported in other income (expense), net in the statements of operations. See Note 15 for further information on fair value.

Accounts Receivable — Accounts receivable are recorded at invoice value, net of allowance for doubtful accounts. Unbilled receivables are included in accounts receivable and include amounts that were invoiced subsequent to the period end for which revenue was recognized in advance of the right to invoice. On a periodic basis, management evaluates its accounts receivable and determines whether to provide an allowance or if any accounts should be written off based on a past history of write-offs, collections, and current credit conditions. A receivable is considered past due if the Company has not received payments based on agreed-upon terms. As of December 31, 2022 and December 31, 2021, the Company does not have any allowances for doubtful accounts.

Prepaid Expenses and Other Current Assets — Prepaid expenses and other current assets include prepaid software, prepaid insurance, other prepaid expenses, all of which are expected to be recognized or realized within the next 12 months.

[Table of Contents](#)

Deferred Offering Costs —The Company capitalizes certain legal, accounting and other third-party fees that are directly associated with the Business Combination or issuance of shares under a registration statement filed with the SEC. After consummation of the Business Combination or issuance of shares, costs allocated to equity-classified instruments are recorded as a reduction to additional paid-in capital. Costs allocated to liability-classified instruments are expensed.

The Company incurred \$2.3 million of offering costs for the year ended December 31, 2022, which related to filing new registration statements with the SEC after the close of the Business Combination. These costs are incremental to those disclosed in Note 3. A portion of the offering costs amounting to \$0.7 million relates to the Common Stock Purchase Agreement with B. Riley Principal Capital II, LLC. As of December 31, 2022, while the registration statement related to the Common Stock Purchase Agreement with B. Riley Principal Capital II, LLC was filed with the SEC, there were no shares issued other than the commitment shares referred to in Note 12. As such \$0.7 million of the offering costs were classified as deferred offering costs. As of December 31, 2021, the Company had recorded deferred offering costs of \$3.4 million, all of which are related to the Business Combination as discussed in Note 3.

Property and Equipment, Net — Property and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are calculated using the straight-line method over the estimated useful lives of the assets. The Company uses an estimated useful life of three years for furniture and other assets and information technology hardware (“IT hardware”), seven years for process equipment, and three to ten years for quantum computing fridges. Leasehold improvements are amortized over the shorter of the lease-term or the estimated useful life of the related asset. Expenditures for repairs and maintenance are expensed as incurred. Upon disposition, the cost and related accumulated depreciation are removed and any resulting gain or loss is reflected in other income (expense) in the consolidated statements of operations.

Long-lived assets, which consist of property and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset (asset group) may not be recoverable. When such events or changes in circumstances occur, the Company performs an undiscounted cash flow analysis to determine if an impairment exists and, if so, an impairment loss would be recorded based on the excess of the carrying amount of the asset (asset group) over its fair value. During the year ended December 31, 2022 the Company determined there was a triggering event and an undiscounted cash flow analysis was performed. Based on the results of this analysis, the Company’s long-lived assets were not impaired and no impairment charge was recorded. During the 11 months ended December 31, 2021 no triggering events were noted.

Goodwill — Goodwill represents the excess of the purchase price over the fair value of assets acquired and liabilities assumed in a business combination. Goodwill has an indefinite useful life and is not amortized. The Company reviews its goodwill for impairment at least annually or whenever events or changes in circumstances indicate that the carrying value of the Company may exceed its fair value. The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of the Company is less than its carrying amount, including goodwill. If that is the case, the Company performs a quantitative impairment test, and, if the carrying amount of the Company exceeds its fair value, then the Company will recognize an impairment charge for the amount by which its carrying amount exceeds its fair value, not to exceed the carrying amount of the goodwill.

The Company determined a triggering event existed in the fourth quarter of 2022 resulting from the sustained decline in the Company’s stock price. A quantitative impairment test was performed and as a result, the Company recognized a \$5.4 million goodwill impairment charge for the year ended December 31, 2022.

Deferred Financing Costs — The incremental cost, including the fair value of warrants, directly associated with obtaining debt financing is capitalized as deferred financing costs upon the issuance of the debt and amortized over the term of the related debt agreement using the effective-interest method with such amortized amounts included as a component of interest expense in the consolidated statements of operations. Unamortized deferred financing costs are presented on the consolidated balance sheets as a direct deduction from the carrying amount of the related debt obligation.

[Table of Contents](#)

Public and Private Warrants — At the Closing Date of the Business Combination, SNII had 4,450,000 Private Warrants and 8,625,000 Public warrants outstanding. Each whole warrant entitles the holder to purchase one share of the Company’s Common Stock at a price of \$11.50 per share, subject to adjustments, and will expire five years after the Business Combination or earlier upon redemption or liquidation.

The Private Warrants do not meet the derivative scope exception and are accounted for as derivative liabilities. Specifically, the Private Warrants contain provisions that cause the settlement amounts to be dependent upon the characteristics of the holder of the warrant which is not an input into the pricing of a fixed-for-fixed option on equity shares. Therefore, the Private Warrants are not considered indexed to the Company’s stock and should be classified as a liability. Since the Private Warrants meet the definition of a derivative, the Company recorded the Private Warrants as liabilities in the consolidated balance sheet at fair value upon the closing, with subsequent changes in the fair value recognized in the consolidated statements of operations at each reporting date. The fair value of the Private Warrants are measured using the Black-Scholes option-pricing model.

The Public Warrants also fail to meet the indexation guidance in ASC 815 and are accounted for as liabilities because they include a provision whereby if there is not an effective registration statement, the warrant holders have a cap of 0.361 shares of Common Stock per warrant (subject to adjustment), on the issuable number of shares in a cashless exercise. Subsequent to the separate listing and trading of the Public Warrants, their fair value has been measured based on the observable listed prices for such warrants. Upon consummation of the Business Combination, the Company recorded a liability related to the Public Warrants of \$16.3 million, with an offsetting entry to additional paid-in capital. On December 31, 2022, the fair value of the Public Warrants decreased to \$0.7 million with the corresponding gain from the change in fair value recorded in the consolidated statement of operations for the year ended December 31, 2022.

See Note 13 and 15 for further information on fair value.

Derivative Warrant Liabilities — The Company does not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. The Company evaluates all of its financial instruments, including issued stock purchase warrants, to determine if such instruments are derivatives or contain features that qualify as embedded derivatives, pursuant to ASC 815, “Derivatives and Hedging” (“ASC 815”) at the initial recognition date.

Other than the Public and Private Warrants noted above, the Company also issued warrants to Trinity Capital which are recognized as derivative liabilities in accordance with ASC 815. Accordingly, the Company recognizes the warrant instruments as liabilities at fair value and adjusts the instruments to fair value at each reporting period until exercised. The fair value of the warrant liabilities issued were initially measured using the Black-Scholes model and are subsequently remeasured at each reporting period with changes recorded as a component of other (expense) income in the Company’s consolidated statements of operations. During the year ended December 31, 2022 these warrants were exercised and are no longer outstanding.

Earn-Out Liability — At the closing of the Business Combination, the SPAC Sponsor subjected certain Sponsor Vesting Shares to forfeiture and vesting as of the Closing Date if thresholds related to the weighted average price of Common Stock are not met for the duration of various specified consecutive day trading periods during the five-year period following the Closing (the “Earn-Out Triggering Events”). Any such shares held by the Sponsor that remain unvested after the fifth anniversary of the Closing will be forfeited.

These Sponsor Vesting Shares are accounted for as liability classified instruments because the Earn-Out Triggering Events that determine the number of Sponsor Vesting Shares to be earned back by the Sponsor include outcomes that are not solely indexed to the Common Stock of the Company. The aggregate fair value of the Sponsor Vesting Shares on the Closing Date was estimated using a Monte Carlo simulation model and was determined to be \$20.4 million at the Closing Date.

As of December 31, 2022, the Earn-Out Triggering Events were not achieved for any of the tranches, and as such, the Company adjusted the carrying amount of the liability to its estimated fair value of \$1.2 million. The change in the fair value of \$19.2 million for the year ended December 31, 2022 is included in gain on fair value change, net in the condensed consolidated statements of operations.

[Table of Contents](#)

Significant inputs into the respective valuation models at March 2, 2022 (the initial recognition) and December 31, 2022 are as follows:

Valuation Assumptions	Initial Recognition on March 2, 2022	December 31, 2022
Stock Price	\$ 9.43	\$ 0.73
Simulated trading days	1,198	1,050
Volatility (annual)	30.50%	109.30%
Risk-free rate	1.74%	4.04%
Estimated time to expiration (years)	5.000	4.170

Revenue Recognition — The Company recognizes revenue in accordance with Accounting Standards Codification (“ASC”) Topic 606, *Revenue from Contracts with Customers* and accounts for certain contract costs in accordance with ASC 340-40, *Other Assets and Deferred Costs—Contracts with Customers*.

The Company recognizes revenue from contracts with customers by applying the following five-step model:

- Identify the contract with a customer
- Identify the performance obligations in the contract
- Determine the transaction price
- Allocate the transaction price to the performance obligations in the contract
- Recognize revenue when (or as) performance obligations are satisfied

The Company generates revenue through its Quantum Computing as a Service (“QCaaS”) and development contracts and other services. Access to Rigetti quantum computing systems can be purchased as a quantum computing subscription, or on a usage basis for a specified quantity of hours. Revenue related to subscription-based access to (“QCaaS”) is recognized over time as access to the systems is provided on a ratable basis over the subscription term, which can range from six months to two years. This time-based input measure of progress provides a faithful depiction of the transfer of the services because the benefits the customer obtains generally equals the benefit from its access to the systems throughout the subscription term. Revenue related to usage-based access to Rigetti quantum computing systems is recognized over time as the systems are accessed using an output method based on compute credit hours expended. This output method provides a faithful depiction of the transfer of the services because the customer has purchased a specified quantity of hours of usage that diminishes each time an hour is expended and therefore each hour of access to the systems is considered a discrete delivery of underlying services in these arrangements.

Development contracts are generally multi-year, non-recurring arrangements in which the Company provides professional services regarding practical applications of quantum computing to technology and business problems within the customer’s industry or organization and assists the customer in developing quantum algorithms and applications that will provide commercial value to the customer in areas of business interest. Development contracts are typically fixed fee arrangements invoiced on a milestone basis but may also be invoiced on a time and materials or cost reimbursement basis in certain cases. Revenue related to development contracts and other services is recognized over time based on completed milestones or hours or costs incurred as appropriate. Revenue for partially completed milestones deemed probable of being met is recognized using an input measure based on actual labor hours incurred to date relative to total estimated labor hours needed to complete the milestone. This input measure of progress provides a faithful depiction of the transfer of the services because it closely depicts the Company’s efforts or inputs to the satisfaction of the performance obligation. Revenue related to the sale of custom quantum computing components is recognized at a point in time upon acceptance by the customer.

[Table of Contents](#)

When the Company's contracts with customers contain multiple performance obligations, the transaction price is allocated on a relative standalone selling price basis to each performance obligation. The Company typically determines standalone selling price based on observable selling prices of our products and services. In instances where standalone selling price is not directly observable, standalone selling price is determined using information that may include market conditions and other observable inputs. Standalone selling price is typically established as a range. In situations in which the stated contract price for a performance obligation is outside of the applicable standalone selling price range and has a different pattern of transfer to the customer than the other performance obligations in the contract, the Company will reallocate the total transaction price to each performance obligation based on the relative standalone selling price of each.

The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods and services to the customer. Revenue is recorded based on the transaction price, which includes fixed consideration and estimates of variable consideration. The amount of variable consideration included in the transaction price is constrained and is included only to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

The Company's contracts with customers may include renewal or other options at fixed prices. Determining whether such options are considered distinct performance obligations that provide the customer with a material right and therefore should be accounted for separately requires significant judgment. Judgment is required to determine the standalone selling price for each renewal option to determine whether the renewal pricing is reflective of standalone selling price or is reflective of a discount that would provide the customer with a material right. Based on the Company's assessment of standalone selling prices, the Company determined that there were no significant material rights provided to its customers requiring separate recognition.

The timing of revenue recognition may not align with the right to invoice the customer. The Company records accounts receivable when it has the unconditional right to issue an invoice and receive payment, regardless of whether revenue has been recognized. If revenue has not yet been recognized, a contract liability (deferred revenue) is also recorded. If revenue is recognized in advance of the right to invoice, a contract asset or unbilled receivable is recorded, depending on whether the Company's right to consideration is considered conditional or unconditional. Unbilled receivables are included within accounts receivable in the consolidated balance sheets.

In instances where the timing of revenue recognition differs from the timing of the right to invoice, the Company has determined that a significant financing component generally does not exist. The primary purpose of the Company's invoicing terms is to provide customers with simplified and predictable ways of purchasing the products and services and not to receive financing from or provide financing to the customer. Additionally, the Company has elected the practical expedient that permits an entity not to recognize a significant financing component if the time between the transfer of a good or service and payment is one year or less.

Payment terms on invoiced amounts are typically net 30 days. The Company does not offer rights of return for its products and services in the normal course of business, and contracts generally do not include service-type warranties that provide any incremental service to the customer beyond providing assurance that the goods and services conform to applicable specifications or customer-specific or subjective acceptance provisions. The Company also excludes from revenue government-assessed and imposed taxes on revenue-generating activities that are invoiced to customers.

Costs of Obtaining and Fulfilling Contracts — The Company has elected to apply the practical expedient to expense contract acquisition costs as incurred when the expected amortization period is one year or less. The Company capitalizes incremental costs incurred to fulfill its contracts that (i) relate directly to the contract, (ii) are expected to generate resources that will be used to satisfy the Company's performance obligation(s) under the contract, and (iii) are expected to be recovered through revenue generated under the contract.

[Table of Contents](#)

Cost of Revenue — Cost of revenue consists primarily of all direct and indirect cost associated with providing QCaaS offerings and development contracts and other services, including employee salaries and employee related costs, including compensation, bonuses, employee taxes and benefit costs of program management and personnel associated with the delivery of goods and services to customers. Cost of revenue also includes an allocation of facility costs, depreciation and amortization directly related to providing the QCaaS offerings and development contracts and other services.

Research and Development — Research and development costs are expensed as incurred. Research and development expenses include compensation, employee benefits, stock-based compensation, outside consultant fees, allocation of facility costs, depreciation and amortization, materials and components purchased for research and development.

General and Administrative — General and administrative expenses include compensation, employee benefits, stock-based compensation, legal, insurance, finance administration and human resources, an allocation of facility costs (including leases), bad debt costs, professional service fees, and an allocation of other general overhead costs including depreciation and amortization to support Rigetti's operations, which consists of operations other than associated with providing QCaaS offerings and development contracts and other services.

Sales and Marketing — Sales and marketing expenses consist primarily of compensation including stock-based compensation, employee benefits of sales and marketing employees, outside consultants fees, travel and marketing and promotion costs.

Capitalized Software — The Company capitalizes the costs to develop its internal-use software when preliminary development efforts are successfully completed, management has authorized and committed project funding, and it is probable that the project will be completed and the software will be used as intended. Such costs are included in property and equipment in the consolidated balance sheets and are amortized on a straight-line basis over the estimated useful life of the related asset. These capitalized costs are primarily related to the software infrastructure supporting the quantum computing services purchased by customers. Costs incurred in the preliminary stages of development are expensed as incurred. Once an application has reached the development stage, internal and external costs, if direct and incremental, are capitalized until the software is substantially complete and ready for its intended use. Capitalization ceases upon completion of all substantial testing. The Company also capitalizes costs related to specific upgrades and enhancements when it is probable the expenditures will result in additional features and functionality. Maintenance costs are expensed as incurred. During the year ended December 31, 2022 and 11 months ended December 31, 2021, no capitalized software has been recorded.

Income Taxes — Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is recorded for deferred tax assets if it is more likely than not that some portion or all of the deferred tax assets will not be realized. As of December 31, 2022 and December 31, 2021, the Company has recorded a full valuation allowance against its deferred tax assets. The Company recognizes the effect of income tax positions only if it is more likely than not that those positions will be sustained. Recognized income tax positions are measured at the largest amount that has a greater than 50% likelihood of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest related to unrecognized tax benefits in interest expense and penalties in income tax expense.

[Table of Contents](#)

Net Loss Per Share — Basic net loss per common share is computed by dividing the net loss available to Common Stockholders (the numerator) by the weighted-average number of common shares outstanding (the denominator) during the period. Diluted net loss per common share is computed by dividing the net loss available to Common Stockholders adjusted by any preferred stock dividends declared during the period by the weighted average number of common shares and potential common shares outstanding when the impact is not antidilutive. Potential common shares from stock options, unvested restricted stock units and Common Stock warrants are computed using the treasury stock method, while those from convertible Series C and C-1 Preferred Stock are computed using the if-converted method. Contingently issuable shares are included in basic net loss per share only when there is no circumstance under which those shares would not be issued. Shares issuable for little or no cash consideration shall be considered outstanding common shares and included in the computation of basic net loss per share.

Stock-Based Compensation — The Company accounts for share-based compensation in accordance with ASC 718, Compensation – Stock Compensation. The Company’s share-based compensation awards are all equity-classified and consist of stock options, restricted stock units (“RSU”) and restricted stock awards (“RSA”). Most stock options have service vesting conditions ranging from 1 to 5 years. RSAs are fully vested on grant date. RSUs granted under the Rigetti & Co., Inc. 2013 Equity Incentive Plan (the “2013 Plan”) have a 4-year service vesting condition and a performance condition linked to the occurrence of a liquidity event defined as a change-in-control event, successful initial public offering or successful merger with a special purpose acquisition company, which was satisfied at the Closing. RSUs granted under the Rigetti Computing, Inc. 2022 Equity Incentive Plan (the “2022 Plan”) have a service vesting condition only. The Company occasionally issues awards that might have different vesting conditions.

Compensation expense is based on the grant-date fair value of the awards and recognized over the requisite service period using a straight-line method for awards that have a service only condition. Compensation expense for awards with service and performance and/or market conditions is recognized using a graded vesting method. Compensation expense for RSAs is recognized fully on grant date. Compensation expenses for awards with a market condition are recognized over the requisite service period regardless of whether the market condition is met unless the service requirement is not met. The Company has elected to account for forfeitures of employee stock awards as they occur.

Fair Value Measurements — The Company reports all financial assets and liabilities and nonfinancial assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis... Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The authoritative guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1—Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2—Inputs are observable, unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities.

Level 3—Inputs are unobservable for the asset or liability.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest-level input that is significant to the fair value measurement in its entirety.

[Table of Contents](#)

Concentrations of Credit Risk — Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash and cash equivalents, short-term investments in the form of commercial paper and corporate bonds, and trade accounts receivable. The Company’s cash and cash equivalents and short-term investments are placed with high-credit-quality financial institutions, and at times exceed federally insured limits. To date, the Company has not experienced any credit loss relating to its cash and cash equivalents or short-term investments.

Significant customers that represent 10% or more of revenue are set forth in the following tables:

<u>Customer</u>	<u>For the Year Ended December 31, 2022</u>	<u>For the 11 months ended December 31, 2021</u>
Customer A	33%	16%
Customer B	18%	20%
Customer C	15%	15%
Customer D	14%	29%
Customer E	11%	*
Customer F	*	17%

*Customer accounted for less than 10% of revenue in the respective period

Significant customers that represent 10% or more of accounts receivable are set forth in the following tables:

<u>Customer</u>	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Customer A	65%	*
Customer B	13%	35%
Customer C	10%	34%
Customer D	*	29%

*Customer accounted for less than 10% of accounts receivable in the respective period

Sales to government entities comprised 81.3% and 80.0% of the Company’s total revenue for the year ended December 31, 2022 and 11 months ended December 31, 2021, respectively.

Recently Adopted Accounting Pronouncements — In February 2016, the FASB issued ASU 2016-02, Leases and related subsequently issued ASUs (collectively, “Topic 842”), which supersedes Topic 840. From a lessee perspective, the core principle of Topic 842 is that a lessee should recognize the assets and liabilities that arise from leases. A lessee should recognize in the statement of financial position a liability to make lease payments (the lease liability) and a right-of-use (“ROU”) asset representing its right to use the underlying asset for the lease term. There continues to be a differentiation between finance leases (which replace capital leases as so identified under Topic 840) and operating leases. However, the principal difference from the previous guidance is that the lease assets and lease liabilities arising from operating leases should be recognized in the statement of financial position. The updated guidance also requires additional quantitative and qualitative disclosures and allows various practical expedients.

[Table of Contents](#)

The Company adopted Topic 842 effective January 1, 2022, using the modified retrospective transition option of applying the new standard at the adoption date for all leases with an original term greater than 12 months. The Company elected the package of practical expedients requiring no reassessment of (i) whether any expired or existing contracts are or contain leases, (ii) the lease classification of any expired or existing leases, or (iii) initial direct costs for any existing leases. Adoption of the standard had a material impact on the Company's consolidated balance sheet by recognizing operating lease ROU assets and operating lease liabilities but did not have an impact on its consolidated statement of operations or cash flows on the date of adoption. The adoption of Topic 842 was recorded as of January 1, 2022 and resulted in the recognition of operating lease ROU assets and operating lease liabilities of \$6.3 million and \$6.6 million respectively and a \$0.3 million adjustment to deferred rent, with no impact to accumulated deficit as of January 1, 2022. The period ended December 31, 2021 continues to be reported in accordance with the Company's historic accounting under previous lease guidance, Topic 840.

The Company determines if an arrangement includes a lease at inception. Operating leases are included in the Company's balance sheet as operating lease ROU assets and operating lease liabilities as of December 31, 2022. Operating lease ROU assets represent the Company's right to use an underlying asset for the lease term and operating lease liabilities represent the Company's obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. In determining the net present value of its lease payments, the Company uses an estimated incremental borrowing rate that is applicable to the Company based on the information available at the later of the lease commencement date, lease modification date, or the date of adoption of Topic 842. The operating lease ROU assets also include any lease payments made less lease incentives. The Company's leases may include options to extend or terminate the lease, which is considered in the lease term when it is reasonably certain that the Company will exercise any such options. Lease expense is recognized on a straight-line basis over the expected lease term, taking into account adjustments for provisions such as free rent, escalating base monthly rental payments or deferred payment terms such as rent holidays that defer the commencement date of required payments. The Company has elected not to apply the recognition requirements of Topic 842 for short-term leases. The Company considers leases with a term of 12 months or less at the date of commencement to be short-term.

In May 2021, the FASB issued ASU No. 2021-04, Earnings Per Share (Topic 260), Debt-Modifications and Extinguishments (Subtopic 470-50), Compensation-Stock Compensation (Topic 718), and Derivatives and Hedging-Contracts in Entity's Own Equity (Subtopic 815-40): Issuer's Accounting for Certain Modifications or Exchanges of Freestanding Equity-Classified Written Call Options ("ASU 2021-04"). The guidance in ASU 2021-04 clarifies and reduces diversity in an issuer's accounting for modifications or exchanges of freestanding equity-classified written call options that remain equity classified after modification or exchange. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2021. The Company adopted ASU 2021-04 as of January 1, 2022. The adoption of ASU 2021-04 did not have an impact on the Company's financial position and results of operations.

In December 2019, the FASB issued ASU 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes, which is intended to simplify various aspects related to accounting for income taxes. ASU 2019-12 removes certain exceptions to the general principles in ASC 740 and also clarifies and amends existing guidance to improve consistent application. The Company adopted this ASU on January 1, 2022. Adoption did not have a significant impact on the Company's financial statements or related disclosures.

Recently Issued Accounting Pronouncements Not Yet Adopted — In June 2022, the FASB issued ASU 2022-03, ASC Subtopic 820 “Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions”. The FASB issued this update (1) to clarify the guidance in Topic 820, Fair Value Measurement, when measuring the fair value of an equity security subject to contractual restrictions that prohibit the sale of an equity security, (2) to amend a related illustrative example, and (3) to introduce new disclosure requirements for equity securities subject to contractual sale restrictions that are measured at fair value in accordance with Topic 820. The ASU is effective for the Company after December 15, 2024, and interim periods within those fiscal years, with early adoption permitted. The Company is still evaluating the impact of this pronouncement on the consolidated financial statements.

In August 2020, the FASB issued ASU No. 2020-06, Debt - (Topic 815) (“ASU No. 2020-06”), which simplifies an issuer’s accounting for convertible instruments and its application of the derivatives scope exception for contracts in its own equity. The amendments in ASU No. 2020-06 are effective for public companies, other than smaller reporting companies, for fiscal years beginning after December 15, 2021, including interim periods within those fiscal years. For all other entities, the amendments are effective for fiscal years beginning after December 15, 2023, including interim periods within those fiscal years. Early adoption is permitted, but no earlier than fiscal years beginning after December 15, 2020, including interim periods within those fiscal years. The Company is still evaluating the impact of this pronouncement on the consolidated financial statements.

In April 2019, the FASB issued ASU 2019-04, Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments. ASU No. 2019-04 was issued as part of the FASB’s ongoing project to improve upon its Accounting Standards Codification (ASC), and to clarify and improve areas of guidance related to recently issued standards on credit losses, hedging, and recognition and measurement. For entities that have not yet adopted the guidance in Update 2016-13, the effective dates and the transition requirements for these amendments are the same as the effective date and transition requirements in Update 2016-13. The amendments related to ASC 326 are effective for the Company as of January 1, 2023. The adoption of the ASU is not expected to have a material impact on its consolidated financial statements.

3. BUSINESS COMBINATION

As discussed in Note 1, on March 2, 2022, the Business Combination was completed. Pursuant to the Company’s certificate of incorporation, as amended on March 2, 2022, the Company is authorized to issue 1,000,000,000 shares of Common Stock and 10,000,000 shares of preferred stock, par value \$0.0001, of the Company (the “Preferred Stock”). The holders of shares of Common Stock are entitled to one vote for each share of Common Stock held. The Preferred Stock is non-voting. No shares of Preferred Stock were issued and outstanding as of December 31, 2022.

On March 1, 2022, prior to the Closing, as contemplated by the Merger Agreement and following approval by SNII’s shareholders at an extraordinary general meeting of shareholders held on February 28, 2022 (the “Extraordinary General Meeting”), SNII filed a notice of deregistration with the Cayman Islands Registrar of Companies, together with the necessary accompanying documents, and filed a certificate of incorporation (the “Certificate of Incorporation”) and a certificate of corporate domestication with the Secretary of State of the State of Delaware, under which SNII was domesticated and continues as a Delaware corporation, changing its name to “Rigetti Computing, Inc.”

[Table of Contents](#)

As a result of and upon the effective time of the Domestication (which occurred on March 1, 2022), among other things: (1) each then issued and outstanding Class A ordinary share, par value \$0.0001 per share, of SNII (“SNII Class A ordinary share”) converted automatically, on a one-for-one basis, into a share of Common Stock; (2) each then issued and outstanding Class B ordinary share, par value \$0.0001 per share, of SNII (“SNII Class B ordinary share”) converted automatically, on a one-for-one basis, into a share of Common Stock; (3) each then issued and outstanding whole warrant of SNII to purchase one SNII Class A ordinary share converted automatically into a Public Warrant to acquire one share of Common Stock at an exercise price of \$11.50 per share pursuant to the Warrant Agreement, dated March 1, 2021, between SNII and American Stock Transfer & Trust Company, as warrant agent; (4) and each then issued and outstanding unit of SNII (the “SNII Units”) was separated and converted automatically into one share of Common Stock and one-fourth of one Warrant.

Immediately prior to the effective time of the Business Combination, each share of Legacy Rigetti’s Series C preferred stock and Series C-1 preferred stock (collectively, the “Legacy Rigetti Preferred Stock”) with Par Value of \$0.000001 converted into shares of Common Stock of Legacy Rigetti (“Legacy Rigetti Common Stock”) in accordance with the Amended and Restated Certificate of Incorporation of Legacy Rigetti (such conversion, the “Legacy Rigetti Preferred Conversion”).

As a result of the Business Combination, among other things (1) all outstanding shares of Legacy Rigetti Common Stock as of immediately prior to the Closing (including Legacy Rigetti Common Stock resulting from the Legacy Rigetti Preferred Stock Conversion), were exchanged at an exchange ratio of 0.7870 (the “Exchange Ratio”) for an aggregate of 78,959,579 shares of Common Stock; (2) each warrant to purchase Legacy Rigetti Common Stock converted into a warrant to purchase shares of Common Stock (“Assumed Warrant”), with each Assumed Warrant subject to the same terms and conditions as were applicable to the original Legacy Rigetti warrant and having an exercise price and number of shares of Common Stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement; (3) each option to purchase Legacy Rigetti Common Stock converted into an option to purchase shares of Common Stock (“Assumed Option”), with each Assumed Option subject to the same terms and conditions as were applicable to the original Legacy Rigetti option and with an exercise price and number of shares of Common Stock purchasable based on the Exchange Ratio and other terms contained in the Merger Agreement, and; (4) each Legacy Rigetti restricted stock unit award converted into a restricted stock unit award to receive shares of Common Stock (“Assumed RSU Award”), with each Assumed RSU Award subject to the same terms and conditions as were applicable to the Legacy Rigetti restricted stock unit award, and with the number of shares of Common Stock to which the Assumed RSU Award converted based on the Exchange Ratio and other terms contained in the Merger Agreement.

In connection with the execution of the Merger Agreement, SNII entered into a sponsor support agreement (the “Sponsor Support Agreement”) with the Sponsor, Legacy Rigetti and SNII’s directors and officers. Pursuant to the Sponsor Support Agreement, the Sponsor and SNII’s directors and officers (“Sponsor Holders”), among other things, agreed to vote all of their shares of SNII capital stock in favor of the approval of the Business Combination. In addition, pursuant to the Sponsor Support Agreement, (i) 2,479,000 shares of Common Stock held by the Sponsor Holders became unvested and subject to forfeiture as of the Closing and will only vest if, during the five year period following the Closing, the volume weighted average price of Common Stock equals or exceeds \$12.50 for any twenty trading days within a period of thirty consecutive trading days, and (ii) 580,273 shares of Common Stock held by the Sponsor Holders became unvested and subject to forfeiture as of the Closing and will only vest if, during the five year period following the Closing, the volume weighted average price of Common Stock equals or exceeds \$15.00 for any twenty trading days within a period of thirty consecutive trading days. Any such shares held by the Sponsor Holders that remain unvested after the fifth anniversary of the Closing will be forfeited. (Refer to Note 2 for related significant accounting policy for the Sponsor Earn-Out Liability).

[Table of Contents](#)

Concurrently with the execution of the Merger Agreement, SNII entered into Subscription Agreements (the “Initial Subscription Agreements”) with certain investors (together, the “Initial PIPE Investors”), pursuant to which the Initial PIPE Investors agreed to subscribe for and purchase, and SNII agreed to issue and sell to the Initial PIPE Investors, an aggregate of 10,251,000 shares of Common Stock at a price of \$10.00 per share, for aggregate gross proceeds of \$102.5 Million (the “Initial PIPE Financing”). On December 23, 2021, SNII entered into Subscription Agreements (the “Subsequent Subscription Agreements”, and together with the Initial Subscription Agreements, the “Subscription Agreements”) with two investors (the “Subsequent PIPE Investors”, and together with the Initial PIPE Investors, the “PIPE Investors”) pursuant to which the Subsequent PIPE Investors agreed to subscribe for and purchase, and SNII agreed to issue and sell to the Subsequent PIPE Investors, an aggregate of 4,390,244 shares of Common Stock at a price of \$10.25 per share, for aggregate gross proceeds of \$45.0 Million (the “Subsequent PIPE Financing”, and together with the Initial PIPE Financing, the “PIPE Financing”). Pursuant to the Subscription Agreements, Rigetti agreed to provide the PIPE Investors with certain registration rights with respect to the shares purchased as part of the PIPE Financing. The PIPE Financing was consummated immediately prior to the Merger.

The Business Combination is accounted for as a reverse recapitalization in accordance with U.S. GAAP. Under this method of accounting, SNII was treated as the “acquired” company for financial reporting purposes.

In accounting for the Business Combination and after redemptions, net proceeds received by the Company totaled \$225.6 million. The table below shows the net proceeds from business combination and PIPE financing:

	Amount
Cash - SNII trust and cash (net of redemption)	\$ 77,769
Cash - PIPE	147,510
Cash - SNII operating account	325
Net Proceeds from Business Combination and PIPE	<u>\$ 225,604</u>

Transaction costs consist of direct legal, accounting and other fees relating to the consummation of the Merger. Legacy Rigetti transaction costs specific and directly attributable to the business combination totaled \$20.65 million. These costs were initially capitalized as incurred in deferred offering assets on the consolidated balance sheets. Upon the Closing, transaction costs related to the issuance of shares were recognized in stockholders’ equity (deficit) while costs associated with the Public Warrants, Private Warrants and Sponsor Vesting Shares were expensed in the consolidated statements of operations. Of the total transaction cost of \$20.65 million, \$19.75 million was recorded to additional paid-in capital as a reduction of proceeds and the remaining \$0.9 million was recognized in the consolidated statements of operations during the year ended December 31, 2022. Transaction cost paid through cash during the year ended December 31, 2022, equals \$16.7 million. For the year ended December 31, 2022, the Company also paid a one-time bonus to certain employees related to the business combination of \$2.1 million.

Table of Contents

The number of shares of Common Stock issued immediately following the consummation of the Business Combination was as follows:

Common Stock - SNII Class A, outstanding prior to Business Combination	34,500,000
Less: redemption of SNII Class A ordinary shares	<u>(22,915,538)</u>
Common Stock - SNII Class A ordinary shares	11,584,462
Common Stock - SNII Class B ordinary shares*	8,625,000
Shares issued in PIPE	<u>14,641,244</u>
Business Combination and PIPE shares	34,850,706
Common Stock - Legacy Rigetti**	18,221,069
Common Stock - exercise of Legacy Rigetti stock options immediately prior to the closing**	1,123,539
Common Stock - exercise of Legacy Rigetti warrants immediately prior to the closing**	2,234,408
Common Stock - upon conversion of Legacy Rigetti Series C preferred stock**	54,478,261
Common Stock - upon conversion of Legacy Rigetti Series C-1 preferred stock**	<u>2,902,302</u>
Total shares of Common Stock immediately after Business Combination	<u>113,810,285</u>

* Includes (i) 2,479,000 shares of Common Stock held by the Sponsor (the “Promote Sponsor Vesting Shares”) and (ii) 580,273 shares of Common Stock held by the Sponsor (“Sponsor Redemption-Based Vesting Shares”).

** (i) all outstanding shares of Legacy Rigetti Common Stock as of immediately prior to the Closing (including Legacy Rigetti Common Stock resulting from the Legacy Rigetti Preferred Stock Conversion), were exchanged at an exchange ratio of 0.7870 (the “Exchange Ratio”). (ii) the conversion ratio to Legacy Rigetti Common Stock for the Legacy Series C Preferred Stock was one-for-one and for Legacy Series C-1 Preferred Stock was eight-for-one.

4. INVESTMENTS

As of December 31, 2022, investment securities in the Company’s Trust Account consisted of \$36.3 million in money market funds, \$58.2 million in United States Treasury securities, \$3.6 million in corporate bonds and \$23.1 million in commercial paper. The money market funds are classified as cash equivalents in the consolidated balance sheets. The Company classifies its investments in fixed income securities as available-for-sale. Available-for-sale marketable securities are recorded at their estimated fair value. The amortized cost, gross unrealized holding loss included in other comprehensive income, and fair value of the investment securities on December 31, 2022 are presented in the table below. The Company did not hold investment securities at December 31, 2021.

	Amortized Cost as of December 31, 2022	Gross Unrealized Holding Loss	Fair Value as of December 31, 2022
Cash equivalents			
Money Market Funds	\$ 36,346	\$ —	\$ 36,346
Short-term investments:			
United States Treasury Securities	58,514	(304)	58,210
Corporate Bonds	3,581	(10)	3,571
Commercial Papers	23,142	—	23,142
	<u>\$ 121,583</u>	<u>\$ (314)</u>	<u>\$ 121,269</u>

[Table of Contents](#)

All of the Company's available-for-sale securities have final maturities of one year or less. The Company reviews the individual securities that have unrealized losses in its short-term investment portfolio on a regular basis. The Company evaluates whether it has the intention to sell any of these investments and whether it is more likely than not that it will be required to sell any of them before recovery of the amortized cost basis. Neither of these criteria were met as of December 31, 2022. The Company additionally evaluates whether the decline in fair value of the securities below their amortized cost basis is related to credit losses or other factors. Based on this evaluation, the Company determined that unrealized losses of the above securities were primarily attributable to changes in interest rates and non-credit-related factors. Accordingly, the Company determined that the unrealized losses were not other-than-temporary and that recording an impairment was therefore unnecessary for its short-term investments as of December 31, 2022. All of the Company's available-for-sale securities have been in an unrealized loss position for less than one year because they were all acquired in 2022. The Company did not have any available-for-sale securities as of December 31, 2021.

5. GOODWILL

The following table sets forth the change in the carrying amount of goodwill for the Company for the year ended December 31, 2022:

January 1, 2021	\$ 5,377
Change	<u>—</u>
December 31, 2021	5,377
Impairment charge	<u>(5,377)</u>
December 31, 2022	<u>\$ —</u>

On the Company's annual goodwill impairment testing date of November 1, 2022 management performed an impairment evaluation of goodwill after assessing qualitative factors that indicated a possible impairment of goodwill. Under the qualitative assessment, management considers relevant events and circumstances including but not limited to macroeconomic conditions, industry and market considerations, overall Company performance and events directly affecting the Company. It was noted during our assessment that the Company has experienced a sustained decline in stock price, however as of November 1, 2022 the Company determined that goodwill was not impaired. Subsequently in December 2022, the Company's stock price continued to decline, resulting in a triggering event to evaluate goodwill for impairment as of December 31, 2022. As a result, further quantitative analysis was conducted to determine the extent to which, if any, the Company's carrying value exceeded its fair value as of December 31, 2022. The quantitative analysis used fair value based on market capitalization adjusted for a control premium based on market comparable transactions. This quantitative analysis resulted in the Company's fair value being significantly below its carrying value, resulting in a non-cash goodwill impairment charge of \$5.4 million being recorded for the year ended December 31, 2022.

6. REVENUE RECOGNITION

The following tables depict the disaggregation of revenue according to the type of good or service and timing of transfer of goods or services for the year ended December 31, 2022, and the 11 months ended December 31, 2021:

	Year Ended December 31, 2022	11 Months Ended December 31, 2021
Type of Goods or Service		
Collaborative research and other professional services	\$ 9,917	\$ 5,849
Access to quantum computing systems	3,185	2,347
	<u>\$ 13,102</u>	<u>\$ 8,196</u>
Timing of Revenue Recognition		
Revenue recognized at a point in time	\$ —	\$ —
Revenue recognized over time	13,102	8,196
	<u>\$ 13,102</u>	<u>\$ 8,196</u>

Selected consolidated balance sheet line items that reflect accounts receivable, contract assets and liabilities as of December 31, 2022 and December 31, 2021 were as follows:

	December 31, 2022	December 31, 2021
Trade receivables	\$ 6,143	\$ 962
Unbilled receivables	\$ 92	\$ 581
Deferred revenue	\$ (961)	\$ (985)

Changes in deferred revenue from contracts with customers were as follows:

	Year Ended December 31, 2022	11 Months Ended December 31, 2021
Balance at beginning of period	\$ (985)	\$ (492)
Deferral of revenue	(545)	(904)
Recognition of deferred revenue	569	411
Balance at end of period	<u>\$ (961)</u>	<u>\$ (985)</u>

Remaining performance obligations represent the portion of the transaction price that has not yet been satisfied or achieved. As of December 31, 2022, the aggregate amount of the transaction price allocated to remaining performance obligations was approximately \$9.7 million. The Company expects to recognize estimated revenues related to performance obligations that are unsatisfied (or partially satisfied) in the amounts of approximately \$7.9 million during the year ended December 31, 2023, and \$1.8 million during the years ended December 31, 2024 and December 31, 2025.

Deferred Contract Acquisition and Fulfillment Costs—The Company has not identified any costs that are incremental to the acquisition of customer contracts that would be capitalized as deferred costs on the balance sheet in accordance with ASC 340-40. Incremental costs incurred to fulfill the Company's contracts that meet the capitalization criteria in ASC 340-40 have historically been immaterial. Accordingly, the Company has not capitalized any contract fulfillment costs as of December 31, 2022 and December 31, 2021.

7. SUPPLEMENTAL FINANCIAL STATEMENTS INFORMATION

Property and Equipment, Net

Property and equipment as of December 31, 2022 and December 31, 2021 are composed of the following:

	December 31, 2022	December 31, 2021
Quantum computing fridges	\$ 30,218	\$ 17,190
Process equipment	23,330	16,170
Leasehold improvements	7,561	4,297
IT Hardware	3,035	2,428
Furniture and other assets	1,246	1,246
Total property and equipment	\$ 65,390	\$ 41,330
Less: Accumulated depreciation and amortization	(25,860)	(18,832)
Property and equipment - net	<u>\$ 39,530</u>	<u>\$ 22,497</u>

As of December 31, 2022 and December 31, 2021, 98% of the total gross property and equipment was located in the United States, and 2% of the total gross property and equipment was located in the United Kingdom. Total depreciation and amortization expense for the year ended December 31, 2022 and 11 months ended December 31, 2021 was \$7.0 million and \$4.7 million, respectively.

Accrued Expenses and Other Current Liabilities

	December 31, 2022	December 31, 2021
Utilities	\$ 1,818	\$ —
Professional & subscription fees	2,044	1,377
Property and other taxes	1,161	571
Subcontractor cost	804	—
Payroll and other payroll costs	781	962
Property and equipment	639	—
Others	626	—
Accrued interest	314	248
Deferred offering costs	18	648
	<u>\$ 8,205</u>	<u>\$ 3,806</u>

8. LEASES

The Company leases a building, offices and equipment under various lease agreements with terms extending through 2029. Under the terms of the building and office leases the Company bears the costs for certain insurance, property taxes and maintenance, and the lease agreements provide for increasing rental payments at fixed intervals.

Components of lease costs, the weighted average remaining lease term and weighted average discount rate were as follows as of and for the year ended December 31, 2022:

	December 31, 2022
Lease cost	
Operating lease cost	\$ 2,513
Short-term lease cost	36
Sub-lease income	(194)
Total lease cost	<u>\$ 2,355</u>

[Table of Contents](#)

	Year Ended December 31, 2022
Cash paid for amounts included in the measurement of lease liabilities:	
Operating cash flows from operating leases	\$2,128
Right-of-use assets obtained in exchange for new and modified operating lease liabilities	\$4,892
Weighted average remaining lease term - operating leases	5.87 years
Weighted average discount rate - operating leases	7.93%

Operating lease liabilities are based on the net present value of the remaining lease payments over the remaining lease term. In determining the net present value of its lease payments, the Company used an estimated incremental borrowing rate that is applicable to the Company based on the information available at the later of the lease commencement date, lease modification date or the date of Adoption of Topic 842. As of December 31, 2022, the maturities of the Company's operating lease liabilities were as follows:

Year	
2023	\$ 2,422
2024	2,288
2025	2,198
2026	1,524
2027	1,566
Thereafter	<u>2,841</u>
Total lease payments	12,839
Less: Imputed interest	<u>(2,636)</u>
Present value of lease liabilities	\$10,203
Operating lease liabilities, current	\$ 2,345
Operating lease liabilities, noncurrent	<u>7,858</u>
	<u>\$10,203</u>

Prior to the adoption of Topic 842 on January 1, 2022, the Company accounted for its leases under Topic 840. The Company recognized rent expense on a straight-line basis over the lease term, taking into account adjustments for provisions such as free or escalating monthly rental payments or deferred payment terms such as rent holidays that defer the commencement date of required payments. The Company recorded the difference between cash rent payments and the recognition of rent expense as deferred rent. Rent expense under the Company's operating leases was \$1.5 million for the 11 months ended December 31, 2021.

Future minimum lease payments under non-cancelable operating leases as of December 31, 2021 are as follows:

Year ending December 31,	
2022	\$1,808
2023	901
2024	928
2025	956
2026	81
Total minimum future lease payments	<u>\$4,674</u>

9. COMMITMENTS AND CONTINGENCIES

The Company is periodically involved in legal proceedings, legal actions and claims arising in the normal course of business. Management believes that the outcome of such legal proceedings, legal actions and claims will not have a significant adverse effect on the Company's financial position, results of operations or cash flows.

10. DEBT

In March 2021, the Company entered into an agreement (the "Loan Agreement") with Trinity Capital Inc. ("Trinity") to secure a debt commitment of \$12.0 million (the "Tranche A") which was drawn at the closing. The term loan is collateralized by a first-priority, senior secured interest in substantially all of the Company's assets. In conjunction with the Loan Agreement, the Company issued Trinity a warrant to purchase shares of Common Stock (the "Trinity Warrants") which is recorded at fair value using the Black-Scholes model, see Note 15 for the fair value assumptions.

The Loan Agreement contains customary representations, warranties and covenants; however, the debt agreement does not include any financial covenants. In May 2021, the debt agreement was modified to increase the overall debt commitment by \$15.0 million (the "Tranche B" or the "Amendment") and \$8.0 million of the additional commitment was drawn at the closing and the remaining commitment of \$7.0 million was available at the Company's option at any time through March 10, 2022 subject to certain conditions. The Company drew the \$7.0 million in November 2021. In conjunction with the Amendment, the Company cancelled the Initial Warrants and issued 995,099 (783,129 shares post conversion upon the closing of the Business Combination) warrant shares to purchase the Common Stock which was an incremental cost allocated between Tranche A and Tranche B, see Note 13 for further information on these warrants. The Amendment to the debt agreement was considered a modification for accounting purposes. The Company capitalized \$2.8 million of debt issuance costs which consist of incremental costs incurred for the lenders and third-party legal firms as well as the fair value of the warrant issued in conjunction with the term loan.

Under the Amendment, the maturity date was modified to be the date equal to 48 months from the first payment date of each specific cash advance. Subject to an interest only period of 19 months following each specific cash advance date, the term loan incurs interest at a rate of the greater of 11% or the US Prime Rate plus 7.50% per annum, payable monthly. The Term Loan includes certain negative covenants, primarily consisting of restrictions on the Company's ability to incur indebtedness, pay dividends, execute fundamental change transactions, and other specified actions.

In January 2022, the debt agreement was modified to increase the overall debt commitment by \$5.0 million (the "Tranche C" or the "Third Amendment") which was drawn on January 27, 2022. Subject to an interest only period of 19 months, Tranche C incurs interest at a rate of the greater of 11% and the US Prime Rate plus 7.50% per annum, payable monthly, until the maturity date, February 1, 2026. Other modifications per the amendment included an extension of the requirement to raise an additional \$75 million of equity until April 1, 2022, and a defined exit fee for the additional \$5.0 million to be at 20% of the advanced funds under the amendment. The company met the requirement to raise additional equity of \$75 million through the business combination mentioned in Note 3. The Company paid an exit fee of \$1.0 million which is 20% of the Tranche C amount upon the consummation of the merger. The exit fee was capitalized as a debt issuance cost and is amortized using the effective interest method over the life of Tranche C. The exit fee is not applicable to Tranche A and Tranche B. In conjunction with the amendment, the Company also guaranteed payment of all monetary amounts owed and performance of all covenants, obligations and liabilities.

In addition, the Company is required to pay a final payment fee equal to 2.75% of the aggregate amount of all term loan advances. The final payment fee is being accreted and amortized into interest expense using the effective interest rate method over the term of the loan. The effective interest was between 20.75% – 26.83% for all tranches of the debt as of December 31, 2022.

[Table of Contents](#)

The fair value of the debt is classified as Level 2. Given the maturity and variable interest rate on the debt, the book value approximates its fair value. Long term debt and the unamortized discount balances are as follows:

	December 31, 2022	December 31, 2021
Outstanding principal amount	\$ 30,709	\$ 27,000
Add: accreted liability of final payment fee	407	125
Less: unamortized debt discount, long term	(990)	(1,618)
Less: current portion of long term debt-principal	(9,491)	(1,291)
Debt—net of current portion	<u>\$ 20,635</u>	<u>\$ 24,216</u>
Current portion of long term debt - principal	\$ 9,491	\$ 1,291
Less: current portion of unamortized debt discount	(1,188)	(716)
Debt—current portion	<u>\$ 8,303</u>	<u>\$ 575</u>

During the year ended December 31, 2022, the Company recorded interest expense of \$5.3 million, which includes the accretion of the end of term liability of \$0.3 million, the amortization of commitment fee asset of \$0.3 million and the amortization of debt issuance cost of \$0.9 million, respectively. The unamortized debt discount of \$2.2 million as of December 31, 2022 is offset against the carrying value of the term loan in the consolidated balance sheet.

During the 11 months ended December 31, 2021, the Company recorded interest expense of \$2.5 million, which includes the accretion of the end of term liability of \$0.1 million, the amortization of commitment fee asset of \$0.1 million and the amortization of debt issuance cost of \$0.5 million. The unamortized debt discount of \$2.3 million as of December 31, 2021 is offset against the carrying value of the term loan in the consolidated balance sheet.

Scheduled principal payments on total outstanding debt as of December 31, 2022 are as follows:

Year ending December 31,	
2023	\$ 9,491
2024	13,007
2025	8,020
2026	191
	<u>\$ 30,709</u>

Scheduled principal payments on total outstanding debt as of December 31, 2021 are as follows:

Year ending December 31,	
2022	\$ 702
2023	8,682
2024	11,008
2025	6,608
2026	—
	<u>\$ 27,000</u>

11. REDEEMABLE CONVERTIBLE PREFERRED STOCK

Legacy Rigetti was authorized to issue 73,389,000 shares of Series C preferred stock and 62,537,577 shares of Series C-1 Preferred Stock with a par value of \$0.000001 per share for each class of preferred Stock. Legacy Rigetti's board of directors is authorized to fix the voting rights, if any, designations, powers, preferences, the relative, participating, option or other special rights and any qualifications, limitations and restrictions thereof, applicable to the shares of each series. Immediately prior to the effective time of the Business Combination (Note 3), all Legacy Rigetti preferred stock outstanding converted into shares of Common Stock of Legacy Rigetti (the shares in this note do not factor in the exchange ratio).

12. COMMON STOCK

As discussed in Note 3, on March 2, 2022, the Company consummated a Business Combination which has been accounted for as a reverse recapitalization. Pursuant to the certificate of incorporation as amended on March 2, 2022, the Company is authorized to issue 1,000,000,000 shares of Common Stock and 10,000,000 shares of Preferred Stock. The holders of shares of Common Stock are entitled to one vote for each share of Common Stock held. The Preferred Stock is non-voting. No shares of Preferred Stock were issued and outstanding as of December 31, 2022.

In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company, and after payment to the holders of shares of Preferred Stock of their liquidation preferences, the holders of the Common Stock are entitled to the entire remaining assets of the Company on a pro rata basis.

As a result of the Business Combination (see Note 3), the Company has retroactively adjusted the warrants and stock-based awards outstanding prior to March 2, 2022 to give effect to the Exchange Ratio used to determine the number of shares of Common Stock into which they were converted.

As of December 31, 2022, the Company has reserved the following shares of Common Stock for issuance upon the conversion, exercise or vesting of the underlying instruments:

	<u>Common Stock</u>
Common Stock Warrants	17,243,811
Stock-Based Awards - RSUs Outstanding	11,332,591
Stock-Based Awards - Options Outstanding	8,845,903
Total	<u>37,422,305</u>

Common Stock Purchase Agreement

The Company entered into a Common Stock Purchase Agreement with B. Riley Principal Capital II, LLC ("B. Riley") on August 11, 2022 pursuant to which the Company may issue and sell to B. Riley the lesser of i) \$75.0 million in aggregate gross purchase price of newly issued shares of the Company's Common Stock or ii) an amount not to exceed 23,648,889 shares of Common Stock (such number of shares equal to approximately 19.99% of the aggregate number of shares of Common Stock issued and outstanding immediately prior to the execution of the agreement and inclusive of 171,008 shares of Common Stock issued to B. Riley on August 11, 2022 as consideration for entering into the Common Stock Purchase Agreement).

In consideration of the parties entering into the foregoing agreement, the parties also entered into a Registration Rights Agreement on August 11, 2022 pursuant to which the Company provides B. Riley with registration rights with respect to such Common Stock and pursuant to which the Company has filed a registration statement covering the resale of such Common Stock.

Upon the initial satisfaction of the conditions to B. Riley's purchase obligation set forth in the Purchase Agreement, on September 14, 2022 (the "Commencement Date") the Company will have the right, but not the obligation, from time to time at the Company's sole discretion over the 24-month period from and after the

[Table of Contents](#)

Commencement, to direct B. Riley to purchase a specified amount of shares not to exceed the lesser of (i) 1,000,000 shares of Common Stock and (ii) 20% of the total aggregate number (or volume) of shares of Common Stock traded on The Nasdaq Capital Market (“Nasdaq”) during the applicable period beginning at the official open (or “commencement”) of the regular trading session on the applicable purchase date for such purchase and ending at such time that the total aggregate volume of shares of common stock traded on Nasdaq reaches the Purchase Share Volume Maximum (as defined herein) for such purchase (as applicable) (such period for each purchase, the “Purchase Valuation Period”). “Purchase Share Volume Maximum” means, with respect to a purchase made pursuant to the Purchase Agreement, the number of shares of Common Stock equal to the quotient obtained by dividing the (i) total number of shares of Common Stock to be purchased by B. Riley in the relevant purchase (the “Purchase Share Amount”), by (ii) 0.20 (subject to certain adjustments). The Company did not identify any feature that needs to be bifurcated and recorded as a derivative within the Purchase Agreement.

The Company recorded \$0.7 million of additional paid-in capital with a corresponding entry to the deferred offering cost asset in the accompanying consolidated balance sheet as of December 31, 2022 with respect to the fair value of the 171,008 common stock commitment shares issued to B. Riley which will be offset against future proceeds from the sale of the Company’s common stock under the Purchase Agreement. The Company did not issue or sell any shares to B. Riley under the Purchase Agreement during the year ended December 31, 2022 other than the 171,008 shares issued as consideration for entering into the Purchase Agreement.

13. WARRANTS

As a result of the Business Combination (see Note 3), the Company has retroactively adjusted the number and corresponding strike price of Rigetti warrants outstanding prior to March 2, 2022, the date of the Business Combination, to give effect to the Exchange Ratio used to determine the number of shares of Common Stock into which they were converted.

Liability Classified Warrants

Public Warrants

Each Public Warrant entitles the holder to the right to purchase one share of Common Stock at an exercise price of \$11.50 per share. No fractional shares will be issued upon exercise of the Public Warrants. The Company may elect to redeem the Public Warrants subject to certain conditions, in whole and not in part, at a price of \$0.01 per Public Warrant if (i) 30 days’ prior written notice of redemption is provided to the holders, and (ii) the last reported sale price of the Company’s Common Stock equals or exceeds \$18.00 per share (as adjusted for stock splits, stock dividends, reorganizations, recapitalizations and the like) for any 20 trading days within a 30-trading day period ending on the third business day prior to the date on which the Company sends the notice of redemption to the warrant holders. Upon issuance of a redemption notice by the Company, the warrant holders have a period of 30 days to exercise for cash, or on a cashless basis. As of December 31, 2022, there were 8,625,000 Public Warrants issued and outstanding (Refer to Note 15 for fair value measurement).

Private Warrants

The Private Warrants may not be redeemed by the Company so long as the Private Warrants are held by the initial purchasers, or such purchasers’ permitted transferees. The Private Warrants have terms and provisions identical to those of the Public Warrants, including as to exercise price, exercisability and exercise period, except if the Private Warrants are held by someone other than the initial purchasers’ permitted transferees, then the Private Warrants are redeemable by the Company and exercisable by such holders on the same basis as the Public Warrants. On August 18, 2022, the Private Placement Warrants were transferred from the initial purchasers to permitted transferees and remain unredeemable by the Company as of December 31, 2022.

[Table of Contents](#)

The fair value of the Private Warrant was measured using the Black Scholes model approach. Significant inputs into the respective models at March 2, 2022 (the initial recognition) and December 31, 2022 are as follows:

Valuation Assumptions	December 31, 2022	Initial Recognition on March 2, 2022
Stock Price	\$0.73	\$9.43
Strike Price	\$11.50	\$11.50
Volatility (annual)	109.26%	30.66%
Risk-free rate	4.04%	1.74%
Estimated time to expiration (years)	4.172	5.000
Dividend yield	—%	—%

Trinity Warrants

The Trinity Warrants were issued in March of 2021 for the purchase of 313,252 shares of Common Stock, and additional warrants to purchase 469,877 shares of Common Stock were issued in connection with the Tranche B Amendment, see Note 10. Therefore, there were total of 783,129 Common Stock warrants issued in conjunction with the Loan and Security Agreement in 2021. The Company utilized a Black-Scholes model to determine the grant date fair value of the warrants which was approximately \$2.7 million and was recorded as a debt issuance cost. The outstanding Common Stock warrants were subsequently remeasured at each reporting period using the Black-Scholes models with changes recorded as a component of other income in the Company's consolidated statement of operations.

The liability related to the Trinity Warrants was \$6.4 million as of June 2, 2022, at which time all 783,129 warrants outstanding were exercised and the fair value of the warrant liability was reclassified to equity. The Company recorded a loss for the change in the fair value of the warrant liability in the consolidated statements of operations for the year ended December 31, 2022 and the 11 months ended December 31, 2021, of \$2.0 million and \$1.7 million, respectively.

The warrant issued in conjunction with the Loan and Security Agreement was classified as a liability under ASC 480, "Distinguishing Liabilities from Equity". See Deferred Financing Cost disclosure at Note 2 Summary of Significant Accounting Policies.

Significant inputs into the Black Scholes model used to value the Trinity Warrant liabilities at June 2, 2022, the exercise date, are as follows:

Valuation Assumptions - Trinity Warrant Liability	June 2, 2022
Stock price	\$8.23
Strike price	\$0.27
Volatility (annual)	105.10%
Risk-free rate	2.94%
Estimated time to expiration (years)	9.000
Dividend yield	—%

Equity Classified Warrants

Series C Preferred Stock Financing Warrants

In conjunction with a prior Series C Preferred Stock Financing the Company issued a total of 5,248,183 Warrants to purchase Class A Common Stock to the Series C investors. The Warrants have a \$0.01 exercise price per share and have a 10-year term to expiration. The Warrants can be exercised for cash or on a cashless basis. The Company determined that the Warrants met the requirements for equity classification under ASC 480 and ASC 815. The Company estimated the fair value of the Warrants using the Black-Scholes model and allocated approximately \$1.2 million in proceeds from the Series C Preferred Stock to the value of the Warrants on a relative fair value basis, which was recorded to additional paid in capital.

[Table of Contents](#)

Customer Warrants

In February 2020, the Company issued a Warrant to purchase 2,680,607 shares of Class A Common Stock to a customer in conjunction with a revenue arrangement (the “Customer Warrants”). The Customer Warrants have a \$1.152 exercise price per share and have a 10-year term to expiration. The Warrants vest upon the achievement of certain performance conditions (i.e., sales milestones) defined in the agreement, and upon a change of control, either 50% or 100% of the then unvested Customer Warrants will become fully vested, dependent on the acquiring party in the change of control transaction. The Warrants can be exercised for cash or on a cashless basis.

The Company followed the guidance in ASC 718 and ASC 606 for the accounting of non-cash consideration payable to a customer. The Company determined that the Customer Warrants met the requirements for equity classification under ASC 718 and measured the Customer Warrants based on their grant date fair value, estimated to be \$0.2 million. The Company recorded this amount as a deferred asset and additional paid in capital as of the issuance date, as the Company believes it is probable that all performance conditions (i.e., sales milestones) in the Customer Warrants will be met.

The vesting status of the Customer Warrant is as follows at December 31, 2022 and December 31, 2021:

	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Vested Customer warrants	1,340,297	1,072,237
Unvested Customer warrants	1,340,310	1,608,370
	<u>2,680,607</u>	<u>2,680,607</u>

14. FORWARD WARRANT AGREEMENT

In connection with the execution of the Merger Agreement in October 2021, Rigetti entered into a warrant subscription agreement (“Forward Warrant Agreement”) with a strategic partner, Ampere Computing LLC (“Ampere”) for the purchase of a warrant for an aggregate purchase price (including amounts from exercise) of \$10.0 million. The Forward Warrant Agreement provides for the issuance of a warrant for the purchase of an aggregate of 1,000,000 shares of Common Stock at an exercise price of \$0.0001. The purchase of the warrant was conditioned upon, among other things, the consummation of the Business Combination and the entry into a collaboration agreement between Rigetti and Ampere. The parties entered into the collaboration agreement in January 2022. Ampere was required to pay \$5.0 million to Rigetti no later than the later of (i) the Closing and (ii) June 30, 2022.

On June 30, 2022, pursuant to the Warrant Subscription Agreement, the Company issued the warrant to Ampere upon receipt of an aggregate of \$5.0 million (including the exercise price), and upon such payment and issuance, 500,000 shares of the Company’s Common Stock vested under the warrant and were immediately exercised by Ampere pursuant to the terms of the warrant. Ampere is required to pay an additional \$5.0 million to Rigetti no later than the closing date of the listing of Ampere’s capital stock, provided that if the listing has not occurred by the second anniversary of the Warrant Subscription Agreement, Ampere is not obligated to make the additional payment. Upon the payment of such additional amounts, the warrant will vest and be exercisable with respect to the remaining 500,000 shares underlying the warrant. The Warrant Subscription Agreement further provides that the Company will use commercially reasonable efforts to file a registration statement to register the resale of the remaining shares underlying the warrant. The Company filed a registration statement registering the resale of the initial 500,000 shares issued under the warrant during the year ended December 31, 2022.

The Company evaluated the Forward Warrant Agreement as a derivative in conjunction with the guidance of ASC 480, “Distinguishing Liabilities from Equity”. The Company calculated the fair value of the Forward Warrant Agreement by using the Forward Contract Pricing methodology at inception and at December 31, 2022. The fair value of the Forward Warrant Agreement was estimated based on the following key inputs and assumptions 1)

[Table of Contents](#)

Assumed holding period 2) Related risk-free rate and 3) Likelihood of the outcome of the various contingencies outlined below. Based on these inputs and assumption, the Company calculated the fair value of the Forward Warrant Agreement to be a \$2.2 million derivative asset and a (\$0.2 million) derivative liability at December 31, 2022 and December 31, 2021, respectively. The Company has included the derivative asset as a forward contract asset and the derivative liability separately in other liabilities (current) on the balance sheet line in the accompanying consolidated balance sheets as of December 31, 2022 and December 31, 2021, respectively. The change in fair value is recorded as part of the general and administrative operating activities in the Company's consolidated statements of operations. The following table represents key valuation assumptions as of the year ended December 31, 2022 and 11 months ended December 31, 2021:

<u>Valuation Assumptions</u>	<u>December 31, 2022</u>	<u>December 31, 2021</u>
Holding period (in years)	0.767	0.5-1.13
Risk free rate	4.69%	0.19%-0.43%
Probability of occurring the contingency	50%	50%-100%
Underlying value per share	\$0.73	\$10.29

15. FAIR VALUE MEASUREMENTS

The fair value measurements of financial assets and liabilities that are measured at fair value at December 31, 2022 and December 31, 2021 are as follows:

	<u>December 31, 2022</u>		
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Assets:			
Cash equivalents:			
Money Market Funds	\$36,346	\$ —	\$ —

Forward warrant agreement	—	—	230
Total Liabilities	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 4,585</u>

As of December 31, 2022, the Company has recorded the following financial instruments subject to fair value measurements: 1) Derivative warrant liabilities—Public Warrants liability and Private Warrants, 2) Forward Warrant Agreement, and 3) Earnout liability.

[Table of Contents](#)

The Company also has long-term debt and a line of credit that provides for variable interest, and therefore, the carrying value approximates the fair value. The carrying values as of December 31, 2022 and December 31, 2021, represent the original principal amounts borrowed less principal payments and debt issuance costs.

The fair value of the Public Warrants has been measured based on the observable listed prices for such warrants, a Level 1 measurement. The Company's money market funds and U.S. Treasury securities are classified within Level I due to the highly liquid nature of these assets with quoted prices in active markets. The investments in available-for-sale securities (i.e., commercial paper and corporate debt securities) and corporate debt issued by the Company are classified within Level II. The fair value of the Company's Level II financial assets and liabilities is determined by using inputs based on quoted market prices for similar instruments. All other financial instruments are classified as Level 3 liabilities as they all include unobservable inputs.

The Private Warrants were initially measured at fair value using a Black Scholes model. The Company estimated the fair value of the Forward Warrant Agreement using a forward analysis with unobservable inputs which included selected risk-free rate and probability outcomes. The Company has further discussed the key aspects of the fair value measurements described above in Notes 13 and 14 to the financial statements.

The aggregate fair value of the Sponsor Vesting Shares on the Closing date was estimated using a Monte Carlo simulation model. The Company has further discussed the key aspect of the valuation inputs in Note 2 significant accounting policy for Sponsor Earn-Out Liability.

As of December 31, 2021, the Company recorded a derivative warrant liability for the Trinity Warrants at fair value using a Black-Scholes option model with unobservable inputs including volatility. The Company estimates the volatility of its ordinary share warrants based on implied volatility from the Company's traded warrants and from historical volatility of select peer company's ordinary shares that matches the expected remaining life of the warrants. On June 2, 2022, all outstanding Trinity Warrants were exercised into shares of the Company's Common Stock

There have been no changes in fair value measurement techniques (other than the change in valuation assumptions described in Note 1) during the year ended December 31, 2022. There were no transfers between Level 1 or Level 2, or transfers in or out of Level 3 of the fair value hierarchy during the year end December 31, 2022. The fair value estimates are based on pertinent information available to management as of December 31, 2022 and December 31, 2021. Although management is not aware of any factors, other than those noted above, that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for the purpose of these financial statements. Current estimates of fair value may differ from the amounts presented.

A summary of the changes in the fair value of the Company's Level 3 financial instruments as of December 31, 2022 and December 31, 2021 are as follows:

	<u>Derivative warrant liability - Trinity Warrants</u>	<u>Derivative warrant liability - Private Warrants</u>	<u>Forward Warrant Agreement</u>	<u>Earn-out liability</u>
Balance - January 31, 2021	\$ —	\$ —	\$ —	\$ —
Issuance	2,691	—	400	—
Change in fair values	1,664	—	(170)	—
Balance - December 31, 2021	<u>\$ 4,355</u>	<u>\$ —</u>	<u>\$ 230</u>	<u>\$ —</u>
Initial measurement on March 2, 2022 upon Business Combination (Note 3)		9,612		20,413
Change in fair values	2,015	(8,544)	(5,764)	(19,207)
Exercise of warrants	(6,370)	—	3,305	—
Balance - December 31, 2022	<u>\$ —</u>	<u>\$ 1,068</u>	<u>\$ (2,229)</u>	<u>\$ 1,206</u>

16. EQUITY PLANS

2013 Equity Incentive Plan

In 2013, the Company adopted the 2013 Plan which provides for the grant of qualified incentive stock options (“ISO”) and nonqualified stock options (“NSO”), restricted stock, restricted stock units (“RSU”) or other awards to the Company’s employees, officers, directors, advisors, and outside consultants. After the Closing Date and consummation of the Business Combination effective March 2, 2022, no additional awards were issued under the 2013 Plan. Awards outstanding under the 2013 Plan will continue to be governed by such plan; however, the Company will not grant any further awards under the 2013 Plan.

2022 Equity Incentive Plan

In connection with the Business Combination (Note 3), the shareholders approved the Rigetti Computing, Inc. 2022 Equity Incentive Plan (the “2022 Plan”) in February, 2022, which became effective immediately upon the Closing Date. The 2022 Plan provides for the grant of ISOs, NSOs, stock appreciation rights, restricted stock awards (“RSA”), restricted stock unit awards, performance awards and other forms of awards to employees, directors, and consultants, including employees and consultants of the Company’s affiliates. The aggregate number of shares of common stock reserved for issuance under the 2022 Plan is 18,332,215 shares as of December 31, 2022. As of December 31, 2022, 4,748,116 shares were available for future issuance under the 2022 Plan. The number of shares reserved for issuance under the 2022 Plan will automatically increase on January 1st of each year for a period of nine years commencing on January 1, 2023 and ending on (and including) January 1, 2032, in an amount equal to 5% of the common stock of all classes outstanding on December 31 of the preceding year; provided, however, that the board of directors of the Company may act prior to January 1st of a given year to provide that the increase for such year will be a lesser number of shares of Common Stock.

Stock Options

A summary of activity related to stock option is summarized as below:

	<u>Number of Options</u>	<u>Weighted-Average Exercise Price</u>	<u>Weighted-Average Contractual Life (in years)</u>	<u>Aggregate Intrinsic Value</u>
Outstanding - December 31, 2021	11,468,275	\$ 0.36		
Granted	1,750,000	\$ 0.96		
Exercised	(2,768,568)	\$ 0.27		
Forfeited and expired	(1,603,804)	\$ 0.27		
Outstanding - December 31, 2022	<u>8,845,903</u>	\$ 0.38	7.2	\$ 3,103
Exercisable - December 31, 2022	<u>5,464,027</u>	\$ 0.40	7.2	\$ 1,780

On December 12, 2022 the Company granted to the CEO an equity award (“CEO award”) under its 2022 Plan that consisted of options to purchase a total of 1,750,000 shares of its common stock with an exercise price of \$0.96 per share. Of the total stock options granted to the CEO, 1,250,000 have time-based vesting over 3 years and the remaining 500,000 have market-based vesting conditions. Compensation expense for the CEO award for the year ending December 31, 2022 was insignificant.

The weighted-average grant date fair value of options granted during the twelve months ended December 31, 2022 and 11 months ended December 31, 2021 was \$0.81 and \$3.43 respectively. The total intrinsic value of options exercised during the twelve months ended December 31, 2022 and 11 months ended December 31, 2021 is \$9.9 million and \$5.7 million, respectively.

As of December 31, 2022, there was \$2.4 million of unrecognized compensation cost related to non-vested stock options granted under the 2013 and 2022 Plan, which is expected to be recognized over a weighted-average period of approximately 1.96 years.

[Table of Contents](#)

Restricted Stock Units

A summary of activity related to RSUs is summarized as below:

	RSUs	Weighted Average Fair Value Per Share
Non-vested shares at December 31, 2021	5,388,455	\$ 3.93
Granted	17,782,607	\$ 4.92
Vested	(7,007,789)	\$ 4.99
Forfeited	(4,830,682)	\$ 5.03
Non-vested shares at December 31, 2022	<u>11,332,591</u>	\$ 4.36

On March 2, 2022, the performance condition of all outstanding RSUs was met due to the closing of the Business Combination. As a result, the Company recorded a cumulative catch-up compensation expense for the vesting period that was satisfied as of March 2, 2022 and continues amortizing compensation expenses for unvested RSUs over their remaining vesting period.

Total fair value of the RSUs vested during the twelve months ending December 31, 2022 and 11 months ended December 31, 2021 was \$35.0 million and \$0 respectively.

Stock-based compensation expense related to RSUs granted to employees was \$42.7 million and \$0 for the twelve months ended December 31, 2022 and 11 months ended December 31, 2021, respectively. As of December 31, 2022, the unrecognized compensation expense related to unvested RSUs was approximately \$41.9 million which is expected to be recognized over a weighted-average period of approximately 2.85 years.

Restricted Stock Awards

During the twelve months ended December 31, 2022, 120,000 restricted stock awards (“RSAs”) were issued and vested immediately on the grant date as part of transaction bonuses in recognition of efforts in connection with the Business Combination. The total compensation expense related to RSAs was \$0.6 million for the twelve months ended December 31, 2022.

The table below summarizes the total stock-based compensation expenses for the year ended December 31, 2022 and 11 months ended December 31, 2021:

	Year Ended December 31, 2022	11 Months Ended December 31, 2021
Research and development	\$ 14,092	\$ 975
Selling and marketing expenses	2,109	106
General and administrative expenses	28,611	684
Total stock-based compensation expenses	<u>\$ 44,812</u>	<u>\$ 1,765</u>

[Table of Contents](#)

Fair Value of Common Stock and Options

The fair value of each option award is estimated on the date of grant using the Black-Scholes option-pricing model that uses the assumptions noted in the table below. Expected volatility for the Company's Common Stock was determined based on an average of the historical volatility of a peer group of similar public companies. The expected term of options granted was calculated using the simplified method, which represents the average of the contractual term of the option and the weighted-average vesting period of the option. The Company uses the simplified method because it does not have sufficient historical option exercise data to provide a reasonable basis upon which to estimate expected term. The assumed dividend yield is based upon the Company's expectation of not paying dividends in the foreseeable future. The risk-free rate is based upon the U.S. Treasury yield curve in effect at the time of grant for the period equivalent to the expected life of the option.

In determining the exercise prices for options granted, the Company's board of directors has considered the fair value of the Common Stock as of the grant date. Before the Company's common stock was publicly traded, the fair value of the Common Stock has been determined by the board of directors at each award grant date based upon a variety of factors, including the results obtained from an independent third-party valuation, the Company's financial position and historical financial performance, the status of technological developments within the Company's products, the composition and ability of the current engineering and management team, an evaluation or benchmark of the Company's competition, the current business climate in the marketplace, the illiquid nature of the Common Stock, arm's-length sales of the Company's capital stock (including redeemable convertible preferred stock), the effect of the rights and preferences of the preferred shareholders, and the prospects of a liquidity event, among others.

Stock options issued in 2022, including the options that are based on market conditions, did not have significant impact on the stock-based compensation expense during the year ended December 31, 2022. The range of assumptions used in the Black-Scholes option-pricing model for time based options issued to employees and in Monte Carlo simulation model for market based options during the 12 months ended December 31, 2022 and 11 months ended December 31, 2021 are as follows:

	12 Months ended December 31, 2022		11 Months ended December 31, 2021
	Time based vesting awards	Market based vesting awards	
Expected volatility	150%	150%	46.8%
Weighted-average risk-free interest rate	3.77%	3.76%	1.07%
Expected dividend yield	0%	0%	0%
Expected term (in years)	5.85	5.0	6.1 years
Exercise price/Stock price	\$ 0.96	\$ 0.96	\$ 0.21

17. NET LOSS PER SHARE

As a result of the Business Combination (see Note 3), the Company has retroactively adjusted the weighted average shares outstanding prior to March 2, 2022 to give effect to the Exchange Ratio used to determine the number of shares of Common Stock into which they were converted.

Table of Contents

The following table sets forth the computation of basic and diluted net loss per share of Common Stock for the year ended December 31, 2022 and 11 months ended December 31, 2021:

	Year Ended December 31, 2022	11 Months ended December 31, 2021
Net loss	\$ (71,521)	\$ (38,241)
Basic and diluted shares		
Weighted-average Class A Common Stock outstanding	102,300,852	23,337,127
Loss per share for Class A Common Stock		
— Basic	\$ (0.70)	\$ (1.64)
— Diluted	\$ (0.70)	\$ (1.64)

There are 3,059,273 shares of contingently issuable Common Stock pursuant to the earn-out arrangement that were not included in the computation of basic net loss per share since the contingencies for the issuance of these shares have not been met as of December 31, 2022. The weighted-average common shares outstanding for the twelve months ended December 31, 2022 and December 31, 2021 include 2,541,856 and 5,116,058 weighted-average shares of warrants with an exercise price of \$0.01, respectively.

The Company's potential dilutive securities, which include stock options, restricted stock units, convertible preferred stock and warrants have been excluded from the computation of diluted net loss per share as the effect would be anti-dilutive. Therefore, the weighted average number of common shares outstanding used to calculate both basic and diluted net loss per share is the same.

The Company excluded the following potential common shares from the computation of diluted net loss per share as of December 31, 2022 and December 31, 2021:

	December 31, 2022	December 31, 2021
Convertible Series C-1 Preferred Stock	—	23,218,320
Convertible Series C Preferred Stock	—	54,478,033
Common Stock Warrants	14,444,127	1,822,319
Stock Options	8,845,903	11,468,227
Restricted Stock Units	11,332,591	—
	<u>34,622,621</u>	<u>90,986,899</u>

- (1) The number of outstanding shares as of December 31, 2021 have been retrospectively adjusted to reflect the Exchange Ratio.
- (2) The number of outstanding warrants as of December 31, 2022 and December 31, 2021 does not include 1,340,310 and 1,608,359 shares, respectively, of Unvested Customer Warrants.

18. INCOME TAXES

The following table presents domestic and foreign components of loss before income taxes for the year ended December 31, 2022 and 11 months ended December 31, 2021:

	Year Ended December 31, 2022	11 Months ended December 31, 2021
Domestic	\$ (67,677)	\$ (36,787)
Foreign	(3,844)	(1,454)
	<u>\$ (71,521)</u>	<u>\$ (38,241)</u>

[Table of Contents](#)

The Company did not pay any income taxes for the year ended December 31, 2022 and 11 months ended December 31, 2021.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred income tax assets and liabilities as of December 31, 2022 and December 31, 2021, are as follows:

	<u>December 31,</u> <u>2022</u>	<u>December 31,</u> <u>2021</u>
Deferred tax assets:		
Net operating loss carryforwards	\$ 61,313	\$ 46,553
Accruals and reserves	160	147
Stock-based compensation	5,233	744
Research and development credits	11	11
Intangible assets	11,509	32
ROU liability	2,507	—
Gross deferred assets	<u>80,733</u>	<u>47,487</u>
Deferred tax liabilities:		
ROU asset	(2,289)	—
Depreciation and amortization	(2,063)	(1,420)
Total deferred tax liabilities	<u>(4,352)</u>	<u>(1,420)</u>
Total net deferred tax assets	76,381	46,067
Valuation allowance	(76,381)	(46,067)
Net deferred tax assets	<u>\$ —</u>	<u>\$ —</u>

The effective tax rate differs from the statutory rate, primarily due to the Company's history of incurring losses which have not been benefited and other permanent differences.

<u>Component</u>	<u>Year Ended</u> <u>December 31, 2022</u> <u>Rate Impact</u>	<u>11 Months Ended</u> <u>December 31, 2021</u> <u>Rate Impact</u>
Total pre-tax book income	21%	21%
State and local income taxes	11%	0%
Fair market value adjustments	14%	0%
Non-deductible executive compensation	(4)%	0%
Goodwill impairment	(2)%	0%
Transaction costs	3%	0%
Other	0%	0%
Change in valuation allowance	(42)%	(21)%
Total:	<u>0%</u>	<u>0%</u>

Realization of deferred tax assets is dependent upon future earnings, if any, the timing and amount of which are uncertain. Accordingly, the net U.S. federal and state deferred tax assets have been fully offset by a valuation allowance. The net change in the total valuation allowance was an increase of approximately \$30.3 million and \$8.0 million for the year ended December 31, 2022 and 11 months ended December 31, 2021, respectively.

As of December 31, 2022, the Company had net operating loss carryforwards for federal income tax purposes of \$230.9 million, of which \$189.4 million does not expire; federal research and development tax credits of \$2.3 million, which will start to expire in 2035; net operating loss carryforwards for state income tax purposes of \$168.1 million, which will start to expire in 2033; and state research and development tax credits of \$2.3 million, which do not expire.

[Table of Contents](#)

Utilization of the net operating losses and credits may be subject to substantial annual limitation due to federal and state ownership change limitations provided by the Internal Revenue Code and similar state provisions. Such annual limitations could result in the expiration of the net operating losses and credits before their utilization. The Company has not performed a Section 382 analysis to determine if an ownership change occurred and whether the use of net operating loss carryforwards and credits carryforwards will be limited to offset future taxable income. For financial statement purposes, the Company has included the federal and state net operating losses and credits in the deferred tax assets with a full valuation allowance.

The Company files U.S., various state income tax returns as well as foreign income tax returns within Australia, Canada and the United Kingdom with varying statutes of limitations. The tax years from inception in 2013 forward remain open to examination due to the carryover of unused net operating losses and tax credits.

The Company had unrecognized tax benefits of \$4.7 million as of December 31, 2022 all of which is offset by a full valuation allowance. These unrecognized tax benefits, if recognized, would not affect the effective tax rate. There were no interest or penalties accrued as of December 31, 2022.

A reconciliation of the beginning and ending amounts of unrecognized income tax benefits during the year is as follows:

Beginning balance at January 1, 2022	\$4,672
Current year increase (decrease)	—
Prior year adjustment - increase (decrease)	—
Ending balance at December 31, 2022	<u>\$4,672</u>

19. SEGMENTS

The following table presents a summary of revenue by geography for the year ended December 31, 2022, and 11 months ended 2021:

	Year Ended December 31, 2022		11 Months Ended December 31, 2021	
	Amount	%	Amount	%
United States	\$ 11,137	85.0%	\$ 5,826	71.1%
Europe	1,965	15.0%	2,370	28.9%
	<u>\$ 13,102</u>	<u>100.0%</u>	<u>\$ 8,196</u>	<u>100.0%</u>

Revenues from external customers are attributed to individual countries based on the physical location in which the services are provided or the particular customer location with whom the Company has contracted.

20. SUBSEQUENT EVENTS

In February 2023, the Company announced an updated business strategy, including revisions to the Company's technology roadmap. In connection with this updated strategy, the Company has implemented a workforce reduction in order to focus the organization and its resources on nearer-term strategic priorities.

The reduction in workforce impacted approximately 50 employees or approximately 28% of the Company's workforce. The Company began implementing activities with respect to the revised business plan, updated technology roadmap and reduction in workforce in February 2023. Affected employees were offered separation benefits, including severance payments and temporary healthcare coverage assistance. The Company currently expects to incur restructuring charges of approximately \$1.4 million for severance payments and temporary healthcare coverage to employees with respect to eliminated positions. Such restructuring charges are expected to be incurred and recorded in the first quarter of 2023.

PART II
INFORMATION NOT REQUIRED IN PROSPECTUS

Item 13. Other Expenses of Issuance and Distribution.

The following table sets forth all costs and expenses, other than underwriting discounts and commissions, payable by us in connection with the sale of the securities being registered. All amounts shown are estimates except for the Securities and Exchange Commission (the "SEC") registration fee.

	<u>Amount</u>
SEC registration fee	\$ 10,655*
FINRA fee	11,750
Accountants' fees and expenses	30,000
Legal fees and expenses	450,000
Printing fees	20,000
Miscellaneous	2,595
Total expenses	<u>\$525,000</u>

* Previously paid.

Discounts, concessions, commissions and similar selling expenses attributable to the sale of shares of common stock covered by this prospectus will be borne by B. Riley Principal Capital II, LLC ("B. Riley"). We will pay all expenses (other than discounts, concessions, commissions and similar selling expenses) relating to the registration of the shares with the SEC, as estimated in the table above.

Item 14. Indemnification of Directors and Officers.

Section 145(a) of the DGCL provides, in general, that a corporation may indemnify any person who was or is a party to or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation), because he or she is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by the person in connection with such action, suit or proceeding, if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful.

Section 145(b) of the DGCL provides, in general, that a corporation may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor because the person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees) actually and reasonably incurred by the person in connection with the defense or settlement of such action or suit if he or she acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interests of the corporation, except that no indemnification shall be made with respect to any claim, issue or matter as to which he or she shall have been adjudged to be liable to the corporation unless and only to the extent that the Court of Chancery or other adjudicating court determines that, despite the adjudication of liability but in view of all of the circumstances of the case, he or she is fairly and reasonably entitled to indemnity for such expenses that the Court of Chancery or other adjudicating court shall deem proper.

Section 145(g) of the DGCL provides, in general, that a corporation may purchase and maintain insurance on behalf of any person who is or was a director, officer, employee or agent of the corporation, or is or was

[Table of Contents](#)

serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against any liability asserted against such person and incurred by such person in any such capacity, or arising out of his or her status as such, whether or not the corporation would have the power to indemnify the person against such liability under Section 145 of the DGCL.

Additionally, our charter eliminates our directors' liability to the fullest extent permitted under the DGCL. The DGCL provides that directors of a corporation will not be personally liable for monetary damages for breach of their fiduciary duties as directors, except for liability:

- for any transaction from which the director derives an improper personal benefit;
- for any act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;
- for any unlawful payment of dividends or redemption of shares; or
- for any breach of a director's duty of loyalty to the corporation or its stockholders.

If the DGCL is amended to authorize corporate action further eliminating or limiting the personal liability of directors, then the liability of the Company's directors will be eliminated or limited to the fullest extent permitted by the DGCL, as so amended.

In addition, we have entered into separate indemnification agreements with our directors and officers. These agreements, among other things, require us to indemnify our directors and officers for certain expenses, including attorneys' fees, judgments, fines, and settlement amounts incurred by a director or officer in any action or proceeding arising out of their services as one of our directors or officers or any other company or enterprise to which the person provides services at our request.

We maintain a directors' and officers' insurance policy pursuant to which our directors and officers are insured against liability for actions taken in their capacities as directors and officers.

Item 15. Recent Sales of Unregistered Securities.

The following list sets forth information regarding all unregistered securities sold by us since inception on December 22, 2020. None of the following transactions involved any underwriters, underwriting discounts or commissions, or any public offering.

Class B Ordinary Shares

On December 22, 2020 the Company issued an aggregate of 5,750,000 Supernova Class B ordinary shares to Supernova Partners II LLC for an aggregate purchase price of \$25,000, or approximately \$0.004 per share, to cover certain offering and formation costs. On January 14, 2021, Supernova effected a share dividend resulting in there being an aggregate of 7,187,500 Class B ordinary shares outstanding, and on March 1, 2021, Supernova effected a second share dividend resulting in there being an aggregate of 8,625,000 Supernova Class B ordinary shares outstanding. Such securities were issued pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act. Supernova Sponsor is an accredited investor for purposes of Rule 501 of Regulation D under the Securities Act.

Private Placement Warrants

Supernova Partners II LLC purchased 4,450,000 private placement warrants at a price of \$2.00 per warrant in a private placement that occurred concurrently with the closing of Supernova's initial public offering and generated gross proceeds of \$8,900,000. Each private placement warrant is exercisable for one share of common stock at a price of \$11.50 per share. The private placement warrants are non-redeemable and exercisable on a

[Table of Contents](#)

cashless basis so long as they are held by Supernova Partners II LLC or its permitted transferees. The sale of the private placement warrants was made pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act.

PIPE Financing Subscription Agreements

On March 2, 2022, subscribers purchased from the Company an aggregate of 10,251,000 shares of common stock, for a purchase price of \$10.00 per share and an aggregate purchase price of \$102.51 million, pursuant to individual subscription agreements, each dated as of October 6, 2021, entered into in connection with the Business Combination. The sale of the shares of common stock to the subscribers was made pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act.

On March 2, 2022, two “accredited investors” (as such term is defined in Rule 501 of Regulation D) purchased from the Company an aggregate of 4,390,244 shares of common stock, for a purchase price of \$10.25 per share and an aggregate purchase price of \$45.0 million, pursuant to individual subscription agreements, each dated as of December 23, 2021, in connection with the Business Combination. The sale of the shares of common stock to the two subscribers was made pursuant to the exemption from registration contained in Section 506(c) of the Securities Act.

Warrant Subscription Agreement

On June 30, 2022, pursuant to the Warrant Subscription Agreement, dated as of October 6, 2021, between Rigetti Holdings, Inc. and Ampere Computing LLC (the “Warrant Subscription Agreement”), the Company issued the Ampere Warrant upon receipt of an aggregate of \$5 million (including the exercise price), and upon such payment and issuance, 500,000 shares of the Company’s common stock vested under the warrant and were immediately exercised by Ampere pursuant to the terms of the warrant. Pursuant to the Warrant Subscription Agreement, Ampere is required to pay, subject to the satisfaction of certain conditions, an additional \$4,999,950 to the Company no later than the second anniversary of the date of the Warrant Subscription Agreement, and upon such payment, the Unexercised Warrant Shares will vest and be exercisable by Ampere pursuant to the terms of the warrant. If the conditions to payment are not satisfied by the second anniversary of the date of the Warrant Subscription Agreement, the Company may reject Ampere’s payment of the additional \$4,999,950 and the Unexercised Warrant Shares will not vest or be exercisable and Ampere will have no further obligation with respect to the payment of the additional \$4,999,950. The Ampere Warrant and the 500,000 outstanding shares of common stock issued upon exercise of the Ampere Warrant were issued pursuant to the exemption from registration contained in Section 4(a)(2) of the Securities Act.

Committed Equity Facility

On August 11, 2022, the Company entered into a Common Stock Purchase Agreement (the “Committed Equity Purchase Agreement”) and a Registration Rights Agreement with B. Riley Principal Capital II, LLC (“B. Riley”). Pursuant to the Committed Equity Purchase Agreement, subject to the satisfaction of the conditions set forth therein, the Company will have the right to sell to B. Riley up to \$75,000,000 of newly issued shares (the “Committed Equity Shares”) of its common stock (subject to certain conditions and limitations contained in the Committed Equity Purchase Agreement), from time to time during the term of the Purchase Agreement. Sales of common stock pursuant to the Committed Equity Purchase Agreement, and the timing of any sales, are solely at the Company’s option, and it is under no obligation to sell any securities to B. Riley under the Committed Equity Purchase Agreement.

As consideration for B. Riley’s commitment to purchase shares of common stock at the Company’s direction upon the terms and subject to the conditions set forth in the Committed Equity Purchase Agreement, upon execution of the Committed Equity Purchase Agreement, the Company issued 171,008 shares of common stock to B. Riley (the “Commitment Shares”).

In the Committed Equity Purchase Agreement, B. Riley represented to the Company among other things, that it is an “accredited investor” (as such term is defined in Rule 501(a) of Regulation D under the Securities Act). The Committed Equity Shares and the Commitment Shares are being issued and sold by the Company to

Table of Contents

B. Riley in reliance upon the exemptions from the registration requirements of the Securities Act afforded by Section 4(a)(2) of the Securities Act and Rule 506(b) of Regulation D promulgated thereunder.

(b) Financial Statement Schedules.

Schedules not listed above have been omitted because the information required to be set forth therein is not applicable or is shown in the financial statements or notes thereto.

Item 17. Undertakings.

The undersigned registrant hereby undertakes:

- (1) to file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:
 - (i) to include any prospectus required by Section 10(a)(3) of the Securities Act of 1933, as amended (the "Securities Act;
 - (ii) to reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and
 - (iii) to include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however, that paragraphs (i), (ii) and (iii) do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Securities and Exchange Commission by the registrant pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the registration statement;

- (2) that, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof;
- (3) to remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering;
- (4) that, for the purpose of determining liability under the Securities Act to any purchaser: each prospectus filed pursuant to Rule 424(b) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A, shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided, however, that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use; and

Table of Contents

- (5) that, for the purpose of determining liability of the registrant under the Securities Act to any purchaser in the initial distribution of the securities, the undersigned registrant undertakes that in a primary offering of securities of the undersigned registrant pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned registrant will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:
- (i) any preliminary prospectus or prospectus of the undersigned registrant relating to the offering required to be filed pursuant to Rule 424;
 - (ii) any free writing prospectus relating to the offering prepared by or on behalf of the undersigned registrant or used or referred to by the undersigned registrant;
 - (iii) the portion of any other free writing prospectus relating to the offering containing material information about the undersigned registrant or its securities provided by or on behalf of the undersigned registrant; and
 - (iv) any other communication that is an offer in the offering made by the undersigned registrant to the purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the registrant has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized in the City of Berkeley, State of California, on this 5th day of April, 2023.

AMENDED AND RESTATED EXECUTIVE EMPLOYMENT AGREEMENT

This AMENDED AND RESTATED EXECUTIVE EMPLOYMENT AGREEMENT dated as of March 2, 2023 (“**Agreement**”) is by and between David Rivas (“**Executive**”) and RIGETTI COMPUTING, INC. (the “**Company**”).

WHEREAS, the Executive and the Company executed a certain Executive Employment Agreement on February 2, 2022 (the “**Prior Agreement**”) and now wish to amend and restate the Prior Agreement on the terms and conditions set forth herein;

WHEREAS, the Company desires to employ Executive as Chief Technology Officer (“**CTO**”) effective on February 9, 2023, subject to Executive’s signature below (the “**Effective Date**”) and provide Executive with certain compensation and benefits in return for Executive’s services, and Executive agrees to continue to be employed by the Company in such capacity and to receive the compensation and benefits on the terms and conditions set forth herein; and

NOW, THEREFORE, in consideration of the mutual promises and covenants contained herein, the parties agree to the following:

1. Employment by the Company.

1.1 Position. Subject to the terms set forth herein, the Company agrees to employ Executive in the position of CTO, and Executive hereby accepts such continued employment on the terms and conditions set forth in this Agreement.

1.2 Duties. As CTO, Executive will report to the Chief Executive Officer of the Company (the “**CEO**”), performing such duties as are normally associated with the position and such duties as are assigned from time to time, subject to the oversight and direction of the CEO. Executive shall make such business trips to such places as may be reasonably necessary or advisable for the efficient operations of the Company.

1.3 Company Policies and Benefits. The employment relationship between the parties shall also be subject to the Company’s personnel policies and procedures as they may be interpreted, adopted, revised or deleted from time to time in the Company’s sole discretion. Executive will be eligible to participate on the same basis as similarly situated employees in the Company’s benefit plans in effect from time to time during Executive’s employment. All matters of eligibility for coverage or benefits under any benefit plan shall be determined in accordance with the provisions of such plan. The Company reserves the right to change, alter, or terminate any benefit plan in its sole discretion. Notwithstanding the foregoing, in the event that the terms of this Agreement differ from or are in conflict with the Company’s general employment policies or practices, this Agreement shall control.

1.4 Vacation. While this Agreement is in effect, Executive shall also receive unlimited paid time off subject to the Company’s vacation policies and procedures as in effect or amended from time to time.

1.5 Indemnification. Subject to applicable law, Executive will be provided indemnification to the maximum extent permitted by the Company's Certificate of Incorporation or Bylaws, all as amended, including, if applicable, any directors and officers insurance policies, with such indemnification to be on terms determined by the Board or any of its committees. Such indemnification shall be documented in an Indemnification Agreement provided after the Closing Date subject to approval by the Board.

2. Compensation.

2.1 Salary. Executive shall receive for Executive's services to be rendered under this Agreement an initial base salary of \$345,000 on an annualized basis, subject to review and adjustment by the Company in its sole discretion, payable subject to standard federal and state payroll withholding requirements in accordance with the Company's standard payroll practices ("**Base Salary**").

2.2 Annual Bonus. While this Agreement is in effect, Executive shall be eligible for a discretionary annual cash bonus of a target amount equal to 25% of Base Salary ("**Target Amount**"), subject to review and adjustment by the Company in its reasonable discretion, payable subject to standard federal and state payroll withholding requirements. Whether or not Executive earns any bonus will be dependent upon (a) Executive's continuous performance of services to the Company through the last date of the applicable performance period, unless otherwise provided for in this Agreement; and (b) the actual achievement by Executive and the Company of the applicable performance targets and goals set by the Board or its Compensation Committee. The annual period over which performance is measured for purposes of this bonus is January 1 through December 31. The Board or its Compensation Committee will determine in its reasonable discretion the extent to which Executive and the Company have achieved the performance goals upon which the bonus is based and the amount of the bonus, which could be above or below the Target Amount (and may be zero). The bonus, if awarded, will be paid no later than March 15 of the calendar year immediately following the calendar year for which the bonus is being measured.

2.3 Equity.

(a) Subject to the approval of the Board or the Compensation Committee, as soon as practicable following the commencement of the Executive's employment with the Company, the Company will grant Executive performance stock units for 600,000 shares of common stock in the Company (the "**Performance Stock**"). The anticipated Performance Stock will be governed by the terms and conditions of the Plan and a written award agreement between the Company and Executive, which will govern and control the Performance Stock in all respects, and will include the vesting terms and conditions set forth in Schedule 1 hereto.

(b) Executive is also eligible to receive additional restricted stock units to acquire shares of Company common stock (the "**PSU Awards**"), if certain performance-based milestones established by the Company are satisfied in the future and provided that Executive has remained continuously employed by the Company through the date that the Board or the Compensation Committee grants such PSU Awards. The PSU Awards, if granted, will be issued subject to the terms and conditions of the Plan and a restricted stock unit award agreement in a form satisfactory to the Company and shall vest in accordance with the terms therein.

(c) Executive will also be eligible to receive awards of stock options, restricted stock, restricted stock units or other equity awards pursuant to any plans or arrangements the Company may have in effect from time to time. The Board or a committee of the Board shall determine in its discretion whether Executive shall be granted any such equity awards and the terms of any such award in accordance with the terms of any applicable plan or arrangement that may be in effect from time to time.

2.4 Expense Reimbursement. The Company will reimburse Executive for reasonable business expenses in accordance with the Company's standard expense reimbursement policy, as the same may be modified by the Company from time to time. For the avoidance of doubt, to the extent that any reimbursements payable to Executive are subject to the provisions of Section 409A of the Code: (a) any such reimbursements will be paid no later than December 31 of the year following the year in which the expense was incurred, (b) the amount of expenses reimbursed in one year will not affect the amount eligible for reimbursement in any subsequent year, and (c) the right to reimbursement under this Agreement will not be subject to liquidation or exchange for another benefit.

3. Confidential Information and Invention Assignment Obligations. As a condition of continued employment, Executive agrees to execute and abide by a Confidential Information and Invention Assignment Agreement attached as Exhibit A ("**Proprietary Information Agreement**"), which may be amended by the parties from time to time without regard to this Agreement. The Proprietary Information Agreement contains provisions that are intended by the parties to survive and do survive termination of this Agreement.

4. Outside Activities during Employment. During the term of Executive's employment with the Company, Executive will work on a full-time basis for the Company and will devote Executive's best efforts and substantially all of Executive's business time and attention to the business of the Company. Except with the prior written consent of the Board, including consent given to Executive prior to the signing of this Agreement, Executive will not, while employed by the Company, undertake or engage in any other employment, occupation or business enterprise that would interfere with Executive's responsibilities and the performance of Executive's duties hereunder except for (i) reasonable time devoted to volunteer services for or on behalf of such religious, educational, non-profit and/or other charitable organization as Executive may wish to serve, (ii) reasonable time devoted to activities in the non-profit and business communities consistent with Executive's duties; and (iii) such other activities as may be specifically approved by the Board, and such approval shall not be unreasonably withheld. This restriction shall not, however, preclude Executive (x) from owning less than one percent (1%) of the total outstanding shares of a publicly traded company, or (y) from employment or service in any capacity with Affiliates of the Company. As used in this Agreement, "**Affiliates**" means an entity under common management or control with the Company.

5. No Conflict with Existing Obligations. Executive represents that Executive's performance of all the terms of this Agreement does not and will not breach any agreement or obligation of any kind made prior to Executive's employment by the Company, including agreements or obligations Executive may have with prior employers or entities for which Executive has provided services. Executive has not entered into, and Executive agrees that Executive will not enter into, any agreement or obligation, either written or oral, in conflict herewith.

6. Termination of Employment. The parties acknowledge that Executive's employment relationship with the Company is at-will, meaning either the Company or Executive may terminate Executive's employment at any time, with or without cause or advance notice. The provisions in this Section govern the amount of compensation, if any, to be provided to Executive upon termination of employment and do not alter Executive's at-will status.

6.1 Termination by the Company without Cause or for Good Reason.

(a) The Company shall have the right to terminate Executive's employment with the Company pursuant to this **Section 6.1** at any time, in accordance with **Section 6.6**, without "Cause" (as defined in **Section 6.3(b)** below) by giving notice as described in **Section 7.1** of this Agreement. A termination pursuant to **Section 6.5** below is not a termination without "Cause" for purposes of receiving the benefits described in **Sections 6.1** or **Section 6.2**.

(b) If the Company terminates Executive's employment at any time without Cause or Executive terminates employment with the Company for Good Reason and *provided* that such termination constitutes a "separation from service" (as defined under Treasury Regulation Section 1.409A-1(h), without regard to any alternative definition thereunder, a "**Separation from Service**"), then Executive shall be entitled to receive the Accrued Obligations (defined below). If Executive complies with the obligations in **Section 6.1(c)** below, Executive shall also be eligible to receive the following "**Severance Benefits**":

(i) The Company will pay Executive an amount equal to Executive's then current Base Salary for twelve (12) months, less all applicable withholdings and deductions, paid in equal installments on the Company's normal payroll schedule following the termination date, with the first payment beginning on the Severance Pay Commencement Date (as defined in **Section 6.1(c)** below), and the remaining installments occurring on the Company's regularly scheduled payroll dates thereafter; *provided* that on the Severance Pay Commencement Date, the Company will pay in a lump sum the aggregate amount of the cash severance payments that the Company would have paid Executive through such date had the payments commenced on the effective date of termination through the Severance Pay Commencement Date.

(ii) If Executive timely elects continued coverage under COBRA for Executive and Executive's covered dependents under the Company's group health plans following such termination, then the Company shall pay the COBRA premiums necessary to continue Executive's and Executive's covered dependents' health insurance coverage in effect for Executive (and Executive's covered dependents) on the termination date until the earliest of: (i) twelve (12) months following the termination date (the "**COBRA Severance Period**"); (ii) the date when Executive becomes eligible for substantially equivalent health insurance coverage in connection with new employment or self-employment; or (iii) the date Executive ceases to be eligible for COBRA continuation coverage for any reason, including plan termination (such period from the termination date through the earlier of (i)-(iii), (the "**COBRA Payment Period**").

Notwithstanding the foregoing, if at any time the Company determines that its payment of COBRA premiums on Executive's behalf would result in a violation of applicable law (including, but not limited to, the 2010 Patient Protection and Affordable Care Act, as amended by the 2010 Health Care and Education Reconciliation Act), then in lieu of paying COBRA premiums pursuant to this Section, the Company shall pay Executive on the last day of each remaining month of the COBRA Payment Period, a fully taxable cash payment equal to the COBRA premium for such month, subject to applicable tax withholding (such amount, the "**Special Severance Payment**"), for the remainder of the COBRA Payment Period. Nothing in this Agreement shall deprive Executive of Executive's rights under COBRA or ERISA for benefits under plans and policies arising under Executive's employment by the Company.

(c) Executive will be paid all of the Accrued Obligations on the Company's first payroll date after Executive's date of termination from employment or earlier if required by law. Executive shall receive the Severance Benefits pursuant to **Section 6.1(b)** or the Change in Control Severance Benefits (defined below) pursuant to **6.2(a)** of this Agreement, as applicable, if: (i) Executive executes and does not revoke a separation agreement containing an effective, general release of claims in favor of the Company and its affiliates and representatives but no other post-employment obligations other than an obligation to continue to abide and be bound by any post-employment obligations set forth in agreements previously entered into with the Company or its affiliates, such as this Agreement or any proprietary rights agreement), in a form acceptable to the Company (the "**Release**") and the Release is enforceable and effective as provided in the Release on or before the date that is the sixtieth (60th) day following the effective date of termination (such 60th day, the "**Severance Pay Commencement Date**"); (ii) if Executive holds any other positions with the Company, Executive resigns such position(s) to be effective no later than the date of Executive's termination date (or such other date as requested by the Board); (iii) Executive returns all Company property on or before the Severance Pay Commencement Date; (iv) Executive complies with Executive's post-termination obligations under this Agreement and the Proprietary Information Agreement; and (v) Executive complies with the terms of the Release.

(d) For purposes of this Agreement, "**Accrued Obligations**" are (i) Executive's accrued but unpaid salary through the date of termination, (ii) any unreimbursed business expenses incurred by Executive payable in accordance with the Company's standard expense reimbursement policies, and (iii) benefits owed to Executive under any qualified retirement plan or health and welfare benefit plan in which Executive was a participant in accordance with applicable law and the provisions of such plan.

(e) The Severance Benefits provided to Executive pursuant to this **Section 6.1** are in lieu of, and not in addition to, any benefits to which Executive may otherwise be entitled under any Company severance plan, policy or program.

(f) For purposes of this Agreement, "**Good Reason**" shall mean the occurrence of any of the following events without Executive's consent: (i) a material reduction in Executive's Base Salary, other than a reduction applied in a similar proportional amount to all similarly situated executives; (ii) a material breach of this Agreement by the Company; (iii) a material reduction in the Executive's duties, authority and responsibilities relative to the Executive's duties, authority, and responsibilities in effect immediately prior to such reduction; or (iv) the relocation of Executive's principal place of employment, without Executive's consent, in

a manner that lengthens Executive's one-way commute distance by twenty-five (25) or more miles from Executive's then-current principal place of employment immediately prior to such relocation; not to include a requirement to return to in-person work as set forth in **Section 1.3**, in which circumstance Good Reason will not apply; *provided, however*, that, any such termination by Executive shall only be deemed for Good Reason pursuant to this definition if: (1) Executive gives the Company written notice of Executive's intent to terminate for Good Reason within thirty (30) days following the first occurrence of the condition(s) that Executive believes constitute(s) Good Reason, which notice shall describe such condition(s); (2) the Company fails to remedy such condition(s) within thirty (30) days following receipt of the written notice (the "**Cure Period**"); and (3) Executive voluntarily terminates employment within thirty (30) days following the end of the Cure Period, or the parties agree in writing to extend such Cure Period.

6.2 Termination by the Company without Cause or for Good Reason Coincident with a Change in Control. If Executive's employment by the Company is terminated by the Company or any successor entity without "Cause" (and not due to Disability or death) or by Executive for Good Reason, in either case, within three (3) months prior to or within twelve (12) months following the effective date of a "**Change in Control**" (as defined in the Plan), and, in either case, provided that such termination constitutes a Separation from Service, without regard to any alternative definition thereunder, then in addition to paying or providing Executive with the Accrued Obligations, and subject to compliance with **Section 6.1(c)**, the following additional benefits shall be provided in lieu of, and not in addition to, the Severance Benefits provided for in **Section 6.1(b)** (the "**Change in Control Severance Benefits**"):

(a) The Company will pay Executive a lump sum equal to Executive's then current annual Base Salary, less all applicable withholdings and deductions, paid on the Severance Pay Commencement Date.

(b) If Executive timely elects continued coverage under COBRA for Executive and Executive's covered dependents under the Company's group health plans following such termination, then the Company shall pay the COBRA premiums necessary to continue Executive's and Executive's covered dependents' health insurance coverage in effect for Executive (and Executive's covered dependents) on the termination date during the COBRA Payment Period. Notwithstanding the foregoing, if at any time the Company determines that its payment of COBRA premiums on Executive's behalf would result in a violation of applicable law (including, but not limited to, the 2010 Patient Protection and Affordable Care Act, as amended by the 2010 Health Care and Education Reconciliation Act), then in lieu of paying COBRA premiums pursuant to this Section, the Company shall pay Executive on the last day of each remaining month of the COBRA Payment Period, the Special Severance Payment, for the remainder of the COBRA Payment Period. Nothing in this Agreement shall deprive Executive of Executive's rights under COBRA or ERISA for benefits under plans and policies arising under Executive's employment by the Company.

(c) The Company will pay a bonus equivalent to a pro rata share of Executive's full Target Amount, for the portion of the performance year completed when Executive's termination occurs. This bonus will be payable subject to standard federal and state payroll withholding requirements in a lump sum payment on the Severance Pay Commencement Date.

(d) Notwithstanding the terms of any equity plan or award agreement to the contrary, the time-based vesting conditions applicable to 100% of Executive's then outstanding stock options and/or other equity awards subject to time-based vesting requirements as of Executive's termination date shall be accelerated as of the date of termination, and, with respect to any performance-based equity awards, and unless otherwise provided by the applicable award agreement, any performance-based vesting objectives will be deemed achieved at the higher of target or actual performance.

6.3 Termination by the Company for Cause.

(a) The Company shall have the right to terminate Executive's employment with the Company at any time, in accordance with **Section 6.6**, for Cause by giving notice as described in **Section 7.1** of this Agreement. In the event Executive's employment is terminated at any time for Cause, Executive will not receive Severance Benefits, Change in Control Severance Benefits, or any other severance compensation or benefits, except that, pursuant to the Company's standard payroll policies, the Company shall pay to Executive the Accrued Obligations.

(b) "**Cause**" for termination shall mean that the Company has determined in its sole discretion that Executive has engaged in any of the following: (i) Executive's material breach of any covenant or condition under this Agreement or any other agreement between the parties; (ii) Executive's material act constituting dishonesty or fraudulent conduct in connection with Executive's duties to the Company; (iii) any conduct which constitutes a felony or a crime of moral turpitude under applicable law; (iv) material violation of any Company policy; (v) refusal to follow or implement a clear and reasonable directive of Company, or any act of willful or intentional misconduct in relation to the Executive's duties to the Company; (vi) repeated or willful failure by Executive to perform Executive's duties in a manner satisfactory to the Company; or (vii) Executive's breach of fiduciary duty to the Company; *provided that Sections 6.3(b)(i), (iv) and (vi) shall only provide the basis for a Cause termination if the Executive has not cured such breach, violation or conduct, to the extent curable, after the expiration of ten (10) days following the Company providing Executive with written notice of such basis for Cause.*

6.4 Resignation by Executive.

(a) Executive may resign from Executive's employment with the Company at any time, in accordance with **Section 6.6**, by giving notice as described in **Section 7.1**.

(b) In the event Executive resigns from Executive's employment with the Company for any reason other than Good Reason in accordance with **Sections 6.1 or 6.2**, Executive will not receive Severance Benefits, Change in Control Severance Benefits, or any other severance compensation or benefits, except that, pursuant to the Company's standard payroll policies, the Company shall pay to Executive the Accrued Obligations.

6.5 Termination by Virtue of Death or Disability of Executive.

(a) In the event of Executive's death while employed pursuant to this Agreement, all obligations of the parties hereunder shall terminate, in accordance with **Section 6.6**, and the Company shall, pursuant to the Company's standard payroll policies, pay to Executive's legal representatives all Accrued Obligations.

(b) Subject to applicable state and federal law, the Company shall at all times have the right, upon written notice to Executive, and in accordance with **Section 6.6**, to terminate Executive's employment based on Executive's Disability. Termination by the Company of Executive's employment based on "**Disability**" shall mean termination because Executive is unable due to a physical or mental condition to perform the essential functions of Executive's position with or without reasonable accommodation for 180 days in the aggregate during any twelve (12) month period or based on the written certification by two licensed physicians of the likely continuation of such condition for such period. This definition shall be interpreted and applied consistent with the Americans with Disabilities Act, the Family and Medical Leave Act, and other applicable federal, state or local law. In the event Executive's employment is terminated by the Company based on Executive's Disability or Executive voluntarily resigns due to such Disability, Executive will not receive Severance Benefits, Change in Control Severance Benefits, or any other severance compensation or benefit, except that, pursuant to the Company's standard payroll policies, the Company shall pay to Executive the Accrued Obligations.

6.6 Notice; Effective Date of Termination.

(a) Termination of Executive's employment pursuant to this Agreement shall be effective on the earliest of:

(i) immediately after the Company gives notice to Executive of Executive's termination, with or without Cause, unless pursuant to **Section 6.3(b)(i)**, if curable, or **Section 6.3(b)(vi)**, in which case ten (10) days after notice if not cured or unless the Company specifies a later date, in which case, termination shall be effective as of such later date;

(ii) immediately upon the Executive's death;

(iii) ten (10) days after the Company gives notice to Executive of Executive's termination on account of Executive's Disability, unless the Company specifies a later date, in which case, termination shall be effective as of such later date, *provided* that Executive has not returned to the full-time performance of Executive's duties prior to such date;

(iv) ten (10) days after the Executive gives written notice to the Company of Executive's resignation, *provided* that the Company may set a termination date at any time between the date of notice and the date of resignation, in which case the Executive's resignation shall be effective as of such other date. Executive will receive compensation through any required notice period; or

(v) for a termination for Good Reason, immediately upon Executive's full satisfaction of the requirements of **Section 6.1(f)**.

(b) In the event of a termination for Cause, written confirmation shall specify the subsection(s) of the definition of Cause relied on to support the decision to terminate.

6.7 Cooperation with Company after Termination of Employment. Following termination of Executive's employment for any reason, Executive agrees to provide reasonable cooperation to the Company in connection with its actual or contemplated defense, prosecution, or investigation of any claims or demands by or against third parties, or other matters arising from events, acts, or failures to act that occurred during the period of Executive's employment by the Company. Such cooperation includes, without limitation, making Executive available to the Company upon reasonable notice, without subpoena, to provide complete, truthful and accurate information in witness interviews, depositions and trial testimony. The Company will reimburse Executive for reasonable out-of-pocket expenses Executive incurs in connection with any such cooperation (excluding forgone wages, salary, or other compensation) and will make reasonable efforts to accommodate Executive's scheduling needs and for more than de minimis service, the parties will agree on a mutually agreeable per diem rate. In addition, in the event Executive is receiving Severance Benefits or Change in Control Severance Benefits, for twelve (12) months after Executive's employment with the Company ends for any reason, Executive agrees to reasonably cooperate with the Company in all matters relating to the transition of Executive's work and responsibilities on behalf of the Company, including, but not limited to, any present, prior or subsequent relationships and the orderly transfer of any such work and institutional knowledge to such other persons as may be designated by the Company. Such transition assistance described in the previous sentence shall not be subject to additional compensation, and the Company will make reasonable efforts to accommodate Executive's scheduling needs.

6.8 Application of Section 409A. It is intended that all of the severance payments payable under this Agreement satisfy, to the greatest extent possible, the exemptions from the application of Section 409A of the Code and the regulations and other guidance thereunder and any state law of similar effect (collectively, "**Section 409A**") provided under Treasury Regulations Sections 1.409A-1(b)(4) and 1.409A-1(b)(9), and this Agreement will be construed in a manner that complies with Section 409A. If not so exempt, this Agreement (and any definitions hereunder) will be construed in a manner that complies with Section 409A, and incorporates by reference all required definitions and payment terms. No severance payments will be made under this Agreement unless Executive's termination of employment constitutes a "separation from service" (as defined under Treasury Regulation Section 1.409A-1(h)). For purposes of Section 409A (including, without limitation, for purposes of Treasury Regulations Section 1.409A-2(b)(2)(iii)), Executive's right to receive any installment payments under this Agreement (whether severance payments or otherwise) shall be treated as a right to receive a series of separate payments and, accordingly, each installment payment hereunder shall at all times be considered a separate and distinct payment. If the Company determines that the severance benefits provided under this Agreement constitutes "deferred compensation" under Section 409A and if Executive is a "specified employee" of the Company, as such term is defined in Section 409A(a)(2)(B)(i) of the Code at the time of Executive's Separation from Service, then, solely to the extent necessary to avoid the incurrence of the adverse personal tax consequences under Section 409A, the timing of the Severance will be delayed as follows: on the earlier to occur of (a) the date that is six months and one day after Executive's Separation from Service, and (b) the date of Executive's death (such earlier date, the "**Delayed Initial Payment Date**"), the Company will (i) pay to Executive a lump sum amount equal to the sum of the severance benefits that Executive would otherwise have received through the Delayed Initial Payment Date if the commencement of the payment of the severance benefits had not been delayed pursuant to this Section 6.8 and

(ii) commence paying the balance of the severance benefits in accordance with the applicable payment schedule set forth in Section 6. No interest shall be due on any amounts deferred pursuant to this Section 6.8. To the extent that any Severance Benefits are deferred compensation under Section 409A of the Code, and are not otherwise exempt from the application of Section 409A, then, if the period during which Executive may consider and sign the Release spans two calendar years, the payment of any such Severance Benefit will not be made or begin until the later calendar year.

6.9 Section 280G. Notwithstanding any other provision of this Agreement to the contrary, if payments made or benefits provided pursuant to this Agreement or otherwise from the Company or any person or entity are considered “parachute payments” under Section 280G of the Code after the application of all exemptions available under Code Section 280G(b)(5)(A), then such parachute payments will be limited to the greatest amount that may be paid to Executive under Section 280G of the Code without causing any loss of deduction to the Company Group under such section, but only if, by reason of such reduction, the net after tax benefit to Executive will exceed the net after tax benefit if such reduction were not made. “**Net after tax benefit**” for purposes of this Agreement will mean the sum of (i) the total amounts payable to the Executive under this Agreement, plus (ii) all other payments and benefits which the Executive receives or then is entitled to receive from the Company or otherwise that would constitute a “parachute payment” within the meaning of Section 280G of the Code, less (iii) the amount of federal, state and local taxes payable with respect to the foregoing calculated at the maximum marginal income tax rate for each year in which the foregoing will be paid to Executive (based upon the rate in effect for such year as set forth in the Code at the time of termination of Executive’s employment), less (iv) the amount of excise taxes imposed with respect to the payments and benefits described in (i) and (ii) above by Section 4999 of the Code. The determination as to whether and to what extent payments are required to be reduced in accordance with this Section 6.9 will be made at the Company’s expense by a nationally recognized certified public accounting firm or other professional services firm, in either case, as may be designated by the Company prior to a change in control (the “**Firm**”). In the event of any mistaken underpayment or overpayment under this Agreement, as determined by the Firm, the amount of such underpayment or overpayment will forthwith be paid to Executive or refunded to the Company, as the case may be, with interest at one hundred twenty (120%) of the applicable Federal rate provided for in Section 7872(f)(2) of the Code. Any reduction in payments required by this Section 6.9 will occur in the following order: (1) any cash severance, (2) cancellation of equity awards being taken into account at full value that were granted “contingent on a change in ownership or control” within the meaning of 280G of the Code in the reverse order of date of grant of the awards (that is, the most recently granted equity awards will be cancelled first); (3) any other cash amount payable to Executive, (4) any benefit valued as a “parachute payment,” (5) the acceleration of vesting of any equity awards that are options, and (6) the acceleration of vesting of any other equity awards. Within any such category of payments and benefits, a reduction will occur first with respect to amounts that are not “deferred compensation” within the meaning of Section 409A and then with respect to amounts that are. In the event that acceleration of compensation from equity awards is to be reduced, such acceleration of vesting will be canceled, subject to the immediately preceding sentence, in the reverse order of the date of grant.

7. General Provisions.

7.1 Notices. Any notices hereunder must be in writing and shall be deemed effectively given: (a) upon personal delivery to the party to be notified, (b) when sent by electronic mail if sent during normal business hours of the recipient, and if not, then on the next business day, (c) five (5) days after having been sent by registered or certified mail, return receipt requested, postage prepaid, or (d) one (1) business day after timely deposit for next-business-day delivery with a nationally recognized overnight courier, specifying next-business-day delivery, with written verification of receipt. All communications shall be sent to the Company at its primary office location, or to legal@rigetti.com, and to Executive at either Executive's address as listed on the Company payroll records, or Executive's Company-issued email address, or at such other address as the Company or Executive may designate by ten (10) days advance written notice to the other.

7.2 Severability. Whenever possible, each provision of this Agreement will be interpreted in such manner as to be effective and valid under applicable law, but if any provision of this Agreement is held to be invalid, illegal or unenforceable in any respect under any applicable law or rule in any jurisdiction, such invalidity, illegality or unenforceability will not affect any other provision or any other jurisdiction, but this Agreement will be reformed, construed and enforced in such jurisdiction as if such invalid, illegal or unenforceable provisions had never been contained herein.

7.3 Survival. Provisions of this Agreement which by their terms must survive the termination of this Agreement in order to effectuate the intent of the parties will survive any such termination for such period as may be appropriate under the circumstances.

7.4 Waiver. If either party should waive any breach of any provisions of this Agreement, it shall not thereby be deemed to have waived any preceding or succeeding breach of the same or any other provision of this Agreement.

7.5 Complete Agreement. This Agreement constitutes the entire agreement between Executive and the Company with regard to the subject matter hereof. This Agreement is the complete, final, and exclusive embodiment of their agreement with regard to this subject matter and supersedes any prior oral discussions or written communications and agreements, including the Prior Agreement. This Agreement is entered into without reliance on any promise or representation other than those expressly contained herein, and it cannot be modified or amended except in writing signed by Executive and an authorized officer of the Company. The parties have entered into a separate Proprietary Information Agreement and have or may enter into separate agreements related to equity. These separate agreements govern other aspects of the relationship between the parties, have or may have provisions that survive termination of Executive's employment under this Agreement, may be amended or superseded by the parties without regard to this Agreement and are enforceable according to their terms without regard to the enforcement provision of this Agreement.

7.6 Counterparts. This Agreement may be executed in separate counterparts, any one of which need not contain signatures of more than one party, but all of which taken together will constitute one and the same Agreement. The parties agree that facsimile and scanned image copies of signatures, including DocuSign, will suffice as original signatures.

7.7 Withholding Taxes. The Company will be entitled to withhold from any payment due to Executive hereunder any amounts required to be withheld by applicable tax laws or regulations.

7.8 Headings. The headings of the sections hereof are inserted for convenience only and shall not be deemed to constitute a part hereof nor to affect the meaning thereof.

7.9 Successors and Assigns. The Company shall assign this Agreement and its rights and obligations hereunder in whole, but not in part, to any Company or other entity with or into which the Company may hereafter merge or consolidate or to which the Company may transfer all or substantially all of its assets, if in any such case said Company or other entity shall by operation of law or expressly in writing assume all obligations of the Company hereunder as fully as if it had been originally made a party hereto, but may not otherwise assign this Agreement or its rights and obligations hereunder. Executive may not assign or transfer this Agreement or any rights or obligations hereunder, other than to Executive's estate upon Executive's death.

7.10 Choice of Law. All questions concerning the construction, validity and interpretation of this Agreement will be governed by the laws of the State of California.

7.11 Dispute Resolution. The parties recognize that litigation in federal or state courts or before federal or state administrative agencies of disputes arising out of the Executive's employment with the Company or out of this Agreement, or the Executive's termination of employment or termination of this Agreement, may not be in the best interests of either the Executive or the Company, and may result in unnecessary costs, delays, complexities, and uncertainty. Except where prohibited by law, the parties agree that any dispute between the parties arising out of or relating to the negotiation, execution, performance or termination of this Agreement or the Executive's employment, including, but not limited to, any claim arising out of this Agreement, claims under Title VII of the Civil Rights Act of 1964, as amended, the Civil Rights Act of 1991, the Age Discrimination in Employment Act of 1967, the Americans with Disabilities Act of 1990, Section 1981 of the Civil Rights Act of 1966, as amended, the Family Medical Leave Act, the Executive Retirement Income Security Act, and any similar federal, state or local law, statute, regulation, or any common law doctrine, whether that dispute arises during or after employment, shall be settled by binding arbitration in accordance with the National Rules for the Resolution of Employment Disputes of the American Arbitration Association. The location for the arbitration shall be in Alameda County, California. Any award made by such panel shall be final, binding and conclusive on the parties for all purposes, and judgment upon the award rendered by the arbitrators may be entered in any court having jurisdiction thereof. The arbitrators' fees and expenses and all administrative fees and expenses associated with the filing of the arbitration shall be borne by the Company; *provided however*, that at the Executive's option, Executive may voluntarily pay up to one-half the costs and fees. The parties acknowledge and agree that their obligations to arbitrate under this Section survive the termination of this Agreement and continue after the termination of the employment relationship between Executive and the Company. The parties each further agree that the arbitration provisions of this Agreement shall provide each party with its **exclusive remedy**, and each party expressly waives any right it might have to seek redress in any other forum, except as otherwise expressly provided in this Agreement. By election arbitration as the means for final settlement of all claims, **the parties hereby waive their respective rights to, and agree not to, sue each other in any action in a Federal, State or**

local court with respect to such claims, but may seek to enforce in court an arbitration award rendered pursuant to this Agreement. The parties specifically agree to waive their respective rights to a trial by jury, and further agree that no demand, request or motion will be made for trial by jury.

[SIGNATURES TO FOLLOW ON NEXT PAGE]

IN WITNESS WHEREOF, the parties have duly executed this Agreement as of the date first above written.

[SIGNATURE PAGE TO AMENDED AND RESTATED EXECUTIVE EMPLOYMENT AGREEMENT]

Schedule 1

Performance Stock

The Performance Stock will be subject to a time-based vesting requirement (the “**Time-Based Vesting Requirement**”) and a performance-based vesting requirement (the “**Performance-Based Vesting Requirement**”) as set forth on this Schedule 1. To the extent that the Performance-Based Vesting Requirement is satisfied prior to the termination of Executive’s Continuous Service, the Performance Stock will vest without regard to the Time-Based Vesting Requirement. However, the Performance Stock will not vest unless and until the Performance-Based Vesting Requirement has been satisfied, even if the Time-Based Vesting Requirement has been satisfied.

Time-Based Vesting Requirement: The Time-Based Vesting Requirement will be satisfied as follows 1/48th of the total shares subject to the Performance Stock will satisfy the Time-Based Vesting Requirement each month on the same day of the month as the vesting commencement date (or if there is no corresponding day, on the last day of the month), in each case, subject to Executive’s Continuous Service through each such date.

Performance-Based Vesting Requirement: The Performance-Based Vesting Requirement will be satisfied with respect to the corresponding number of shares indicated in the chart below to the extent that, during the five-year period beginning on the Effective Date and ending on the fifth (5th) anniversary thereof, the closing price per share of the Company’s common stock for any twenty (20) trading days during any consecutive thirty (30) trading day period equals or exceeds a price set forth in the chart below, subject to the certification of such achievement by the Compensation Committee. Any portion of the Performance Stock that has not satisfied the Performance-Based Vesting Requirement on or prior to the fifth (5th) anniversary of the Effective Date will be forfeited without consideration.

Closing Price	Shares to Vest
\$2.00 or higher	300,000
\$4.00 or higher	300,000

Termination of Employment: Upon a termination of the Executive’s Continuous Service for any reason, any portion of the Performance Stock that has satisfied the Time-Based Vesting Requirement on or prior to the date of such termination (including due to any applicable acceleration in connection with such termination in accordance with the Agreement) shall remain outstanding and eligible to vest, to the extent not already vested, based on the satisfaction of the Performance-Based Vesting Requirement. Notwithstanding the foregoing, upon a termination of the Executive’s Continuous Service for Cause, the Performance Stock, whether or not vested, will immediately be forfeited without consideration.
